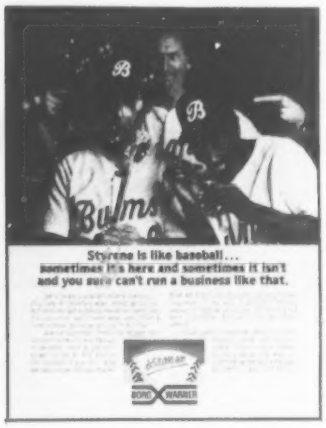
Fahlgren & Ferriss

Any creative philosophy behind advertising like ours is simple; treat the trade journal reader just like a consumer. He's the same person. The same guy who watches television and reads *Sports Illustrated* is a design engineer during the day. Nothing changes. No need to switch to boring ads about equipment or plants. As David Ogilvy once said, "the only time you show a picture of your plant is when you want to sell it."



la Renta division of Kayser-Roth, Jordache division of Top Form Mills. Lost: Leadership Networks, WPIX-FM, Jordache division of Top Form Mills. The Bloom Cos.

Defining the product in terms of the consumer's needs and desires—trying to capture their state of mind, is one of the philosophies of Bloom and is reflected in its advertising for Braniff's Texas Class, which carries the "perceived need" of better travel for lower fares; and for Zales, which carries the "perceived need" of eliminating anxiety and confusion in buying a diamond.

Mike Sloan Inc.

We apply three simple standards to our ads. Does it break through? Does it ring true? Will someone out there like you? In other words, we think of each ad or commercial as a human being—does it have a unique personality you want to listen to or is it just bland, is it credible or just more of the same platitudes, it is likeable? As a result, a strong sense of humanity runs through most of our work. They get attention, they get belief and they make people like to do business with our clients.

Goodwin, Dannenbaum Littman & Wingfield

We have specialized in retail advertising for the past 37 years. We have written 10 Commandments to go by, including No. 7: Sell the difference to make the difference (even though the merchandise may not be exclusive) —*i.e.*, reflect the personality of the advertiser to sell the where as well as the what and why to buy. Commandment No. 2: Ads must speak to individuals yet reach mass audiences, reflected in the agency's campaign for Palais Royal, a 21-store chain of fashion specialty stores.

It could best be characterized as a "strategy" oriented advertising agency—that is to say, as much emphasis is given to marketing strategy and to creative strategy as to the creative executional aspects of those strategies. Creatively speaking the discipline of strategic thinking is then balanced by the use of multiple creative teams to explore the optimum translation(s) of the agreed upon strategy.

The Marcus Group, Atlanta, reported gross income of $464,100 and net income of $26,320 in 1981 on billings of $2,847,550. Falling 'Star' bad sign for newspapers

By ROBERT REED

The all-day *Minneapolis Star and Tribune*, spawned by the demise of the afternoon *Minneapolis Star*, debuts next week, accompanied by speculation that Cleveland and Kansas City are next in line to suffer newspaper casualties.

The Minneapolis Star & Tribune Co. said it was combining the morning *Tribune* and the *Star* into a single paper because of the afternoon paper's continuing drops in circulation and advertising. The 24-hour *Star and Tribune*, now the city's only newspaper, will run a morning and two afternoon editions. The afternoon papers will be sold exclusively at newsstands.

Unions make their bid to keep *New York Daily News* from the newspaper graveyard. . .Story on Page 3.

Meanwhile, in Cleveland, rumors are swirling that the *Cleveland Press*, fighting for its survival against the Newhouse-owned *Plain Dealer*, is considering shutting down, even though it recently initiated a morning edition in an effort to boost circulation.

Press execs deny the paper will fold and claim that *Plain Dealer*

Swimming into the cola war

As mother and father teach their son to swim, an announcer notes that while kids "need a lot of love and a little encouragement," there's one thing they don't need: Caffeine. That's the reason for the introduction of Seven-Up Co.'s Like, which offers "full, rich cola taste" without added caffeine (*see story, Page 2*).

NFL tv pact, strike threats worry adfolk

By JAMES P. FORKAN

New York—Tv networks and sponsors, already finding trouble swallowing a new $2 billion pact with the National Football League, now face a stronger strike threat from the players.

Players' spokesman Ed Garvey last week put the chance of a strike at 50-50, citing the owners' position against players getting 55% of NFL grosses.

The rights fees—roughly triple the previous pact—stirred sponsor unrest, and the added minute of commercial time per game (to a total of 24 minutes) risks viewer annoyance.

■ In summarizing the typical negotiations between NFL commissioner Pete Rozelle and the network sports chiefs, a CBS source somewhat facetiously said, "Rozelle tells us what he wants and we pay it, and we all make money." The third part of

Needham balancing act wins Sears

Chicago—Needham, Harper & Steers won the $30,000,000-plus Sears, Roebuck & Co. apparel business last Wednesday because of a combination of "balanced resources and chemistry," according to Joel Hochberg, senior vp-director of creative services. But the next day agency staffers were told Needham was losing Wm. Wrigley Jr. Co.'s Spearmint gum, a brand that gets about $9,000,000 in media advertising, to BBDO, which won in a creative dual.

The nation's No. 1 retailer selected Needham over Leo Burnett USA, Tatham-Laird & Kudner and N W Ayer for an assignment including all national advertising for the newly consolidated apparel group. Needham had pursued Sears on many occasions over the years, but this is the first time NH&S has appeared on its roster.

Sears management has been centralizing the merchandise group's administrative and retailing functions. The agency selection follows a January restructuring effort which unified the wearing apparel group.

The consolidation forced the dismantling of an advertising triumverate that included Foote, Cone & Belding, women's apparel; Stern Walters/Earle Ludgin, children's clothing, and McCann-Erickson, men's apparel.

Robert Wood II, Sears' vp-advertising, said earlier that more Sears customers are purchasing goods from all three clothing groups, and that one agency could better address this crossover.

Stern Walters/Earle Ludgin continues to handle national radio advertising for children's apparel and FCB retains Sears automotive and recreation group business. McCann-Erickson is no longer on the Sears agency roster.

At the Needham office here, which now is projecting 1982 billings of $220,000,000 (out of total U.S. billings projected at $415,000,000), the Sears victory can be seen as stemming from a concerted effort on the part of management to emphasize the agency's strengths and remedy its weaknesses.

Since Needham lost the $53,000,000 McDonald's account to Burnett in October, some major organizational changes have taken place, designed, according to exec vp-managing director Al Wolfe, to guarantee that Needham "never again would be hit for 'lack of marketing depth' or services."

Mr. Wolfe, who joined the

Bonjour, B&S ready to split

By PAT SLOAN

New York—It looks like Backer & Spielvogel is ready to say "au revoir" to Bonjour International, just as the agency's spring campaign for the client breaks.

The cause for the probable split, trade sources believe, is Bonjour's alleged nonpayment of perhaps as much as $1,000,000 in media bills. Neither client nor agency have commented on this, but Bonjour vp Charles Dayan admitted, "We are talking with five agencies."

Agency chairman Carl Spielvogel said only, "We will have an amicable and mutual parting."

The issue of nonpayment is not a new one for the sportswear and jeans company, which has been involved in a number of legal hassles and out-of-court disputes with suppliers and agencies (AA, Aug. 24).

One of the most recent led to a rift with previous agency D'Arcy-MacManus & Masius. Shortly thereafter, Ray Bittner was brought in from Lee Co. as Bonjour

last minute news

Lever puts $13 million behind Impulse rollout

New York—Lever Bros. is going national with Impulse deodorant/fragrance. A $13,000,000 campaign via JWT is slated to begin late in May. Already in 20 countries, it has been testing in Rochester where it gained a 9.9% share of the deodorant/antiperspirant market, sources said.

Nestea plunge dropped; Nestle goes 'natural'

White Plains, N.Y.—Nestle is replacing the "Nestea plunge" (by its former agency, Burnett) with a new JWT campaign that uses Dan ("Grizzly Adams") Haggerty to impart a "natural" message and highlight the improved taste of its Nestea iced tea brands. Tv breaks this week; budget is believed to be $10,000,000-plus.

AMC planning 'major push' for Jeep line

Southfield, Mich.—AMC will launch a "major marketing effort" and ad drive for Jeeps "fairly quickly," said Joe Cappy, vp-marketing group. AMC's cars will get a separate drive. Compton has Jeep; autos are at Grey.

Berger, Stone & Ratner, McCaffery eyeing link

New York—Berger, Stone & Ratner is working on "joining forces" with William McCaffery Inc., according to BS&R president Joseph Stone.

Independent agencies say future bright

By CHRISTY MARSHALL

NEW YORK—While former independents William Esty Co., Compton Advertising and Cunningham & Walsh take wedding vows, chief executives of other independent agencies proudly are proclaiming they are not the marrying kind.

In fact, as they deny the contention that their future is a shaky one at best, these execs are crowing that the latest rash of mergermania is only good news for them.

"The future [for the independent] has never been brighter," said Carl Spielvogel, chairman-ceo of Backer & Spielvogel, the fast-climbing 3-year-old independent.

"It is terrific for us," said Chuck Peebler, ceo, Bozell & Jacobs. "We have a good 10 to 15 years of our growth ahead of us. We're positioned right now to take advantage of some periods of adjustment with our competitors. When you have change, you have opportunity."

Two of the major merger deals recently concluded, William Esty Co.-Ted Bates & Co. and Compton-Saatchi & Saatchi, resulted in expanded international operations and lucrative settlements for the principals. These deals also were accompanied by talk about how time was running out for the big independent agencies as their multinational clients pressed them to enlarge their operational scope.

"You've got to become a Goliath to survive," said Compton's Bob Huntington as he signed up with Saatchi & Saatchi (AA, March 22).

Referring to these mammoth deals, Mr. Peebler asked, "How is Bates going to end up managing all these operations? First they buy them and then they want to maintain the management, but the managements have sold because, in many cases, they don't have any succession. Now what happens when the problems of succession come into being? You no longer have the same entrepreneurial drives available because you no longer have ownership on the same basis you had before. And clients are going to see the value of an involved owner management, which I think tends to care more in the personal service business."

■ "I think it is the greatest opportunity McCaffrey & McCall has ever had," said chairman David McCall, who sees no need to merge. "The clients we serve, and the clients we don't serve but talk to, are dubious about the advantages of the mass organizations. Some of them are very good. But, God, some of them are a living mess. I see no advantages, particularly for agencies at this level." He added that clients still seek "terrific marketing, thinking, great creative work, solid research and a good media plan."

K&E ceo Leo-Arthur Kelmenson sees the merger surge as good for the industry.

"It's very clear that something very exciting is happening in the

Seven-Up chief believes time right for Like cola

By NANCY GIGES

As Seven-Up Co.'s 99% caffeine-free cola Like makes its debut, soft drink analysts expect the new product to prolong the already drawn-out cola war that began when Pepsi started its comparative taste tests in the mid-1970s.

Seven-Up is introducing Like (AA, Feb. 1) in eight markets, four where company-owned bottlers will market the brand and four where it is franchised. The cities are St. Louis; Rochester, N.Y.; Norfolk; Dayton; Madison, Wis.; Albuquerque, Phoenix and San Diego.

■ Commercials break first in Dayton March 28 and will begin in all markets within three weeks.

Although Coca-Cola and Pepsi-Cola thus far have played down the importance of caffeine-free soft drinks, they cannot afford to ignore the situation a whole lot longer, commented Bonnie M. Cook, soft drink analyst at Robinson-Humphrey, Atlanta.

Pepsi, while discounting the potential of low-caffeine soft drinks, has reacted strongly to a new anti-caffeine approach in advertising for the 7UP brand (AA, March 1). In a communication to its bottlers that also handle 7UP, Pepsi said any support they give to the anti-caffeine campaign might be a violation of its franchise agreement.

There are reports that both cola companies are prepared to introduce competitive decaffeinated cola products and are far enough along to have worked out ad plans. One source said Pepsi is ready to convert Pepsi Light sugar-free cola with a lemon twist to a caffeine-free formula. Others say Pepsi is considering the use of new names such as Pepsi Free, Pepsi 2 and Pepsi Gold.

Like's advertising, by Backer & Spielvogel, has the theme, "You don't need caffeine and neither does your cola." Each of four introductory commercials centers on a parent/child activity.

■ They initially focus on what a child needs (such as every kid needs a dream, lots of love, encouragement, etc.), and then, as action abruptly stops on the child for several seconds, an announcer notes: "But there's something they don't need. They don't need caffeine. That's why we created a cola with no added caffeine." Copy says Like gets its excitement from full, rich cola taste, unlike the leading colas that add caffeine.

Edward Frantel, Seven-Up Co. president, maintains that the commercials do not position the brand specifically for children. "We see this [advertising] as positioning it for everybody," he said. It would

NBC-TV springs its shifts

By JAMES P. FORKAN

NEW YORK—NBC-TV has unveiled a rash of springtime changes in hopes of finding candidates for fall and for the 1983 mid-season. CBS and ABC, still engaged in a close battle for first and second in the Nielsens, announced spring fixes earlier (AA, Feb. 22 et seq.).

NBC's latest moves include two shows that just got new berths during March, "McClain's Law" and "Chicago Story."

With Brandon Tartikoff, NBC Entertainment president, slating three limited-run series and moving six current shows, mostly on Friday and Saturday nights, April shapes up as a crucial month for the network as it tries again to battle its way out of the Nielsen basement.

Already committed to six new series for fall prime time, NBC so far has renewed only three current shows, "Quincy," "Hill Street Blues" and "Real People," with more expected shortly. The newcomers include two delayed from this season, "Devlin Connection" and "The Powers of Matthew Star," plus "Saint Elsewhere,"

WINE

Consumers toast to a vintage future

By Ed Zotti

It's a little startling to realize, but once upon a time the center of the U.S. wine industry was Cincinnati. Or at least that's what wine historian Leon Adams claims.

Ed Zotti is a Chicago business writer and a frequent contributor to Magazine/Section 2.

We're talking pre-Civil War, a time when the wine business was a tad on the rustic side. Unfortunately for Ohioans, Buckeye dominance didn't last long. Folks were already growing grapes in Southern California, and during the 1850s the first commercial wineries were established in Northern California.

It has not exactly been a century of progress since then. Wine's prospects look cheery today, but up until about 30 years ago the story of American wine was the story of one catastrophe after another—plagues of vine pests, Prohibition, a couple world wars and a depression, among other things. It wasn't until 1948, according to one observer, that the wine industry entered a period of more or less "normal" growth.

Until 1980, when it surpassed distilled spirits, wine ranked dead last among the 10 major U.S. beverage categories. As late as 1960, Americans were drinking only a half gallon of table wine per capita annually, compared with nearly 30 gallons among the major wine-consuming nations of Europe. Even today, fewer than 4% of the nation's wine drinkers consume more than half the wine produced.

But there's no question that things are changing. "The cultural trends are on our side," says John De Luca, president of the Wine Institute, the industry's largest trade group. Wine is invariably associated with a more affluent, sophisticated life style, proponents say, and as

(Continued on Page M-14)

Toasting wine's future

(Continued from Page M-13)

more Americans find themselves in that category it's likely they'll turn to wine from more proletarian beverages. Consider some of the radical changes in the industry since the repeal of Prohibition. Initially the big business was in "dessert" wines of more than 14% alcohol, with some fortified with brandy to as much as 20% alcohol. They were not well made; some of them, frankly, were rotgut. They sold mainly because they were a cheap source of alcohol.

"Wines were taxed at rates far more advantageous than spirits," says Louis Gomberg, a San Francisco-based wine consultant and longtime observer of the scene. "Wine then as now was thought of as an agricultural product whereas spirits and beer have always been thought of as manufactured products. I would say that 80% to 90% of the growth in dessert wines [from nothing to 100,000,000 gallons by 1955] was due to the fact that these wines had a tax advantage. It was an artificial market."

Dessert wines peaked in the mid-1950s as their mostly low-income customers switched to hard liquor, and sales have declined ever since. But sales of table wine were growing at a steady rate. By the time the watershed year 1968 rolled around, table wine sales equaled dessert wines sales.

The late '60s saw a number of other interesting developments, too—the "pop" wine craze, for one thing, as well as a sudden interest in wine on the part of big business. National Distillers bought Almaden in 1967. In 1969 Heublein bought United Vintners. Later Schlitz, Coca-Cola Co. of New York, Coca-Cola Co. of Atlanta, Nestle Co. and others would get into the act.

But the real news was that Americans were finally learning the wine habit. Years earlier, Mr. Gomberg recalls, the Roper organization asked Americans whom they thought drank wine. The three leading answers were foreigners, rich people and bums. By the '70s, one could safely say, that was no longer true.

Still, Americans tend to use wine in unpredictable ways, and anticipating what those new directions might be has come to be a major preoccupation of wine observers around the country.

Take the phenomenal growth in white wine, for instance. In 1970 whites were the least popular of the three wine "colors," with 24% of the table wine market, compared with 26% for rose and 50% for red. By 1980 the situation had shifted dramatically, with white accounting for 54% of the market, red 26% and rose 20%.

Not everyone saw that change coming. Those who did, notably Marvin Shanken, publisher of the industry newsletter *Impact*, have ample opportunity to gloat nowadays.

"My friend Lou Gomberg and all these other guys for years used to put me down, that [white wine] was just a fad," Mr. Shanken says. "They don't put me down anymore."

"I did research reports. I analyzed the business of why people were turning to wine and white wine in particular and I went step-by-step through all the factors involved. Three years ago I spoke at the University of California at Davis on white wine before an audience of 700 grape growers who were knee-high in red grapes. I was going into the lion's den . . .

"Other people only looked at wine in the context of wine—they didn't look at wine in the context of the beverage world. I fit wine within the context of consumer behavior patterns in terms of beverage consumption."

So why white wine? "It's pretty obvious," Mr. Shanken says. "It's chilled, it's light, it's flavorful, it's got a certain elite status to it. The migration to the South where people have a tendency to want to drink cold beverages only added to it."

In addition, many people, particularly women, found white wine a good substitute for a before-dinner cocktail. "People wanted to switch from spirits," he says.

One of the next big opportunities for wine, Mr. Shanken agrees, will be in the recreational beverage market, a move made possible by the development of convenient containers like cans and plastic bags in boxes. That means that wine may eventually be competing head-to-head with premium and superpremium beers. Already the new containers make wine less of a headache for outlets ranging from restaurants to airlines, and greater availability, naturally, is the key to greater consumer acceptance.

Mr. Shanken sees a decidedly optimistic future for the U.S. table wine business—an annual volume of nearly a billion gallons by 1990, a little short of three times present production. "It's a function of two things. One, the population of users is going to increase. Right now about a third of the American adult population drink wine. Another third, for moral or health reasons, does not and will not drink wine and the remaining third represents the potential new audience. So the potential exists for the wine-drinking population base to double."

"The other area is frequency of usage, and I see wine becoming more than just an occasional beverage. People today who drink it maybe once a month will be drinking it once or twice a week. And I haven't even gone into the fact of increasing usage at a given time, taking two drinks instead of one."

Still, nobody's quite sure exactly what kind of wine people are going to be drinking in 10 years. It's more than an idle question, since it can take as much as five years between the time vines are planted and the first wines prepared. Grape growers who guess wrong can find themselves in big trouble down the road.

One current debate, for instance, centers on future color preference. Red grapes are presently plentiful, while whites are in short supply. But some observers, noting that white wine is the traditional drink of the wine novice, think that present white wine drinkers will eventually graduate to the reds. Others aren't so sure, doubting that the mass of American consumers will ever develop the educated palate the more complex reds require.

A somewhat more pertinent issue is what new product(s) it's going to take to entice nonwine drinkers away from their present beverages. Some look to low calorie and/or low alcohol products.

"The soft wines and light wines are steps in the right direction to appeal more to the American palate," Mr. Gomberg says. "They're the first real attempt from the standpoint of traditional types of wine to reach the nonwine drinking portion of the country."

Mr. Gomberg points to the success of the relatively low-alcohol Italian Lambruscos, pioneered by Villa Banfi with Riunite. "It is a genuine grape table wine [as opposed to a "pop" wine], with a couple of additional things—it has tingle on the tongue, which appeals to Americans who were weaned away from mother's milk to soft drinks. And for the first time with Lambrusco, marketers said to the public, to hell with this rule, 'never chill red wine.' You chill our Lambrusco and you'll enjoy it more. And people did chill it and they loved it. Another factor is the absence of tannin," which gives wine a somewhat astringent taste.

Others think Lambruscos have only a limited appeal. "It's been a phenomenon that's been very heavily oriented in some parts of the East Coast but certainly in the Midwest to consumption patterns that have always been traditionally in quite sweet wines," says George Vare, a San Francisco-based wine consultant who served as president of Schlitz's Geyser Peak Winery until 1979.

As for low-alcohol wines generally, Mr. Vare says, "I don't think they're going to be that big. I think some of it is going to cannabalize [the sales of] existing higher-alcohol wines. It's long been known that there's a gigantic market for a low-alcohol beverage, but it's real low, down in the 2% to 3% range. But in order to achieve that, there are all kinds of technical problems." The light wines currently offered, which typically are 7% to 10% alcohol, just aren't low enough, Mr. Vare thinks.

Whatever the product, Mr. Vare believes one factor the U.S. wine industry is going to have contend with in the near future is costs. "I think you're going to see the cost pressures of California agriculture and the wineries themselves putting a tremendous amount of pressure on California wines," he says. Continued industrial and residential development, for one thing, is sure to force land prices up.

"I think that we're possibly going to open the door for more low-priced imports coming in. There's a whole sea of wine that exists outside the U.S., and I think given government subsidies whether open or disguised that [foreign wineries] are going to be watching this pressure."

Others agree. Mr. Gomberg goes so far as to say that the day may be coming when California may simply cease making the lower-priced wines altogether.

Admittedly, there are some for whom increasingly tight conditions in California bode well—notably all the non-California wineries who might conceivably take up the slack.

At the moment, things don't look too good for "other states" wineries, as they're called. Their market share has fallen to a dismal 8%. Mr. Shanken thinks they'll be lucky to end up with half that 10 years from now, and he predicts an actual decline in gallonage.

The problem has been the allegedly "foxy" taste associated with the types of grapes Eastern growers are forced to use because of less favorable climatic conditions. "But that's diametrically opposite to what all the New York wineries are producing now" with the new hybrid grape varieties, says Bill Moffett. He's executive director of the Assn. of American Vintners, most of whose members are located east of the Rockies.

"Look at the California situation," he says. "The Napa Valley is pretty well filled. There's not too many more places where you can put grapes." Other observers scoff at this, but all the same *Eastern Grape Grower & Winery News* magazine, which Mr. Moffett runs, is helping to organize a seminar next fall for potential investors in eastern vineyards.

Production details aside, the trends are encouraging. AA

The changing table wine pattern in the U.S.

Regional scene is in ferment

By Eunice Fried

The past 25 years have been bountiful ones for winemaking in the U.S., with new wineries sprouting up like modern day pioneer settlements, not only in California, but also in the Northwest, East, Midwest, South and Southwest. It is a tantalizing revolution with the wine scene in constant ferment, and with the wineries' bottled offerings edging more Americans toward the pleasures of wine.

Although 36 other states are now commercially involved in winemaking, California still leads by far. Since the mid-1960s, when the state's ebullient experimentation and growth began, wineries have proliferated there with a zeal akin to a religious calling.

Today, California is home to 484 wineries (about three-fourths of which have opened since 1970), and that number increases so rapidly that a count today is bound to be obsolete tomorrow. California, in fact, has more wineries than the rest of the country has in total.

Nowhere in the state is there a greater concentration of winemaking than in Napa Valley. With 130 wineries tucked into this 30-mile long valley—barely five miles at its widest—Napa is the brightest star of American winemaking.

Just west of Napa, over the mountains that divide them, is Sonoma. With about twice the land space of Napa and a wine history that stretches back to the early 1800s, Sonoma now has about 80 wineries.

While Napa and Sonoma are California's stars, their success has spawned many satellites. North of these two prestigious regions are Mendocino and Lake County, both coming into their own as prominent wine growing regions.

Slowly, the names of other regions are also catching the eye of the American wine lover—Santa Clara and Livermore, two old established regions; San Luis Obispo; Santa Barbara-Santa Ynez; the Sierra Foothills, including the Amador, El Dorado and Calaveras areas; and Rancho California (Temecula), among them. In all, reports Wine Institute, the California wine industry's trade association, more than 15 regions in the state are now involved in winemaking.

And in fact, of all the wine America drinks, 87% of it comes from California. Yet, despite this overwhelming preference for California wines, all is not glittering in the Golden State. As in any of the world's wine regions, much of the production is ordinary, uncomplicated and unexciting.

Even among some of the state's premium wineries there has often been a tendency to produce wines that are too high in alcohol, have spent too much time in oak cask and, in general, tend to be excessive and overwrought.

Fortunately, the most astute of the prestigious winemakers have always understood that boldness does not necessarily spell greatness. Warren Winiarski, owner and winemaker of Napa Valley's Stag Leap Wine Cellars, is an imaginative and thoughtful man whose wines are said to possess elegance and restraint. "We have to learn to temper the richness and the power this beneficial valley gives us," says Mr. Winiarski. "We have great abundance here, but it has not yet found its proportion."

Also contemplative about California's wine future is Walter Schug, winemaker of Joseph Phelps Vineyards, Napa Valley. "We know how to make good wine and to raise good fruit. The next frontier is to learn more about matching each grape variety to the appropiate growing area. To find out where the best wine grapes can grow well."

For all the excitement engendered by California, it is only one facet of the American wine scene, albeit the largest. But there are other worlds of wine in America.

Up in the Pacific Northwest, Oregon and Washington are producing praiseworthy wines that compete with those from California, particularly with the whites and Pinot Noir. And Idaho and Utah, too, are now producing fine wines.

From the Rockies on east, it is a different, and in some ways, a more complex story.

There are currently 335 wineries in 32 states stretching from the Rockies east to the Atlantic Coast. Most are small and sell their wines close to home. Many are in states rarely before considered wine country. New York is the East's largest wine-producing state and one of its oldest. Now, however, vineyards and wineries are making their mark in such states as Missouri, Indiana, Ohio, Oklahoma, New Mexico, Florida, Alabama, Minnesota, Michigan, Massachusetts and Iowa.

Winemaking began in a small way in the East when the early European settlers found vines of the Vitis Labrusca (of which the Concord is an example) growing wild. The vines were hardy and able to withstand the severe winter and short, humid summers of the region, but their grapes made wine that had an assertive, musky flavor unlike anything they had known in Europe.

The New World colonists made wine from them, nonetheless, but they were not satisfied. Soon, they were importing vines from the Old World, varieties of the vinifera species. These vines, however, failed in the colonies while the native vines continued to flourish. And for 250 years, no one knew why.

Then, in the 1860s, some American vine cuttings were sent to England. Unknown to anyone, a louse indigenous to the eastern U.S. was buried in their roots. Called phylloxera, the louse spread throughout Europe, destroying almost all of the continent's vineyards. Next, it spread to California where vinifera varieties were also grown. By the turn of the century, most of the western world's vineyards were dead. Yet thriving in the midst of ruin were the native American species, alone immune to phylloxera. The rebirth of vinifera came about when men began to graft vinifera vines on to the roots of the phylloxera-immune American species, and that is how most of the vines of the world are planted today.

Meanwhile, researchers in France, Canada and the U.S. were crossing viniferas with American vines to produce hybrids— new grapes that they hoped would combine the fine flavors of vinifera with the hardiness of the American species. Many hybrids were produced, but few, if any, succeeded in coupling the essential qualities of vinifera with labrusca. Still, the best of them offered a step up in flavor and a reasonable alternative for people who shunned labrusca wines.

It was the introduction of these hybrids after World War II and later, the successful reintroduction of vinifera, that changed the wine fortunes and future of much of this country.

Dr. Konstantin Frank is the man who proved that vinifera could thrive in the East. Born in Russia more than 80 years ago, he had grown grapes there in 40-degree-below-zero winters. In 1962, he established Vinifera Wine Cellars in the Finger Lakes Region of upstate New York and showed, that by grafting vinifera on to the correct root stock, the European grapes could withstand the region's severe winters.

Thus, today, the special excitement in the states east of the Rockies is that three totally different philosophies of grape growing are operating, often side by side.

Although no breakdown of grape species for the entire eastern wineries industry seems to exist, there are figures for New York State. The largest producer east of the Rockies, New York, is currently harvesting about 79% of its wine grapes from labrusca, just over 19% from hybrids and only slightly more than 1% from vinifera.

Vinifera is the hardest to grow and yields the smallest crop, but it does make the finest wines of the East, and it is this small percentage of vinifera that is turning the reputation of eastern wineries around and giving the consumer some surprises.

Some of the most outstanding surprises are coming from small wineries, such as Glenora Wine Cellars on Seneca Lake in upper New York. Established in 1977, Glenora began to win awards almost as soon as it had wine in the bottle. In the 1981 New York

Regionals

(Continued from Page M-15)

State Fair Wine Competition, for example, it entered 10 wines and garnered 10 awards. A third of its 15,000-case production is in vinifera—in Johannisberg Riesling and Chardonnay—which makes it, according to general manager Raymond Spencer, the largest producer of vinifera in the state. In about two years, the winery expects to have half its production in vinifera.

Markko Vineyards of Conneaut, O. has been devoted solely to vinifera since it began 13 years ago. With an annual production of barely 2,000 cases, however, its buttery, well-balanced Chardonnays and its Johannisberg Riesling—all estate bottled—reach few consumers.

Among the East's larger, older wineries, most of which were established in the 1800s and whose fortunes were founded on labrusca, only Gold Seal on New York's Keuka Lake has made forceful strides into vinifera. Under the presidency of English-born Master of Wine Michael Cliff, Gold Seal has begun producing highly regarded Chardonnay, Johannisberg Riesling and Gewurztraminer.

Red vinifera, on the other hand, and in fact, red wine generally, has met with rare success in the East.

But despite the upgrading of many eastern wines and of white viniferas particularly, there has been little demand for them in the wine shops and restaurants outside their own areas.

At the sixth annual eastern wine industry conference in December, "Wineries Unlimited," speakers at the marketing seminars pointed to just that fact.

"Your reputation in New York City is lousy," said M. David Levin, news producer of WCBS Radio in New York. "If you want to hit the big city market, forget the name 'eastern wines.' Go with your winery name. Promote your estate wines. Your most promising future is in your viniferas, your light, fruity whites and your sparkling wines."

Ed Everett, editor of the "Gomberg Report" and publisher of "Wine Trade," both in San Francisco, chided the wineries—of California as well as of the East—for not keeping up with trends in the market.

James Rossbach of Bonsal Seggerman, importers, suggested the small wineries try to sell their wines through small wine shops. "Give them only one or two of your best, particularly, your whites. And hold your price."

If California has similar problems, its wine people are not emphasizing them, at least not publicly. Instead, at the annual Napa Valley Wine Symposium last February, all was upbeat.

Richard Maher Jr., president of Beringer Vineyards, in a talk entitled "Napa Valley: A Greater Future," spoke about the consumer's concern with quality. "The consumer is starting younger, and he is more knowledgeable, more daring, more affluent . . . I believe the wine explosion will continue."

As wineries, wines and wine styles continue to proliferate in the Golden State, there seem to be two trends.

One has been the development of limited production, top-of-the-line wines by large, historic, mass production wineries. Much of California's growth in the past decade has been small, special wineries turning out high quality wines often in minuscule production. Because a number of them have been so successful, a kind of cult of all small wineries has developed. As a result, many of the large, old wineries have been forced to reexamine their own wines and, in an effort to upgrade them and to compete with the new small wineries, they have established special productions.

Almaden Vineyards entered the limited production market in 1978 with its Charles Lefranc label, accounting for 45,000 cases out of the winery's total 12,000,000 cases per year. Christian Brothers answered the challenge by creating its white and gold vintage-dated label that represents 20,000 cases of its annual 1,500,000 production. Sebastiani Vineyards now has its Proprietor's Reserves; and Paul Masson makes 25,000 cases of its Pinnacles Selections while the winery's regular production is 7,000,000 cases.

On the other end of specialization is the smaller winery that has learned what it does best, and trims its line down to its greatest successes. One example is Tom Burgess who established Burgess Cellars in Napa Valley in 1972. After winning kudos for all his wines, he decided to drop four (Chenin Blanc, Johannisberg Riesling, Petite Sirah and Pinot Noir) and to concentrate on Chardonnay, Cabernet Sauvignon and Zinfandel.

"I think specialization is something all small wineries should consider," says Mr. Burgess. "There is a tremendous call for Chardonnay, and yet, the year before we began our new program I was able to send only 20 cases to New York, a big market. With our new three-wine limit, we'll be making 18,000 cases of Chardonnay and we can fill much more of the need. Specialization is really a natural evolution."

Meanwhile, wine has become a cause for celebration across the country. Wine festivals, wine clubs, societies and special events abound and seem to multiply almost as fast as the wineries themselves. But the greatest accolade to wine in the U.S remains the Barrel Dinner sponsored each March by the Four Seasons Restaurant in New York City. Today, the Seventh California Vintners Barrel Tasting Dinner is being held.

The dinner is the most coveted ticket in town with 224 of the fortunate jamming the Four Seasons Pool Room while more than 2,300 others are refused.

In many ways, for many reasons, American winemakers have good reason to congratulate themselves. AA

White to light to alcohol-free? Maybe

By Richard Paul Hinkle

Some of America's largest wineries are jumping onto the "light wine" bandwagon as if it were the last lifeboat in a storm-tossed sea. Following so closely on the heels of the "white wine boom," it may take some time to correctly analyze the long-term place of "light" in the marketplace.

First, we must be careful to clarify two terms that are being bandied about. Though "soft" and "light" frequently overlap, they are distinguishable. "Soft," as originally used by Ed Friedrich at San Martin Winery, refers to wines of lower than normal alcohol. The lowest "normal" alcohol allowed in California, before 1979, was 10% (it is now 7%). "Light"—in light of "Everything you always wanted in a beer. And less."—may then be construed to mean wines of lower caloric content.

Indeed, lower caloric content is exactly what most of the advertising conversation has concerned itself with. Just as the "Lite" beer brewers fought for the lowest possible caloric rating, so too have the wineries.

Last August, Paul Masson boasted of its "new white wine with the lowest caloric content [49 calories per 100 ml.] of any wine sold in the U.S." That was too much for Masson's cross-town rival, Almaden.

Last February, Almaden jumped—with a quarter of a million cases—into a market that president John McClelland had previously expressed doubts about. In fact, Almaden did a double on "light," on its front label ("Almaden Light," "Light Chablis"), as well as announcing "48 calories per 100 ml. serving" immediately below. Even more, it's as low in alcohol as the law allows and there's just enough intentional carbon dioxide for an obvious bit of effervesence.

Interestingly, when Sebastiani Vineyards first entered this market, the intention was to stress the lower alcohol content. "When we first began to promote our August Sebastiani 'Light Country White,' our print and radio ads contained a reference to the low alcohol content of the wine," notes Sam Sebastiani, third generation president of the family-owned Sonoma winery.

"We pointed out that, since both grape sugar and alcohol contain calories, our wine was fermented to dryness. This marketing strategy was carefully designed to correctly position our wine in the marketplace and also to accurately define our light wine for the consumer. Unfortunately, the Federal Alcohol Administration Act forbids any advertising that relates to a wine's alcoholic content. It's ironic, because the intent of the law, which does *not* apply to distilled spirits, was to prevent a producer from suggesting that his particular wine or beer might really give you a buzz."

Mr. Sebastiani is convinced that light wines may one day eclipse the predictions of those who believe that they will concern 10% (or more) of the overall wine market. "My father, August Sebastiani, first made a low alcohol wine back in 1957," he says quietly. "He commented at the time that one day Americans would want to drink this kind of wine. I am proud that we were the first family winery to produce a light wine and that it honors the memory of my father."

There's no question but that Americans are looking for beverages of lower caloric content. "Since 1975 light beer consumption has increased 80% [from a small base], vs. a 19% increase in the total beer category," notes Pierre Ferrari, group brand manager for Coca-Cola Co.'s Taylor, who secured the right to "Light" and has jumped into the national marketplace in a big way. Mr. Ferrari cites a similar growth pattern in soft drinks, adding that: "Today's active life style emphasizes the extraordinary potential for our Light wines."

The fact that producers of the light wines have been sharp enough to add caloric, carbohydrate, protein and fat statements to their back labels is a subtle means of sliding wine toward a "food" image. There is evidence that Americans still perceive wine as an "alcoholic beverage" rather than as an agricultural food product.

Industry analyst Louis R. Gomberg, who has nearly a half century of wine experience, is convinced that the future of wine in America is tied to a *generic* product called "wine." When he says "wine," he's not talking about those wines with geographic genealogies or varietal pedigrees.

He's talking about a simple, low alcohol beverage made from fermented grapes that fills the same need as "coffee" (as opposed to "Hills Bros." or "Mountain Grown"), "tea" (not "Herb" or "Flow-Through") or "cola."

"If and when we ever see a generic product called 'wine'—as they have in France, where you just order *vin*—then the potential for the growth of light wines is enormous!" says Mr. Gomberg. "Ask Robert Mondavi, who added 'Red Table Wine' and 'White Table Wine' to his production in 1975 and went from 200,000 cases to almost 1,000,000 cases in three years."

As Mr. Gomberg sees it, the potential American wine market is 100,000,000 people, [approximately half the present population]. This figure excludes minors, those with religious scruples and those whose bodies react negatively to alcohol in any form. Of that number, only about 6% are regular consumers of table wine, and perhaps another 14% to 16% are occasional consumers.

"The remaining 80,000,000 will not become wine consumers by buying Cabernet Sauvignon and Chardonnay," asserts Mr. Gomberg. "It will only happen when there is a Joe Doaks White and a Joe Doaks Red, wines of 8% alcohol that are comparable with a European *vin ordinaire*."

The recognized (commercial) pioneer of low alcohol wines in California was and is San Martin's Ed Friedrich, who saw in low alcohol a means of preserving and framing the natural fruitiness of the grape.

"One of the reasons we appreciate fine wines is for their naturally fruity flavors," says Mr. Friedrich, who began his exploration of low alcohol wines with a Chenin Blanc that he dubbed "Soft" back in 1975.

It wasn't until 1979—retroactive to the 1978 vintage—that wines with less than 10% alcohol could be made for sale in California. Since that time Soft Johannisberg Riesling and Soft Gamay Beaujolais have been added to San Martin's production, though several other varieties have been produced experimentally.

Mr. Friedrich's work is grounded in the philosophy that wine is a food, a food whose alcohol is necessary *primarily* to

Fine wine retailers take lights lightly

With all of this talk of the light wines, what do the "premium wine" retailers think?

Ed Everett, editor and publisher of the "Wine Trade," a San Francisco-based industry newsletter, sees the market response to light wines as "erratic," noting that California sales patterns indicate a reluctance on the part of premium wine retailers to push the product.

"Out here, the light wines seem to be selling well in places like Sacramento, San Jose and the central valley. But in areas where wine knowledge is great—like San Francisco, Marin County, Berkeley or the Peninsula—the light wines are not selling well."

Conversations with retailers of fine wines from coast to coast confirmed that reluctance. "I'm still watching and waiting," says Tony Wood, manager of Beltramo's in Belmont, Cal. "We're not doing much more than filling the pipeline [filling the demand] with the light wines. Frankly, I hate 'em all. When I was a smoker, I wanted a cigaret with full flavor—no filters. As a wine drinker, I want something with distinctive character. The light wines don't have it. I suspect they'll do better in the supermarket than they will in the fine wine shops, especially here in the West. We don't sell nearly the quantities of the low alcohol imports as eastern stores do."

"Frankly, I hate 'em all. As a wine drinker, I want something with distinctive character."

Like Beltramo's, Schaeffer's in Skokie, Ill., doesn't do much business in either American lights or the Lambruscos.

"I haven't found any that really taste bad," says George Schaeffer, "but they definitely do lack character. I think they're just a step above water, and a short step at that." He equates the light wines to light beers, in that "the American public seems to prefer neutral tasting beer! I suppose I ought to market these wines in the beer cooler, to appeal to the nonwine consumer, but I'm not all that enthused about the whole thing."

In New York, Peter Morrell doesn't even carry the light wines. "I've tasted them, and they're not unpalatable," he says without enthusiasm. "They tend to underwhelm me, which may be more a comment on my conditioning than on the wines themselves. We're going to take on the Taylor line in the spring." Mr. Morrell, who favors wine sales in grocery stores, suggests that the light wines ought to do well nationwide, especially in the summer. A golfer, Mr. Morrell is not really interested in a light wine unless it's dry, carbonated and in a can.

Actually, it won't be long before that happens. Almaden's entry into the market is lightly carbonated and Geyser Peak hopes to have canned light wines out by summer. Thus, the answer to expanding the market may simply be beer made from grapes! —*R.P.H.*

Light wines are positioned as "food" through the listing of caloric, carbohydrate, protein and fat content on labels.

The lights

(Continued from Page M-18)

preserve the fruit juice. Modern fermentation techniques, he argues, are sufficient to stop spoilage, thus it is no longer necessary to maintain high alcohol levels to prevent spoilage. "Ironically, we didn't produce these wines with the thought in mind to serve today's ever so cautious weight-watching generation, or to please those who think light is chic, but only because some grape varieties simply taste better if their fruit is not masked with burning alcohol."

The swelling millions of cases of Italian imports point to the success of low alcohol and effervescence. The vast increase in the sales of light beers, diet soft drinks and sparkling mineral waters support the theory that appeals to "slimness" and "health" have successful repercussions. It would stand to reason that the combination of these appeals would be an obvious winner. Or ought to be.

The question here involves something marketing people refer to as "cannibalization." That the combination is a good one is accepted.

But at whose cost? Where will the new sales of light wine come from? From new wine consumers? Or will they merely cut into the sales of the more traditional wines?

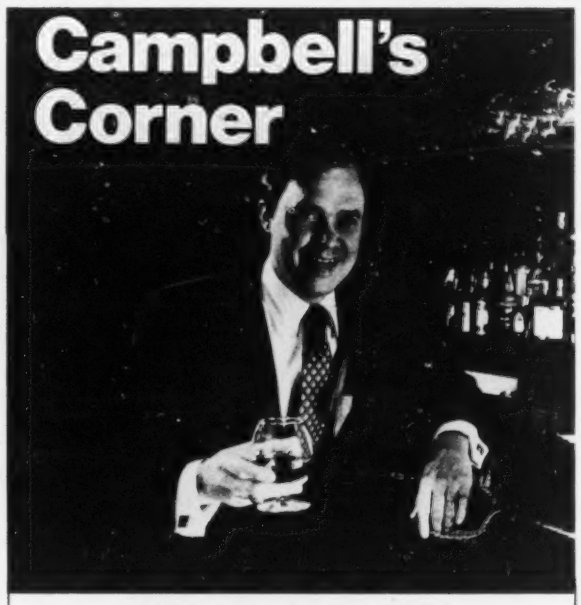
Marvin Shanken, publisher of *Impact*, *Market Watch* and the *Wine Spectator*, is convinced that the answer to that critical question will depend on marketing expertise. "As it stands, the 12% to 15% share of the beer market that the light beers enjoy has come at the expense of the regular beers," says Mr. Shanken. "The same situation holds in the sugar-free cola market. At present, I haven't seen enough light wine ads that are targeted toward the new wine consumer. The industry would love to attract new consumers through the light wines, but that's a function of effective advertising. The theory of marketing is to bring new customers to the marketplace, but the light wine marketing hasn't done that yet. The ads that are visible appeal to current consumers of wine. The future of light wines remains to be seen."

"It's an optimistic view that says light wines will grow tremendously and that most of that growth will come from their attraction of consumers new to wine," agrees Ed Everett, the San Francisco publisher of "Wine Trade." Mr. Everett, who sees the market response to light wines as "erratic, ragged thus far," notes that retailers of fine wines are approaching the light wine phenomenon with "great suspicion."

"The key may be whether or not Gallo moves into this area. Since Gallo seems to be more interested in the nonalcoholic wines that have been pioneered in Australia and France, my guess is that they will not enter the light wine market."

The exploration into light and soft wines carries with it great promise. First, there is the possibility that Americans will begin to understand wine as a basic food product, rather than as just another spiritous beverage.

Second, the developing technology that is part and parcel of the movement leads onward into the highly attractive twilight zone of alcohol-free wines. And each of these carries the potential of expanding what is now a relatively small American wine market. Dramatically. AA



Wine is pouring it on.

We know that wine has been gaining popularity among the business crowd over the past few years. It's no surprise these days to hear a request for a glass of wine at a business lunch.

And now, more than ever, business people want to know as much about wine as they do about the distilled spirits they buy for themselves or as gifts.

Simply put, they want to be better wine consumers. To know which wines to buy. Where the quality wines come from. What the difference is between wines.

Business Week readers typify this interest. In fact, according to our latest subscriber study, 3 out of every 4 subscribers used or served wine at home in the past month. And 30 percent of them are buying wine *by the case!*

This should tell you what it's telling me. That Business Week is a great place to advertise wine.

For more information about the value of the Business Week audience, give me a call at 212-997-6394.

Retailers, miffed at industry neglect, have a cluster of gripes (and praise)

By B.G. Yovovich

Just as soldiers in the trenches can supply generals with crucial bits of intelligence, so can wine retailers provide strategists at wine company headquarters with a variety of useful—and sometimes surprising—information.

Like what?

Like leads regarding opportunities for major offensives, tips about market weak points and crucial insights into the morale of those manning the trenches.

Marketers at the major wineries, for example, might be surprised at how abandoned many of the wine store troops feel.

"The advertising done by the big wineries is designed to presell their wines . . . [so that] the winery won't need the wine retailer any more," says Leo Silverman of Sam's Wine Warehouse in Chicago, who echos the sentiments of many others around the country. "They want to gain universal acceptance [for the product] so that they can put the stuff on supermarket shelves and not need anyone there to sell it."

In fact, nettled by the increasing number of supermarkets carrying wine and beer and by the rising competition from cut-rate liquor outlets, virtually all wine retailers have rallied around their traditional redoubts: Service, selection and expertise.

"I never run an ad on a jug wine. I have to create an upscale identity and project the knowledge and the unique, unusual selection that we offer," says Atlanta wine retailer Frank Stone, whose ads often underscore the advisory services that are available to customers at his store.

"I may not be located for the everyday wine purchase [as local supermarkets and liquor stores are], but I want my customers to feel as though they can't buy wine for special occasions unless they buy from me."

"A lot of our advertising is for our Bordeaux [wines]. We're aiming at 2% to 3% of the wine-consuming public, but it is a group that is growing three to four times as fast as the rest of the wine market," adds Mr. Silverman, whose annual sales volume has tripled to $6,000,000 in the last six years.

Wine retailers also point out that more than 50 colleges and universities now offer degrees or degree credits in wine appreciation and that more than 600,000 people are taking courses in wine appreciation.

In light of these statistics and the merchants' personal experiences, some wine retailers believe the major wineries are making a mistake by concentrating all their efforts on mass-market, nonvintage wines. One retailer pointed out that sales of certain mass-marketed wines like Mateus and Lancers, often considered "starting wines," have begun to decline as wine drinkers become more sophisticated.

Wineries also may be surprised at the widespread retailer interest in more detailed information on wine labels.

"For most consumers, the only advertising they see is the label," says New York-based wine merchant Peter J. Morrell. "You don't want to bare the [wine's] whole life story on the back label," but more information would be welcomed by the retailer and consumer. And some retailers are offering more information.

In Atlanta, for example, Mr. Stone's Skinflint's store has established a 10-point flavor index rating wines according to how sweet (10) or dry (1) they are.

"Customers want to know what a wine tastes like, how it compares with other wines," says Mr. Stone. "Our customer comes to know what a '5' means. Maybe it is time for one [major] winery to take the plunge and set up its own standard."

There also is much support for increased label information on wines aimed at more sophisticated consumers, to include such things as pH, alcohol and residual sugar content—all of which play a major role in taste. It also has been suggested that labels on vintage wines include information explaining the optimal years for consumption. But not all retailers are convinced of the need for such information.

"Anyone who is telling you that [there is a demand for more detailed information] is reacting to a very small, but very vocal part of his clientele," says Darrell Corti of Corti Bros. in Sacramento, Cal. "The people who ask for that kind of information are the wine crazies. They're not interested in wine as a beverage, but as a mental exercise."

"You can't simplify wines that way," adds David Courtenay-Clack of the Wine Merchant in Beverly Hills. "It would be inaccurate. You would never get anyone to agree on the ratings, and the customer wouldn't pay any attention to them. I think it would be a waste of time."

Even those in favor of flavor ratings concede that there are likely to be significant problems in setting up universally accepted scales. As one wine expert points out, "If you have been drinking Mogen David, the Lancer's rose seems dry." A rating system's usefulness might also be undermined by Americans' tendency to "talk dry, but drink sweet."

The retailers' strong emphasis on more information also carries over to criticism of the major wineries' tv ads.

"The general life style commercials with all their sunsets, pretty girls and craggy-faced vintners are pretty hollow," says Don Robinson, wine director of Green's Beer & Wine Store, Atlanta. "It is important to create an ambience, but if it can be combined with a kernel of truth of information [about the wine], the long-term results will be better."

The danger with the current approach, explains the retailer, is that the wineries will end up with problems similar to those of Detroit's auto marketers who took a similar life style approach in their ads and ended up "underestimating the intelligence of the consumer."

Wine retailers also give nationally advertised wines mixed reviews for the local merchandising support they provide for their tv efforts. The Italian wines, for example, get high marks for the instore materials that they make available to retailers.

"Riunite is as strong as goat's breath in my market," says Mr. Stone, who attributes much of its strength to "aggressive use of instore materials. They've got decals, posters, doormats, maps of Italy with the Riunite logo on them and even cassette tapes with the Riunite jingle."

Similarly, Cella reinforces its commercials with point-of-purchase posters of its Aldo character that, says Mr. Stone, "some of my customers even talk to." On the other hand, says the retailer, "Paul Masson did the right thing the wrong way. Everyone recognized Orson Welles on tv, but Paul Masson didn't follow it up with instore materials, and the image of the ads was lost."

In addition to materials to be used at the point of purchase, other items frequently requested by retailers include ad slicks and logos that can be easily used in ads and in store catalogs that are distributed to customers.

Despite their various compiaints, virtually all of the wine retailers credit the major wine marketers with, in the words of Mr. Corti of Sacramento-based Corti Bros., "helping to remove the stigma of snobbishness that has been connected with wine.

"Wine is an everyday beverage, not a god or a museum artifact." AA

Do you have Media

GAP-O-SIS?*

*Holes in your national coverage

Many media plans concentrate on major metro markets for good reasons.

BUT — there are thousands of good, growing businesses and hundreds-of-thousands of high income consumers out there in those B, C, and D counties, too.

How to skim that cream efficiently at moderate cost? Take a look.

Your ad in THE ROTARIAN sells 478,000 ABC-audited influential and affluent business and professional men and consumer families who believe in Rotary and our book. 91% readership at home. Dual audience. Consider —

COMMUNITY / OPINION LEADERS

* Members of more than 6,000 Rotary Clubs in the U.S.A.
* 93% own homes (median value $70,000).
* 63% belong to local Chamber of Commerce.
* 87% live in B, C, or D counties (where other books reaching an upscale audience are relatively weak).

LOCAL BUSINESS LEADERS

* 81% have company purchase authority.
* 52% TOP management; 15% middle management.
* 21% professional men (you don't reach many in the "standard business books").
* 87% attended college — 66% grads.
* $45,000+ incomes (average).
* Median age primary audience, 53 (42 for total audience: MRI).

THE ROTARIAN can go a long way toward curing your GAP-O-SIS by extending your coverage to a select audience in the un-giant markets. For less than $8 cpm, it may be just what you need in your media mix. Get our complete Harvey Research Study and details. Contact our rep or —

Imports graft new sales

By Roger McGrath

Fascination with imported products is only one factor in the continuing love affair Americans are having with imported wines. Effective advertising and shrewd marketing strategies that read correctly changing American palates are others.

Actually, the love affair has been going on since colonial times, and by the late 1800s, imports supplied about 25% of U.S. wine consumption. This percentage dwindled drastically with Prohibition and even after World War II, imported wines were only up to just 5% of the market, a position they held through the 1950s.

By the 1960s, however, Americans were growing more prosperous, casting appreciative eyes toward the European wines. This tendency was heartily reinforced by the French and German vintners who sent only their very best-quality wines to our shores. By 1968, imports' market share had reached roughly 10%.

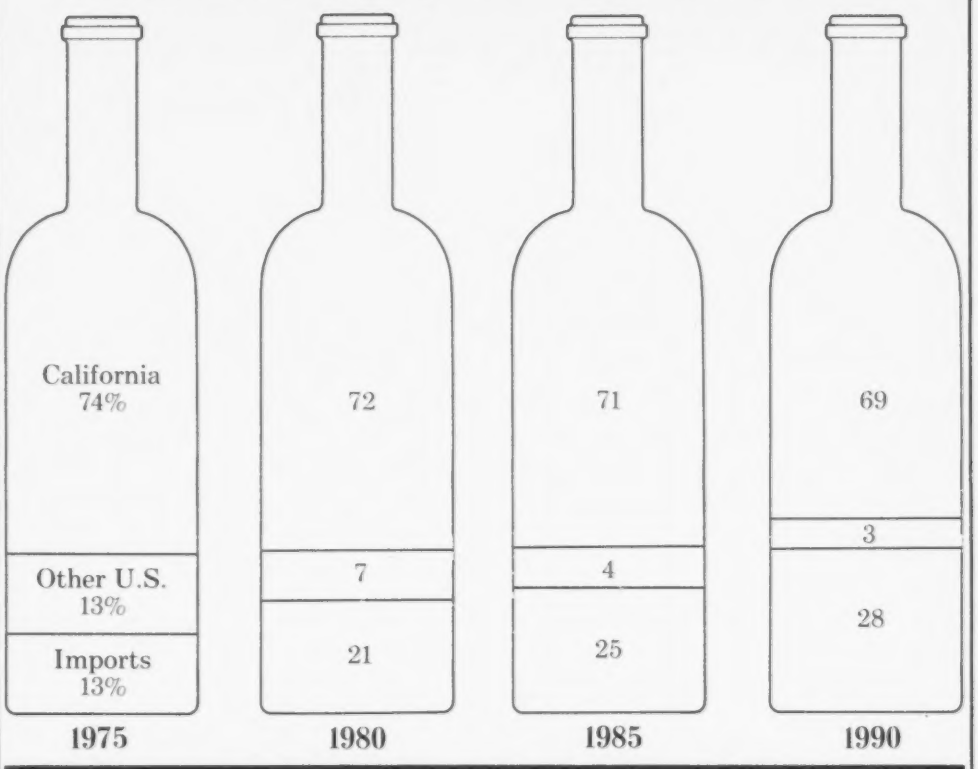
"Imports have always been a factor in the U.S. market," says wine industry consultant Louis R. Gomberg. "They have set the tone for the industry."

And they continue to do so, especially since 1975, when domestic producers stopped heavy promotion of apple-based "pop" wines. Again, as in the past, the Europeans—this time the Italians—saw opportunity, and rushed to fill the void with Lambruscos, led by Riunite. According to one wine expert, the Lambrusco is an "unusual red wine, almost always slightly sparkling . . . extremely fruity, somewhat sweet, with an intense and extraordinary bouquet." Not only were the wines fruity tasting, lightly carbonated and generally lower in alcoholic content, they were best served cold. "America's palate," notes one industry observer, "is in the icebox." And Riunite captured the American fancy.

Appropriately, importers took their marketing cue from soft drink makers and aggressively pursued the mass market, a strategy that continues to pay dividends. "They're well above 20% [market share] now, probably 22%," says Mr. Gomberg. And so the importers, having bottled a fifth or so of the market, are continuing their aggressive marketing and pricing strategies, positioning their wines as thirst-quenching, refreshment beverages for active life styles.

Roger McGrath is a St. Louis-based business writer.

Actual and projected market share



Source: IMPACT American Wine Market Review & Forecast, 1981

"The potential is virtually limitless," says Stephen Freedman, director of wine marketing at Renfield Importers Ltd., New York. "It's a nice position to be in."

Marvin R. Shanken, publisher of *Impact*, an industry newsletter, predicts imports will expand 11% a year—two points faster than the over-all market—during the 1980s and will finish 1990 with a 28% share.

That volume could easily be higher, says wine industry consultant Mr. Gomberg. He estimates that imports, in the absence of a domestic consumer education campaign, could increase market penetration one to two points a year. Imports climbed a rung to 22% last year, he points out.

"It has the [domestic] industry mildly concerned," he says.

Table wine consumption tripled during the 1970s, fueling imports'—indeed, the entire industry's—growth. Today, nine of 10 imports are table wines. Sixty per cent originates in Italy.

Sales of sparkling wines are bubbling, too. "That's the biggest growth category for 1982," says Jess DiPasquale of PepsiCo Wine & Spirits International, New York. The PepsiCo unit introduces a sparkling Rumanian wine late next month.

"Those types that appeal to American tastes and prices have done best," says Frank Gentile, senior vp-sales for Villa Banfi, importer of the top-selling Riunite, the Lambrusco generally credited with uncorking wine's mass market potential.

Industry observers figure a quarter of the market consumes 80% of volume. "There's room to grow if you can get the other 75% of the population to chomp on it," says John C. Maxwell Jr., first vp, Lehman Bros. Kuhn Loeb, New York.

That's precisely the target importers are aiming at. "They're going after the mass audience," Mr. Gomberg says.

Key to reaching the masses is television. "It has the most impact of any medium when you have a mass market product," Renfield Importer's Mr. Freedman says. Other importers agree. In 1980, the top three advertised imports—Riunite, Bolla and Cella—spent 97%, 90% and 100% of their ad budgets on tv. Domestic marketers averaged less than 75%.

When Renfield took over the third largest import (Giacobazzi) in September, Mr. Freedman immediately resumed airing "Make friends with Giacobazzi" spots made for the previous importer. "We wanted to get on the air quickly," he explains. New creative is due this summer.

Much of the advertising is aimed at new wine drinkers. Yago Sant'gria spots breaking in April will spoof macho beer advertising. The goal, says PepsiCo's Mr. DiPasquale, "is to get the attention of entry-level consumers." The ads also will feature Yago's six-pack in bottles.

Another important mass market ingredient: Low cost. "The availability of low-priced wines tends to expand the market," observes Rex Davis, executive director of the National Assn. of Beverage Importers.

"Everybody's looking for a good value today," agrees Kevin O'Brien, vp, Charles Jacquin et Cie, Philadelphia. The price of the importer's Jean Boulaine, a premium French table wine, is below most domestic competition, "so we hope our pricing will outweigh our not having multimillion dollar advertising." But the Italians are way ahead.

Why? According to *Impact's* Marvin Shanken, "A combination of reasonable, competitive prices and strong brand-building activity on the part of the Italian table wine marketers has moved the marketplace decidedly in their favor."

"The French have begun to take strong action to counter that," Mr. Gomberg says. "And I expect the Germans and Spanish to do likewise."

The French, in fact, are highlighting low-priced table wines in the new "Foods & Wines of France" promotion. The Spanish Rioja Council, along with importer PepsiCo Wine & Spirits, is running a 10-city newspaper campaign telling consumers "how inexpensively you can pick up" the $4-a-bottle Rioja wines, Mr. DiPasquale says.

Importers are actively pushing wine into mainstream distribution, going head-to-head with beer, soft drinks, iced tea and other "refreshment beverages." First stop: Supermarkets.

Although only 20 states allow wine to be sold in grocery stores, Villa Banfi earlier this month rolled out "the first national program geared specially to mass volume supermarkets," says Frank Gentile, senior vp-sales. Grocers sold about 60% of Riunite's 11,000,000 cases last year.

The five-part promotion teams Riunite with picnic foods, watermelon, snacks, Thanksgiving and the Christmas holidays in one free-standing display. "These displays assist the supermarket in promoting other items in the store," he says. A "Riunite is a picnic" banner, for example, ties products scattered throughout the store—hot dogs, buns, mustard, even paper plates, napkins and charcoal—into the promotion.

Villa Banfi's goal: Position Riunite as an "anytime" beverage. Advertising encourages consumers to keep the wine "right next to the orange juice, beer and soft drinks." "We have to let them know it's okay to drink at midday, as a cooler, for refreshment," Mr. Gentile says.

Most importers are pushing similar positioning. Yago Sant'gria is now available at 12 professional athletic stadiums, including the County Stadium in Milwaukee, onetime U.S. beer capital.

Importers also are eager for what an official at Paterno Imports, Chicago, calls the market's "natural drift" to drier premium and superpremium wines. "There's definitely a trade-up pattern," Renfield's Mr. Freedman agrees.

And marketers aren't bashful about capitalizing on America's infatuation with imports. "The fact that it says 'imported' on it enhances its image value," Louis Gomberg says.

"People in America perceive wines coming from France as being of very high quality," says Mr. O'Brien of Charles Jacquin.

Consumers hold the cards: This 'fad' won't fade

By Robert B. Morrisey

Back in the mid-1960s when dessert wines dominated sales in America, a discerning observer of the wine scene boldly forecast a "wine revolution" in the upcoming '70s. At the time, his remarks were generally ignored by the wine industry, and forgotten—for a few years.

By 1970, an American wine revolution had, indeed, begun. Wine consumer tastes were changing nationally in favor of table wines, and the venerable Leon D. Adams, respected wine historian and author of "Wines of America," and "Commonsense Book of Wine," could say unequivocally: "I told you so."

Making his bold prediction in an address to Ohio wholesale wine dealers in Cincinnati in September, 1965, subsequently published in a leading wine industry magazine, Mr. Adams revealed a "buried" statistic that showed how rapidly table wine was then coming on, compared with dessert wines. For him, it promised that "the industry's stepchild, table wine, obviously would soon become a giant," revolutionizing the wine business.

Whether or not the latest innovation—"light" or "soft" wines—is a winner depends on yet-to-be determined consumer acceptance.

He admits today that even he did not realize at the time just how swiftly the revolution would occur—and how explosive it would be.

And as the transformation picked up momentum, relatively few in the business of making and selling American wines clearly read the rapidly developing consumer trends that were accelerating the upheaval. None, for instance, really anticipated the "white wine boom," as many vintners indifferently went about increasing their planting of red wine grapes.

Nor did they read early the changing cultural climate in America as it affected drinking habits and attitudes. "Drunkenness was going out of style," Mr. Adams observes. "Wine, in turn, was readily associated with good manners and gracious living, as it is today."

While wine surely has generated a lot of excitement in America over the past decade, it is far from being the nation's leading consumer beverage. Annual per capita consumption has "reached" just over two gallons (double that for California), ranking us about 30th among wine-consuming nations.

Now, if wine has become such an accepted alcoholic beverage of dignity and moderation, how come such a low U.S. consumption per capita? Good question; startling answer. About 4% of the adult American population drinks about 53% of all wine consumed in our country. So found a national probability study done by Wine Spectrum, Coca-Cola Co.'s wine marketing arm, about two years ago. To qualify for membership in the elite "four-percenter" category one must simply consume wine four or more times a week.

And the same study found that 68% of adult Americans drank no wine at all during a controlled 30-day period!

Even if there has been a small increase in the per cent of "serious" (four-or-more-times-a-week) consumers since the Wine Spectrum study, it is obvious that relatively few Americans consume a relatively large amount of the grape to support our current, unexciting two-plus gallon per capita rate. And these heartier consumers constitute a public unto itself, one that exerts a positive influence in today's wine marketplace.

To reach this special public, scattered as it is throughout the nation's population, both American and foreign wine producers are nowadays budgeting millions for media advertising, including big bucks for prime time tv.

Wineries jump at opportunities to pour their wines at major public tastings, wine festivals and large seminars where frequently 100 or more different winery tables line the four walls in a single auditorium or hall. It's a means to confront, eyeball-to-eyeball, a large number of four-percenters who often travel far and pay large admissions to be "updated" on the wine scene.

And while good advertising may influence some knowledgeable consumers to try a particular brand, producers have learned that educated palates frequently dictate final judgments.

To participate in major tasting events is to offer a winemaker's best wines for on-the-spot evaluation.

Because the serious wine consumer's thirst is not only for wine, but for wine knowledge, there are today about 500 wine writers who are published regularly or sporadically in some form or another. A number of them are widely and well read in leading newspapers and magazines, and some have authored books on wine, of which there have been an abundance in recent years.

Not only do most written wine words have a strong influence on consumers, they frequently influence winemakers. A "rave" notice about a particular wine by a widely read and respected wine writer has caused that wine to be sold out virtually overnight. On the other hand, a bad review about a winery or its wines can add dust to a producer's inventory.

And how better to satisfy this thirst for knowledge than to attend formal educational courses devoted specifically to the subject of wine. At last count, there are about 1,000 well-attended wine courses being offered in the U.S., the majority conducted at 600 different colleges and universities. The national Society of Wine Educators boasts over 600 members.

Do beer and spirits consumers have their own private newsletters, magazines and newspapers? Do they have their own membership organizations that meet regularly to hear makers talk up their products and to taste, compare and critique them? Do they have the benefit of formal judgings by experts who bestow medals for brand superiority? Wine consumers have all of the above. Their fierce dedication to the fermented grape product has created a demand—and the support.

All that said, let the record show that today's devoted American wine consumer is already—or is on his or her way to becoming—sophisticated. Many experts allow as how today's American consumers are, in fact, more sophisticated than any others anywhere. And these affluent aficionados will continue to dictate American wine trends.

Some marketers (and producers) still insist that the white wine boom is a fad that will fade. Others insist that red wine will soon dominate once again—and forever after.

But consumers are performing to the contrary.

Peter Sealey, vp-market planning and marketing services for Coca-Cola Co.'s Wine Spectrum, noted in a recent speech that "we might believe that as people become more sophisticated wine consumers, they will drink more red, but this is simply not true in the over-all premium-priced market. The trend there to white is even more pronounced."

Statistically, red wine shipments to market in 1981 were down about 2% from 1980 figures, according to California's Wine Institute (the trade association for California wineries) compilations. White wine was up 14.8%. No trend to red yet. Champagnes or sparkling wines are asserting themselves somewhat. U.S. shipments from France last year set a new record, and for the first time exceeded French Champagne shipments to any other country.

A rave notice about a particular wine by a widely read and respected wine writer has caused that wine to be sold out virtually overnight.

Whether or not the latest innovation—"light" or "soft" wines—is a winner depends on yet-to-be-determined consumer acceptance. The industry remains divided as to their success. The same goes for wine marketed in cans. The wine may taste the same, but consumers have been raised on bottles. Wine-in-a-box is becoming practical and economical for restaurant house wine dispensing, but it is still not common in consumer refrigerators. Again, it's the bottle training.

Meanwhile, the man who rightly predicted the wine revolution 16 years ago says now that America's wine consumption can and will easily exceed 10 gallons per capita when wine can be purchased in *all* grocery stores throughout the U.S., not in just some locales.

"I know that statistics show that more women buy wine these days than do men," Mr. Adams acknowledges, "but when any woman shopper can easily pick up wine along with her foodstuffs, consumption will take off.

"We're in the midst of a great experiment," he concludes, "and all of us are subjects. If Thomas Jefferson was right when he said 'no nation is drunken where wine is cheap,' then our increasing wine consumption will cause drunkenness to decline, and drinking will have become civilized in America." AA

Table wine growth versus total wine growth over the past decade

BEER

The 'big 2' strengthen their grip

By Anna Sobczynski

Kingdoms in the beer industry come in two sizes: Giant and small.

On the one side are the vast expanses of the first tier of breweries—Anheuser-Busch and Miller Brewing Co.—always overlooking the others from atop the highest hills.

On the other side are the entities of the "second tier," ever worrying about survival, always conscious of their vulnerability.

It is easy to understand why those of the second tier might feel a bit warier than usual these days. The two giants of the industry, though they clash mightily in their intramural contests, command power and respect. And what they do—or don't do—in many ways shapes the beer industry as it is known today.

Riding its famous Clydesdale hitch, Anheuser-Busch is now blissfully trotting along at the top of the brewing industry, where it holds a commanding lead.

With a 28% share of the nation's beer market, the St. Louis-based company enjoys an enviable vantage point over the rest of the industry.

But there is always the danger of smugness that comes with being No. 1, and Anheuser-Busch refuses to succumb to that temptation.

The company's advertising budget, its marketing strategy and its expansion plans all bear out A-B's conviction that if its "King of beers," Budweiser, and the rest of the royal court are to reign supreme, their subjects must believe that the palace residents continue to earn loyalty.

The year 1982 marks Anheuser-Busch's 25th year as the most popular head of beer on the nation's steins. Ever since

(Continued on Page M-38)

Anna Sobczynski, a business writer in Wheaton, Ill., is a frequent contributor to Magazine/Section 2.

The 'big 2'

(Continued from Page M-37)

A-B wrested the lead from Jos. Schlitz Brewing Co. in 1957, the company continues to climb higher every year. But no fanfare or fireworks are being planned for its milestone anniversary.

"We had thought about making a public statement or featuring the 25th year at the top in our advertising, but we decided against it," says Michael J. Roarty, vp-marketing. "We don't want the consumer to think we're so pleased with ourselves that we forgot him."

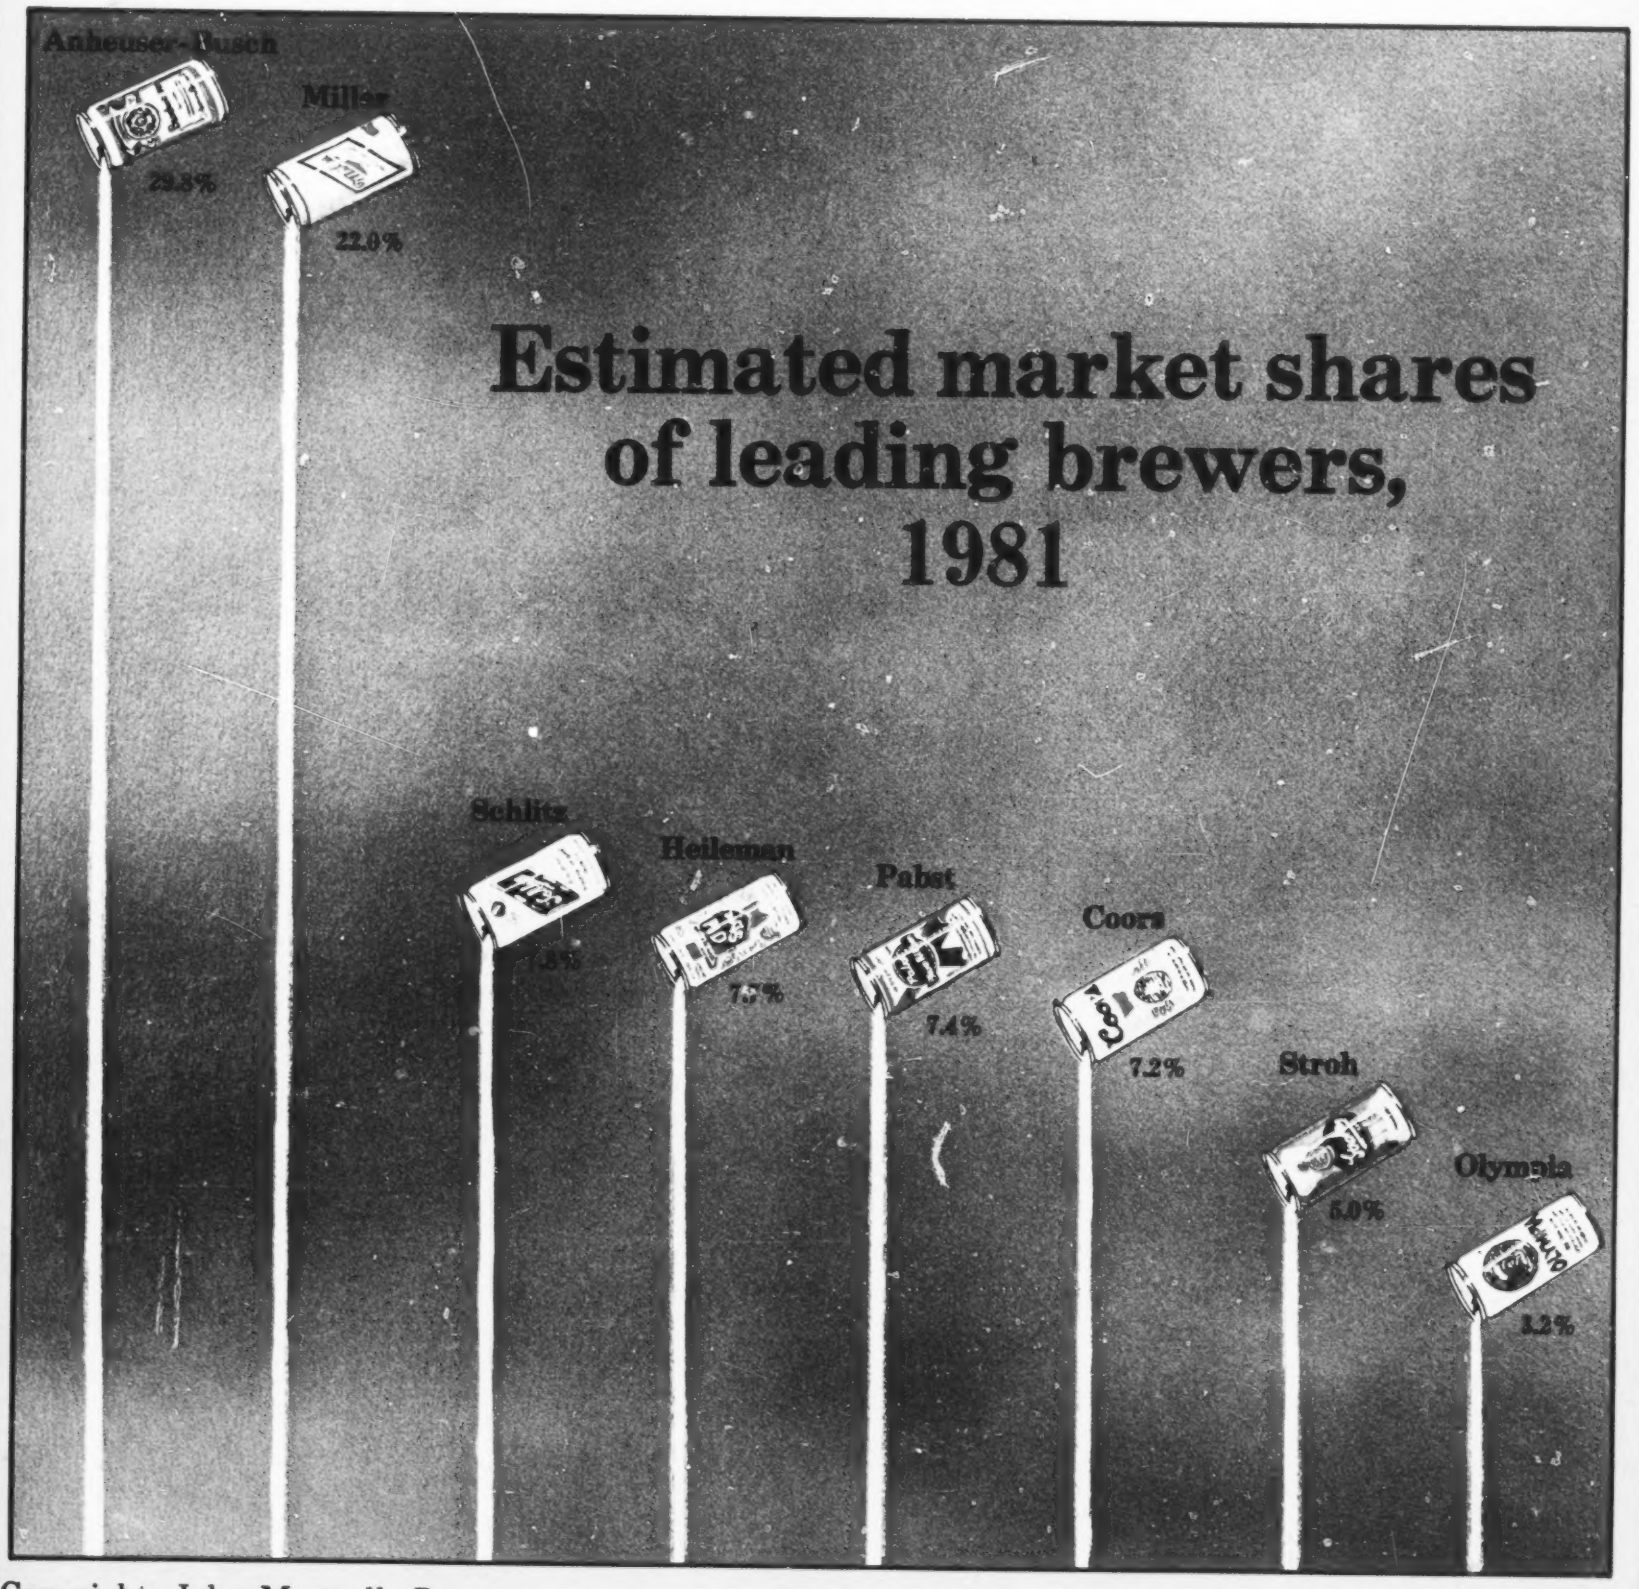
One thing Anheuser can never allow itself to forget is who's No. 2. Miller Brewing Co.'s claim to fame rests on its aggressive and skillful marketing, which has given A-B a run for its throne for the past 12 years. Miller, a subsidiary of Philip Morris Inc., makes no secret that its fight for the froth on top will continue to be an unrelenting one. And no one realizes that better than A-B.

As these two giants battle it out in a market they dominate together, other brewers, especially those in the "second tier," stand by lamenting their position and scheming—perhaps romantically at times—to get a larger piece of the manor.

Even though A-B has been growing at a rate roughly four times the industry norm (8.5%, compared with 2% to 3% a year), registering a healthy $4.4 billion in gross sales last year, it has been forced to run to keep itself ahead since Miller set a rapid pace in 1973.

Before 1970, the beer industry had been busy doing what it does best—brewing beer and satisfying the taste buds of its vaguely defined audience, the beer drinker. Enter the two words that "changed the competitive nature of the industry," says industry consultant Robert Weinberg of Weinberg & Associates, St. Louis. Those two words —Philip Morris—brought their own new word to the brewing industry: Marketing.

It's ironic that an outsider brought such irrevocable change. The lesson Philip Morris taught was that the marketplace is not a cosmic unknown, but a definable, diverse and, above all, reachable grouping of entities. As Philip Morris began



Estimated market shares of leading brewers, 1981

Copyright: John Maxwell, *Beverage Industry*, Feb. 5, 1982. Source: Lehman Bros. Kuhn Loeb Research

to untangle the web, Miller began to "understand who was drinking beer—culturally, ethnically, socially and economically," says Alan G. Easton, vp for corporate affairs at Miller.

And so this, at the time, seventh ranking upstart kid, whom few took seriously save for his doting parent, applied his new-found knowledge so effectively he was able to bypass such brewing biggies as Pabst, Blatz and Schlitz on the way to the near-top—No. 2.

Meanwhile, the giant at the top couldn't help but sit up, take notice and delve into marketing know-how with unabashed fervor, as Miller edged ever closer. Even the people at Miller today will agree that A-B skillfully learned to use the tools of its master competitor. "They have been good and fast learners," Mr. Easton says.

But what stunning marketing feat of Miller's made Anheuser sit up and first take notice? Once Miller had defined its audience, it realized that the advertising effort that supported its flagship brand had been made to the wrong market segment. Miller High Life was so much Miller's No. 1 product that it almost made Miller a one brand brewery. It was exotically referred to as "the champagne of bottle beers."

The analogy cited the high brow tastes of the country club set who drank the beer with relish, but while the tennis crowd tastefully downed a beer or two after a jaunt on the courts, they were not the volume beer drinkers. The everyday man who drank beer, drank *it* and not champagne!

This is why Miller's first advertising effort was a sort of uncampaign. That is, its purpose was to undo the country club image of High Life, to "neutralize the perception," as Miller's Mr. Easton describes it. Associating the product with everyday things and events, the 18-month effort culminated with Miller's 1973 unveiling of "Miller time." That campaign, which was developed by McCann-Erickson, New York, presented Miller High Life beer as a reward to anyone for a job well done. The time spent in enjoying that reward was, of course, "Miller time."

Today, that phrase is more than an advertisement, Mr. Easton explains. "Miller time has passed into the American lexicon," he says. "It's an idea. Now

(Continued on Page M-40)

'Second-tier' players jockey for position

Schlitz

Jos. Schlitz Brewing Co., the dethroned leader of the brewing industry, is now a distant third, behind Anheuser-Busch and Miller Brewing Co. and on top of the "second tier" of breweries. In 1981, Schlitz had an estimated 7.8% share of the market and just more than $1 billion in pretax revenues. Still, its current standing in the industry is a noteworthy accomplishment in face of overwhelming odds.

In its recent history, the Milwaukee-based brewer was crippled by a number of crucial mistakes or misjudgments. Among them was a reformulation of the company's flagship brand that ultimately led to consumer dissatisfaction.

According to an industry observer, the Schlitz product today is probably even better than it was before the reformulation, but its reputation has been hurt.

Despite a decline in barrelage last year, the company has been making a slow but purposeful recovery under the leadership of chief executive officer Frank Sellinger, a 47-year brewing industry specialist and a master brewer. Heading a new management team, Mr. Sellinger has put support behind a campaign that has gone through several stages. (One industry analyst estimates that Schlitz, together with Adolph Coors Co., spend the most money-per-barrel on advertising.)

Mr. Sellinger is Schlitz' spokesman in the J. Walter Thompson U.S.A.-created ads.

Last year, G. Heileman Brewing offered to buy Schlitz for $494,000,000, but the U.S. Justice Department opposed the merger. Carol Vollmer, manager of corporate communications with Schlitz, says the brewery continues "to pursue its business as an independent company."

But Jerry Steinman, editor and publisher of "Beer Marketer's Insights," an industry newsletter, says the two companies are still talking.

Heileman

Russell Cleary, head of G. Heileman Brewing Co., has been ungraciously referred to as the "guerrilla fighter" of the brewing industry. It is a term used with respect, however. He has been described as a pricing and marketing wizard.

G. Heileman, based in La Crosse, Wis., is the country's fourth largest brewer, having raked in revenues in excess of $931,000,000 last year. The company's earnings have been up 19 of the last 20 years.

But, whereas second-tier breweries have been said to be "in trouble," Heileman looks to be immune from the danger and Mr. Cleary's unconventional approach to marketing is cited as the reason.

The brewer has no national brand to compete head-on with the likes of Budweiser or Miller High Life. Instead, Heileman distributes more than 30 brands, primarily throughout the Midwest, Colorado, Arizona and Kentucky.

When Heileman takes over a brewery, the list is augmented by another member of who's who in the history of brewing. For starters, there are Blatz Brewing Co., Jacob Schmidt Brewing Co., Rainier Brewing Co. and Drewery's Ltd. U.S.A. After acquiring them, Heileman did not move in its existing brands. Instead, it continued to sell the products of that regional brewer.

The result is "we don't undermine the awareness people already have in those markets for those products," says Ron Drout, vp-brand management. Its Old Style brand, for example, commands almost a 37% share of the Chicago market, according to Mr. Drout.

Heileman is primarily a marketer of popular priced beer, and it has 11 brands in the lucrative light beer category. Having so many entries in these areas could prove even more fortunate for Heileman. Donald Rice, an industry analyst with Blunt, Ellis & Loewi, Milwaukee, says that for the first time in a decade, the popular priced segment of the industry is *the* hot area.

Pabst

"If anyone can save Pabst and bring it out independently, it's Bill Smith," says Mr. Rice, the analyst with Blunt, Ellis & Loewi. William F. Smith became president and chief executive officer of Pabst Brewing Co. last fall after he came from Pittsburgh Brewing Co., which he is credited with saving.

The hope is that the management reshuffling and proxy fights that have been plaguing the company will finally subside so that Pabst, which had $811,000,000 in revenues in 1981, can once again concentrate on the business of brewing.

Much attention has focused on a proxy fight between the Pabst board of directors and Minnesota entrepreneur Irwin Jacobs, the largest stockholder in Pabst. The issue may be resolved when Pabst has its annual meeting in April.

But besides skirmishes at the top, the company's flagship brand has been "suffering from atrophy," as an industry observer notes. For a long time, Pabst has been trying to "premium-ize" its Pabst Blue Ribbon beer.

That's somewhat paradoxical because, before these attempts to upgrade its image, Pabst had been considered a premium product. In fact, in 1893, Pabst was picked as "America's Best Beer" at the Chicago Columbian Exposition. Some blame Pabst's "premium beer at popular prices" strategy for the product's lowering in sales and stature.

At any rate, to help enhance its standing, Pabst has put its money behind a "real taste of beer" campaign that relies on testimonials by "real people" attesting to the worth of the product. McCann-Erickson, New York, is the agency.

Meanwhile, Pabst is attempting to acquire Pittsburgh Brewing Co. for $7,800,000. Both sides have reached agreement in principle.

Among its brands, Pabst now offers Pabst Light, a low-calorie version of its flagship brand. It is also scheduled to go into test during the second quarter of this year with Jacob Best Premium Light, a 96-calorie entry.

Coors

Adolph Coors Co., the sixth largest brewery in the country, with net sales of $929,900,000 in 1981, has long been a name associated with the mystique of the West and the mountains, perhaps because it isn't available in the East. Coors now sells its brands in 20 states, and the company claims to be No. 1 in Texas and growing in California.

It would be a happy state of affairs for the Golden, Colo.-based brewery, were it not for the fact that both Anheuser-Busch and Miller Brewing Co. place those two areas of Coors strength high on their lists of "must-haves."

Though the main battle is being waged between the Big Two, Coors is in danger of getting hurt. And it must keep a tenacious hold on its Texas and California markets in order to survive.

Of the A-B and Miller challenges, Bob Keyser, corporate communications representative with Coors, says: "They're out to prove they have deeper pockets than anyone else. But we'll be competing aggressively in those two areas. We know the two majors are targeting those states, and we're up to the challenge."

Coors' own pockets, at least for advertising, have also been deepening over the past few years. The company's ad budget increased from $9,000,000 in 1976 to just under $90,000,000 in 1981. That increase has been the price paid to remain a strong regional brewer.

Company philosophy is to increase market share in Coors' own area and then to consider expansion. In face of A-B and Miller challenges, that strategy may be particularly significant in the near future. The Golden plant is being expanded in order to reach 20,000,000 bbl. capacity by the mid-1980s. The company produced 13,3000,000 bbls. last year, slightly less than the year before. The company has also bought land in Rockingham County, Va., with long-range plans to build a 10,000,000 bbl. facility there.

Coors Light, one of the later entries into the category, is said to hold a 10% share of all light beers sold. Figures show it grew by 35% in 1981 over 1980. A campaign created by Ted Bates & Co., New York, emphasized the "surprise" the consumer experiences in finding out how well Coors Light tastes.

Meanwhile, the company is testing two brands for the superpremium market.

One is George Killian's Irish Red Ale, which is being tested in Santa Barbara, Monterrey and San Francisco, Cal.; Wichita, Kan., and Colorado Springs, Colo., is scheduled to be rolled out into the Coors market area throughout 1982.

The other product in test is Herman Joseph 1868.

Stroh

Stroh Brewing Co., the nation's seventh largest brewer, holds about a 3.8% share of the national market. The regional brewer distributes in 28 states, most of them in the Midwest, Southeast and now parts of the East since its acquisition of the F&M Schaefer Brewing Co. last year.

Although limited distribution is a problem that plagues the regionals, Stroh capitalizes on it in its advertising. Its agency of record for the past 14 years, Doyle Dane Bernbach, devised a campaign where people go out of their way to find a Stroh's. The ad budget totaled about $16,000,000.

Stroh plans to expand into Florida this year with Stroh and Stroh Light. It also plans to introduce a new superpremium product in May.

Olympia

Olympia Brewing Co. has capitalized on an invasion by alien beings since the fall of 1980. Americans have gotten hooked on the Artesians.

Chiat/Day of Los Angeles, the agency for the Olympia, Wash.-based brewery, created the highly publicized Artesian campaign, receiving inspiration from the artesian well water the company's beer is made from.

The campaign has won accolades for its creativity. But, as one analyst says, "It sells T-shirts. The only thing it doesn't sell is beer." The company had a $1,400,000 loss on revenues of $393,000,000 in 1981. The loss represented Olympia's first since Prohibition.

Olympia executives, while acknowledging that the campaign hasn't made Olympia a runaway overnight success, profess to be assured that the company is in line for better days.

Olympia continues to rely on the sale of its flagship brand and Olympia Gold, its entry in the light field. According to the company, "Oly" Gold is the No. 1 light in the Pacific Northwest, the company's home territory, No. 2 in Chicago and third in California.

But the brewer's 3.2% national market share was not generated by the sales of Olympia and Oly Gold alone. The company also owns the Theodore Hamm Brewing Co. and Lone Star Brewing Co., which give Olympia plants and markets in St. Paul and San Antonio, respectively.

After acquiring Hamm's, Olympia resurrected the Hamm's bear figure, which is now 25 years old. Partly as a result of this campaign—"From the land of sky blue water" is the theme—the brand has been turned around after more than a decade of declines. —*A.S.*

Heileman bottles a can-do philosophy

By Jack Hafferkamp

Last October, the U.S. Justice Department announced that it was opposed to a proposed merger of the G. Heileman and Jos. Schlitz brewing companies, a logical combination that one industry observer describes as "fitting like a hand in a glove."

That opposition was a great blow to the aggressive, ambitious La Crosse, Wis.-based Heileman, which hoped by the move to leap from the industry's second tier to almost equal partnership with the twin goliaths of beer, Anheuser-Busch and Miller Brewing Co. Now, after a winter of quiet discontent, it appears that Heileman plans to continue its industry-leading growth pattern and does not intend to let the merger matter rest.

Jack Hafferkamp is a business and free lance writer in Chicago.

In the beer business of the last two decades, Cinderella's last name has been spelled Heileman. The industry's major historical theme has been the elimination of the nation's small and medium brewers and a concentration of half the country's total beer market in the hands of just two companies, A-B and Miller, a division of tobacco giant Philip Morris Inc. Yet while other local and regional brewers have gone down around it, Heileman's industry position has risen from 31st to 4th. None of the competing second tier brands (Schlitz, Pabst, Coors and others) has matched Heileman's growth. In 1981, Heileman was the only major brewer outside of A-B and Miller to show volume, sales and earnings increases. In 1982, its sales are expected to exceed $1 billion for the first time ever.

"Heileman has succeeded because it didn't attempt to become a national one-brand brewery," explains Don Rice, senior market analyst with Blunt, Ellis & Loewi, Milwaukee. "By beer industry logic, it did everything wrong. Economic necessity led Heileman to use a technique best described as multibrand, multiregion marketing. And it's worked."

Old Style, the company's flagship brand, is emphasized in Chicago, Wisconsin and contiguous states. Rainier leads in the Northwest. Schmidt is in and around Minnesota's Twin Cities; Wiedemann around Cincinnati, and Carling Black Label in Baltimore. This company policy often has been described by Russell G. Cleary, president, chairman and chief executive officer, as "you go fishing where the fish are."

"I think Heileman management understood where the beer business was going," says Mr. Cleary, a veteran of 22 years with Heileman. "We knew that you couldn't rest on your laurels selling a good product in two or three states. We knew you had to develop a long-term survival strategy. If we were too limited in our geographical distribution, we would be vulnerable to the big guys. We have tried to develop a collection of regional breweries by joining other regional brands with the original Heileman brands.

"Our objective has been to increase the penetration in the markets that are natural to us, and—secondarily—to broaden our base throughout the country. Thus we acquired Blatz in 1969, Rainier in '77, Carling-National in '79 and so forth."

Altogether, Heileman puts out 30-odd brands, with its eight major labels (Old Style, Blatz, Rainier, Colt 45, Schmidt, Black Label, Wiedemann and Special Export) accounting for about 80% of total output. Throughout its entire development program, Heileman has sought to avoid "leap frogging," jumping into distant, hostile territory. The preference has been "to grow contiguously," a style developed to promote Heileman's chief preacquisition product, Old Style, which is the No. 1 selling beer in Wisconsin and Illinois.

"Right now," says Mr. Cleary, "the main targets for our Old Style development plan are Michigan, Indiana, Iowa, the Dakotas, Nebraska, Missouri and Southern Illinois. The goal is to get distribution on a wall-to-wall basis."

Analyst Mr. Rice believes that

Second tier

(Continued from Page M-39)

when somebody just does something well, his reward period has come to be known as 'Miller Time.'" Miller Brewing has been reaping the rewards of its own "Miller time" since.

The following year, Miller caused ripples of laughter to run through the competitor's brewery when it unleashed Lite on an unsuspecting industry.

Everyone guffawed at the ludicrousness of the "diet beer" concept, which had been tried in the past by several brewers and failed. Everyone that is, except Miller.

You will remember that targeted segment marketing and market analysis were the cornerstones of the Philip Morris philosophy, and they figured highly in Miller's belief in the viability of its new product. Lite may have been a lower-calorie product, but its merit was not translated into a calorie count for the diet conscious.

Miller took the Lite concept light years away from dieting and thus a new campaign and a new product were born. "Tastes great. Less filling" is still the brand's campaign theme.

"Miller took a brand and created an industry [light beers]," says Donald Rice, an industry analyst with Blunt, Ellis & Loewi, Milwaukee. "They changed it from a diet product to a macho product and ran with it."

Miller prides itself on the longevity of its themes, which Mr. Easton believes is an important aspect of the company's marketing successes. As he points out: "Other major brewers have cycled through a variety of campaigns. Once we develop our creative strategy and theme, we stick with it. As an advertising agency representative once explained Miller's enduring product themes, 'If it ain't broke, don't fix it.'"

Lite enjoyed a 60% share of market in 1981, according to several industry sources, and and the campaign is now entering its eighth year.

A new version of the national "All Stars" campaign, a bowling tournament, debuted on March 14. The campaign's spots continue to feature known personalities, predominantly former athletes—"the kind of guys you'd like to have a beer with," as Mr. Easton describes them. Weekend television sports shows are the primary vehicle for the campaign.

"Miller took a brand and created an industry. They changed light beers from a diet product to a macho product."

In fact, all of the beer industry has become sports oriented. Miller claims that its original market research precipitated the trend toward sports when it discovered that the demographics of America's sports fans pretty well match those of the volume beer drinker.

Here again, Anheuser-Busch was a perceptive pupil. The company now claims to be the largest sports sponsor in the U.S.

Knowledge of one's market area alone, however, does not a successful brewer make. A-B and Miller together would not command 52.6% of the market if they didn't have the vast financial resources to realize their findings.

So when Miller finally proved convincing in its belief that people bought beer for its aura, as well as its aroma, A-B began pouring copious funds into advertising to support its top-selling brands. The decision was not made overnight, however.

Three years into the Miller High Life campaign and two years after Lite was introduced, A-B was crippled by a 100-day work stoppage. The issues revolved around work rules and grievance procedures. Bottles of Michelob beer, A-B's superpremium brand, were hard to find. Miller High Life, which had been steadily gaining market share, could now do so almost unimpeded. Lite was in its infancy and not only lacked contenders in its own category, but now had little competition from the best-selling brands of the top brewer in the country.

The aftershock of the June, 1976, strike reverberated throughout the A-B brewery until well into the first quarter of the following year. But rather than wring their hands in despair, the executives at Anheuser-Busch treated this as a time of reflection and barrel-searching. The bottom line was, "We're still beating them, but we'd better join them."

The brand they chose to promote aggressively, Budweiser, the flagship product, was criticized by some in the industry as an empty cause. It was considered to be a mature brand and therefore immune to the most brilliant marketing efforts.

A-B went ahead with its newly educated gut instincts. Advertising budgets were increased substantially, packages were revamped by skilled marketers, who had been lured from such gurus of marketing as Procter & Gamble and campaigns were reworked. From 1977 to 1981, A-B's ad budget rose from $60,000,000 to $171,000,000. During that time, the barrels for two A-B light beer entries were also rolled out—Michelob Light and Natural Light.

The efforts paid off. A-B sales increased by 25,400,000 bbls., while the rest of the industry—*in toto*—produced only 23,000,000 bbls. Budweiser's new campaign, the brainchild of D'Arcy, McManus & Masius, St. Louis, followed in the reward-for-work-well-done vein initiated by Miller.

"For all you do, this Bud's for you" first broke in April, 1979, and has endured into 1982, helping the brewer sell an impressive 38,200,000 bbls. last year—70% of the company's total volume. (Miller's total barrelage last year was 40,300,000.)

Budweiser's ads have been aimed at blacks, Hispanics and college students. Soon, broadcast spots will be featuring women. The college crowd was introduced to the TasteBuds, a motley crew of beer tempters featured during "Saturday Night Live" broadcasts.

Optimistic and sure of itself best describes A-B's attitude toward its third light beer offering, Budweiser Light.

A-B, like the rest of the industry, was at first skeptical about the selling power of light beers. This is why it didn't take the leap into light until well after Miller's Lite was running away with the category and the profits.

Still, according to industry analyst Mr. Rice, Michelob Light is a very successful brand for A-B. Natural Light, on the other hand, is not doing that well, according to Jerry Steinman, editor and publisher of "Beer Marketer's Insights," an industry newsletter. While Lite last year was the only light beer among the top 10 best sellers—it was, in fact, the largest-selling brand last year after A-B's Budweiser and Miller High Life—Natural Light was not meeting A-B's expectations, according to analysts at Sanford C. Bernstein & Co., New York.

A-B reacted accordingly. First, the brand was repositioned as a mid-priced product below the premium priced light beers like Miller's Lite. Second, a new campaign was introduced to associate the product with good-tasting food. The new campaign, with "What's more natural than Natural Light" as its theme, began running in the late fall of 1981.

According to the company, the brand's decline has been arrested. Two earlier campaigns attempted and apparently failed to deal with Natural Light's marketing difficulties. Industry sources say the product's name was confusing. This prompted the introduction of a campaign in which spokesman Norm Crosby urged consumers to "Just say 'Natural.'"

This effort was followed by testimonials from known sports figures and other celebrities who claimed to have "switched" to Natural Light—obviously from Miller's Lite. So now, following repositioning, repricing and campaign doctoring, A-B hopes the brand will take off as successfully as its kin. Together with Michelob Light, Natural Light now holds a 17% share of the light beer market.

Optimistic and sure of itself best describes A-B's attitude toward its third light beer offering, Budweiser Light. Pleased with the results of test marketing, A-B is now ready to enter the light battle with Miller. A campaign for Bud Light broke on March 1 to coincide with a phased rollout of the product. Network television, in which 70% of the campaign is concentrated, will begin running the commercials around the end of April. To reinforce strong ties to its well established relative, Budweiser, the new product's ads will feature a single Clydesdale horse. The theme, "Bring out your best," coincides with the company's fondest hopes for the product. Needham, Harper

Heileman's approach developed from necessity. He says Heileman became the industry's "merger specialist" because it didn't have money to build new facilities all over the map. Its only route to growth was through acquisition.

One unanticipated benefit of this strategy is that Heileman has never had to pour big money into a national media campaign, bringing it "substantial savings" by going with less expensive local and regional advertising.

In 1980, Heileman's total output was about 14,000,000 bbls., very near that of Schlitz, Coors and Pabst. Each had around 8% of the national market. Miller put out about 37,000,000 bbls. for 21%. Anheuser-Busch's output was 50,000,000, or 28% of the national beer market. In the following year only A-B, Miller and Heileman had significant gains, with the Anheuser and Miller combined market share reaching 54%.

The proposed Heileman-Schlitz merger would have launched Heileman into the same league with the two majors. Specifically, it would have created competition in the Sunbelt, which is currently the playing field of A-B and Miller.

Heileman's operations are concentrated in the North. The troubled Schlitz, on the other hand, closed its brewing operation in Milwaukee and is, in effect, heavily concentrated in the South. A merger would, in one stroke, keep Schlitz from falling into A-B's or Miller's hands and make Heileman a national operation.

Understandably, there was opposition to the merger from other brewers. Less understandable was the opposition from the Reagan administration, whose trustbusters have otherwise winked at the matings of much larger fish than Heileman and Schlitz. In the beer industry, there are people convinced that if the Justice Department is genuinely serious about real world competition, it is going after it in a backwards fashion.

Mr. Rice goes so far as to call the Justice Department move "ludicrous."

"This decision," he says, "is totally destroying potential competition in the industry. The gap between the first and second tiers is widening. The Justice Department is essentially giving the industry to Anheuser and Miller. It will give them 75% to 80% of the national market."

Since the announcement of federal opposition last Oct. 21, Heileman has kept its cards close. But now there are rumblings in the industry, and the vehemence of Mr. Cleary's "no comment" could suggest that another round in this battle maybe coming up. At this moment Mr. Cleary remains noncommittal about specific plans. Yet he does say this:

"I think there is a legitimate concern that as the gap between the top two and the balance of the industry widens that it will be more difficult to compete. Obviously we think that the most important aspect of preserving competition in the beer business is creating a third strong national company. The merger of Heileman and Schlitz would have done that."

As Mr. Rice sees things, "It's only a matter of time until Heileman owns Schlitz. Russell Cleary does not roll over easily.

"All sorts of things can occur now, but they boil down to two main possibilities regarding the merger. Heileman can acquiesce to some degree, and give up some of its brands in areas where its market share is very high. And/or the company will just say to the Justice Department, 'You can't win this in court; let's go.'"

In other words, to achieve the merger Heileman may be willing to give up some of its smaller brands to local or second tier competitors. Theoretically—and perhaps in fact—this would increase competition in the areas where Heileman is especially strong, and thus pave the way for increased national competition. AA

& Steers, Chicago, handles the account.

Miller is also bringing out what it hopes will be its best shot at the popular brand portion of the superpremium segment, now dominated by Michelob.

According to Miller's Mr. Easton, the brewery will expand Special Reserve from three test markets into Tucson, Ariz.; Fresno, Cal.; Atlanta; Rochester, N.Y.; Baltimore, and Milwaukee for more tests.

Some in the industry also expect Miller to introduce a popular-priced beer this year, but company executives refused to comment. The popular-priced beers, long a stagnant category, are expected to show real growth this year, making the segment a likely vehicle for new entries.

Few of Miller's 40,300,000 bbls. produced in 1981 made it overseas. The company has modest international distribution. Its chief competitor, however, has been hopping across both the Atlantic and Pacific Oceans. Budweiser is now the No. 1-selling import in Japan, according to company sources, and it is slated to enter Hong Kong this year. A locally brewed "Busch" brand beer is to appear in France as well.

On the home front, the Big Two are expected by industry sources to concentrate their marketing efforts even more on the lucrative Sunbelt region, as well as the Midwest. With disproportionately high advertising budgets, these combined forces can wield a heavy hand against Texas and California marketer Adolph Coors Co. and Midwest beer lord G. Heileman Brewing Co., as well as other second tier brewers. In the interests of fair play and the exhiliration of competitiveness, onlookers hope the blow won't be a fatal one. But if the marketing histories of the Top Two are any indication, even when the star of the show is a smash, one slipup or oversight can make any understudy an overnight success. AA

When T-shirts are the medium, Hanes Printables gives you the maximum.

Maximum exposure.

How do you get it from a T-shirt promotion? By choosing T-shirts that people enjoy wearing — T-shirts recognized for their comfort and quality. Hanes Printables offers the winning styles and rich colors, the quality workmanship and brand confidence that make our T-shirts great to print on. And to put on.

Maximum service.

How can you be sure that your T-shirts will arrive when you need them? By relying on the number one service organization in the imprinted sportswear industry. Hanes Printables helps coordinate all of your promotional requirements to make sure everything goes smoothly.

Maximum results.

When Hanes Printables® shirts are the medium, your company benefits from advertising exposure on top-quality, branded T-shirts, while our experience assures you of a dynamic promotion that brings great results. You won't just get a good response. You'll get the maximum.

Hanes Printables
The first name in quality.

Allbritton, 'News' unions face off

By STUART EMMRICH

NEW YORK—Texas financier Joseph Allbritton's plan to purchase the *New York Daily News*, announced last week, hinges on obtaining what he considers favorable contract concessions from the paper's 11 unions. A difficult task under any conditions, it is made more difficult by the 30-day deadline placed on those negotiations.

Mr. Allbritton, former owner of the now-defunct *Washington Star*, last Thursday signed a letter of intent with the Tribune Co. to acquire the *Daily News* provided that he is able to reach "satisfactory agreements in 30 days" with the unions.

Neither side would discuss the price being paid for the nation's largest general circulation daily, although it almost certainly will depend on what final conditions can be worked out with the unions. Mr. Allbritton will only be picking up the newspaper and its Queens and Brooklyn printing plants, not the valuable mid-Manhattan Art Deco office building that houses the *News*, nor the potentially lucrative nearby fleet facility.

It has been widely speculated that the Tribune Co. was willing to part with the paper for almost no cash if the buyer would pick up pension liability and severance pay that reportedly total to $90,000,000.

If the deal with Mr. Allbritton falls through, then the Tribune Co. could either continue its search for another buyer, perhaps work out an extension on the 30-day deadline with Mr. Allbritton if he requests it, or just decide to close the paper and assume those liabilities itself.

Mr. Allbritton met with union representatives Friday and said formal negotiations with the 11 unions would begin soon.

Arguing that the *Daily News* ran against the "classic mold" of most dying newspapers —afternoon distribution, No. 2 in its market and falling circulation and advertising—Mr. Allbritton said he was confident he could return the paper to profitability.

As a morning paper "growing in circulation and sound in advertising, with a strong Sunday edition, the *Daily News* is firmly entrenched as the No. 1 paper of the people of New York," Mr. Allbritton said.

Although representatives of the unions announced that they were "pleased and delighted" that the *Daily News* had apparently found a buyer, statements they made at their own press conference Thursday and opinions of those who have closely followed the *Daily News* indicate the road to reaching an agreement might be a rough one.

Labor mediator Ted Kheel, who has acted as an advisor to the unions during the past few months, acknowleged that reaching an

(Continued on Page 70)

Upfront tv sales outlook

Fall looks hot, prices up 10%

By COLBY COATES

NEW YORK—The tv networks and agency buyers are only in spring training now, but the early line on the 1982-83 upfront sales season suggests record numbers in everybody's stadium.

Both sides of the bargaining table already hint at a 10% to 12% prime time price hike next fall, and see that upward pressure spilling over into other dayparts, especially news and, at ABC and CBS, daytime.

With the three networks' fall schedules due for release by the first week in May, networks sales chiefs are fine-tuning their selling strategies. Meanwhile, agency buyers are advising their clients on upfront commitments, telling them to be ready to move quickly once the program lineups are set.

So far, preseason polls have failed to turn up a buyer who is not recommending a bigger upfront commitment than last year. Why do otherwise? ABC-TV sales estimates put current second-quarter scatter buys at 14% to 16% more costly than buys made in the 1981-82 upfront market. And compared to a year ago, second-quarter scatter is as much as 19% higher.

And there's more, too. The new higher prices for football telecasts are expected to channel some extra money into prime time; the networks are bullish about a second-half economic recovery and, for the first time in three years, there is no Hollywood strike to force anyone into a waiting game on the sidelines.

In addition, there is the programing situation. There is no question that some buyers are fed up with the way the networks run programs in and out of the schedules. Many are tired of guessing what programs are running when and how often. Coming into the fray in that frame of mind, it's not too hard to see that buyers are likely to heavy up on the tried and true, proven winners. Besides the security such programs offer, they also usually turn out to represent the best value.

As for football and the prices the networks will charge, buyers now are faced with a situation in which

Harley-Davidson jabs its Japanese competitors in this new effort for custom bikes now breaking in enthusiast magazines. Copy says the Japanese have tried to match Harley's style, but "something keeps getting lost in the translation." Carmichael-Lynch, Minneapolis, is the agency.

JWT writeoff $30 million

By CHRISTY MARSHALL

NEW YORK—JWT Group last week said the accounting irregularities in J. Walter Thompson U.S.A.'s syndication unit directly affected two of its clients. And rather than having a pretax writeoff of $24,500,000, as JWT reported earlier, the figure has been restated to $30,005,000.

The latest findings come seven weeks after JWT first disclosed that some irregularities had turned up in the books of the syndication unit. At that time, Marie Luisi, senior vp-spot buying and syndication units, was suspended without pay (AA, Feb. 8). Last week, in its latest disclosures about its investigation, JWT said it had fired Ms. Luisi, effective Mach 31. Still under orders from her attorney, Ivan Fisher, Ms. Luisi was not talking to reporters. JWT said its "investigation is continuing with respect to certain matters, principally of a legal nature." JWT declined to personalize its remarks when asked if the probe could lead to legal action against Ms. Luisi.

Contrary to earlier statements, the agency's latest report on its investigation says two clients were improperly billed for spot tv time. Don Deaton, senior vp-communications at JWT, declined to identify the clients. "What good would it do for that information to be out?" he asked. "They know who they are."

Most of the agency's major clients declined to comment on the matter. Earlier reports had Lever

Busch rolling out in France

By CAROLYN PFAFF and ANIKA MICHALOWSKA

PARIS—Anheuser-Busch and its partner in France, food conglomerate BSN/Gervais Danone, later this month will begin a $5,000,000 campaign to woo the French away from their traditional tipple and onto the first American-style beer ever offered here, the homeland of champagne and Perrier.

Starting around April 15, Doyle Dane Bernbach, ad agency for the new "Busch beer" as it is called, will play up the American theme to the hilt in print, tv and cinema ads. "We wanted a premium beer with a strong image and a new message," said Michel Lasfargues, manager of the BSN liquid products division. "We're pushing the American way of life—cowboys, wide-open spaces. In short, the whole Western ambiance."

One new device DDB is using is to have actors in the cinema commercial speak in English with French subtitles. That is a daring move, in the opinion of some observers, because French regulations discourage it; big fines have been levied on ads using English words in the text. Pepsi-Cola flaunted the rules last fall, however, and got away with a big English-language poster campaign that ran all over Paris with impunity.

The Busch case will probably cause discussion in Socialist France, but the best bet is that

last minute news

Canada Dry's $8 million account moves to Y&R

DALLAS—Dr Pepper Co. is moving advertising for recently acquired Canada Dry unit from Grey to Y&R, New York, agency for other Dr Pepper business. Latest media data put the ad budget around $8,000,000.

Report TWA asks O&M to take commission cut

NEW YORK—Trans World Airlines has reportedly asked Ogilvy & Mather to take a cut in its commission. Neither party would comment on the report. General Motors and Ford recently gained 2% commission cuts from agencies, and Chrysler has asked for direct billing.

Big debut expected for Gillette Widget tool

BOSTON—Gillette's safety razor division is planning to introduce Widget, an all-purpose tool that can be used for "scraping, cutting and trimming." To retail for $1, the plastic Widget comes with five stainless steel blades. Gillette is expected to have a significant introductory push, although it would not comment on Widget. Agency undetermined.

ITS FIRST COMPARATIVE SPOT

Gillette slashes at Bic

By JOHN J. O'CONNOR

In a figurative sense, the close shave that Gillette and Bic are treating each other to might better be described as throat-cutting.

Boston-based shaving giant Gillette, apparently fed up with Bic comparative advertising that poohpoohs the closeness of twin-blade shaving, has for the first time resorted to comparative advertising, as it touts the superiority of its Good News! disposable twin-blade over Bic's single-blade disposable.

A Gillette commercial that broke last week on network tv has a man telling viewers first the "good news": Nationwide shaving tests showed its twin-blade "gave a closer, smoother and safer shave than Bic." Then viewers get the "bad news": "If you use Bic you're not getting as close, as smooth, as safe a shave as you would with Gillette's Good News!" The spot ends with a thumb-in-the-eye remark, "Sorry, Bic."

Gillette's attack via BBDO follows by about three weeks a $10,000,000 Bic tv campaign that uses scanning electron-microscope photography to support the claim that Gillette's Trac II twin-blade cartridge does not shave closer than its single-blade Bic shaver (AA, March 29). Wells, Rich, Greene is the Bic agency.

Bic advertising manager Dave Furman characterized the new Gillette spot as "rapidly produced, personalized and emotional," which he said suggests that the facts in the Bic commercial have "touched a sensitive nerve."

The Bic exec said his company was "surprised" at the "frivolous,

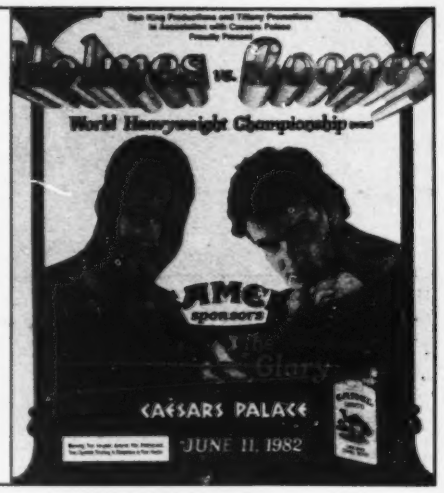
Fight hype

"The Pride & The Glory" is the promotional theme line for the Holmes-Cooney fight in the advertising, via Ross Salupo Advertising, Cleveland, and fight poster. Rockbill Inc. signed Camel cigarets for the promoters (AA, March 29).



world news roundup

Amsterdam—Leo Burnett International has bought Noordervliet & Winninghoff, the last and biggest independent agency in the Netherlands, billing $25,000,000. The existing office of Leo Burnett here, billing $7,000,000, will be integrated into the new Noordervliet & Winninghoff/Leo Burnett.

Rome—Italian authorities accused Kraft of violating commercial codes in its advertising and marketing of Bonnet, called "Friggitutto" (fry everything) in Italy. The product, they say, is nothing but liquid margarine and doesn't comply with standards for cooking oils.

Tel Aviv—Israel's largest advertiser, Bank Leumi Le-Israel, is moving its $6,000,000 account to Arieli Advertising, after 30 years with Tal-Aroyo.

Sydney—Nabisco is facing a legal challenge from Australian competitor Sanitarium, which charges Nabisco with misleading advertising in its current campaign for Vita Brits breakfast cereal. The ads claim Vita Brits has lower sugar content than Sanitarium's Weet Bix.

Duesseldorf—Beecham subsidiary Lingner & Fischer, is moving its $2,500,000 account for Odol, Germany's No. 1 mouthwash, to Gramm & Grey here, after only a year with Heumann, Ogilvy & Mather.

Rio De Janeiro—Philip Morris is test marketing Chesterfield cigarets here, with the slogan "The most famous American," already used to launch the brand in Argentina (where it is No. 2).

London—The European Assn. of Advertising Agencies, spurred on by Procter & Gamble, is about to launch a major lobbying drive to convince local governments to increase commercial time on tv. The opening target will probably be Germany.

Qube blitzes Pittsburgh

By MAURINE CHRISTOPHER

A marketing and promotion blitz is under way to sign up subscribers for Warner Amex of Pittsburgh, the country's most elaborate cable system, and to build interest in the formal Qube Day launch there set for April 13.

Newspapers, radio, tv and cable will be used in the introductory campaign created by Ogilvy & Mather. Door-to-door salespeople will carry detailed brochures to explain to householders just what is available on the 65 operating channels (and at what price) in a black box that will eventually offer 80 viewing and service choices.

Subscribers now will get a cornucopia from the RCA Americom and Western Union cable satellites. Nearly all the advertiser-supported, nonreligious networks from the birds will be in the Pittsburgh lineup. The list ranges from Black Entertainment Network and C-SPAN to CBS Cable, Music TV and ARTS, Nickelodeon and CNN I and II, plus one superstation, WTBS, Atlanta. Basic tiers will come in five different packages, priced from $5.35 for a relatively limited number of channels to $9.45 for basic with Qube.

The premiere will demonstrate Warner Amex's third two-way, talk-back setup in action with Mayor Richard Caliguiri and Warner Amex Cable chairman Gustave Hauser participating in the ceremonies.

From the premium pay category Pittsburgh viewers may choose Westinghouse-Teleprompter's Home Theater Network, at $3.95, Warner's own Movie Channel at $5.95, Time's Home Box Office at $6.95 or Teleprompter-Viacom's Showtime, available at $9.50 in combination with Qube.

Everything comes in multiples on this system, even pay per view, allowing customers to call or push a button to order "blockbuster" programs for which they will be billed individually later.

Pay per view on "Viewer's Choice" in Qube homes kicks off opening night with a Marsha Mason and Kristy McNichol film, "Only When I Laugh," followed by a second feature, "Superman II."

Ted Campbell, president of Warner Amex of Pittsburgh and former general manager of Warner Akron, will hire an ad staff to sell local minutes available in ESPN, USA, CNN and the other

AGENCY FINANCIAL REPORTS—FOURTH QUARTER 30

Vol. 53, No. 15—ADVERTISING AGE (ISSN 0001-8899) is published weekly except semi-weekly the fourth week in March, the second week in September at 740 Rush Street, Chicago, IL 60611. Second-class postage paid at Chicago and additional mailing offices.

Continental leaving WRG unit

Los Angeles—The instalation of Frank Lorenzo as Continental Airlines chairman, along with a Texas Air Corp.-dominated board, has triggered the end of the airline's relationship with Johns, Cohen & Pasqualina here. The move fueled speculation that Texas International and Continental may pool their marketing resources if the proposed merger of the two carriers is approved.

Continental's official word is that the airline is conducting a review of agencies to handle the $16,000,000 account. An airline spokesman said a decision is expected within two weeks. Continental declined to name who is participating in the review, but Benton & Bowles, Chiat/Day, Doyle Dane Bernbach, Foote, Cone & Belding/Honig, Young & Rubicam and Scali, McCabe, Sloves have been mentioned.

■ Sources give Scali, Texas International's agency, the inside track, since it is believed parent Texas Air is considering consolidating marketing staffs and/or ad budgets. The agency earlier said it planned to open a Los Angeles office this year (AA, March 22).

Johns, Cohen & Pasqualina was

O&M posts top gains of '81

By CHRISTY MARSHALL

NEW YORK—Of the publicly held agencies thus far reporting 1981 results, Ogilvy & Mather fared the best in terms of increased revenues and net income for the year and the final quarter.

JWT Group, beset by the recent discovery of $24,500,000 worth of fictitious entries in its computer from its syndication unit, has yet to release its fourth-quarter and yearend figures.

O&M posted the greatest gain in net income in 1981, a 19.5% increase to $16,544,000, compared with $13,845,000 in 1980.

The other public agency companies reported slight gains, except for Interpublic Group of Cos., whose net plummeted 23% to $15,171,000 from $19,724,000 in 1980. Interpublic blamed its poor showing on foreign exchange rates. Its report noted, "Had the exchange rates remained comparable, worldwide net income would have increased approximately 15% over 1980." The company's net income includes foreign exchange losses of $5,412,000 in 1981, compared with $1,350,000 in 1980.

In the wake of Financial Accounting Standards Statement No. 52, permitting companies to use accounting procedures that reduce a portion of the losses suffered as a result of the strong dollar, BBDO, Doyle Dane Bernbach and O&M restated their 1980 and 1981 incomes. Interpublic plans to use the new method in 1982. The basic effect of the FAS Statement 52 is the exclusion of any gains or losses realized strictly from currency translation.

Grey Advertising's gross income climbed 15% in 1981 to $113,747,000, the largest such gain reported among the six agencies. O&M was a very close second with a 14.9% gain to $302,852,000. DDB's gross increased 12% (to $161,793,000) while the other agencies reported modest gains.

BBDO's revenues for the year slipped 2% to $176,700,000. The agency's domestic revenues increased 5% to $124,400,000 from $118,000,000 while international revenues dropped 16% to $52,300,000 from $61,900,000. The decrease in international revenues was attributed to the stronger U.S. dollar and decline of advertiser spending in many European markets. In the fourth quarter, the greatest gain in net income was reported by Foote, Cone & Belding, up 20.6% to $5,299,000. Again a close second, O&M's net for the quarter was up 19.7% to $5,936,000; DDB's was up 16% to $4,890,000; BBDO's up 9% to $5,502,000. Decreases in net incomes were reported by Grey and Interpublic, down 9% and 11.2%, respectively.

DDB and O&M ranked first and second in increases in gross income for the last three months of of 1981. DDB was up 23% to $51,708,000 while O&M was up 22.1% to $92,070,000. Grey was up 14% to $32,950,000.#

New Wasey C-E shakeup

By HOWARD SHARMAN

LONDON—The troubled Wasey Campbell-Ewald office here was given a massive shakeup when new chairman Bill Murphy continued a round of firings that has reduced the office staff to 126 against 178 last November and 253 at the end of 1980.

Another 22 employes were fired, bringing to 40 the total number cut by Mr. Murphy since he took over three months ago. Even senior management has not escaped the ax; the arrival of Mr. Murphy, an American anglophile, meant the immediate departure of managing director Hugh Burkitt and the move to an international assignment of chairman Colin Goodson. In February, creative director Nick Da Costa flew the coop.

The agency was "too fat, too many people for the billing we actually had," said Mr. Murphy. That's because Wasey has been losing a steady stream of clients. Last fall, the agency lost or resigned $14,000,000 worth of Philips business. This loss was preceded by the collapse of Wasey's second agency, Tinker & Partners, followed by the loss of Omega gum and other Nestle and Coca-Cola products.

Now the new chairman is determined to get tougher with the creative side and to reestablish top-level contact with major clients. "Clients want top-level contact, and if I don't learn that no one will ever learn it," said Mr. Murphy, who claims to have made safe Wasey's six major clients—including General Motors, Goodyear and L'Oreal—and three international accounts—Coca-Cola, Heublein and Eastern Air Lines.

Sources say that Mr. Murphy is bringing a new, aggressive U.S. style to the agency. "For better or worse, they have an American leading them," said Mr. Murphy. "And if we need to be young, brash and snappy, we must go out and do that."#

New localism

(Continued from Page M-7)
everyone knows how much weight should be given to political slogans and party platforms.

But for the new breed of city and regional magazines that have blossomed in the last 10 years, localism is the only explanation. Were it not for heightened public interest in local concerns, the publications would never have received much attention, and any effort to understand the magazines' success—much less to try to foresee their future—requires a close look at this major social trend.

One of the most important causes for increased localism is the trend toward decentralization.

"About six or seven years ago, [the forces fostering] decentralization became greater than the centralizing forces," says John Naisbitt, who heads his own Washington-based trend-monitoring organization. "We're decentralizing like crazy now."

In the big scheme of things, explains Mr. Naisbitt, the capital-intensive nature of our industrial society had favored development of larger institutions and, adds the trend-tracker, "There were two great centralizing events [in the 20th Century], the Great Depression and World War II."

Following the war, the large-scale orientation was further reinforced as "We began to realize the interconnection of things" on a global scale, says Bruce Stokes, senior researcher at the Worldwatch Institute in Washington and author of "Helping Ourselves: Local Solutions to Global Problems." "We learned, for example, that drought in India could cause higher bread prices in the U.S. As a result, in the 1950s and 1960s, the common problem-solving approach was global" rather than local.

As our capital-intensive, industrial economy began to evolve into a post-industrial society and as service industries became the fastest-growing segments, the need for centralization diminished.

The failure of numerous large-scale programs to solve the major problems of the 1960s, and the resentment toward the increasing impersonality of large institutions also fomented disenchantment with central planning and control.

"We saw tnat those macro, top-down solutions didn't work," says Mr. Naisbitt, and that "the only thing that really works is local initiative."

"It wasn't just conservatives," adds Mr. Stokes. As the nation moved through the dislocations of the 1970s, he says, "all people began feeling that their lives were out of control."

On top of everything else, the dramatic "rise in energy prices made it increasingly expensive to live very far from amenities," says David Morris, president of the Institute for Local Self-Reliance and author of "Self-Reliant Cities," scheduled to be published next month. "The concept of compactness was revived," and such things as neighborhood grocery stores and neighborhood bars became more important.

At the same time, many newly affluent members of the baby boom generation also came on the scene.

"The new magazines are oriented toward this new class of people that has enjoyed an explosion in disposable income," says Mr. Morris. Adds publishing industry analyst John Morton of Lynch, Jones & Ryan, "The most successful of the city magazines tend to be very upscale."

Even the most cursory examination of city and regional magazines provides plenty of evidence to support such a conclusion. For example, virtually every city magazine from *Atlanta* to the *Wichitan* devotes significant editorial space to restaurant reviews. At the very successful *Chicago* (profiled in this section), which began as a program guide for the local fine arts radio station, the restaurant reviews continue to be the best read feature, and the publications's best-selling issue traditionally has been its annual listing of the city's best and worst rated eating places.

"The city magazines have tapped into the conspicuous cultivation" that has become more apparent in recent years, explains Arthur Shapiro, head of the social trend-monitoring division of the Yankelovich, Skelly and White research company. According to Mr. Shapiro, the new interest in community can be seen as a natural extension of me-generation self-interest, and the "insider tips and evaluations offered by city magazines" fit very nicely with the increased desire of individuals to see themselves as "behind the scenes experts, as *cognoscenti*."

Not surprisingly, the magazines generally have been most successful in attracting advertisers from restaurants and local retailers who cater to upscale audiences.

"I've got to believe that restaurants pay the postage" for most of the city magazines, says Ed Weiner, media director at Geers Gross Advertising. "The magazines also are a good opportunity for advertisers of products like liqueurs and imported autos that are compatible with the kind of people who are interested in the new French restaurant in town."

In light of the important role that localism and related economic trends have played in the development of city and regional magazines, it is natural to ask what the future holds. The consensus: There is good news and bad news.

The good news is that people's ties to their local communities are likely to become even stronger as we move into the 1980s. High interest rates, for example, already have inhibited people from moving and have helped spur them to develop deeper roots in their communities. And even when interest rates begin to come down, sociologists predict that the aging of the U.S. population and the establishment of nuclear families by increasing numbers of baby boom members will also cut into the tendency to move, thus strengthening localism and increasing the vitality of local communities.

The best prospects for increased vitality are smaller cities (population 10,000 to 25,000) that "are growing most rapidly and have the highest income levels," says Mr. Morris.

The bad news is that the city magazines are likely to face significantly more competition.

"One of the things that I think will happen is that the major metro dailies increasingly will try to appeal to this [upscale] group," says Mr. Morton, the publishing industry analyst.

"There is potential for newspapers to shift their Sunday supplements to be aimed at more of the same kind of audience" and to carry the same kinds of features as city magazines, adds J. Kendrick Noble, publishing anaylst at Paine Webber. Newspapers have shied away from such steps in the past because they "prided themselves on being a mass medium, but newspapers have been adding more targeted sections in recent years."

According to the publishing industry experts, many of the local magazines have done an excellent job of establishing a local franchise as the best source of cultural and entertainment information, but their monthly periodicities may prove to be a major disadvantage should the dailies move more aggressively in this direction. Because of the deadlines associated with a monthly schedule, explains Mr. Morton, "Often they have trouble putting together a comprehensive listing of cultural and entertainment events, much less trying to review things. They are vulnerable there."

There also is the possibility that services like electronic Yellow Pages or cable-delivered information banks might undercut the usefulness of such popular features as city magazine restaurant listings, though Mr. Morton points out, having allowed *Chicago* "to establish a franchise, the *Chicago Tribune*, for example, may have trouble taking it away.

Look at what Walter Annenberg did with the *TV Guide*. Most newspapers overlooked tv because they saw it as a competitor, and they've never been able to recapture that franchise."

Nonetheless, "for the personality of a city magazine to become more important, it will have to be more than just listings," adds Mr. Morton. "It will have to develop a personality, an identity, that can't be duplicated on cable."

The city and regional magazines also may have to adjust to significant shifts in reader interests.

As many members of the baby boom generation begin to form nuclear families, for example, "schools will become a dominant subject for city and regional magazines in the next ten years," predicts Mr. Stokes of Worldwatch, "just as schools were among the most important issues in the 1950s."

Ratings of school system quality may wind up rivaling restaurant guides in popularity, and some publications already have begun to extend this review and consumer service approach to include ratings of used car lots, gas stations, drug stores, and emergency rooms at local hospitals.

"If I were the magazines, I'd be looking for ancillary products, like special-edition home guides, restaurant guides and guides to financial services available in the area," says Mr. Shapiro of Yankelovich, Skelly and White.

"City and regional magazines haven't fully picked up on the neighborhood phenomenon," points out Harry Boyte, executive director of the Citizen Heritage Center in Minneapolis and author of "The Backyard Revolution."

Mr. Boyte expects to see more attention to local history and architecture, including "features on what it was like to live in the area 100 years ago."

Adds "Whole Earth Catalog" publisher Stewart Brand, who has written about the localism trend in his Co-Evolution Quarterly, "Conservative editing and publishing can cause the [city and regional] magazines to get pinched between the dailies and the more imaginative [community] weeklies. Still, the big dailies are big, slow and ponderous. They can't make fast moves, and the magazines can always move quickly and find things to do." AA

Source: Advertising Age Survey

By Kristin Blom

Whether it's on the radio, television or in the newspaper, you rarely make it through a day without hearing of budget cutbacks, employe layoffs or plant closings.

You, too, probably find yourself cutting back and having to make sacrifices. Unfortunately, one thing people give up is a magazine subscription.

In a poll conducted by Advertising Age Magazine asking editors to name some of the major problems facing city and regional magazines today, the over-all concern centers on the current recession. It seems to be a vicious circle, with a combination of rising production costs, achieving recognition from national advertisers and affording good free lance writers, all bouncing off one another.

The increasing cost of doing business has been difficult for the Naples, Fla.-based *Gulfshore*. Editor Molly Burns says, "A significant problem exists in the increased costs of printing, supplies and postage."

The economic downturn hasn't helped, although according to Ms. Burns, the smart advertiser will maintain its linage through bad times. "A common pitfall is to do something that

Kristin Blom is assistant editor with Advertising Age Magazine.

Texas

"A thorough class act." That's how one magazine editor described a publication in the city and regional magazine field. That publication was *Texas Monthly*.

As a matter of fact, *Texas Monthly* was the overwhelming choice of editors responding to a recent Advertising Age Magazine poll that asked city and regional magazine editors to name the five best magazines in their field.

Not all the comments were complimentary. Some believe Texas Monthly was "No. 1 in the 1970s but has cooled down a little."

Texas Monthly, receiving 134 total points, was mentioned 33 times—more than any other magazine—and of those, it was cited 18 times as No. 1. Among the comments were: "Outrageous, fun covers but outstanding material inside," "catches the

Economic woes worry the editors

another magazine in another region does," she says. "What sells in Miami, however, probably won't sell in Salt Lake City."

Others agree that rising production and staff costs are a problem.

"Especially in direct mail campaigns and circulation services," says Sylvan Meyer, editor of *Miami*.

Brian Nicol, editor of *Honolulu* says, "Editorially, we are stronger than ever in providing our readers with a useful, meaningful package. But postal service, as well as rates, remains a problem, not to mention attracting national advertising."

In the case of James D. Lester, publisher and senior editor of *Tennessee Monthly*, it's the universal problems of insufficient advertising and building circulation. "We face the problem of credibility with national advertisers," he says, "and as we overcome that problem we tend to grow and expand in size and quality."

Brian Anderson, editor of *Mpls.-St. Paul*, based in Minneapolis, says that reliance upon free lancers continues to keep magazines in some markets from moving into strong, in-depth articles.

"It's tough to do in-depth stories with limited financial resources, but the fact that such magazines *want* to do such articles bodes well for their future," Mr. Anderson says.

Sheri Rosen, editor of *D*, the Dallas/Fort Worth magazine, singles the problem out. "It's difficult to find decent writers that don't demand the kinds of fees that national magazines can afford to pay," she says.

Another editor thinks city magazines face different problems than regionals. "City magazine editors need more editorial freedom to pursue the in-depth controversies, with additional staff and the time to do it," says Rita Gormley, editor of *Aloha*. "Regionals all seem to be understaffed. I'm not sure whether we're facing a lack of writers with style or a lack of readers with taste."

What about the future? Overall, the editors believe that there will be an improvement in editorial quality, an increase in solid in-depth pieces, service-type columns and the use of four color.

Mr. Meyer of *Miami* sees improvement in the quantity and quality of service features (lists, primarily): "I see content moving from rather gimmicky special features of the past to more solid life style analysis pieces."

Others contend that city and regional magazines are becoming more sophisticated—less puff and more solid news.

Co-editors of Erie, Pa.-based *Erie*, Gae Metalanis and Pamela Carson, say that "more and more meaningful stands are being taken on controversial topics. Public relations and fluffy articles are declining."

Yet some editors have a difference of opinion. Allen H. Kelson, editor-in-chief of *Chicago*, says many books are becoming fluff-oriented and once-tough publications are going softer. "Other magazines are becoming predictable with three or four annual stories (best and worst of everything in town, dining issues, celebrity issues)," he says. "But visual and writing quality is generally improving as staffs become more experienced and larger."

Bernard McCormick, editor of *Gold Coast of Florida*, based in Fort Lauderdale, contends that magazines are copying each other. "It's ridiculous imitation," he says. "Everybody is into gimmicks, make money stories, etc."

Mr. McCormick says this situation suggests that magazines are beginning to forget why they exist. "Good writing is the answer," he says. "No newspaper can compete with a superior story, written in depth and with style, in a better built and more lasting package. If magazines are not saved, they are not doing the job."

Frank Bentayou, editor of *Tampa*, thinks city magazines are moving into the mainstream of reading. "Newspapers beware!" he says.

Another trend some editors see is the move to target not only a local or regional audience, but a special interest audience within that region.

"For example, our magazine goes to the people in the Richmond, Washington, Baltimore, Philadelphia media markets who are interested in the history, recreation and travel opportunities available in the surrounding countryside, one of the most editorially rich in the nation," says Wilson Morris, editor of *Country Magazine*, based in Alexandria, Va.

Frank Soler, editor of *Miami Mensual*, foresees new city and regional magazines oriented to highly specialized audiences, such as Hispanics.

"I consider the city and regional magazine marketplace to be one of the strongest among all publications," he says. "There is no reason whatsoever why such magazines, if properly managed and focused toward the community, should not continue to enjoy strong health even in a recession period." AA

Magazine

POLL

The top 10 city and regional magazines

(Forty-two editors took part in the ranking of the poll. First-place votes counted 5 points, second-place, 4 points, third-place, 3; fourth-place, 2; and fifth-place, 1)

Total no. of mentions	Magazine	Points (First-place votes in parentheses)
32	1. Texas Monthly	134 (17)
19	2. Philadelphia	69 (6)
21	3. Washingtonian	62 (3)
17	4. Los Angeles	57 (2)
14	5. New York	45 (5)
11	6. Chicago	37 (0)
11	7. D (Dallas/Ft. Worth)	30 (2)
8	8. California	20 (0)
5	9. Cleveland	18 (1)
9	10. Boston	16 (0)

Other magazines receiving first-place votes (one each) were Louisville, Blair & Ketchum's County Journal (in Brattleboro, Vt.) Mpls.-St. Paul, Palm Springs Life, the Washington Dossier and Rocky Mountain (in Denver).

lair tops 'em all

true flavor of the region," "best of the best," "audacious, witty, attractive."

However, not all the comments were complimentary. Some believe *Texas Monthly* is still good journalistically, but has slipped in the last couple of years. One said, "it was No. 1 in the 1970s but has cooled down a little."

In all, 44 responses were received from city and regional magazines around the country. Each publication had a circulation that ranged from 12,000 to 245,000 and staffs of one ("with many free lancers") to 20 ("full time").

The second ranked choice was *Philadelphia* with a total of 69 points, followed closely by the *Washingtonian* with 62, *Los Angeles* with 57 and *New York* with 45 points.

Philadelphia, receiving 19 total mentions, was consistently praised for its good mix of editorial content.

Among the comments were the following: "Gritty, though softening," "good mix of light with hard hitting material" and "excellent local orientation." One editor even referred to it as "the granddaddy of the 'serious' city books."

Improvement was the key word among editors in describing *Washingtonian*, which ranked third and received 21 mentions.

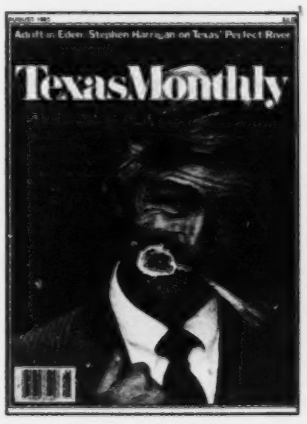
One of them said, "Most improved in the last 18 months." Others had a variety of comments, including "top notch journalism," "droll, good editorial mix," "solid" and "punchy."

The only characteristic editors could agree on about *Los Angeles*, rated fourth, was its effectiveness at understanding its market. "Original material perfectly suited to its market," said one, yet others differed in comments. "Lightweight, ugly, but entertaining," "fat with ads" and "editorially bankrupt, but popular."

And *New York* magazine, rated fifth, was cited more than once for its consistency and imaginative content.

Yet one added, "given the market, it should be better than it is."

The five other magazines that ranked in the top 10 catagory, include, in order, sixth place *Chicago* with 37 points, *D* (Dallas/Fort Worth) with 30, *California* with 20, *Cleveland* with 18 and *Boston* with 16 total points. —*K.B.*



***Texas Monthly* took top honors in the city-regional magazine poll conducted by *Advertising Age Magazine*.**

In dual buy with TRIM

Tele-Research to Harte-Hanks

SAN ANTONIO—Harte-Hanks Communications, a communications conglomerate with annual revenues exceeding $355,000,000, continued its expansion into the research industry via the acquisition of TRIM Inc. and Tele-Research Inc., both based in Los Angeles.

The acquisition of TRIM, a research company that pioneered Universal Product Code scanner checkout measures of grocery products movement, was expected (AA, March 15), but the acquisition of Tele-Research, founded in 1964 and one of the largest research companies specializing in tv copy testing, was not.

Both acquisitions will become part of the Marketing Service Group of HHC, which already includes Urban Data Processing, Burlington, Mass., acquired in 1978, and RMH Research Inc., Fair Lawn, N.J., which was started by HHC as an entrepreneurial venture in 1975.

■ These two units had revenues estimated at $8,000,000 in 1981, and the TRIM/Tele-Research combo had revenues estimated at about $3,750,000. Put together, they will make HHC one of the top 20 research organizations in the country.

HHC, whose operations are concentrated in the southwestern states, owns 99 newspapers, four tv stations, 11 radio stations and one cable tv operation. The head man, as far as acquisitions are concerned, is Larry Franklin, a senior vp.

Both TRIM and Tele-Research were founded by Ward J. Jenssen. Because of an exclusive arrangement with Ralphs Grocery Co. in Los Angeles, the operation that became TRIM (for Tele-Research Item Movement), was on the ground floor in utilizing UPC scanner-derived data for controlled stores tests, a development often eulogized by Patrick W. Collins, president of Ralphs.

In March, 1978, HHC announced an "association" with TRIM, which had been spun off as a company separate from Tele-Research, and TRIM started to use an HHC com-

Murdoch's move perils 'News'

By STUART EMMRICH

NEW YORK—The chances that the *New York Daily News* might fold increased dramatically last week as the three principals involved in talks to find a buyer for the paper —the Tribune Co., the paper's unions and prospective buyer Joe Allbritton—each pulled a bargaining ploy that combined to jeopardize the possibility of reaching agreement.

The Tribune Co. made the first move Wednesday, designating Mr. Allbritton as the "buyer of last resort" and telling the unions that it would close the paper unless they met the contract terms Mr. Allbritton says are necessary for him to take over the paper. Those terms involve staffing and contract concessions—including a cut of 1,600 jobs—that Mr. Allbritton said would save the money-losing paper $85,000,000 a year. He also insisted that April 25 was the final deadline for agreement to be reached.

The unions countered with their own bombshell Thursday. They asked *New York Post* owner Rupert Murdoch to consider making his own offer for the *Daily News*. He said he would study the matter during the weekend and scheduled an April 12 meeting with the unions.

■ With that, Joe Allbritton announced on Thursday night that he had broken off talks with the unions. The Texas financier said he would not resume bargaining unless the unions acknowledge that he is the only possible buyer for the *News* and they retract their overture to Mr. Murdoch. "I am the only possible purchaser of the *News*," Mr. Allbritton said. In a statement that further chilled prospects for the paper's survival, he added, "I am therefore suspending further meetings with the unions until their position is clarified."

Mr. Allbritton also repeated his April 25 deadline.

Union officials refused to comment on Mr. Allbritton's demands that they not bring Mr. Murdoch into the negotiation process and indicated that this morning's meeting would go on as planned. Earlier in the week, Mr. Murdoch projected himself into the picture by announcing that he would expect to gain the same concessions the unions agree to make to the *News*.

Some industry observers said they thought the unions made a tactical error by turning to Mr. Murdoch at this time and feared the move might very well backfire.

"This was not a smart move for them," said Bruce Thorp, a newspaper industry analyst at Lynch, Jones & Ryan. "I can't imagine Murdoch, if he controlled both papers, keeping them both running, and certainly not with the number of total jobs that are now involved. I'm not sure if I know what the unions could gain from this.

Mr. Thorp added that the unions were also risking the possibility that Mr. Murdoch could string out the talks with the unions beyond the April 25 deadline, watch Mr. Allbritton walk away from the *News*, and have the *Post* reap whatever benefits are to be derived from the demise of its chief competitor.

The unions said Thursday that they asked Mr. Murdoch to consider his own bid for the *Daily News* because they are now fearful that saving the *News* on Mr. Allbritton's terms would ultimately mean the closing of the *Post* and the loss of that paper's 1,200 jobs.

"This may be the only way to keep New York a three-newspaper town," said labor mediator Ted Kheel, an adviser to the paper's 11 unions. "We are not dealing with one ailing newspaper, but two."

Mr. Kheel and other labor officials say they are worried that Mr. Murdoch is serious about closing down the *Post* if the *News* is saved.

James J. Florio (D., N.J.) resumes its hearings on legislation authorizing the FTC to remain in opera-

(Continued on Page 87)

Jeans stretch across Europe

But the right advertising approach creates a dilemma

By Anika Michalowska

Jeans makers who once looked on Europe as El Dorado are in a dilemma. Though jeans have bucked the downtrend hitting most sections of the fashion industry, European unit sales of jeans rose by only 4% to 6% last year—disappointing by spectacular pre-1980 standards. The five big international manufacturers have been repositioning themselves, with enhanced advertising budgets and revamped product lines, to safeguard their market shares against the challenge from unbranded makers and national brands (Brutus in the United Kingdom, Mustang in Germany and Jesus and Rifle in Italy, for example).

The average European buys only one pair a year, against the American's 2.5 pairs. That suggests there is still plenty of room for growth.

But the question they have not resolved is whether, in their advertising, they should go for a pan-European image or a national approach. The issue is both vital and complex. Earlier successes have firmly established jeans as ageless (though the 15 to 35-year-old group is still the main buyer), sexless (about half of European purchases are by women) and classless. The average European—if there is one—buys only one pair a year, against the American's 2.5 pairs. That suggests there is still plenty of room for growth, yet the European average hides wide national discrepancies.

In Sweden, annual sales work out to 1.6 pairs per person, and most other northern nations run close to that.

In Spain, on the other hand, the equivalent figure is 0.6 pairs, and most of the Mediterranean countries have not really come to grips yet with the jeans phenomenon.

So should the advertising approach be rifle shot or scatter gun? The big five—Levi Strauss, Blue Bell/Wrangler and V.F. Corp.'s Lee, all from the U.S., plus Lee Cooper from the United Kingdom and Spain's Lois—have turned the question over recently. Their conclusions are mixed.

Photo by Abramson-Culbert

Most interesting is Lois, which went to the brink of a pan-European strategy and then decided to stick with its national campaigns after lengthy consultations with Young & Rubicam. "I strongly opposed the change," says Jean-Pierre Emden, managing director of Lois France. "I felt we would lose all the investment made over the last few years in our specific advertising." Mr. Emden came out on the winning side. Eventually Lois decided it was "too premature," but it may return to the question "in a few years time."

Levi Strauss & Co., generally accepted as the over-all brand leader—although meaningful data on market shares is in short supply and closely guarded—has no doubts and has practiced a more or less pan-European approach for years. The only division it makes, that for reasons national per-head figures show plainly, is between the U.K. and Scandinavia (coordinated from London) on one hand, and Continental Europe (coordinated from Brussels) on the other. "We have the same strategy as Coca-Cola, with a bit more flexibility in local approaches since we deal with fashion," says Ed Gibson, director of marketing services at Levi's Continental Europe division.

"We have the same strategy as Coca-Cola, with a bit more flexibility in local approaches since we deal with fashion."

Wrangler is currently at a half-way point. Its brand image hit trouble recently—"It became cloudy," the company says—and it is running an image study as a possible prelude to a simultaneous campaign in all European countries. Sales have been dented by the recession, and European marketing services have been restructured into three divisions—north (the U.K., Ireland and Scandinavia), central (Germany and Austria) and south. Each has its own president and is "fairly independent" in terms

Anika Michalowska is a Paris-based stringer for Advertising Age *and* Advertising Age's Focus. *This article is reprinted from the April, 1982, issue of* Focus.

Jeans makers count on arresting ads to help increase sales.

of its advertising approach.

"Our strategy is not to have a pan-European advertising campaign," says Iain G. Lyon, newly appointed president of the southern division. "By doing so, there is a danger of losing specific appeal. The result may be an unexciting compromise. A lot depends also on whether you have a uniform image and a uniform line of products."

Britain's Lee Cooper operates what it calls an informal international policy. Each country retains its autonomy, except for the use of the logo, but all artwork is recorded in a databank, and all national offshoots must consult the group before launching a new campaign. (Lee Cooper's logo has caused problems of late. After two unsuccessful attempts at a revamp, the group called in designers Conran Associates for a third version, now being promoted heavily throughout Europe.)

Lee Cooper France was the first subsidiary to set up its own marketing and advertising structure, and, says ad manager Philippe Forcioli-Conti, it still acts as something of a clearing house for campaigns for other western European countries.

Whether the campaigns are national or pan-national, all five of the major jean brands are set to step up ad spending spectacularly this year.

Exact figures are hard to come by, but in France, for example, Lee Cooper has increased its 1981 ad and promotion budget by 25%, taking it to around $2,500,000 for 1982.

Lois will spend the same, a jump of 50%.

Lee France says for the first time it has opened a "real communications budget."

In two years, Levi increased its allocation by 150%.

All forms of media are being used, but Levi's Ed Gibson, for one, can't wait for new ones, particularly satellite television, to arrive.

An ex-Procter & Gamble and Coca-Cola executive, he believes jeans are one of the most difficult lines to advertise: "We all compete for the same target group [the 19 to 24 age bracket]. We are all promoting me-too products . . . all claiming all the references to authenticity and life style."

Partly for that reason, and to help carve a slice out of the unbranded market, (which accounts for 60% to 65% of sales in France, for example), most of the major brands have been diversifying their product lines.

Jeans themselves have become more complex. In 1977, Levi Strauss satisfied 90% of its customers with just two patterns; now it has around 20. LS Continental Europe vp and general manager of LS France, Andre Kolasinski, told *Depeche Mode* magazine recently that the jeans market is entering a phase of "much narrower segmentation.

Four of the big five have been spreading their wings not only with wider jeans ranges, but with related products—skirts, shirts, parkas, pullovers, sweaters and even shoes.

"Our strategy is not to have a pan-European advertising campaign. By doing so, there is a danger of losing specific appeal . . . . A lot depends also on whether you have a uniform image and a uniform line of products."

The exception is Lee Cooper, which has cut its range back to basic denim. On the face of it, there is logic behind that decision. Between 80% and 85% of the big five's European jeans market is accounted for by the traditional five-pocket, plain denim styles, cut more tightly or less, according to taste. Most of the growth over the past couple of years has come in that area, while interest in corduroy and other fabrics has fallen off.

That, say some experts, signals a return to basics, which fits in well with a time of general austerity.

Others believe firmly in the adage that if the market slows, go out and create a new segment.

Time will show who is right, but if the big five do not recapture the momentum of the years before 1980, it will not be for want of time, thought and promotion effort. AA

The European market for jeans 1980

	Volume (Millions)	Value ($ Millions)
Austria	7.1	126
Belgium-Lux	6.4	150
Denmark	5.0	170
Finland	6.7	160
France	47.5	1,020

They wear the pants in the jeans world

Five manufacturers lead the European race for market share

In the competitive world of the jeans makers, market shares are hard to establish. Most manufacturers do their own studies for internal use.

But even when they become available, they are difficult to compare because individual definitions of the product vary to sometimes include, sportswear, tops and boots.

The three U.S. giants, Levi Strauss, Wrangler and Lee, are at the top of the polls. Their exports, including jeans manufactured by offshoots outside the U.S., doubled to 380,000,000 pairs between 1967 and 1980. The main European challengers are Britain's Lee Cooper and Spain's Lois.

Levi Strauss

The world's No. 1 jeans maker, Levi Strauss & Co. of San Francisco, also tops the branded sales in most European countries, with a turnover in Europe of around $88,000,000.

It established its position in the 1960s, opening a warehouse and distribution center in Belgium.

The first European branch was set up in the Netherlands in 1967, and the first manufacturing plant in Belgium the following year.

From 1970 it began buying back all the brand's national distribution companies and establishing local branches, most recently in Spain in 1980.

Blue Bell/Wrangler

Based in Greensboro, N.C., Wrangler is generally reckoned to hold second place in total European sales. Although its position varies according to country, it is put in the top five in most. Wrangler first hit Europe in 1959, but after years of expansion, it ran into a period of recession, losing some of both corporate and product images.

Lee

H.D. Lee Co., Merriam, Kan., a subsidiary of Wyomissing, Pa.-based V.F. Corp., was a late comer on the European jeans scene, not arriving until the 1970s and even then without much apparent conviction.

However, its Lee brand is now firmly established in the United Kingdom and Scandinavia.

It is second only to Lois in Spain and is pushing hard in France, where turnover doubled in a year to hit $17,000,000.

Latest available figures show over-all European sales of $100,000,000.

Lois

Spain's top-selling maker of branded jeans is gaining ground both in Europe and North America with its upmarket, sophisticated products. Output began in Valencia in 1962, and the European expansion started with the opening of Lois Holland in 1968.

Lois France was created in 1975, and the company, which has been promoting itself heavily there, is now considering setting up a French manufacturing facility.

Lee Cooper

This company started making jeans back in 1946 and for a long time was brand leader in the U.K. It has lost that status, but plans to win it back. Its first venture overseas was in Holland, followed by France in 1961 and the rest of the European Economic Community, except Germany, thereafter.

Branches are planned for Spain and Germany eventually, but the immediate aim is to consolidate existing bridgeheads.

Manufacturing plants outside the U.K. are in France, Greece and Tunisia. Sales in 1981 were $167,000,000.

Coffee decline may level off

By JOHN C. MAXWELL JR.

Once again in 1981, U.S. consumption of coffee dropped—whether measured in gallons per capita (26), pounds per capita (9.5) or absolute volume. Nonetheless, statistics do show the possibility of a leveling off in this drop after some two decades. Much of this is due to the general aging of the population; as the population moves into middle age, coffee consumption goes up substantially.

Soluble coffee appears to be the main growth area. It accounted for about 16.5% of industry volume in 1981, up about a point and a half in share from 1980. Leaders in this area are General Foods with Sanka and Brim, and Procter & Gamble with High Point; both of these increased share substantially in 1981. Nestle's Taster's Choice decaffeinated also showed meaningful share movement. We think this will continue to be the most interesting coffee industry area for the foreseeable future.

The other real winner in the industry is General Foods' Master Blend, which showed a 5% market share in 1981 and is currently running above that. General Foods increased share in both regular and instant coffee in 1981 to the detriment of almost everyone else, with the exception of Procter & Gamble in the instant area.

The coffee industry is working on a campaign to get more people to drink coffee from mugs, as they hold more coffee than regular cups. This is an interesting market ploy and should add to the growth of the industry if successful.#

Mr. Maxwell is with Lehman Bros. Kuhn Loeb, New York.

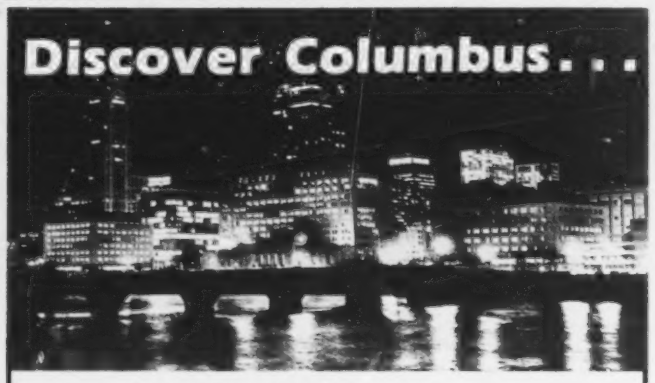
DAVID W. TIBBOTT

CHATHAM, MASS.—David W. Tibbott, 86, retired director of advertising and information services, New England Mutual Life Insurance Co., Boston, died March 4 after a long illness.

Prior to joining the company in 1939, he was in the national ad department, *Boston Globe*; covered the New England states and eastern Canada for the ad department of the *Saturday Evening Post*, and was an account exec in BBDO's Boston office.

EDITH H. BOSWORTH

BRISTOL, R.I.—Edith H. Bosworth, 85, retired treasurer of the Phoenix-Times Publishing Co., died here March 4. She was the wife of Roswell S. Bosworth Sr., retired publisher of the *Bristol Phoenix*. Survivors also include a son, Roswell Jr., who is now publisher of the Phoenix-Times Newspapers.#



an area of growth, innovation and progress

While most areas in the Northeast quadrant of the United States are losing population to the Sun Belt, Columbus, Ohio is growing.* What's more, Columbus' fortunes do not rise and fall with a single particular industry. Our steady, healthy economy reflects a balanced blend of commerce and industry, education, research and agribusiness.

Along with Hartford and Boston, Columbus is one of the leading insurance capitals of the United States. More than 50 insurance company home offices are located in Columbus.

Columbus is strong in many areas that may surprise you. But the real excitement is that The Columbus Dispatch and Citizen-Journal cover this energetic, developing market with 61% coverage of all adults each weekday.** Equally important, our one million plus people have spending power rivaled by no population of comparable size in America. Effective buying income is in excess of $9 billion . . . and steadily growing.

Is your advertising a looking glass...or a window?

When you look at your advertising, do you see a flattering vision of yourself, or a realistic view of your markets?

That question deserves some serious thought. Because it's easy to get so wrapped up in your own products and interests that you lose sight of the customer. And that can result in some pretty ineffective advertising.

Which you don't want.

When you get right down to it, flattery is expensive at any price—but good advertising pays for itself.

We at Davis Harrison believe that the best way to keep clients happy is by turning out advertising that gets through to the market.

Give us a call. We'll show you how Davis Harrison Advertising can take you beyond the looking glass.

ABC soaps clean up on ratings sheets

'Capitol' scores with novel promo

By JAMES P. FORKAN

NEW YORK—ABC-TV continued to clean up in the world of daytime soap operas, in both homes and women 18 to 49, through the first quarter, but its rivals this month are working up a lather in scheduling and tune-in promotion.

On the advertiser side, Procter & Gamble still is having mixed results with its tv soaps, although daytime's biggest spender does produce three of the opening quarter's 10 most popular series.

The big daytime favorite still is ABC's "General Hospital," based on weekly and quarterly numbers through March 19. Coming closest to "GH's" 11.4 homes rating in the quarterly Nielsens were ABC's "All My Children" (at 9.7) and "One Life to Live" (9.4).

CBS' top show in the first quarter was P&G's "Guiding Light," at 8.7, followed by "The Price Is Right" with an 8.5 homes average. "As the World Turns," another P&G perennial, was sixth with an 8.1 score, slightly ahead of the other CBS serial hit, "The Young & the Restless," at 7.9.

P&G's "Search for Tomorrow" averaged a 7.4 for January through March to rank eighth, edging NBC's "Family Feud" and ABC's "Ryan's Hope," tied at No. 9 with 7.2 scores.

While P&G and fellow soap giant Colgate-Palmolive are not involved in an owner/producer capacity with the three hottest ABC soaps, Colgate is a participating sponsor in "GH," and P&G has spots running in the other two and in CBS' "Young," for example.

In the Nielsens for the week ended March 19, ABC's "All My Children" was closest to leader "GH" (9.0 to 10.1), with "One Life" right behind at 8.3.

"The Price Is Right" was CBS' top daytime show with an 8 rating for its 11:30 a.m. (ET) instalment. P&G's "Guiding Light" followed as CBS' favorite serial, while "Young & Restless" tied "As the World Turns" at No. 6 with a 7.2 homes average.

Rounding out the top 10 for that week were the opening half-hour of "The Price Is Right," ABC's "Ryan's Hope" and "Search for Tomorrow" near the end of its CBS run.

ABC execs also pointed to the daytime roster's sex appeal among the all-important women 18 to 49. The latest demographic data, covering January and February, showed "General Hospital" as the favorite with an average 5,790,000 women per show in that age bracket, out of a total viewership of 13,070,000. ABC also had the three other demographic biggies—"All My Children" with 5,230,000 women 18 to 49 out of 10,750,000 viewers; "One Life to Live" (5,000,000 women 18 to 49) and "Ryan's Hope" (3,200,000).

Their closest rivals for the women's affections were CBS' "Guiding Light" and "Young & Restless," tied for fifth with slightly more than 3,000,000 women 18 to 49 per episode. "Guiding Light" had 3,120,000 fewer total viewers than "GH" in the same 3 p.m. to 4 p.m. time period.

The highest-rated daytimer ever, "General Hospital," has slipped some since last season. It averaged a 12.1 rating with 14,000,000 fans in the span from June 29 through Sept. 18 (AA, Oct. 5). Some industry sources attributed the slippage to the departure of Genie Francis (Laura) from the serial shortly after her tv wedding to Tony Geary (Luke), who now has a new love interest. It was noted that the series' writing staff moved to NBC's "Days of Our Lives" (AA, Oct. 5).

■ "General Hospital" also leads among teens, 1,800,000 compared with the 620,000 drawn to "Guiding Light." The latter serial, apparently in an effort to rectify that, has begun using pop singers in the stories. Among those signed have been Judy Collins and the Bee-Gees' Maurice Gibb; this latest wrinkle in the celebrity guest trend will continue into June.

CBS is banking heavily on "Capitol's" success as it tries to break ABC's lock on daytime leadership. As James Rosenfield, CBS/Broadcast Group president, told an analysts group recently, "If we can achieve a one-point improvement in ratings over a year in daytime, we could increase our revenue for the year by $47,500,000."

CBS' strategy of slotting a preview "Capitol" special in prime time behind "Dallas" proved shrewd, delivering an 18 rating and 30 share to rank No. 29 among prime timers during the week ended March 22. ABC for its part benefited too: With "Capitol" losing 10 rating points from its "Dallas" lead-in, ABC's "Strike Force" got a 17.4 rating, its best showing of the season to that point.

(Continued on Page 86)

Serials win prime time points

NEW YORK—"Dallas," which helped the soap opera format bubble over into prime time, remains the overwhelming favorite of its genre.

That serial on the machinations of the J.R. Ewing clan, tv's top-rated series of any kind in the 46 audience share range, also is assisting "Falcon Crest," with a 37 share due mainly to the "Dallas" lead-in.

To further fuel the ratings, CBS ran a "Dallas" tune-in ad in *TV Guide* for the April 9 episode, saying, "Tonight! Each person's life will change...One will crumble. Which one?"

"Dynasty," in the top 25 for the season thus far with a 34 Nielsen share, is ABC's top prime time trials-and-tribulations drama. This serial posted its strongest numbers (23.7 rating and 42 share) in the week ended March 28, topping its previous high a week earlier.

"Knots Landing," the "Dallas" spinoff, is barely among the top 40 series for the season to date with a 28 share. Late last month, "Knots" tried to call up its J.R. connection once again with tune-in ads, but that episode lost the time period to both "Nurse" and "20/20."

■ NBC's "Flamingo Road" has not yet caught soap fever. The fact that it has scarcely cracked the top 70 prime time shows, thanks to a meager 24 share, puts it in jeopardy as renewal time nears.

The steamy drama format also has boiled over into syndication this year. Among the soapy series offered at the recent National Assn. of Television Program Executives international convention in Las Vegas were six focusing on serial story lines or stars: PolyGram's "Daytime World of Soaps," Firestone Syndication's "Soap Opera Digest," Andrews/Mitchell's "Soap Opera Recap," Mag/Net Inc.'s "Soap Talk" and Colbert/King World Productions' "Soap World" series and "The Soap Spot," a package of interview briefs. Series in soap format, meanwhile, included Comworld International's "Romance Theatre" dramas, Columbia Pictures TV's offnet reruns of the "Soap" prime timer and Worldvision Enterprises' "Dark Shadows" oldie.

Ad industry to back Miller's FTC cutback

By RICHARD L. GORDON

WASHINGTON—Ending their silence, ad industry leaders are siding with Federal Trade Commission chairman James C. Miller III in a major political struggle to narrow the commission's authority to police deceptive advertising.

Three weeks of private deliberations, including consultations with key Miller advisers, ended with the joint announcement last week that the Assn. of National Advertisers, American Assn. of Advertising Agencies and the American Advertising Federation are ready to support congressional action to withdraw the sweeping authority given FTC in 1938 to regulate deceptive practices.

Instead, the associations will outline to a House subcommittee tomorrow their proposal that Congress, for the first time, write a definition of deception into the Federal Trade Commission Act that would set boundaries on the types of ad cases the commission could pursue. They will also continue to urge Congress to eliminate "unfairness" as a basis for FTC prosecution of an advertiser.

Support from the advertising industry was conspicuously absent when chairman Miller, a leading Reaganite spokesman on regulatory reform, first proposed legislative action to impose outside limits on FTC selection of deceptive advertising cases (AA, March 22). While the Chamber of Commerce and National Assn. of Manufacturers were quick to support the Miller approach, advertising spokesmen hung back, unwilling to move without a clearer understanding of the stakes.

The ad industry hop from fence-straddling to the Miller camp was greeted with dismay by FTC's three other commissioners, all opponents of the chairman's approach to FTC "reform," who renewed warnings that advertisers face years of regulatory turmoil if the commission and the courts are given new ad regulation instructions by Congress.

"I think they're making an error from their own

K/D/P surprise Continental pick

LOS ANGELES—Continental Airlines, which two weeks ago got a new chairman and board of directors with Texas connections, has selected a new ad agency with similar claims of its own, Keye/Donna/Pearlstein.

The small Los Angeles agency, best known for its creative work for San Antonio-based Lone Star Brewing Co., competed for the $16,000,000 Continental account in a review involving several major agencies. Taking part were Chiat/Day; Doyle Dane Bernbach/West; Foote, Cone & Belding/Honig; Young & Rubicam; Scali, McCabe, Sloves, and Benton & Bowles, although the list finally was paired down to B&B and K/D/P. At press time, the airline had not yet announced the selection.

K/D/P was a surprise pick to most observers. The agency, which started in 1969 in an apartment on Wilshire Boulevard, is highly regarded and well-known in Southern California, but little known in other parts of the country.

Sources say Continental's management was impressed with K/D/P's work from the start, but hedged on the final selection for several days because of the agency's relative anonymity outside this area. But it was the strength of K/D/P's creative product that finally won Continental over.

The airline account will increase the agency's $30,000,000 billings by more than 50%.

B&B had handled the Continental account from the early 1970s until last year, when it was succeeded by Wells, Rich, Greene/West. Scali, New York, is the agency for Texas International.

Continental began the search for a new agency two days after its annual stockholders meeting two weeks ago, when Texas Air president Frank Lorenzo was installed as chairman, along with a Texas Air-dominated board of directors. One of Mr. Lorenzo's first actions was to can Continental's agency, Johns, Cohen & Pasqualina, a WRG spinoff that was formed in January after WRG's New York office took on the conflicting Pan Am account.

Continental president George Warde came under stockholder criticism at the annual meeting for retaining the Gardner unit

UNHAPPY GROUP WANTS OWN AGENCY

Avis franchisees shop

NEW YORK—As Norton Simon chairman David Mahoney prepared to go before the cameras in a new role as pitchman for the company's subsidiary, Avis Rent A Car System, rebellious Avis Texas franchise owners began screening agencies in what appears to be a split over new advertising strategy.

The move apparently was triggered by the franchise owners' displeasure over Avis' selection of McCaffrey & McCall as its agency (AA, March 22).

■ Agency sources said that the move, instigated by approximately six Avis franchise owners in Texas, could lead to a national revolt of Avis independent franchise owners over NSI-directed ads.

Such a move could drain approximately $6,000,000 franchisees contribute to the over-all $10,000,000 Avis account.

William Shechter, an Avis spokesman, declined comment on the franchise owners' actions, saying, "We really don't know what those guys are up to." David McCall, M&M chairman, was unavailable for comment.

Sources said that presentations were made in Texas last week. Shops that presented to franchisees were the Bloom Agency; Bozell & Jacobs, and Benton & Bowles.

Meanwhile, Mr. Mahoney is headed for a starring role as the new spokesman for Avis. On April 14 and 15 he went before the cameras at Newark International Airport in connection with the forthcoming tv commercial.

In M&M's presentation, which eventually landed it the account, Mr. Mahoney is heard delivering the familiar "we try harder" theme.

Mr. Mahoney apparently had expressed displeasure with current spokesman Glenn Ford, which led to a split between Avis and its former agency, BBDO.

Mr. Mahoney was a source of controversy during the competition for the account. Some losing agencies maintained he had made up his mind to select M&M before the presentations began. However, an M&M exec said Mr. Mahoney was not present during its presentations.

last minute news

'Wall Street Journal' to publish Europe edition

NEW YORK—*Wall Street Journal* is planning to publish a European edition with a separate staff and is expected to sign a printing contract in the Netherlands by next month, according to reliable sources in Europe. The newspaper will be printed by *Limburgs Dagblad*, a subsidiary of the huge Telegraaf Holding Co., in Heerlen (AA, Oct. 19). The *Journal* is likely to place up to 20 editorial and sales staffers in Europe and to shoot for doubling the current European circulation of the U.S. paper to 20,000 readers within two years. Dow Jones officials in New York deny that any final decision has been made about the European edition, but other sources say the go-ahead is "90% certain."

SSC&B reportedly getting Mello Yello account

ATLANTA—Coca-Cola reportedly will move Mello Yello citrus soft drink to SSC&B, New York, from McDonald & Little. The company would not comment on the report. Spending estimated at more than $5,000,000.

Allbritton, unions talking; Murdoch on hold

'News' stances soften

By STUART EMMRICH

NEW YORK—Their flirtation with Rupert Murdoch placed on indefinite hold, *New York Daily News* union negotiators returned to the bargaining table last week with Joe L. Allbritton, the only prospective buyer to whom the Tribune Co. says it will sell the paper.

And in contrast to Mr. Allbritton's first meetings earlier this month—meetings in which he demanded annual payroll cuts of $85,000,000 as a condition for his purchase of the paper—these bargaining sessions showed signs of some softening on both sides. Both sides agreed last week that some concessions will have to be made if the talks are to beat the April 25 deadline Mr. Allbritton has set.

Among the carrots Mr. Allbritton is offering as an incentive to go along with cuts of up to 1,600 full-time positions and a two-year wage freeze is a plan that would give employes a 20% share in the paper's future profits.

The profit-sharing offer came as bargaining resumed last Tuesday night after a four-day break brought on by Mr. Allbritton's anger over the unions' overture to *New York Post* owner Rupert Murdoch. The unions approached Mr. Murdoch about the possibility of a joint ownership of the *News* and the *Post* after Mr. Allbritton admittedly shocked them with the size and scope of his contract de-

Sales rev-up for 'USA Today'

WASHINGTON—Gannett is stepping closer to launching its long-awaited full-court press to recruit national advertisers for *USA Today*.

In announcements expected tomorrow, it's understood Gannett will commit to a mid-September startup date for *USA Today* in Washington/Baltimore, its first market, and disclose that a new, 40-page, four-section prototype of the a.m. newspaper will come off the press this week for presentations to the ad community and for additional research.

It's also understood the new prototype will be customized for each targeted advertiser, with that company's ads featured in prominent up-front positions in the newspaper. And it's known this latest version of *USA Today* will feature more business news coverage than previous sample issues, but will contain no major format changes.

While Gannett has previously circulated two prototypes, the company now has assembled the nucleus of a *USA Today* sales staff in New York. But Gannett has not disclosed whether ad rates have been set or whether its sales execs will have order books ready when they call on advertisers.

Until this week, Gannett execs have spoken only of an autumn launch for the first edition of what is planned as a "national" newspaper. Mid-September had been mentioned as possible. Plans call for start-ups in 14 additional markets, including New York, Los Angeles and Chicago, within six months of the

Picky, picky, picky.
At Star you can pick your own. For a great natural snack you can't beat our sweet, firm, green, red, and black grapes.
Star's expert buyers choose the best for our stores. Which means our plums, peaches and nectarines are always ripe for the picking.
Our quality control inspectors check all produce at our distribution centers. Our strawberries and blueberries are firm, plump, and juicy.
Star's produce people are trained to handle and display only the highest quality produce. So you know your salad ingredients are fresh.
We make sure that our produce arrives at the store in perfect condition. Our cantaloupes, honeydews, and watermelons are great summer treats.
Star's produce is delivered fresh every day. Like our corn. It's top quality, with fresh green husks and tender, sweet kernels.
There's always a huge selection of produce at Star. Look for Boston, Iceberg, and Romaine lettuce all refrigerated at the right temperature. So they stay fresh.
STAR
We'll find a way.

How to pick 'em

Produce quality gets star billing in this color page for Star Markets scheduled for magazines in June. Agency for the supermarket chain is Quinn & Johnson, Boston.

'Backer shop gets shot at 7UP account

ST. LOUIS—Seven-Up Co. is finally going to give Backer & Spielvogel a crack at the 7UP and Diet 7UP business that N W Ayer earnestly wants to retain.

A reliable source confirmed that both agencies will be involved in a creative shootout for that estimated $30,000,000 chunk of business in the coming weeks. Backer & Spielvogel is the agency for Like, Seven-Up's caffeine-free cola that is testing in eight markets. Should that brand move national, it could pack an awesome $100,000,000 budget for a no-caffeine ad and promotional campaign that has upset other soft drink marketers. A spokesman for Seven-Up would not comment on the matter (AA, March 29).

The suddenness of the review has given rise to speculation that perhaps the agency and client may have had a disagreement over the recent switch to a no-caffeine creative tack for 7UP. The new ad approach has served to chill Seven-Up's relationship with bottlers and distributors, many of which carry competing caffeine-based colas.

Backer & Spielvogel and two of its other major accounts, Philip Morris' Miller Brewing Co. and Paddington Corp., were being given overtime treatment by the rumor mills late last week.

Miller denied that Young & Rubicam was being considered for Miller High Life beer, which is at Backer & Spielvogel along with Lite beer. The report apparently was generated by Y&R's handling of Special Reserve beer that has expanded from three to eight test markets.

Miller also scotched a report that it was to take over U.S. importation of Guinness stout and Harp Irish beer from Guinness-Harp Corp. That report apparently resulted from the fact that a number of Miller distributors in the New York area will henceforth assume distribution of Guinness and Harp formerly handled by G-H, which continues as a U.S. importer.

Paddington Corp. also denied that it was reviewing the J&B scotch account at B&S.#

Johnston, JWT face analysts

NEW YORK—When Don Johnston, chairman and chief executive of the JWT Group, meets with the New York Society of Financial Analysts today, he will say "the emphasis in 1982 is to improve profit, maintain competitive pressures, keep creative levels high and operate efficiently and effectively."

As in talks the chairman has delivered to analysts before, Mr. Johnston will be bullish on the agency business as a whole by citing increases in tv prices and positive projections for all media.

The "Marie Luisi affair," the computer manipulations in J. Walter Thompson U.S.A.'s tv program syndication unit that resulted in a pretax adjustment of $30,005,000 over a four-year period, will be dealt with first by exec vp-finance Herb Eames, who will explain the restated figures and notes and answer questions regarding the company's investigation.

Mr. Johnston faces the financial community amid speculation that the irregular activities in the agency are jeopardizing his job. The chief executive dismissed such

(Continued on Page 82)

Nonbranded items hold record shares

NEW YORK—Nonbranded items reached record share levels for the 12-week period ending last Dec. 11, according to the SAMI national private-label trend report.

Published by Selling Areas-Marketing Inc., a Time Inc. subsidiary, the report indicated private label and generic products accounted for 16.33% of all warehoused categories, up from 13.65% in 1970 when SAMI first began releasing share trends.

■ For the 12 months ended Dec. 11, all product departments showed share advances for both private-label and generic items. The highest rate of gain came in refrigerated and frozens, which advanced to a 26.8% share, up from 24.46%. Dry grocery nonfood grew to a 12.26% share, up from 10.82%, while dry grocery food grew to 15.09%, up from 14.28%. Health & beauty aids grew to 3.69%, up from 3.33%. Both generic and private-label products contributed to the gains (see charts), although frozen and refrigerated items experienced greater gains in regular private-label while other lines saw greater gains from generics.

Categories with gains for nonbranded items over seven percentage points for the year were diet canned vegetables, up 24.9 percentage points to 32.3% of the category; miscellaneous bread products, up 7.8 points to 20.1%; coffee filters, up 7.6 points to 16.3%; refrigerated and frozen English muffins, up 13 points to 34.3%; American-style frozen vegetables, up 11.7 points to 46.8%; frozen strawberries, up 7.7 points to 61.9%; all other frozen fruits, up 7.6% to 18.6%.#

Hong Kong latest cola hot spot

By LYNNE CURRY

HONG KONG—In the latest battle of the cola wars, Pepsi has staged an advertising blitz against Coca-Cola in Hong Kong.

PepsiCo International's multimillion-dollar ad campaign was recently launched to regain the market share it lost in 1980 when the local bottler pulled out. But Coca-Cola, which holds the dominant market position in Hong Kong, is not expected to give up shares without a fight.

Pepsi currently has less than 10% of the soft-drink market and is aiming eventually to corner about 30% with the launching of this campaign, according to Edward Moerk, Pepsi's regional marketing director.

■ Pepsi spent more than $175,000 in the first week of the multimedia blitz, which is being managed by Meridian International, a wholly owned subsidiary of Ogilvy & Mather, New York.

The "Switch to Pepsi" campaign will make Hong Kong advertising history, with two-minute commercials running on all four television channels simultaneously. For a theme song, Pepsi bought the Hong Kong rights to pop star Rod Stewart's "Do You Think I'm Sexy?" for an undisclosed amount and overlaid it with the Pepsi jingle. The world-renowned British singer is particularly popular among the colony's youth.

Mr. Moerk said Pepsi's campaign strategy focuses on convincing the local population that "Pepsi is a big success in the U.S." He explained that, based on market research, Hong Kong residents, especially young ones, look to the U.S. as a role model for social trends.

The company estimated that over 90% of all residents saw the tv commercial three times during the first few days of the campaign. In addition to radio, tv and newspaper, the company plans to advertise heavily in the colony's subway, where it should reach nearly 5,000,000 passengers weekly.

Simultaneous with the campaign's launch, Pepsi began selling four brands—Pepsi, Diet Pepsi, Mirinda and Teem—in bottles to the local market. The company began distributing its soft drinks in cans about eight months ago.

Mr. Moerk said Pepsi is determined to turn the market around, as he claims it has done elsewhere in Southeast Asia. He said that Pepsi is now the leading soft drink in the Philippines, Thailand and Singapore and is attempting to crack the South Korean market.

The Hong Kong campaign coincides with the beginning of full production at PepsiCo's new $5,500,000 bottling plant in Shenzhen, one of China's Special Economic Zones (SEZs), located in Guangdong province, bordering Hong Kong. The SEZ offers favorable economic incentives to encourage foreign businessmen to invest in the area.

■ Under the terms of its arrangement with the Shenzhen authorities, 80% of the 100,000,000 cans and 100,000,000 bottles of Pepsi produced there annually will be exported to Hong Kong. The remaining 20% will be sold locally for Chinese currency.

The price, said Mr. Moerk, has not yet been determined, but it will be substantially less than the 45¢ Coca-Cola charges for its drink in Friendship Stores and hotels.#

Foreign Agency Income Profiles

Dentsu widens world lead in '81

International agency income growth stalled by recession, devaluations

By Carolyn Hulse

Japan's Dentsu Advertising maintained a secure hold on its title as the world's largest advertising agency in 1981. While some felt this was the year that No. 2-ranked Young & Rubicam might usurp the top slot, in fact, Dentsu widened its lead.

Dentsu's reported gross income of $428,000,000 came in a secure $75,000,000 ahead of Y&R's $353,000,000, while the J. Walter Thompson Group held onto the No. 3 position, with gross income of $331,700,000. Ogilvy & Mather swept past McCann-Erickson to gain the No. 4 spot, with a gross income of $286,500,000, and McCann dropped to No. 5 with $268,700,000.

While world gross income rose 23% to $3.9 billion on worldwide billings of $14.8 billion, Advertising Age figures from 811 agencies in 72 countries indicate that international business was not the bonanza it promised to be last year. A worsening recession in Europe and massive currency devaluations in Latin America resulted in five of the top ten U.S. multinational agency groups (Y&R, JWT, McCann-Erickson, Foote, Cone & Belding and Doyle Dane Bernbach) posting drops in international income.

Despite the rivalry of numbers between Dentsu and Y&R, the two giants became partners in November, 1981, by merging the agencies' Tokyo subsidiaries—the first leg in an historic joint venture which will eventually extend to the U.S., Southeast Asia, Canada, Latin America and, finally, Europe. The marriage, while giving Y&R more muscle in Japan, gives the formerly conservative Dentsu an imposing entree into world markets.

(Continued on Page M-8)

Carolyn Hulse is an editor on the international staff of Advertising Age.

Dentsu holds agency lead

(Continued from Page M-7)

The impetus to move beyond national boundaries is also driving European agencies. Weak currencies and depressed economies have underscored expansionist fervor. After Britain's creative hot shop, Collett Dickenson Pearce, announced in late February that it would pool resources with Chiat/Day of Los Angeles, it was upstaged last month by the U.K.'s Saatchi & Saatchi, the leading agency in Britain and Europe, announcing it would buy significantly larger Compton Advertising. The move will catapult the new Saatchi & Saatchi Compton into the world's top 10.

In France last year, rumors that Roux Seguela Cayzac & Goudard (No. 39 worldwide) and Publicis Intermarco-Farner (No. 21) were looking for U.S. partners abounded.

Meanwhile, U.S. agencies continued their race to open offices in Latin America or buy stakes in established Dutch agencies, undaunted by drops in international gross income. Y&R posted a $10,000,000 drop, from $140,865,000 in 1980 to $130,171,000 in 1981. JWT dropped from $184,700,000 to $178,000,000; McCann-Erickson, from $204,074,000 to $201,497,000; FCB, from $55,397,000 to $53,745,000; and DDB, from $52,600,000 to $50,000,000.

However, agency execs agree that these losses are no indicator of brewing disaster. According to Richard W. Cuthbertson, executive vp of FCB International, "We are confident that international business will play an even more significant role in agency earnings in the next 10 years." He also felt that while European networks are mature (gross income in Europe declined 3.7%), Latin America and Asia-Pacific regions are ripe for expansion. The numbers agree: Gross income in Asia increased 11.3% in 1981, while income in Latin America grew a whopping 104%, not accounting for inflation.

In Asia, Japan continues to be the standout, posting a 7.6% increase in gross income for 1981. Two more Japanese agencies made it into the world's top 50—Tokyu Advertising and Chuo Senko Advertising—meaning that ten of the world's top agencies are now Japanese. Before 1990, most major U.S. agencies will be obliged to follow Y&R's lead and forge a strong Japanese link in their networks. Some agencies, like FCB, have found that process slow and arduous.

While inflation rates soar and currencies plummet, Latin America continues to be a growth spot for advertising. The leader, Brazil, has sent three agencies into the top 50—MPM, Alcantara Machado, Periscinoto and Salles/Inter-Americana. Gross income in Brazil grew 137.7% in 1981, which represents significant growth despite 100% inflation.

Substantial growth continues in Chile, with a 73% increase in gross income and a 9.5% inflation rate. But the country to watch in coming years may be Peru. Rejecting the extreme economic measures employed in other Latin countries, Peru has an indexed economy, is creditworthy and is experiencing real growth in the all-important agricultural sector. Agencies in Peru reported an increase in gross income of 131%, with a 72.7% inflation rate.

While the mathematical equations measuring real growth in the international arena will continue to be checked by weak foreign currencies and economies in recession, the long-term prospects for agency growth are widely held to be strong.

"Jeans, Brazilian flavor," says playful ad by Alcantara Machado, Periscinoto, new to top 50.

Dreamy Benson & Hedges ad from Britain's CDP, linked with Chiat/Day.

ARGENTINA

The same 1981 average annual exchange rate of .000283 dollars to the Argentina peso was applied to local currency reported for both 1981 and 1980 income and billings in this issue. This procedure factors out a 53% depreciation of the peso against the dollar based on the peso's 1980 exchange rate of .000601.

Leo Burnett-Sagarra, Buenos Aires, reports gross income of $1,020 on billings of $6.805 for 1981, its first year in business. (In local currency, gross income was Ps 3,604,900 on billings of Ps 24,044,683.) Employes: 39. Accounts gained: Seven-Up.

Casares, Grey & Asociados, S.R.L., Buenos Aires, reports gross income of $4,788,360 on billings of $36,203,624 for 1981, as compared to gross income of $2,353,145 on billings of

World's top 50 ad agencies in 1981

Figures shown here in millions are based on total equity interest in foreign shops.

Foreign agency profiles

A comprehensive view of the agency business is presented in the following section, in which ADVERTISING AGE has prepared profiles of international agencies, including their gross income and billings in 1981 and 1980, accounts won and lost, media mix and number of employes. The agency profiles are arranged alphabetically, by country. A table listing the average annual rate of exchange per country is found below.

$18,417,923 for 1980. (In local currency, gross income was Ps 16.9 billion on billings of Ps 127.928 billion for 1981, as compared to gross income of Ps 8.3 billion on billings of Ps 65.081 billion for 1980.) Media breakdown: Newspapers 8%, magazines 3%, radio 10%, tv 79%. Employes: 99.

Accounts gained: S.A. Banco Internacional, Bank of America, Hileret Saic. Lost: Furlotti, Rigolleau, Sol Jet, Silvino Llaneza E Hijos.

Cicero/Ted Bates Publicidad, Buenos Aires, reports gross income of $1,630,000 on billings of $8,150,400 for 1981, as compared to gross income of $1,018,800 on billings of $5,094,000 for 1980. (In local currency, gross income was Ps 5.76 billion on billings of Ps 28.8 billion for 1981, as compared to gross income of Ps 3.6 billion on billings of Ps 18 billion for 1980.)

Media breakdown: Newspapers 31%, magazines 3%, radio 3%, tv 50%, outdoor 1%, business press 4%, point of sale 5%, cinema 1%.

Accounts gained: Secretaria de Turismo, BASF, Ericksson, Seiko Time, Mars Inc., Novo Industri. Lost: Inmobitalia, Siam.

Gabriel Dreyfus & Asoc., Buenos Aires, reports gross income of $900,000 on billings of $6,180,000 for 1981. The agency was founded Sept. 1, 1980, and plans to open up a Chilean branch by mid-1982. (In local currency, gross income was Ps 3.18 billion on billings of Ps 21.84 billion.)

Media breakdown: Tv 47%, newspapers 12%, magazines 4%, radio 30%, other 7%. Employes: 28.

Accounts gained: Kenwood audio equipment, Aguila Saint coffee, cocoa and confections, Bayer Labs veterinary division, Bulova watches, Corporacion General de Alimentos food products, Emece Editors, Instituto Superior Mariano Moreno professional schools, Inverfin financers, Laponia ice creams, *La Prensa*, Province of Misiones' tourism and economy, Province of Santa Cruz' tourism, SAFRA canned food and concentrated broth, Rheem thermo tanks, Schneider confections and soft drinks, Spar turbo fans and air filters, Cocha travel agency, Victoria Insurance, Canit home loans. Lost: Rheem.

Gomez Ferran Inter-Americana, Buenos Aires, part of Kenyon & Eckhardt International, reports only billings of $9,500,000 for 1981, as compared to billings of $12,000,000 for 1980. (In local currency, billings were Ps 33.56 billion for 1981, as compared to billings of Ps 40.24 billion for 1980.)

Media breakdown: Newspapers 30%; magazines 10%; radio 5%; tv 50%; outdoor 3%; point of sale 1%; cinema 1%.

Employes: 60. Accounts gained: Renault (institutional).

Johnson/Benton & Bowles, Buenos Aires, reports gross income of $1,041,099 on billings of $3,494,826 for 1981, as compared to gross income of $832,879 on billings of $2,795,861 for 1980. (In local currency, gross income was Ps 3.679 billion on billings of Ps 12.349 billion for 1981, as compared to gross income of Ps 2.943 billion on billings of Ps 9.880 billion for 1980.) Media Employes: 38.

Gunther Krauss S.A. de Publicidad, Buenos Aires, reports gross income of $3,813,172 on billings of $17,180,152 for 1981, as compared to gross income of $1,424,262 on billings of $7,038,583 for 1980. (In local currency, gross income was Ps 13.474 billion on billings of Ps 60.707 billion for 1981, as compared to gross income of Ps 5.033 billion on billings of Ps 24.871 billion for 1980.)

Media breakdown: Newspapers 4%, tv 86%, outdoor 10%.

Employes: 19. Accounts gained: Gandara descremado (low-fat yogurt), Mortimer cuadriculada (sponge pad), Blendi (children's toothpaste).

Lautrec Publicidad, Buenos Aires, part of Dancer Fitzgerald Sample, reports gross income of $3,622,100 on billings of $15,074,800 for 1981, the only year it reported. (In local currency, gross income was Ps 12.799 billion on billings of Ps 53.268 billion for 1981.) Media breakdown: Newspapers 3%, magazines 5%, radio 10%, tv 69%, outdoor 3%, business press 1%, point of sale 5%, cinema 4%. Employes: 63. Accounts gained: Duracell batteries, Monsanto (Round Up Lazo herbicides), Grimoldi (Hush Puppies and Gomycuer shoes).

Lost: Brassovora (Sampic cleanser and Robin, aerosol for dressing textiles), CGA (Arlistan instant coffee), and resigned A.J. Armando (Mitsubishi cars official importer).

Lintas Limitada SA (Argentina), Buenos Aires, reports gross income of $5,930,000 on billings of $39,527,000 for 1981, as compared to gross income of $3,560,000 on billings of $23,747,000 for 1980. (In local currency, gross income was Ps 20.955 billion on billings of Ps 139.684 billion for 1981, as compared to gross income of Ps 12.575 billion on billings of Ps 83.908 billion for 1980.) Media breakdown: Newspapers 12%, magazines 6%, radio 5%, tv 73%, outdoor 1%, cinema 3%. Employes: 59 in 1981; 71 in 1980. Accounts gained: Cica canned vegetables. Lost: Suchard.

"For looking down on the world." CPV Kenyon & Eckhardt, Milan.

McCann-Erickson S.A., Buenos Aires, reports gross income of $1,049,000 on billings of $6,997,000 for 1981, its first year in business. (In local currency, gross income was Ps 3.708 billion on billings of Ps 24.734 billion. Accounts gained: Casio Computer (musical instruments, cash registers), Johnson & Johnson (sanitary napkin).

Ortiz, Scopesi y Cia., Buenos Aires, part of the Ogilvy & Mather network, reports gross income of $7,125,398 on billings of $35,273,530 for 1981, as compared to gross income of $3,412,499 on billings of $17,445,847 for 1980. (In local currency, gross income was Ps 25.178 billion on billings of Ps 124.642 billion for 1981, as compared to gross income of Ps 12.058 billion on billings of Ps 61.646 billion for 1980.)

Media breakdown: Newspapers 14%, magazines 8%, radio 13%, tv 52%, outdoor 1%, point of sale 4%, cinema 8%.

Employes: 96. Accounts gained: Dulcemar SACI (sugar), British Caledonian Airways, Aguila Saint (candy bars and chocolate).

David Ratto, Buenos Aires, reports estimated gross income of $3,281,385 on billings of $21,875,900 for 1981. (In local currency, gross income was Ps 11.595 billion on billings of Ps 77.3 billion for 1981.) Gross income figure is AA estimate. No 1980 figures supplied by agency.

Solanas/Ayer, Buenos Aires, reports gross income of $3,017,000 on billings of $16,500,000 for 1981, as compared to gross income of $2,385,000 on billings of $9,820,000 for 1980. (In local

(Continued on Page 16)

Foreign currency rates

Exchange rates in these tables were applied to both 1981 and 1980 local currency figures for each agency. This provides a more accurate assessment of an agency's year-to-year income and billings growth than applying different exchange rates for each year.

The use of different exchange rates for each year would make an agency's growth captive to the foreign exchange market, eliminating its true growth as defined by its local currency performance. For example, if a German agency had billings of DM 10,000 in 1981 and DM 9,000 in 1980, AA's system of applying the same exchange rate of .4455 to both years would give the agency U.S. dollar equivalents of $4,455 and $4,010, respectively, indicating a growth in dollars as well as marks of 11%. However, if 1980's annual exchange rate of .5623 were applied to DM 9,000, the dollar equivalent would be $5,061, or a decline in dollar growth of about 12%.

Rates listed in the tables are average annual rates of exchange. These rates, along with those used in last year's issue, are listed in the lead-ins to the agency profiles for each country. Local currency figures are supplied in each agency profile.

Agency resumes from 72 nations

Figures shown in this table of agencies ranked by gross income and in other tables represent the best information available to Advertising Age and are constructed either from answers to questionnaires (sometimes revised on the basis of other information) or on the best data available. All material on this and the following pages is copyrighted, 1982 Crain Communications Inc. Quotation or reproduction in whole or in part without written permission is expressly prohibited. A blank space indicates no gross income was reported by the agency or estimated by AA. Also, figures listed under 1980 are based on the same exchange rates used to determine the dollar equivalent of an agency's gross for 1981. More complete data, including total billings, media breakdown, accounts gained and lost and local currency equivalents for 1981 are provided in these profiles.

TRANSLATION WARRANTY

Language Translation Services, Inc. warrants all translations rendered by us to be fit for marketing purposes and to be in keeping with the intent and standards of quality set forth in the original English. This warranty covers materials produced in each of the languages handled by our firm: Spanish, French, and German, and it covers each of our stages of production: translation, typesetting, graphics, and photography. Therefore, it is important to note that we disclaim responsibility for, and caution against, any alterations to our productions by others than our staff, unless we are given the opportunity to critique the changes. Such warranty shall survive delivery and shall not be deemed waived either by reason of Buyer's acceptance of said materials or by payment for them. Sellers Liability: Language Translation Services, Inc. shall, at its option, replace the production or refund the amount paid for the specific production sold and causing the alleged damages, either of which shall constitute a settlement in full of all claims of every nature. This warranty does not cover, and Language Translation Services, Inc. shall not be liable for, incidental or consequential damages.

Language Translation Services, Inc., 319 South Limestone St., Lexington, Kentucky 40508, (606) 233-4154

The company that is offering you this warranty can contribute more to your international marketing than you might ever have thought possible.

Your marketing materials are too important to leave to chance. You wouldn't entrust your English copywriting to anyone who happens to speak English. Not just anyone can write marketing copy. The translation of marketing materials involves copywriting between languages. It requires that the translator have a thorough knowledge of English as well as that special talent for copywriting in their native language.

Language Translation Services, Inc. specializes in the translation and production of marketing materials for use wherever Spanish, French, or German are spoken.

No other translation firm can match the LTS commitment to serving the multinational client. In each language, a team of copywriters and editors representing different nationalities works together to assure the accuracy and universal acceptability of every production. This accomplished, LTS typesetters, graphic artists, and photographers finalize the production. And, all of these services are in-house.

Join the growing number of multinational companies that rely on LTS for the translation and production of key marketing materials.

Alcantara Machado, Periscinoto captions its Christmas greeting for VW: "A zero kilometer year is approaching. Spend it with common sense and be happy"; and toots Brazil's horn internationally: "Made in Brazil. Passat."

Advertising Age

25th ANNUAL CREATIVE WORKSHOP

August 22-25, 1982 • The New York Hilton

A three and one-half day workshop featuring creativity throughout the marketing process—from the marketing strategy to the final ad. Sessions will cover the major media: radio, tv, print, direct mail and cable. Each day covers a different aspect of creativity:

Sunday, August 22: Creativity in Music—a special presentation
Monday, August 23: Creativity in Product/Service
Tuesday, August 24: Creative Use of Media
Wednesday, August 25: Creativity in Technique/Technology

Featured speakers:

• Keith Reinhard/Needham, Harper & Steers • Sid Woloshin/Sid Woloshin Inc. • JohnPowers/Eastman Kodak • Tony Antin/Reader's Digest • Ron Hoff/FCB • Tom McElligott/Fallon McElligott Rice • Shirley Young/Grey Advertising Inc. • Don Peppers/New York Air • Steve Hunter/Ketchum New York • Fred Hoar/Apple Computer • John Jacobs/Grey Advertising Inc. • William Corey/IBM Federal Systems • Richard Farrell/Marsteller Inc. • John Drake, Roger Winter/Southland Corp. • Carl Hixon/AA Columnist • Al Hampel/D'Arcy-MacManus & Masius • Ted Simmons/Gardner Advertising • Maureen Hartigan/TRW • Chuck Blore/Chuck Blore & Don Richman, Inc. • Hooper White/Hooper White Company • Hal Riney/Ogilvy & Mather • Joan Throckmorton/Throckmorton/Zolfo Associates, Inc. • Philip White/Continental Fibre Drum • George Cohan/Cohan & Paul • Bill Cameron/Needham, Harper & Steers • Thomas Staudt/Chevrolet Motor Division • Jan Soderstrom/Atari • Manny Perez/Young & Rubicam • George Prince/Synectics • Dennis Altman/D'Arcy-MacManus & Masius • Hadassa Gerber/McCann-Erickson • Charles McCabe/Manufacturers Hanover Trust Co. • Richard Swart/3M • Ira Tumpowsky/Young & Rubicam • George Love/Marshall Field's • Ed McCabe/Scali, McCabe, Sloves, Inc. • Ronald Kaatz/J. Media breakdown: Newspapers 27%, magazines 37%, radio 5%,

IS THIS HOW YOU WANT TO BE TREATED BY YOUR FIRST BANK?
Isn't it time banks started treating school-leavers like adults?
We think so. Which is why this year we've decided to offer school-leavers their own Barclaycards.
As long as you're paid monthly, you can apply for one as soon as we get your first pay cheque*
(At most banks you have to prove yourself for about six months before they'll give you a cheque card.)
When you do have your own Barclaycard, you'll wonder how anyone could possibly manage without one.
For a start, you can use it to guarantee your cheques in shops instead of paying by cash.
You can also use it to cash your cheques up to £100 at any of our branches, without having to sit around waiting while a clerk rings up your branch to check you out.
And if you're 18 or older, you'll find a Barclaycard is especially handy.
Because not only can you use it as a cheque card, you can also use it as a credit card.
Something else we're offering school-leavers, though not for the first time, is free banking.
When you first start work you'll probably find it difficult to manage on the money you earn.
And we've no wish to add to your problems by asking you to pay bank charges.
So during your first year with us, all your cheques, banker's orders and statements are free.
Your bank manager can probably give you a lot of help as well.
If you want to find out about different ways of saving or you need an insurance policy explained, don't hesitate to consult him.
If you'd like to know more about what Barclays have to offer school-leavers this year, send us the coupon and we'll send you our booklet called 'Starting Work'.
Or else pop into any of our branches and pick one up from the counter.
BARCLAYS
EUROCARD

INTRODUCING THE XEROX 3450
IT CAN'T MAKE BREAKFAST.
But the Xerox 3450 plain paper copier does just about everything else.
It makes regular and large-size copies.
It makes reduced-size copies of oversize documents like computer printouts.
There's an automatic sorter to put your reports in order, copy contrast control, and even push-button choice of paper trays. And to keep it simple, the Xerox 3450 features computer diagnostics and semi-automatic document handling.
Need a copier that can do almost anything? There's never been anything like it.
The Xerox 3450.
Xerox of Canada Limited
XEROX

The Xerox 3450 does "just" about everything, suggests NH&S/Canada ad.

CANADA

Pioneer Petroleum, WABCO. Lost: Chipman, Wendy's Restaurants.

Soap segment freshened up

By JENNIFER ALTER

While the song and dance surrounding the arrival of liquid soap has grabbed much of the limelight in the $850,000,000 soap category, the trend toward the deodorant "refresher" bars has quietly gained momentum.

Both Andrew Jergens Co. and Armour-Dial are testing deodorant bars positioned as "refreshers." Jergens' Fiesta, testing in Peoria, Ill., and Birmingham, Ala. (AA, Jan. 25), focuses on showering as a "refreshing experience." Ad copy advises, "Don't Just Shower, Celebrate! with new Fiesta refreshing deodorant soap."

Similarly, Armour-Dial's Spirit is positioned as a "high fragrance, high lather, refresher bar," according to a spokesman.

Now testing in A-D's southeast zone, which covers most of Georgia, Nashville and Charleston-Huntington, W. Va., Spirit was first tested in 1980 in several Midwest markets. It was pulled from those areas in early 1981, but reappeared later that year, with a new package featuring the soap itself rather than a more abstract design.

Should Spirit and/or Fiesta go national, they will enter a segment which is nearly one-half the size of the total category and has been the scene of most new product activity in recent years. Furthermore, though dollar sales of the deodorant segment hover at the 49% mark, advertising support of those brands is closer to 60% of category spending.

■ Undoubtedly fueling A-D's and Jergens' interest has been the performance of Lever Bros.' Shield, launched nationally in early 1981. Although Shield is not positioned as a "refresher" soap, but rather as a strong odor-fighter, the 4% dollar share it has achieved in just more than a year on the market has proven the deodorant segment to be fertile ground.

A-D's Spirit has chalked up 3% and 4% shares in test market, according to foodstore warehouse withdrawal figures for the four-week period ended March 5; Fiesta has not been on the shelves long enough to register a realistic performance.

Although soap enthusiasts have been carefully watching Shield's impact on A-D's Dial soap, that brand, which has been on the decline for a number of years, appears to be holding up under the challenge of its newest competitor. Once holding as much as a 21% share (1975), Dial has been at 13% since mid-1980. Part of its slippage was attributed to the incursion of Procter & Gamble's Coast, a highly fragranced deodorant soap positioned as a "refresher." Dial has, however, held steady throughout the $5,000,000-plus Shield introduction.

Some of Shield's sales appear to be coming from other brands in the segment, including P&G's Safeguard, which currently has 6%, Zest (8%) and Coast (6.7%), plus Colgate-Palmolive's Irish Spring (4%).#

CLINICORT
New CLINICYDIN.™ It fights infection and aids healing.
New CLINICAINE.™ It kills germs and kills pain.
New CLINICORT™ It stops the itch and fights the rash.
Johnson & Johnson
The first name in first aid.

Branching out

"The first name in first aid" with Band-Aids, Johnson & Johnson is using print ads like this to introduce its new three-item treatment line of Clinicydin, Clinicaine and Clinicort (AA, Feb. 22). The line is "all you'll ever need to treat 95% of your first aid needs." Grey Advertising is the agency.

Postal exec's ads try to beat cheats

By JOHN J. O'CONNOR

The mail crossing Kacy R. McClelland's desk is running heavily in favor of people who want to earn $750 a month in their spare time. Getting less interest is his classified ad that offers a new weight-reducing formula from Europe.

No, he's not a confidence man looking to bilk unsuspecting shutins, retired people and housewives. Mr. McClelland is a postal inspector in Pittsburgh who is combatting mail fraud by beating the con artists to their pigeons, the uninformed, gullible consumers.

His "scheme" involved the placement of small-space ads in about 40 daily newspapers in West Virginia, Pennsylvania and New York. One ad was headlined "Earn $750 a month in your spare time from your own home. Be your own boss." The other read, "European reducing formula now available. Lose weight like never before." Readers were asked to write to a post office box for further information."

On April 12, the first batch of mail to reach Mr. McClelland yielded 25 letters, 22 of them from people interested in the make-money-at-home proposition. One of the letters that provides a clue to the type of individuals most vulnerable to the get-rich-quick scam began, "Dear Sers."

Those who responded to his ads —placed at a cost of roughly $3 each—receive a gently worded letter warning of such fraudulent activities; a refund of their postage, and a booklet on mail fraud.

Mr. McClelland said that he has found that fraudulent ads that appeal to individual greed or vanity (medical fraud) generally are the most successful ones. Under the heading of medical fraud he lumped such appeals as "fad diets" and "grow hair and look 10 years younger."

The inspector was unable to say what percentage of the estimated $500,000,000 in consumer and business frauds committed in the U.S. last year is attributable to mail fraud. In that total are securities, bank, mail and insurance fraud.

The phony invoice scam is another area where businessmen get burned, he pointed out. As he explained it, businesses receive such invoices for things such as listings in directories, office supplies and electrical hookups. The amounts of the invoices, ranging from $75 to $200, usually go through accounting departments and are paid without verification. Between 1976 and 1980 more than a dozen bogus West Coast companies netted a total of $12,500,000 before postal authorities caught up with them. But in many cases, a company hit with a false representation order can go right back to the scam by using a different name. For that reason, the federal government is seeking to have stiff fines accompany such orders.

Mr. McClelland said that some cases have happy endings. He spoke of a case three years ago that resulted in a prison term for the head of a bogus Chicago company that offered a digital watch for around $19. "The ad ran in *TV Guide* and promised delivery before Christmas," he recalled. "The guy even rented out warehouse space, but he didn't have any watches." The con artist then arranged to have the money that poured in wired to him in South America. Thanks to some "hurry up" work by postal authorities, the suspect was arrested before he left the country and most of the money (some $300,000) was recovered and returned to consumers, the inspector said.

Mr. McClelland was unable to say whether his classified ad idea will be adopted by the 16 other postal divisions in the country. But based on the extensive news coverage given to his venture, he observed, "You'd have to say it's very cost-effective," alluding to the low cost of running such ads in the newspapers that agreed to cooperate with the weeklong program.#

Pepsi, Coke gain— depending on source

NEW YORK—As the two major cola marketers assess the impact of no-caffeine colas, both can claim greater success in 1981—depending on what source is used.

Figures developed by John C. Maxwell, soft drink analyst, Lehman Bros. Kuhn Loeb, and *Beverage Industry* show Coke's market share down one-tenth of a percentage point for 1981 and Pepsi up three-tenths.

Figures for November/December from A.C. Nielsen Co. show that Coke has pulled ahead of Pepsi in food outlets for the first time in many months.

■ The *Beverage Industry* figures represent total U.S. sales of soft drinks, including fountain and vending sales. Mr. Maxwell develops figures from a variety of sources and converts fountain and vending drink sales into case sales. Nielsen measures retail sales via survey of food and drugstores.

Coke is the unquestioned leader in total U.S. sales because of its strength in the fountain segment. The battleground in recent years for leadership has been the supermarket, where Pepsi moved up to overtake Coke for a number of months.

For November/December, Nielsen shows Coca-Cola at 22.5% of the soft drink category nationally and Pepsi at 22.3%. Tab at 4.1% has taken a strong lead over Diet Pepsi at 3.6%. Coca-Cola brands as a whole moved up to 30.9% of the category in 1981 from 30.0% in 1980. Pepsi-Cola brands held 29.4%, up from 29.1% a year earlier, the Nielsen figures indicate.

According to *Beverage Industry*, Coke's share declined to 24.2% from 24.3%, while Pepsi's rose to 18.3% from 18.0%. The report, which appeared in the April 9 issue of the publication, pointed out that Pepsi's Mountain Dew has passed Coca-Cola's Sprite to capture the No. 6 spot in the top 10.

■ The article stated that PepsiCo wound up the year with the highest volume gain of all soft drink companies (5.6%), with Coca-Cola gaining 3%.

The biggest sales gainers last year, according to *Beverage Industry*, were the diet drinks, which accounted for nearly 14% of the entire category, an 11% increase in diet sales over the previous year. Total soft drink volume was up 2.7% over the previous year to just more than six billion cases (24 8-oz. containers per case), the magazine estimates.#

Top ten soft drinks

ROBERT L. SEIDNER

CHICAGO—Robert L. Seidner, 56, retired newspaper and retail advertising exec, died here April 8. For 20 years, he was with the Chicago American in various positions, including ad manager and assistant to the publisher. In 1968, Mr. Seidner joined Sears, Roebuck & Co. where he served in several posts before leaving in 1978 to form R.L.S. Enterprises.

Mr. Seidner was a past director and vp of American Marketing Assn. and Chicago Adclub.#

Clients, staff are targeted

JWT striving to overcome Luisi scandal

By NANCY MILLMAN and CHRISTY MARSHALL

NEW YORK—Last week, employes in the seven offices of J. Walter Thompson USA were surprised to receive memos, signed by chairman-chief executive officer Burt Manning and president-chief operating officer Wally O'Brien, announcing an awards program in which creators of the agency's best advertising will receive substantial cash prizes. Such in-house competition is not unusual at major agencies, but it is new to JWT.

Thompson USA staffers also have been receiving nationally distributed memos congratulating individuals on promotions, calling attention to awards won by individual offices or praising a particular branch for landing some new business. These too are not uncommon at other agencies, but JWT management in recent years has not kept in touch with its people in this way.

Thompson executives play down the connection between these innovations and the Marie Luisi scandal, which has caused parent JWT Group to write off $30,005,000 in pretax earnings for the past four years, including a $12,400,000 charge against 1981 earnings. They say the contest and stepped-up communications efforts were planned well before the company began disclosing the discovery of fictitious entries in the "time bank" of the tv syndication unit headed by Ms. Luisi.

B. Manning

W. O'Brien

Trying to put the problems behind them.

Nevertheless, the moves could not have come at a better time, for the venerable JWT (founded in 1864), the nation's largest publicly owned agency, has been shaken to its roots by the scandal. The improprieties at one of its minor subsidiaries have blossomed into one of the largest financial scandals in the history of advertising, and the company that has boasted of selling more products in more countries than any other ad agency now is faced with its toughest selling job of all: It must sell itself. It must restore the morale and confidence of employes; it must retain the prized loyalty of existing clients, and it must assure potential clients and, indeed, the entire marketing community, that its over-all integrity and effectiveness remain intact. That is no mean task, for in few businesses do image and trust, both brought into question at JWT by the Luisi affair, matter as much as they do in advertising.

JWT must do all this, moreover, amid continuing internal, Justice Department and Securities & Exchange Commission investigations that could produce even more embarrassing disclosures, and amid Madison Avenue rumors that more bombshells are coming. JWT

McDonald's cooks up broad-scale attack

By RICHARD KREISMAN

In its first full-fledged campaign from Leo Burnett USA, McDonald's Corp.'s creative strategy will remain true to form: Commercials breaking in late May retain the "You deserve a break today" theme and showcase what the company likes to call "heartsell" advertising, featuring slice-of-life vignettes.

The commercials form the national umbrella over massive local ad and promotion efforts for two new products, the McRib sandwich and Chicken McNuggets, both of which continue to roll out in selected markets throughout the country. McDonald's, which spent over $250,000,000 domestically on advertising last year, will exceed that figure this year.

The new campaign, shown to McDonald's owner/operators last week at a San Francisco convention, does not reflect a major strategic change from advertising created by former agency Needham, Harper & Steers.

To attract adults to try the two new products and increase family visits, the Oak Brook, Ill.-based chain has slated back-to-back nationwide "Happy Meal" children's promotions this summer.

And, if all goes according to plan, McDonald's will unveil a rub-and-win game promotion in mid-August that is tied to a videogame theme. The specific nature of the game has not been finalized, but it is centered around the Pac-Man game and characters. Pac-Man licensing rights are held by the Midway division of Bally Corp., but Atari, which markets the home video version, reportedly first approached McDonald's.

■ All three parties currently are negotiating with McDonald's, according to a Midway source, who said other fast-food chains, including Taco Bell, have expressed interest in game tie-ins.

The McDonald's game is slated to run through mid-October. A McDonald's spokesman would not com-

ALLBRITTON, UNION TALKS BREAK DOWN

'N.Y. News' at the brink

By STUART EMMRICH

NEW YORK—Barring a last-minute miracle, the *New York Daily News* seems headed for the grave.

Negotiations between the paper's unions and potential owner Joe L. Allbritton broke down in the crucial final days before the Sunday deadline, as both sides hardened their bargaining positions. At press time Friday, union officials were still holding out the slight hope that an agreement could be reached, but others close to the paper all but completely discounted the chance that Mr. Allbritton, the Texas financier, would be able to work out a deal to buy the paper.

The key sticking point is Mr. Allbritton's demand that the unions agree to a two-year wage freeze in a five-year contract as part of an over-all package to save the paper an estimated $70,000,000 in annual payroll costs. Mr. Allbritton offered the unions 20% of the paper's future profits.

■ The unions have not rejected these terms outright, but said they must be negotiated as part of the over-all package of wage and contract concessions Mr. Allbritton is seeking. But Mr. Allbritton's representatives said Thursday that the wage freeze and the five-year contract are "nonnegotiable."

The talks deteriorated from there. The heaviest blow came late Thursday when Bertram Powers, printers' union leader and a name well known to the city's newspaper readers by virtue of past strikes and newspaper closings, suggested anew that *New York Post* owner Rupert Murdoch be brought back into the bargaining picture as a potential buyer for the *Daily News*. This suggestion infuriated the Allbritton representatives and reportedly led to their storming out of the meeting room.

"We have notified the unions representing the *Daily News* that under present circumstances there is no realistic possibility of reaching an agreement with them," Ed-

Republicans eye sponsors of CBS show

WASHINGTON—The White House said Friday that its flap with CBS over Bill Moyers' "People Like Us" documentary is finished. But there is still muttering among some Republican Senate staffers, who want to put the heat on the sponsors.

White House communications chief David Gergen's wrath over the program's depiction of the impact of Reagan budget cuts on the poor never extended to the half-dozen advertisers that appeared in the Wednesday night program, an aide said Friday. But tempers were less firmly in check among the dozens of Republican Senate staffers who saw the program at screenings Thursday, organized by the Senate Republican Policy Committee.

Ironically, committee aides

Avis will try twice as hard via 2 drives

By ROBERT RAISSMAN and TOM BAYER

NEW YORK—Despite the decision by Avis Rent A Car System's national franchisees to move their $6,000,000 account to Bozell & Jacobs from McCaffrey & McCall, Avis will retain M&M to develop its corporate campaign and will not cut back on funding for the effort.

Harry Savage, a vp at Norton Simon, the Avis parent company, said the franchisees' decision does not affect Avis-M&M plans. "We are developing a campaign, and as we stated originally the campaign will be funded at the $10,000,000 level" (AA, March 22).

This would mean that between the franchisees and corporate, Avis would be spending about $16,000,000 with the two agencies.

Orville Storey, an El Paso, Tex., businessman who owns an Avis franchise that operates in 13 cities, said that differences in promotion ideas emerged as one of the key reasons for the defection. Mr. Storey is chairman of Avis' advertising and policy committee, a group that includes both corporate and licensee members.

Avis has approximately 150 franchises that represent about 52% of the cities in the Avis system, according to Mr. Storey. Because the corporation owns operations in larger cities, the franchisee group does not contribute the majority of the company's revenues.

The franchisee group, according to Mr. Storey, has full re-

House skeptical of curbs on FTC

By RICHARD L. GORDON

WASHINGTON—First congressional reaction to the ad industry's new proposals to curb Federal Trade Commission jurisdiction over deceptive advertising shows the industry associations have a tough selling job ahead.

Lawyers for the Assn. of National Advertisers, American Assn. of Advertising Agencies and American Advertising Federation ran into a barrage of questions from the ranking Democrat and Republican on the House commerce, consumer and tourism subcommittee last week, which is drafting new FTC legislation.

The new industry line struck subcommittee chairman James Florio (D., N.J.) as "a 130-degree change" from previous ad industry support for the present FTC law, which simply bars deceptive ads and leaves it to the commission to decide what is and isn't deceptive. "I understand what you're saying, but it's very difficult for me to understand the suddenness of your concern," he said.

And Rep. Florio said he is "particularly concerned" that changing the Federal Trade Commission Act to include the industry's proposed amendments will upset existing legal standards that advertisers have come to live with. "It will be extremely difficult for your industry to determine what will pass ultimate court scrutiny," he warned.

Rep. Norman Lent (R., N.Y.), the senior Republican on the House panel, expressed concern that the ad industry's proposed test for determining deception was "tough," and might force the commission to show monetary harm to consumers before proceeding against a deceptive ad.

The day after the House hear-

Europe competitors await 'WSJ'

By DENNIS CHASE

The vision of businessmen all over the world reading regional editions of the *Wall Street Journal* is about to come a giant step closer to reality, along with a budding war for the global reader among some heavyweight competitors.

When the *Journal*, the largest business newspaper in the world with 1,900,000 readers in the U.S. alone, announces this week that it will publish a separate edition in Europe (AA, April 19), it will put the newspaper smack on the turf of its leading competitors in the global newspaper race: The *Financial Times* in London and the *International Herald Tribune*, headquartered in Paris.

The move into Europe is the latest step taken by the *Journal* on the road to becoming the world's first truly global newspaper service, with editions eventually in Latin America and elsewhere joining the existing *Asian Wall Street Journal*, the new European edition, and the U.S. edition. Both the *FT* and the *IHT* have pan-European editions already, and the *Tribune* has a Far East edition to compete with the *Asian WSJ*.

But, according to sources at Dow Jones & Co. and outside the company, the feeling is that a global newspaper will have to spring from the U.S., an English-speaking country where there is more advertising support than in Europe. There is also the feeling that such a global newspaper is more likely to spring from a business newspaper than from a mass-oriented paper.

The *Journal* is moving boldly into Europe. The edition will be printed in Heerlen, a tiny southern Holland mining town on the German border, by Limburgs Dagblad. Although the contract hasn't been signed yet, it is expected to be next month. When the newspaper will actually appear is unclear, but the best guess is not until early or mid-1983. Initial circulation will be between 7,000 and 10,000, mostly existing readers of the late-arriving U.S. edition. A staff of up to 20 people, probably located in Brussels, will edit and market the publication, which will not make use of any of Dow Jones' sophisticated satellite transmission capabilities for printing.

The newspaper will probably resemble the *Asian Wall Street Journal*. The editor and publisher of the European edition is Norman Pearlstine, ex-editor of the *Asian Journal* and now the *Wall Street Journal* national news editor. In place in Brussels is Jane Tolson, formerly in Singapore with the *Asian Journal* and now circulation director for the *Wall Street Journal* international air edition. She will become circulation director for the European edition. The company

St. Paul dailies to merge?

By ROBERT REED

The management of the *Pioneer Press* and *Dispatch* newspapers seriously is considering merging the morning and evening dailies into an all-day paper designed to combat the recently merged *Minneapolis Star and Tribune*.

Newspaper industry sources contend execs for the papers are exploring the idea but have not established a firm timetable for the decision. If the merger goes through, it would be a further indication that the long-standing "gentleman's agreement" between the St. Paul and Minneapolis papers is officially over, sources say.

Thomas Carlin, publisher of the *Pioneer Press* and *Dispatch*, would not comment on a merger, although he says his company is "looking into alternatives" and that the emergence of the 24-hour *Minneapolis Star and Tribune* is "another element to the situation." The morning *Pioneer Press* and evening *Dispatch* are owned by the Miami-based Knight-Ridder newspaper chain.

Both papers are holding steady in circulation with the *Dispatch* to-

Miles to wire, promises to keep

By Susan Spillman

New technology gurus, multiplying almost as fast as cable channels, say that by 1990 half of all tv households will hook up to basic cable, generating $5 billion in revenue for cable operators. Pay tv subscriptions will amass another $3 billion and cable advertising yet another $3 billion by that time, according to their crystal balls. But before the so-called wonders of a wired nation can be realized, the nation must be wired.

Cable franchising and its politics and technological promises grabbed headlines from coast-to-coast over the past three years. For most major multiple system operators (msos), battling for the right to wire prime markets is top priority—but usually at the expense of improvement in other areas. With only a handful of desirable markets left and only a handful of msos economically able to stay in the game, the gold rush is slowing.

During the past 15 months, 10 major cities—including Boston, Denver and Miami—awarded cable franchises totaling more than 1,400,000 homes. The winners will spend an estimated $450,000,000 wiring these cities. The losers spent about $20,000,000 hoping to.

Ten other major cities and suburban franchises (including four New York boroughs, Milwaukee and large portions of Los Angeles) are currently evaluating proposals or negotiating contracts with cable companies.

The remaining uncabled top 50 markets—except Minneapolis, which is planning a municipal-owned system—are in the process of gathering information and expect to issue requests for proposals by next year.

However, the last cities—Baltimore, Chicago, Clevelend, Detroit, Philadelphia, St. Louis and Washington—will not receive the competition experienced by their predecessors, agree top mso franchisers. "Most of these simply are not desirable cable markets," says one top franchiser who did not want to be identified. "What's left are largely older, declining cities with decreasing growth rates and, in many cases, severe unemployment," the franchiser said. The ideal cable market has high density (at least 30 homes a mile), requires little underground wiring, has middle to upper income demographics, is one that the bidder already has contiguous franchises in and is one the bidder thinks he has an unusually good chance of winning. Apart from what many consider are drawbacks to the remaining markets, cable companies are more selective about what they bid.

With several big city wins required to be built, many msos have their circuits full.

"Many msos have shareholders to answer to and building cable is a capital intensive business," said Howard Gann, general council for the Cable Television Information Center, a consulting company that assists cities in evaluating cable proposals. "Cable companies have to dump a tremendous amount of money into building a system that it can't expect to see a return on for two years or a profit on for seven years.

"Many are concerned that promises being made today may not be able to be kept and they don't want to make such promises and be bound to them by a municipal contract," adds Mr. Gann.

Cities that see cable profits as a healthy new stream of revenue comprehend the franchising process better and are more demanding, or as disgruntled mso franchisers claim, ridiculously unrealistic in their requests.

"Everyone reads about the kinds of systems being built in

(Continued on Page M-20)

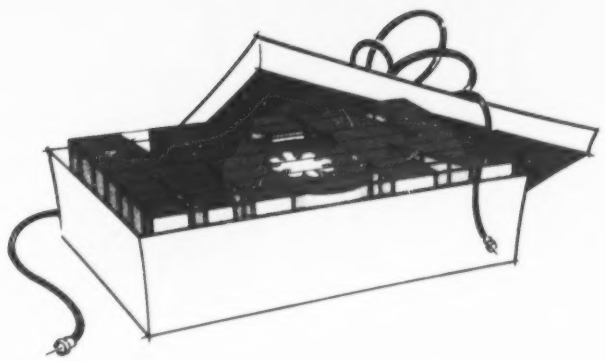
"GOOD THINGS COME IN SMALL PACKAGES..."



Modern Satellite Network offers your clients a better media mix through cable. Our unique package gives you more ways to advertise. With conventional :30 and :60 spots in a key daypart – at surprisingly reasonable rates. With unique and innovative *infomercial* programming like our nationally acclaimed "The Home Shopping Show," and "Viewpoint" – long-form advertising which can be created and produced at a fraction of the cost of traditional messages. And with program sponsorships within our magazine-format series – timely features dealing with consumerism, health, travel and finance.

Modern Satellite Network is *the* daytime source for consumer information on cable. Unique programming that viewers want, and watch and respond to. A subscriber base of more than 4 million households nationwide, reaching a targeted audience of adult women 18-54.

Whatever your need, MSN is the viable choice for cable advertising. To get the full story, contact Les Tolchin at (212) 582-5500 or 582-5962.

Promises

(Continued from Page M-18)

Dallas or Cincinnati and expects the same, but it just may not be economical," says one franchiser.

"The cities have become impossible," echoes another. As a result, MSOs are throwing in the towel in markets they've spent several months and thousands of dollars selecting. Other cities simply aren't getting the initial responses expected.

ATC (American Television & Communications) withdrew from the Sacramento, Cal., competition because of an innovative concept—channel banking—imposed by the city.

To guarantee that the franchise delivers on its promises, the city will place 20% of the system's total channnel capacity into a video escrow account. So if the winning bidder has proposed 100 channels, 20 of these would be held by the city.

The operator has 51 months to complete the construction of the system at which time the city will return 10 channels to the operator.

After one year of operation, the cable company's performance will be evaluated. If the report is satisfactory, the remaining channels will be returned to the cable operator. If not, one channel will be returned each year until the sixth year when all will be returned.

In Dearborn, Mich., seven companies submitted bids for the affluent 35,000-home franchise. After reviewing the bids the city decided to toss out the bids and start over. This time it distributed a 160-question survey.

After reviewing the responses the city narrowed the running down to three companies.

After negotiating with those three, only Teleprompter agreed to meet all of the city's demands.

These demands include: A $1,000,000 cash security deposit to be held for the duration of the franchise; $150,000 to be paid by Teleprompter for community programing, and another $10,000 to cover the cost of the franchise process.

The city is also seeking a waiver from the FCC to enable it to collect 7% instead of the legal limit of 5% of the systems revenues.

The stiffest cable contract negotiations are currently taking place in New York City. Seven companies targeted to build sections of Queens, Staten Island, the Bronx and Brooklyn were slapped with unprecedented demands.

Among the demands were provisions for 11 city-owned channels; eight leased access channels available to all persons on a first come, first serve basis; a buyout clause requiring the operator to sell all or any part of his system to the city at book value upon request, and 8% of all revenues are to be paid to the city.

The city is attempting to write one standard ordinance to all parts of the city to guarantee that comparable service is offered at comparable rates to all citizens.

As a result, the company awarded the Bronx and a depressed portion of Brooklyn to Cablevision Systems, which opted to discontinue its negotiations with the city. If the ordinance appears to make the proposition economical, Cablevision will sign. If not, the city may find it difficult to come up with an alternative plan since Cablevision Systems was the only bidder in the Bronx.

In short, summed Bruce Burnham, vp of franchising for Cox Cable, "You now spend more and get less. Winning ain't as good as it use to be."

Meanwhile a number of MSOs are anxiously awaiting decisions in numerous cities—some that were bid on as much as two years ago.

Others are carefully scrutinizing the potential of those markets due to come up for grabs during the year. By the end of 1983 most franchising activity will come to a halt. Then MSOs will be faced with delivering on their promises. AA

15 MILLION SUBSCRIBERS PROVE WE'RE WORTH WATCHING.

BEFORE YOUR VERY EYES, CBN SATELLITE NETWORK HAS BECOME THE FAMILY ENTERTAINER.

And no wonder. Subscribers in 3,000 communities watch us for refreshing family entertainment 24 hours a day. System operators look to us for the balance we give their cable package. Major advertisers eye us for the sizeable family audiences we deliver. Municipal leaders nationwide see us as a vital element in the video selection they want their citizens to have.

24

With so many people looking at us in so many different ways, maybe you should take a closer look. And find out why CBN Satellite Network **is** The Family Entertainer. And why, more than ever before, we're the one worth watching!

WHAT DO FAMILIES SEE IN US?

They see The Family Entertainer as the one network they can turn to for wholesome, timely, family-style programs. Not just for an hour or two, but for 24 hours a day. They see great movies. TV comedy classics. Inspirational programs. Nature series. Children's shows. Sports specials. Daily up-beat women's programming. Families see CBN Satellite Network as the one place where they can reunite in front of the TV.

LOOK AT THE SPLASH OUR SOAP MAKES!

CBN Satellite Network offers a lineup of original productions, including **Another Life,** a continuing drama. It emotionally involves viewers in its frank, sensitive story, forming ties that keep them on as subscribers.

THESE ARE EXCLUSIVELY OURS AND EXCLUSIVELY GOOD!

Other original programming includes **USam,** a fresh-as-dew early morning show; **The 700 Club,** the live TV magazine-format show with a timely perspective on today's world; and **CBN Update News,** a round-the-clock series of 90-second news capsules. All our shows are produced using the highest-caliber talent on both sides of the camera in CBN's 160,000 square foot communications center that's a showcase for today's finest broadcast technology.

SEE HOW WE'VE GROWN.

Industry research revealed that during 1981, CBN Satellite Network achieved significant growth. We surged ahead 22% in number of systems and 63% in number of homes. Today, 15 million subscribers welcome The Family Entertainer into their homes!

THE VIEW FOR AFFILIATES IS BRIGHTER THAN EVER.

We see to it that our 24-hour full-time affiliates get the support they need.

Best campaigns

(Continued from Page M-41)

The couple's return with the Sun Camera once again placed the campaign in the top five in the final quarter.

"They're a wonderful team. I always look forward to their commercials," said a young man from New Haven about Garner/Hartley. The never ending saga of this couple, their real life interplay, their portrayal of a typical marriage, their humor with funny twists and refreshing style make these commercials pleasant to watch and at the same time believable and informative. This unique combination of humor ("it holds your attention because it is entertaining") and informativeness ("it gives you useful information and a reason to buy the product") is frequently listed by the viewers as their sole reason for buying a Polaroid camera. "Very good commerical, I went out and bought the Sun Camera," commented a new owner from Denver.

Viewers particularly enjoy the variety of commercials Polaroid offers. "They have a different commercial every day. There are a lot of them so you don't see the same commercial over and over again." After all, a commercial is seldom funny the second time.

FRENCH'S MUSTARD (J. Walter Thompson USA). The "Mustard Sandwich," with its media budget of $3,200,000, is the lowest budget campaign ever to appear on this list. Within three months of its launch, it landed in the fifth position on our quarterly list and this makes it the fastest moving campaign we have seen in the past four years of our tracking.

Confronted with a declining brand share, French's introduced the "Mustard Sandwich" campaign in April, 1981 to convince its target audience that it has such a superior taste you can eat it alone from the jar. This commercial featured a youngster in the act of making a mustard on mustard sandwich while singing "You are my sunshine." At the end of the commercial, after his first bite, he declares "Delicious." The commercial is credited with producing the first share gain for French's in three years.

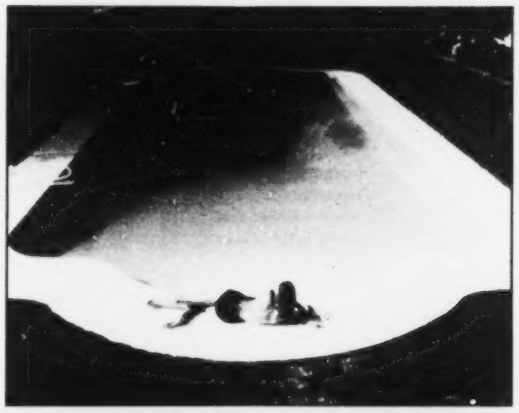
"It's so precious, I run to see it," said a woman from Orlando. Most campaign recall was for its star singer. Viewers found him adorable, charming, believable and "very goofy." His singing was considered "melodious," his expressions funny and his performance terrific. "That little boy gets to me," said another woman from Milwaukee. Some mothers were not sure about the mustard alone sandwich ("don't see how anyone can eat such a sandwich") but most could identify with the situation seeing their own kids doing that. "Typical but ingenious," said one such believer. The commercial managed to get the mustard taste across as a number of viewers chimed "delicious" meaning both the mustard and the commercial.

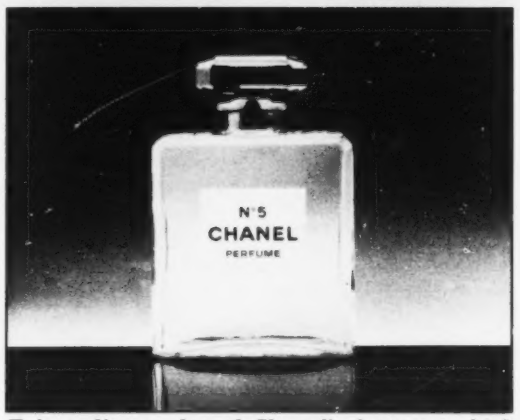
SEVEN-UP (N W Ayer). Early in 1981, the Seven-Up campaign switched from "America's Turning 7 UP" to a more upbeat, contemporary tune of "Feeling 7 UP." There was an enormous response to this change as the campaign jumped from No. 10 to No. 3 position on our quarterly list. During the year, the campaign continued to emphasize the refreshing values of this mainstream soft drink by portraying the family side of sports personalities such as Sugar Ray Leonard, George Brett, Tug McGraw, Mike Schmidt and Magic Johnson. Strategy, music, execution and celebrities are credited by the advertiser for the success of this campaign. Diet 7 Up with its cast of stars who "will not give up on taste" aired three spots in 1981 featuring Don Rickles/Linda Carter, Rich Little/Marilyn Michaels and Lonnie Anderson/Arnold Schwarzenegger.

Sports figures and their relationship with their children were most frequently cited as outstanding elements of the 7 UP campaign. George Brett was recalled as the best presented ("a wholesome, true to life commercial") followed by Sugar Ray Leonard ("a real natural, not a fizzed fight"). "Everyone can relate to the father and son relationship," said a new father from Long Island. A special vote was cast for the celebrity children, for their warmth ("Sugar Ray's little boy touches my heart") and cute lines ("just my dad" or "choke up on the bat").

Original tune and catchy jingle closely followed the personalities in recall. All 7 UP commercials are commended for depicting situations that involve the viewer and make him happy. "They sort of pep you up and give you an uplift" reported a dedicated fan of the 7 UP commercials. The enthusiasm and natural ease of presenters were often mentioned because they show "what people's real feelings are about 7 UP," said a believer from North Carolina. Don Rickles and Linda Carter were the best recalled of the Diet 7 UP commercials.

OSCAR MAYER (JWT). In 1981, Oscar Mayer had three campaigns on the air—cold cuts, hot dogs and ham. The three cold cut commercials "My bologna has a first name" have been on the air since 1974. The hot dog





Tv's audience shared Chanel's fantasy, which made the list for the first time this year.

commercials were launched in 1980, and emphasize the products special flavor due to the roasting process. Toward the end of 1981, Oscar Mayer added a ham commercial to its pool.

All Oscar Mayer commercials are rated "good, wholesome commercials," like the product. The kids and the jingle are integral parts of these commercials. To the viewers, Oscar Mayer kids are adorable, innocent, natural and eyecatching. Singing about the product, they appear honest and convincing.

"The nuances of these children are so appealing. They are delightful to watch," said a viewer from Kansas City. Once again, "Fisherman" and its singing star top the list of Oscar Mayer commercials. "He reminds me of my own son. His personality is one of enthusiasm," remarked a mother from Florida. The oldest question in our business was once again asked by a viewer from St. Louis, "How did he memorize those lines?"

LIFE CEREAL (BBDO). "They brought back 'Mikey'," exclaimed a grateful viewer from Denver. The "Mikey" commercial for Life cereal did not air in 1980 and the campaign was placed at 20th position in our list in that year. Brought back by popular demand in 1981, he has now propelled the campaign to 11th position this year. Besides "Mikey," the campaign aired two more spots in 1981, "Campers" and "Patient." The campaign positions Life cereal as a nutritional cereal that tastes so good even children love it.

"Mikey" was the best recalled of the 1981 Life cereal commercials with the other two running far behind. Most Life cereal commercials are considered family-type that find their way to mothers' pockets through their hearts. "It was such a cute commercial that I went out and bought some for my daughter," said one from Worcester, Mass.

Both adults and children can often relate to situations which use dialog between children. The campaign is applauded for using real life situations with children being themselves. The cute little boy who likes nothing is often described as natural, funny, entertaining and convincing. "He is so real. He makes you feel that he really enjoys the cereal." However, as in the past, not all fans of "Mikey" could recall the brand he advertises as his name was freely associated with a number of leading cereal brands.

KIBBLES 'N BITS (JWT). Kibbles 'n Bits is the most successful new product campaign in a number of years. After two years in test market, Kibbles 'n Bits completed its national roll out in 1981. The television campaign with three 30-second spots started in July, 1981 and immediately appeared on our quarterly list—the first time a new product campaign has done so. The campaign positions the brand as a totally new dog food that offers great taste through its unique two part form —kibbles and bits. The spots generate a strong brand name registration and convey a real sense of dog excitement, urgency and satisfaction with the brand.

Kibbles 'n Bits commercials were generally considered outstanding for the presence of the darling dog and the commercial's ability to make the viewers laugh. A dog panting down the street in combination with special sound effects was considered catchy and clever.

Most dog owners could identify with the dog in the commercial—from the man in Minneapolis ("he looks just like my dog") to the woman in Miami who insisted that her dog "talks just like the one in the commercial." The jingle was considered memorable. "I won't say it's the best, but you don't forget it. It sticks in your mind," said a dog owner from Detroit.

A number of viewers claimed to have bought the product because of these commercials. "My husband went out and bought some for our dog right away," said a woman from Nebraska. This combination of an amusing commercial which also sells the product was best described by a young man from Baltimore who ventured; "it makes you laugh and a commercial that makes you laugh sells the product." Some of us may want to add "not always."

MEOW MIX (Drossman Yustein Clowes). Meow Mix is back on our list this year. Continuing the strategy developed in 1974 ("the only cat food cats ask for by name), the campaign presented three spots in 1981—"Crosswords," "Answer Cat" and "Satisfied Customer."

Meow Mix commercials go to great lengths to present perception of their cats. In "Crosswords," for example, a clever cat helps his owner solve a tricky problem and get in a word for its favorite brand. A smart "Answer Cat" (like the "Answer Man Radio Show") provides answers to some very difficult questions even before they are asked. "Satisfied Customers," as the name suggests, presents a series of interviews with Meow Mix-loving cats from various walks of life.

Cute and humorous are the two words most often used by viewers to describe Meow Mix commercials. The cat's behavior and mannerisms in these commercials are considered not only funny, but also "realistic" and true to life. Crosswords was the best recalled and liked of the 1981 spots. "You can watch it over and over," said a viewer from Cleveland. "The humor of the situation sticks in your mind for months," remarked another from Memphis.

TAB (McCann). Tab, "The Beautiful Drink for Beautiful People," campaign has been on the air since 1977. It added five new spots in 1981 that focus on the goals of a Tab drinker—achieving a perfect figure that produces a feeling of self-confidence that shows in everything she does.

With her stunning figure, the "Girl on Beach" scored far ahead of all other Tab commercials in the 1981 pool. "It is a mind grabber because of the girl" exclaimed one viewer from San Francisco. This perfect "10" figure on the air since April, 1981 attracts a wide range of comments: To a man from New Orleans it was "inviting" and showed that "she was really striking and very sexy," and to a woman from Tampa it was an "inspiration" showing that Tab "really works." Some viewers, though very much a minority, found this blatant display of beautiful people an exploitation of the female body and rated the commercial "very offensive."

Over-all, the humor of the situation (a man staring at this figure as his wife pours a bucket of water over him) was considered cute, true to life and funny. It kept the viewers glued to the screen ("made me want to see where it would lead to") and then delivers its message which according to a teenager from Boston was "it pays not to look."

JELL-O (Y&R). "Children love it and mothers feel good about serving it because it is wholesome" was clearly the message of the two Jell-O pudding commercials that aired in 1981. Bill Cosby's presentation of this strategy since 1973 is credited with continuously increasing the Jell-O pudding market share and reinforcing the brand's warm and friendly personality. The Jell-O gelatin "Fun" campaign added two new executions in 1981 celebrating the unique and delicious eating experience based on rediscovering Jell-O gelatin. The "fun" of Jell-O gelatin was presented through a combination of wiggling product, happy faces and matching music.

To most viewers, Bill Cosby is the Jell-O campaign. He is considered natural, cute, hysterical, warm, entertaining, friendly, humorous, believable, enjoyable and "the greatest." The way he acts and reacts to children is often cited as an example of his talent to get his message across without even trying. The "Fun" campaign was frequently recalled for its children and music. The family get-together commercials created an all-American image for the brand. "It was wholesome. The representation of what we think American families are," observed a woman from Allentown, Pa.

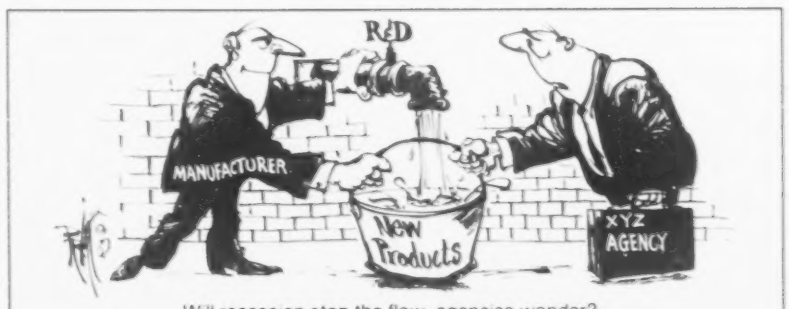
No new product r&d cutbacks yet



Will recession stop the flow, agencies wonder?

An Advertising Age roundup

Agency executives who are coping with cost-cutting plans and proposals are wondering whether today's recession will generate a new product drought in the future.

Noting that clients tend to protect the bottom line in periods of recession, often by reducing new product research and development and eliminating any venture that smacks of high risk, an agency head said: "Sure, there is increased support for the cash cows [at such times]. And they'll think of line extensions before they think of new products.

"In the long run, fewer new products on the drawing boards will hurt agencies more than anything I can think of. . .because decisions to shelve a new product venture this year actually impact on agencies in 1985. It's the long-range impact of the 'no-go' decisions that are now being made that is our problem," he said.

■ The fear does not appear to be well-founded, however, judging from the findings of an Advertising Age survey of new product activity among major advertisers. (And assuming that their comments avoid blind optimism as they endeavor to strengthen the corporate posture concerning

(Continued on Page 77)

Carnation to launch health center chain

By JENNIFER PENDLETON

Los Angeles—Carnation Co. is taking a major step into the health and nutrition field with a new retail chain offering personalized weight-loss programs and a new line of health-oriented Carnation products.

The company will open six Carnation Health & Nutrition Centers in Los Angeles this fall as a prototype for what will eventually become a national chain, if all goes according to plan. The centers will offer personalized service extending to nutritional and weight-loss counseling, plus a separate retail outlet that will sell health foods, vitamins and low-calorie foods under the Carnation and other brand names.

Carnation is developing the new products exclusively for the centers; the centers will not be outlets for existing Carnation products.

Carnation has set up a separate health and nutrition division to manage the project. Last December it hired former Sun Drug president Kenneth Chane; he will be the division's general manager. Carnation has assembled a sizable staff to handle all phases of the new operation.

Mr. Chane told Advertising Age the concept of the center is unlike any other in the health and nutrition field today. "This is not an exercise center spa," he said. "What we are offering is a professional approach to personalized weight loss using Carnation's expertise in diet and food technology."

Although Carnation's retailing experience is limited, Mr. Chane has spent his entire career in retailing, most recently as president of Pennsylvania-based Sun Drug and, before that, as exec vp of Mack Drugs in the northeastern U.S.

It was known that Chiat/Day had been named to handle an undisclosed line of Carnation nutritional products (AA, March 15), but the extent of the project was not known until Carnation chairman H.E. Olson mentioned that the company would start testing a new

(Continued on Page 82)

Wanna pop?

Shasta Beverages uses the theme "I wanna pop" in new campaign breaking today (AA, March 22). "Don't gimme that so-so soda, the same old cola. I wanna pop. I wanna Shasta," spots say. Needham, Harper & Steers handles.

Almost: A $2.3 billion agency merger

FCB strikes out at DDB

By CHRISTY MARSHALL

New York—Foote, Cone & Belding, which Friday found its merger discussions with Doyle Dane Bernbach "amicably" terminated, is expected to go back to a list of other marriage candidates it has drawn up.

That list is said to include Backer & Spielvogel, Dancer Fitzgerald Sample, N W Ayer, Grey Advertising, Wells, Rich, Greene and Warwick, Welsh & Miller. Prior to its discussions with DDB, which if fruitful would have created a $2.3 billion U.S. agency second only to Young & Rubicam in worldwide billings, the agency had met with Needham, Harper & Steers, but nothing came of those talks either.

Robert Pfundstein, exec vp-chief financial officer at Doyle Dane Bernbach, would say only that they "found some snags" in the FCB/DDB matchup—snags significant enough to warrant breaking off the talks. An examination of the two client rosters reveals a number of major conflicts.

One source claimed the agencies actually had made a deal late Thursday night, with FCB the acquiring agency, but it came apart when they tackled the problem of what to call the merged agency. Doyle Dane Bernbach/Foote Cone & Belding? Foote, Cone & Belding/Doyle Dane Bernbach? Bernbach/FCB?

■ If FCB had linked with DDB, the record for the largest merger in agency history ($2 billion) that was established only last February by Ted Bates & Co. and William Esty Co. would have been topped. Combined billings of DDB ($1.150 billion) and Foote, Cone ($1.153 billion) would have hit $2.3 billion, changing the agencies' status from the ninth and tenth-largest, respectively, to No. 2, bumping J. Walter Thompson Co. ($2.2 billion) to No. 3. (Those figures are for U.S.-based agencies; Japan-based Dentsu Advertising bills $3 billion

Daughter Christie takes over

Can new Hefner rebuild empire?

By JENNIFER ALTER and PAUL MERRION

CHICAGO—By elevating his 29-year-old daughter to the presidency of Playboy Enterprises, Hugh Hefner is hoping that he has solved the management problems that have plagued his company in the last decade.

Not the least of those problems, Playboy followers note, has been the paradoxical Mr. Hefner himself. Since buying an idyllic Los Angeles retreat in 1970 he has been at once an aloof and intimidating figure at the company—indifferent to all company pursuits except those associated with his beloved *Playboy* yet insistent upon calling all the shots when it comes down to decision time.

"They need entrepreneurial direction," says Kenneth Noble, a publishing analyst at Paine Webber Mitchell Hutchins and a longtime Playboy follower. "They need a person in charge who's there."

Now in charge is Christie Hefner, just eight years out of Brandeis University. She has inherited, along with her father's entrepreneurial genes, a shattered empire. Suddenly shorn of the gambling interests in England and New Jersey that promised to make the company a major casino-resort operator with an almost incidental interest in publishing, Playboy once more is largely a magazine publisher. It is, moreover, a magazine publisher that has demonstrated little competence in expanding beyond its flagship title, although *Playboy* retains a solid hold on an important audience and is profitable enough to finance new ventures.

The company has made a tentative, and so far unproven, foray into cable tv programing. Beyond that, it has little but its 16 remaining Playboy clubs, which no longer appeal to the people they were built for and

Elsie moves into market to take on Shamitoff

While Borden has just begun an Oklahoma City test of Rainbow frozen fruit bars, in five varieties with no artificial preservatives, Shamitoff Foods of Redwood City, Cal., has been gradually expanding distribution of Shamitoff's Number One True Fruit bars. Its line is now in more than 35 states.

Shamitoff's five flavors of bars contain one-fourth cup of fruit, average 60 calories and contain no artificial ingredients. Borden is using newspaper ads handled in-house; Shamitoff runs newspaper ads only upon distributor request (also done in-house).

Planned ABC net plugs into home taping

By MORRIE GELMAN

ABC Video Enterprises has dropped a bombshell on the home video business.

Not content with its Hearst, Group W and ESPN ventures, the ABC Inc. unit has been quietly developing subscription tv for videocassette recorders. Sony is its hardware manufacturer/supplier.

ABC is asking the Federal Communications Commission for expedited approval to initiate a national subscription tv distribution service using a combination of over-the-air broadcast and videotape recording technology.

This proposed Home Video Network (HVN) would transmit movies (eight new ones per month), cultural, theatrical, educational and how-to programing in scrambled form for subsequent automatic recording on vcrs in HVN subscriber homes. It will transmit five times a week, from 2 a.m. to 6 a.m. (ET), over the five network-owned stations as well as any affiliates that want to participate.

The fee would be $19.95 a month plus installation charge. Homes sans videocassette recorders could lease a unit from HVN for $29.95 monthly, or buy one through the service at a cost comparable to the lowest retail level. The HVN system is compatible with virtually all vcrs, not just Sony's Betamax.

ABC affiliates would participate by receiving a monthly payment per subscriber in their market area. Asked if HVN viewing is going to dilute hut (homes using television) levels of ABC nationally and affiliates locally, ABC Video Enterprises president Herb Granath, under whose aegis the new delivery system falls, acknowledged it will be competitive to some extent, but could more appreciably impact on the home video business.

Another impact is going to be on direct broadcast satellites. Mr. Granath believes. He thinks HVN is going to have its most immediate impact in markets that are not served, and not likely to be served, by cable.

A selling point, according to Mr. Granath, for the program suppliers, particularly the movie studios: More security and accountability in the distribution of product to the home video market than in current tape rentals. For the ABC affiliate, HVN presumably offers a chance to join the video parade without making a major financial commitment.

Specifically, ABC, which wants to get HVN into full-fledged operation by early next year, is asking the FCC for the same sort of stv waiver for its five owned vhf stations as stations in the uhf band have received. Sony also is seeking approval to use its encoding/decoding devices.#

Tribune to keep 'News'

By STUART EMMRICH

NEW YORK—Reversing its months-long position that the only way the *New York Daily News* was going to survive was under another owner, the Tribune Co. announced late last week that it had decided to keep the paper itself.

In a low-key statement that amazingly seemed to ignore any mention of four months of turmoil, uncertainty and confusion that has surrounded the *Daily News* since it was put up for sale last December, Tribune Co. president Stanton Cook said the company now believes it is possible to reverse the paper's financial slide.

"This is a great newspaper, a newspaper whose circulation and advertising strength demonstrate that it will be needed and effective in the marketplace for years to come," Mr. Cook said. "We believe it can again be a profitable newspaper."

In meeting with the paper's unions to inform them of the reversal, Mr. Cook said he hoped the company would be able to get the same sort of contract and staffing concessions that had been offered

Giving each other the business

Tough new ads hammer away at the competition

By Stuart Emmrich

There it was in unmistakable black and white, disturbing an otherwise uneventful Monday morning.

An ad placed by *Business Week* showed a rolled up, discarded copy of the *Wall Street Journal* nesting in a wastepaper basket. Its headline: "It's 10 a.m. Do you know where your ad is?"

The *Wall Street Journal*? Tossed aside like any old fish-wrapper? It was a sight that had some media buyers surprised and *Wall Street Journal* executives apoplectic. Sure, competing publications aren't above taking occasional swipes at each other, but those previous efforts had the impact of pebbles skimming over the water compared with this ad, which appeared in the New York Times and Advertisng Age.

"That was a new low in advertising. When you start to take shots like that, it's more than a little beneath the call of competition," charged Bernard Flanagan, vp-advertising at the *Journal*.

The ad was part of a series in a new campaign *Business Week* and its agency, Fearon/O'Leary Associates, New York, broke earlier this year. A previous ad, using news clips from both *Business Week* and the *Journal*, sought to demonstrate how *Business Week* had beaten the *Journal* on news stories months or weeks earlier. Another ad described the journalistic competition between the weekly *Business Week* and the daily *Journal* as the difference between "perked and instant" reporting.

Those ads were okay with *Journal* vp-associate publisher Peter Kann, who said it was normal and expected for competitors to make unflattering comments about their rivals, but he said he, too, was taken aback by the now infamous "It's 10 a.m." ad.

"I'm surprised to see that a magazine would show a picture of its competitor in a wastepaper basket," Mr. Kann said. "It really lacks class and good taste, and I'm not sure why they would want to do something like that. We certainly don't think *Business Week* is trash."

But *Business Week* publisher R.B. (Bernie) Alexander, while acknowledging that the "wastepaper basket" ad might have been a "little rough," said that his magazine wasn't trying to portray the *Journal* as trash.

"We certainly didn't have that in mind; we have the greatest respect for the *Journal*," Mr. Alexander said. "But it is our most formidable competitor. We have to position ourselves against it. There are some things we can say about ourselves and the differences between us and the *Journal*, such as that we can take four-color ads and they just have black and white, or that a weekly magazine has a longer shelf life than a daily newspaper, which is what I think that ad tried to get across."

But Mr. Alexander said he would be "surprised" to see *Business Week* carry its comparison advertising campaign much further. "I think we made our point," he explained, adding that he never intended a "campaign against the *Wall Street Journal*."

Making the point that there are substantial differences among the rival business magazines has cropped up with a vengeance in recent months, as almost every publication in the category seems to be taking on its competitors in bare knuckle ads that they never attempted before. If it isn't *Business Week* pitted against the *Wall Street Journal*, it's *Fortune* vs. *Forbes*, or *Dun's Business Month* vs. both *Fortune* and *Forbes*, or *Barron's* vs. *Business Week*, *Fortune* and *Forbes*.

"It certainly seems as though the field has become more competitive in its advertising, but I don't think that is unhealthy," said Marianne Caponnetto, associate media director at Needham, Harper & Steers. "It reminds us of the different strengths of the magazines."

"Of course, it isn't always positive," Ms. Caponnetto added. "To go and knock your competitor is not always a positive way to do things, but it is often a way to get noticed."

But Joseph W. Ostrow, executive vp at Young & Rubicam, the agency for *Fortune*, who has broad experience in handling Time Inc.'s magazine promotion efforts, believes that just getting noticed isn't enough reason for one magazine to run an ad that knocks a competitor.

Of all the competitive new ads among business publications, this "wastebasket" presentation by* Business Week *has stirred the most controversy.

"I'm surprised that a magazine would show a picture of its competitor in a wastepaper basket. It really lacks class and good taste and I'm not sure why they would want to do something like that."

"That sort of thing is not a way of doing battle that I think makes sense," Mr. Ostrow said of *Business Week's* wastepaper basket ad. "It doesn't cause you to read the ad. It just catches your attention momentarily and then you move on. The kind of comparative ads that are useful are those dealing with issues of substance: Editorial quality, price, performance."

Others in the industry, while not expressing approval of the wastepaper basket execution, said they were not surprised that *Business Week* decided to take on the *Wall Street Journal* in its latest campaign.

"*Business Week* carries more ads than anyone else, and when you are No. 1, you have to find somewhere to grow," said W. Donald Larson, director of communications at *Forbes*. "They first went after the newsweeklies a few years ago when they wanted consumer advertising; now they are going after the *Wall Street Journal* because that opens up a new area for them. There is no point in *Business Week* going after us."

Ms. Caponnetto said tighter ad budgets may be one reason why the head-to-head competition has become fiercer in recent months.

"While advertisers are increasing their investments in business magazines," she said, "they recognize that times are tough and that they just can't run a campaign in a whole list of publications. They have to be more selective."

Although ad budgets tend to become tighter in recessionary times, one of the factors seemingly fueling the increased competition among business magazines is the realization that business publications are hot books that can represent ad revenue gold mines. As these stakes grow higher, the competition gets tougher.

Last year, *Fortune* increased ad pages by 19%, to 2,738, while its revenues rose by 27% to $70,442,000. *Forbes* was up by 4% in pages, to 2,765, and by 20% in revenues, to $53,923,000. The *Wall Street Journal*, while not disclosing actual ad revenues, was up in linage by about 10%, as national ad rates were increased approximately by 15%, according to Mr. Kann. And even *Business Week*, which dropped by 2.3% in pages last year, to 4,845, still pulled in an impressive $133,296,000 in 1981, a 3% increase over the previous year.

What's ironic about the ad revenues collected by these publications is the relatively low circulation levels of the business magazines. With *Business Week* at 770,000 paid circulation, *Forbes* at 700,000 and *Fortune* at 646,000, each ranks near the bottom of the country's 100 largest magazines.

But as these financial success stories grow, so do the number and influence of their competitors.

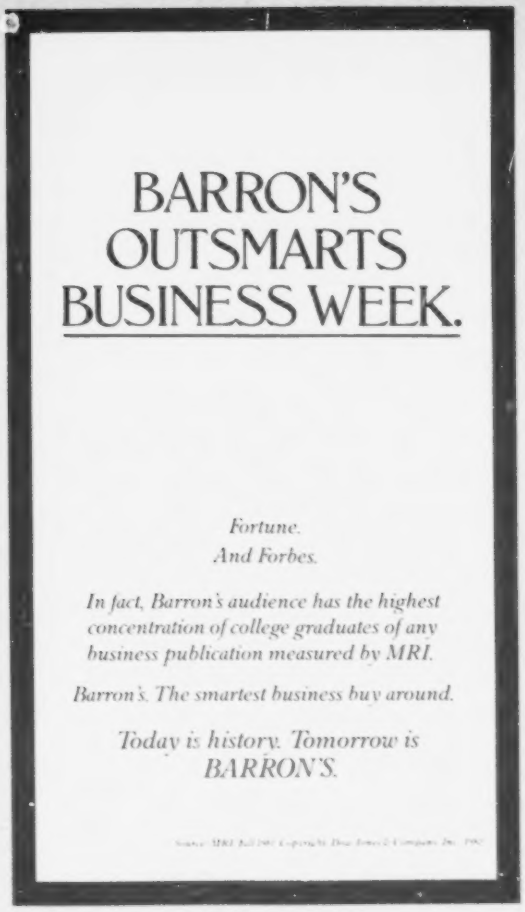
Inc., one of the fastest-growing of the business magazines, carried 994 ad pages last year, up by nearly 29% from 772 the year before. *Industry Week* increased by 4.3%, to 1,663 pages from 1,593, while *Venture* gained 36%, to 468 from 344 pages. *Barron's*, despite a 4% decrease in pages in 1981, carried 2,216 pages of advertising. And *Dun's*, having dropped to 914 pages in 1981 from 1,021 the previous year, now is enjoying a strong rebound since changing its name and format late last year. The Dun & Bradstreet publication last fall changed its name from *Dun's Review* and altered the format to include a section that is designed to give executives a quick roundup of the month's business events. Ad pages were up by 12.5%, to 135 from 118, for the first two months of 1982.

So as the competition and the stakes grow, the business magazines are continuing to evaluate their own marketing strategies in seeking new ways to gain a competitive edge.

And among the major publications, both *Fortune* and *Business Week* expect to be spending more heavily on advertising than they have in recent years. *Business Week* executives, while declining to discuss actual figures, said they intend to increase their 1982 advertising budget by at least 25% and perhaps as much as 50% over the previous year. *Fortune* executives said they too would probably be increasing 1982 ad expenditures by about 25%.

One change among business magazines, particularly reflected in *Business Week's* and *Fortune's* advertising, is that the individual publications, when they go to comparative advertising, are less likely to talk about demographic differences, focusing instead on editorial content

Stuart Emmrich, a reporter in Advertising Age's New York bureau, covers the magazine publishing industry.



BARRON'S OUTSMARTS BUSINESS WEEK.
Fortune.
And Forbes.
In fact, Barron's audience has the highest concentration of college graduates of any business publication measured by MRI.
Barron's. The smartest business buy around.
Today is history. Tomorrow is BARRON'S.

That fabulous Forbes environment. How much will it affect your advertising? (You be the judge.)
Publications that best fits each statement
Forbes
Fortune
Business Week
Has the best information on companies
Is the liveliest magazine
Has the most up-to-date information for readers on business events
Is the most authoritative
Is the one I would miss most
Is the most enjoyable
Offers the best judgments and insights
Is the most interesting to read
Has the most provocative writing
Is written with wit and humor
Think writers "tell it like it is"
Of the three it is my favorite
No wonder Forbes has been shown year after year to be the business magazine read regularly by the most influential executives in the country. After all, it's their favorite. No wonder that in 1981, only seven magazines—all weeklies—carried more advertising pages than Forbes.
No wonder Forbes now tops Business Week in net paid U.S. circulation—after their average arrears of 57,000 unpaid copies are deducted from their latest published figures—making Forbes the leading mass business magazine in paid U.S. circulation, with a total of 667,000—15,000 more than Business Week (and 120,000 over Fortune).
Next time you want your advertising message to reach the most powerful management market in America, consider how effective it will be in that witty, provocative, lively, conversable magazine whose writers 'tell it like it is.'
Forbes
Capitalist Tool

Dun's Business Month *(from left)*, Barron's and Forbes *all take direct aim at their competitors, with* Barron's *even elevating* Business Week *to the headline of its display, while* Forbes *and* Dun's *use figures to show their presumed superiority.*

or perceptions by readers and advertisers. "What really separates the magazines today is the quality of their editorial," argued Don Austermann, *Business Week's* director of marketing communications. "We used to talk about audience profile, but that is now a given. Most of our competitors can show the same thing. Instead we are now talking about what makes a magazine important, what makes it must reading."

Although admitting that it is difficult to articulate to advertisers the exact quality of editorial product, he said that the new *Business Week* campaign comes as close to any he has seen. "This advertising has caused more positive reaction than any ads we have used in the past 10 years," Mr. Austermann said. But he denied that it should be seen as a head-to-head battle against the *Wall Street Journal* or against any other business magazine.

"We are not really marketing against anyone; we are

Publications battle

(Continued from Page M-3)

marketing for *Business Week*," Mr. Austermann said. He conceded that the ads do target the *Journal* to a degree not used before, but added that the mention of other business publications in those same ads doesn't mean he sees *Business Week* as setting the tone for comparative advertising.

"We're the leader. We don't have to answer to anyone," he said. "What is important for us to do is to sell value and virtues of the magazine. We don't have to answer to a magazine that is barking at our heels."

That same position, ironically, is being taken by *Wall Street Journal* executives, who say they have no plans to respond directly to the *Business Week* ads that compared the two publications.

"We are not going to get that dirty," said Bernard Flanagan, vp-marketing at the *Journal*. "I have five ads that I could run right now that would cream them—and they are all factual—but I don't think that is the way to do business."

Instead, the *Journal* just broke a campaign focusing on the idea that the *Journal* is read by most corporate executives. The ads show pictures of 15 famous buildings and ask which landmark is "viewed by 6,000,000 Americans for more than four hours a week." The answer is found in the 16th snapshot: A rolled-up copy of the *Wall Street Journal* photographed to look like a skyscraper. The newspaper will also continue to use its "All cream" ads that discuss the readership demographics. The paper's agency is Jim Johnston Inc., New York.

"We used to talk about audience profile, but that is now a given. Now we are talking about what makes a magazine important, what makes it must reading."

That same aloofness is not being maintained by other publications, however. The degree to which the magazines pit themselves against their competitors differs from one marketing department to another.

"This comparative advertising is not really new for us, but it is a change for some of the smaller publications," said Mr. Garson of *Forbes*, "To get a part of the action, they have to become part of the field. It's how the women's books grew into a category. If these magazines such as *Inc.*, *Barron's*, *Dun's* and *Industry Week* want to grow, they have to marry themselves to us."

Meanwhile, *Forbes* has decided to use some of the "buzzword" advertising that Mr. Garson said has been effective for *Fortune*.

This **Wall Street Journal** *ad singles out its Friday edition—the same day* **Business Week** *comes out.*

"For some years, *Fortune* had been basing its advertising on research we had pretty much ignored. I call it buzzword advertising—the image of authority, long stories, etc.," Mr. Garson said. "I think the truth of those statements changed a bit when they went biweekly, but images die hard, and they are always going to win on what I would call the 'ponderous' adjectives. And *Business Week*, because of its frequency and the kind of stories it carries, is always going to win on being more timely and newsy. But I believed that *Forbes* would win on such things as liveliness and being enjoyable. So I put my money where my mouth was, commissioned our own research, and it worked." He added that the results are now appearing in *Forbes* ads.

Fortune, while continuing to point out what it sees as differences between itself and other publications, is making a greater effort—in its 1982 campaign—to define what it sees as the character of the magazine and how it can be used as a career advancement tool.

The new Y&R ads were spurred by a survey *Fortune* recently commissioned that showed nonsubscribers seemed to have a distorted idea of what the magazine was about, said promotion director Walter Joyce.

"Nonsubscribers tended to think it was a magazine written for chief executives of the top 1,000 companies. When we asked if they thought the magazine was edited for them, they said no," Mr. Joyce said. "We wanted to show these individuals that this is an exciting publication that can help young managers succeed and move up in business."

The magazine is especially interested in catching more younger readers than it has in the past, Mr. Joyce said.

The new ads—humorous and thought-provoking—use such grabbers as a sheep sitting behind a desk, with a headline: "If you stick with the herd, you could end up as a lamb chop." Another, captioned "By diligence, a quick-witted fellow can rise from rags to riches," shows an old photograph of a city kid selling newspapers.

Both ads, as well as others in the campaign, sell the idea that ambition is okay, that you don't have to hide ego and the urge to get ahead. And it argues that *Fortune* is the one place where up-and-coming executives can get the information that will help them jump ahead of their peers.

Previous ad campaigns basically publicized contents of each issue and assumed people understood the thrust of the magazine, Mr. Joyce said.

James Hoefer, associate publisher-advertising director, conceded that he was not naive enough to assume that *Fortune* is not competing with its rival magazines for advertisers and readers. He asserted, however, that the magazine does not believe in using comparative advertising, except in a minimal way.

It is an attitude found at most Time Inc. publications.

"To say you are better than someone is to really assume that you are worried about your competitors," Mr. Hoefer said. "Our position is that we are the prestige publication, the premier showcase." AA

How business magazines take shots at each other

Here is a sampling of what the business magazines are saying about each other in their latest ad campaigns:

• **Barron's**: "*Barron's* outsmarts *Business Week*" is the headline on one current ad in the *Barron's* campaign, adding in smaller type "and *Fortune* and *Forbes*," arguing that the latest readership studies from Mediamark Research shows that *Barron's* has the highest concentration of college graduates of any of its rivals. Other ads from the Dow Jones & Co. publication proclaim, "*Barron's* outclasses . . . " and "*Barron's* outearns . . . ," with different competitors' names used to fill in the blanks.

• **Business Week**: The now famous "It's 10 a.m. . ." ad tried to make the point that a "fast run-through of the capusule business news, a scan of the stock tables, a quick look at some earnings and sales figures and a glance at an ad or two. Then it's all over for the daily journal." Meanwhile, according to the ad, *Business Week* readers keep reading their issues all week long. Other ads in the series tried to make a point that *Business Week* readers often learn about a story before it breaks in the *Journal* or that *Business Week*, when it can't always beat the *Journal* on a story, is able to offer more insight and background than the daily newspaper.

Other recent *Business Week* ads make an observation about the McGraw-Hill magazine and then include a line such as, "It's the kind of in-depth business reporting 6,000,000 business leaders know they can get consistently in *Business Week*. Not in *Forbes*. Not in *Fortune*. Not in the Wall Street Journal."

• **Dun's Business Month**: "With ad budgets getting tighter every day, can you afford to waste $270,000?" asks *Dun's* publisher Robert Potts in that publication's latest ad. The new campaign from the Dun & Bradstreet magazine assumes that businesses are going to advertise in *Business Week* and the *Wall Street Journal* no matter what, and that any inroads *Dun's* is going to make will depend on knocking off *Fortune* and Forbes.

The ad compares a 12-times-a-year media buy in combination with the *Journal* and *Business Week*, claiming an advertiser will spend $1,104,747 with a combination that includes *Dun's*—$270,792 less than that combination with *Fortune* and $207,864 less than with *Forbes*.

• **Forbes**: In its latest campaign, *Forbes* tries to turn the tables on *Fortune*, which for many years has been using businessmen's attitudes about the various business publications as a way to sell its own magazines. Its own study of top executives conceded that *Fortune* won on being the most authoritative and that *Business Week* was the big winner on being most up-to-date, but that *Forbes* pulled out ahead on such impressions as being the liveliest, the most enjoyable, the most interesting to read, the one written with the most wit and humor, and came out on top when the executives were asked to pick which of the three was their favorite.

• **Fortune**: The Time Inc. magazine carefully avoids outright comparative advertising, instead using ads that maintain that *Fortune* is in a unique position. A typical line from an ad reads, "For over 50 years, it's been the authority, the horse's mouth, the one you rely on when you can't afford a wrong decision," subtly implying that its rivals lag behind in the competitive foot race.

• **Wall Street Journal**: The *Journal* pretty much avoids mentioning any competitor's name in its ads, but a couple of weeks after *Business Week* showed a copy of the *Journal* in the wastepaper basket, the Dow Jones publication retaliated in a low-key way. It ran a spread ad in the March 22 issue of Advertising Age showing a backseat rider in a Rolls-Royce asking: "Did you see that story in Friday's *Journal*?" Although it made the point that the Journal was "top-of-the-day reading every business day," it especially touted the Friday *Journal* as a wrapup of the week's events. Coincidentally, Friday is the day most *Business Week* subscribers receive their issue of that magazine. —S.E.

Senate FTC bill would eliminate unfairness rules

WASHINGTON—A key Senate Republican, endorsing the ad industry's major legislative goal this session of Congress, is forcing a Senate commerce committee showdown to end Federal Trade Commission regulation of "unfair" advertising. But proposals to restrict FTC control over deceptive ads appear dead for the year.

Support on the unfairness issue came from Senate consumer subcommittee chairman Robert Kasten (R., Wis.). After introducing his long-awaited FTC bill last week, he is scheduled to take it before the full commerce committee for action May 11. It will be a busy week on Capitol Hill for FTC. While the Senate commerce committee tackles the Kasten bill, FTC's controversial used-car sales disclosure rule faces a Senate floor vote on a killing veto resolution. A floor vote in the House, where the energy and commerce committee recommended a veto of the rule 25-16 last week, is also imminent.

The Kasten bill drops "unfairness" as grounds for prosecuting an advertiser, the first major change in congressional policy since the law makers directed the commission to root out "unfair or deceptive" ads and business practices in 1938. The commission retains the power to attack nonadvertising business practices as unfair, but the Kasten bill adds to the law, for the first time, a set of standards the commission must use in selecting cases.

But Sen. Kasten said it is premature for Congress to replace FTC's current, broadly written authority to select deceptive ad cases with a new legislative standard. "A systematic study" of complaints about FTC's de-

Wendy's healthy kind of people

The "all-you-can-eat" salad bar will get a good deal of attention in Wendy s International's new campaign, breaking in July. The "Wendy's kind of people"-themed drive goes after fast-food consumers who want "something better" (*see story, Page 14*). Dancer Fitzgerald Sample is the agency.

Invading Cossack vows to stay on air

By JOHN J. O'CONNOR

Cossack vodka has invaded a segment of the Boston media turf that heretofore has been open only to wine and beer advertisers.

Since the beginning of the baseball season, WITS listeners who tune to Red Sox games have been exposed to a 60-second radio spot for the hard liquor produced by Massachusetts-based M.S. Walker.

Harvey Allen, president of Walker, characterized the radio campaign as a "pioneering step" that is "60% self-serving" and 40% devoted to what he sees as the problem of distilled spirits having a second-class citizenship status while beer and wine advertisers enjoy easy access to radio and tv.

"My position," Mr. Allen said, is that advertisers of products containing alcohol "should be all on or all off the air."

In his opinion, beer and wine today are greater contributors to alcohol abuse—especially among young drinkers—than hard liquor. "Some people may consider me the black sheep of the industry," Mr. Allen said, "but I'm not pleased with the holier-than-thou attitudes of large distillers." He was referring to the fact that the Distilled Spirits Council of the U.S., a self-regulatory body, prohibits broadcasting ads for hard liquor. Walker is not a member.

The distiller also advanced another reason for taking Cossack, the largest-selling vodka in Massachusetts, into broadcast advertising. Mr. Allen said he was concerned that, with the suspension of the National Assn. of Broadcasters code in February, some other spirits marketer might have gone on the air with commercials lacking "the taste and dignified manner" of the Cossack spot.

WITS vp-general manager Frank Tenore said he underwent no personal agonizing over the spot. He said he had been troubled for some time by the double standard inherent in the broadcast code with respect to hard liquor.

NAB has suspended the code while it appeals a federal court ruling that found a portion of it to violate antitrust laws. In turn, an Indianapolis tv station, WTHR, is waiting for its lawyers to decide if there are legal snags should it decide to permit hard liquor commercials (AA, April 19).

Since the Cossack spots began airing, the WITS exec said, he has received only one complaint. Having accepted Cossack's "fair-sized" account does not mean WITS intends to become "liquor central" for Boston radio, Mr. Tenore stressed. He has instructed his sales force not to solicit other liquors.

Mr. Tenore said that even if the code is reinstated, he will not bounce Cossack off WITS, which is an NAB member.#

O&M to add ties in Japan

By CHRISTY MARSHALL

If all goes well, Ogilvy & Mather's network of 34 countries will be expanded to 35. The agency has teamed up with Tokyu Agency International to form an agency and, at long last, establish its presence in Japan.

Ogilvy has signed a contract with Tokyu that agrees to "study the potential of a future joint-venture agency in Japan." William Phillips, chairman-chief executive officer of Ogilvy, said he hopes to close the deal by the end of the year. It has not been decided what the agency will be called.

Bruce Odza, most recently senior vp-managing director of Ogilvy's Houston office, has moved to Japan to represent the agency in the negotiations. Before taking over the job in the Houston office, Ogilvy's largest, he was managing director of the agency's Melbourne office.

Mr. Phillips said Ogilvy is actively looking for acquisitions in both Korea and Switzerland, and predicted one of its subsidiaries, Scali, McCabe, Sloves, would be acquiring agencies before the

Pet food $ sales up 10% in 1981

By JOHN C. MAXWELL JR.

Pet food industry volume moved up close to 10% in dollars in 1981. However, A.C. Nielsen Co. says the gain in units was a modest 1%. Our over-all numbers differ somewhat from Nielsen's since we include sales through other sources in addition to food stores.

Dry dog food continued to be the largest-selling product, and was up rather well in dollars although not in units. Most of the generic and private label business is in this area, and it now accounts for about 20% of dry dollar volume and 31% of unit volume.

This had adverse ramifications for product growth at Ralston Purina, whose market share for 1981 was down, along with those of the other major companies. Ralston had a 28.5% share in 1981, down from 29.2% in 1980. Carnation remained in second place, though its share dipped from 12.5% to 11%.

General Foods moved past Quaker Oats Co. in market share last year. GF took third place despite a share drop from 8.9% to 8.8%. Quaker's share dropped from 8.8% to 7.8%. The other major pet food marketer, Liggett Group, also saw its share slip slightly.

Alpo continued to lead the brands in the canned dog food category; Dog Chow holds the lead in the dry segment, Gainesburgers in the moist category and Tender Chunks in the soft-dry segment.

Canned dog food continued to show unit losses, although it was up some 4% over-all in dollars.

The main growth within the industry is still in cat food, with all product lines expanding in the double-digit area, and with dry cat food faring best in dollars (up 23%), although in pounds specialty canned and moist (both up 6%) did best.#

Mr. Maxwell is with Lehman Bros. Kuhn Loeb, New York.

Is your advertising a looking glass...or a window?

When you look at your advertising, do you see a flattering vision of yourself, or a realistic view of your markets?

That question deserves some serious thought. Because it's easy to get so wrapped up in your own products and interests that you lose sight of the customer. And that can result in some pretty ineffective advertising.

Which you don't want.

When you get right down to it, flattery is expensive at any price—but good advertising pays for itself.

We at Davis Harrison believe that the best way to keep clients happy is by turning out advertising that gets through to the market.

Give us a call. We'll show you how Davis Harrison Advertising can take you beyond the looking glass.

Contact Doug Davis at:

The presses get down to business

Delivering information to industry's decision makers

By Jack Hafferkamp

Optimism is alive and well in the American business press. The consumer on the street may have only the dimmest awareness that there is another publishing industry parallel to the consumer and academic presses. Yet run it does, to the annual tune of an estimated $2.6 billion. And Thomas King, president of the American Business Press, New York, estimates that by 1992, dollar volume will reach $6 billion.

Folio concludes that 127 of the country's top 400 revenue-producing magazines—32%—are trade publications. And that number may very well climb. While the consumer press faces hard times, (rising costs and fewer readers), the business-to-business press continues a decade-long period of growth. Right now there isn't a major pub-

Business press delivers

(Continued from Page M-7)

lisher in the industry who isn't at least thinking about acquisitions, startups or related informational-business projects. This is an exciting time in business publishing.

Robert L. Edgell, chairman of Harcourt Brace Jovanovich Publications, New York, speaks for much of the industry when he says, "We're very bullish for the next decade. We've just come off our best year, and this year is better than last."

Of course, this kind of unbridled enthusiasm does not mean that there are no trouble spots in the business press. It is not immune to economic reality. Hard times have come to those publications serving the hardest hit segments of the whole American economy: Automotive, construction and heavy equipment. Yet the trade press as a whole is making progress in spite of current national economic woes. The strong publications more than make up for the weak ones.

In brief, the single most important reason for the success of the American business press is that it gives advertisers their best return on investment.

The single most important reason for the success of the business press is that it gives advertisers their best return on investment.

"The number of advertising pages continues to go up," explains Mr. King, "because they are doing good things for the people who are spending the money. We're putting out good products that are directed to the right audiences." Mr. King says he likes to use the cable tv term "narrowcasting" to describe how the business press gets to those right audiences.

The technological revolution, combined with the information gathering techniques of social scientists, has given trade press publishers access to very precise information on the people who read their publications. Publishers now routinely aim their magazines at very specialized "reader universes." Readership studies can thus show advertisers two very important things about a magazine's ability to generate sales:

- Trade publications are a cost-effective way to reach an industry's decision makers, the people who spend its money. Advertising in the business press eliminates expensive, useless shotgun advertising in print, radio or tv that wastes resources on people who have no use for the products or services offered.
- As Mr. Edgell puts it, "Companies that continue to advertise in a recession come out faster and often their market position is stronger than those who have let their advertising program slip."

In other words, the business press is thriving today because it can demonstrate to advertisers that it gets their message to the right people, and because those who don't advertise in hard times risk losing market position to those who do when times get better. In some circles this enviable position is known as "getting 'em coming and going."

However, to grasp this alone is to understand only one of many major factors contributing to the dynamism of contemporary trade publishing. A decade of growing prosperity has brought graphics-aware art directors, slick paper and more editorial color. Purses have been loosened to hire top-flight editors and writers—and electronics technicians. The result of this multileveled growth, according to William A. Barbour, president of Chilton Company in Radnor, Pa., is that the editorial product is "100 times better than it was 10 years ago.

"In the old days," says Mr. Barbour, "there was damned little editorial selling. The salesman went out with a copy of the rate card and—if the guy asked to see it—the circulation statement. The had a couple of martinis and played golf.

"Then in the middle '60s and into the '70s, business publishers came to realize that their only real reason for existence is to deliver business information. To me, the improvement in our editorial product is the best thing that has happened to this industry over the last ten years."

Editorial improvement is a dynamic kind of enterprise. The better a magazine becomes, the more information flows through it, and the more important it becomes to an industry's decision makers (and those who would be decision makers). They read it, talk about it, talk to its reporters and editors, and thus help to enhance it. The ideal publication is so on top of the industry it serves that it becomes must reading for anyone who wants to spot industry trends *before* they happen.

Another significant factor in the growth and sophistication of the business press is the emerging electronics revolution. "Database" is an industry buzzword. And like most buzzwords it is perceived differently by different people. Essentially, though, it refers to a continually updated source of information on a specific subject area. A database doesn't necessarily have to be computerized, but when it is, and when subscribers can tap into it via an on-line terminal, electronic databases offer publishers great opportunities and challenges—the shape of which are still being worked out.

When the idea of database publishing came along in the 1970s, predictions were heard that its arrival marked the beginning of the end for the printed word. Today, however, a more temperate view prevails.

Mr. Barbour, the president of Chilton, says, "We have been looking at it for some time. Each generation of computers gets smaller, faster and cheaper while the reader's needs become more sophisticated. But I don't think it's ever going to replace the printed word."

Mr. King concurs: "The use of electronic means for transmitting information will continue to grow. But it won't happen overnight. I think that five or 10 year from now we will be printing *more* pages than we are now, and we will also be delivering electronic information to people who want to get their information very fast."

In the middle '60s business publishers began to realize that their main reason for existence is to deliver business information.

As Mr. Barbour sees it, the key to the rate and extent to which electronic publishing takes over the trade press depends on its cost efficiency. "The mechanical costs of doing business—the percentage of total costs that go to printing, paper and postage—are much higher now than they were," he says. "If they get higher still, and we can't raise our rates to compensate, then we have to look at new ways to distribute. The minute electronic information transmittal becomes more cost-effective than the old ways of sending hard copy, then the publishers will do it that way."

Electronic publishing isn't the only way in which the new technology is changing the trade press. In fact, for most publications its greatest usefulness may not have anything to do with generating revenue. Its value lies in its ability to increase internal efficiencies. Harcourt Brace has recently taken final bids on an editorially interactive electronic data transmission system that will link New York to its Duluth offices. The company thinking is illustrative.

"The main advantage to us is

the simple factor of time," says Lars Fladmark, executive vp of the publications division. "We have so many different deadlines per day with all our magazines that the ability to cut closer to deadlines by eliminating the shipping of copy is a great advantage.

"In terms of database applications to print, our interests have been more internal than external. We have a big computer downstairs that we're using to form total definitions of our readerships.

"Some very nice spinoffs come from it, such as reader surveys on a variety of topics. We can target an industry's leaders very precisely, and we use them as a sort of informal editorial opinion board.

"Our primary use for this information so far has been as the basis for editorial material in the magazines. The other main thing we're doing is building a fully integrated production/billing information management system."

Editorial improvement is a dynamic kind of enterprise. The better a magazine becomes, the more information flows through it.

At this time Harcourt Brace has no plans to market its readership surveys, but other houses do. Chilton, for instance, markets an on-line service to business-to-business advertisers that helps them determine exactly what kinds of ads are most effective for particular audiences.

The necessity for magazine publishers to think in terms of database marketing in addition to the electronic delivery of editorial material gives clear insight into the fundamental nature of the ferment in today's trade

The key to the rate and extent to which electronic publishing takes over the trade press depends on its cost efficiency.

press industry. Long gone are the days when publishers could rest on the laurels of their good magazines. To stand still is to lose ground in today's market.

"The magazine business always has been vulnerable to the economy as a whole, just like the newspaper business," explains Mr. Barbour. "But in the past 10 years we have learned to cope better. Part of it is better management. Part of it is that we—like a lot of places led by McGraw-Hill—have diversified into other areas to develop revenues that are countercyclical to the business trends of our industry.

"Twenty years ago 90 to 95% of Chilton's income was from the magazines. Now it's 40%. We're in the research business, the direct marketing business, the newsletter business and book publishing. We are always looking for new sources of income."

Mr. Barbour's candor clearly indicates that the optimism of his industry is tempered by a common understanding that continued expansion depends on a national economy that doesn't worsen significantly.

"You can have the best magazine in the world," he says, "but if you get some big hitters at the very top of the corporation—as has happened in the last couple of months—who say, 'No more advertising until further notice,' there's nothing you can do about it. You'd better have something else in the back."

Mr. Fladmark believes that the health of the industry depends on generalized cost containment. "The business press has always enjoyed a nice competitive edge because relative to other methods it has been a good advertising buy. We don't want to give up that advantage, but rising costs could make this a long-term problem."

One rising cost that has everyone wary is postal rates. They have gone up, says Mr. King, "at an alarming rate, and the projections don't make you want to relax." At the same time the quality of service has deteriorated. And there seems to be no easy solution to this two-edged problem.

People are another rising cost. "Our biggest problem is people; keeping the high quality individuals," says John B. O'Neil, president of Vance Publishing Co., Chicago. "You've got to treat them right—that is, pay them enough so they stay with you and grow with you. Otherwise they're going to move on to someone who will."

Mr. Edgell, the chairman of Harcourt Brace, sees another potential problem in the over-fragmentation of markets. "There are certain fields," he says, "where too many people have tried to bring too many publications in. Some are falling by the wayside as budgets have gotten tighter. The major publications have continued to do well, but in many cases the second-tier magazines have suffered."

On the other hand, not every possibility on the horizon is bleak. Even in segments of the industry where the recession has hit hard the new technologies are opening up new markets. An example the ABP's Mr. King cites is the machine tool industry press. The coming of computers in that field has brought in new sources of revenue that didn't even exist just a few years ago.

And in the depressed housing industry, publications are now exploiting energy-saving product markets (insulation, thermal windows, etc.) that were barely tapped five years ago.

Mr. O'Neil can even find a few good words about the recession itself: "When things go well for too long a time, you get fat and you don't know it. Every so often it's good to measure your operation and make sure you run as leanly as possible. Sometimes you come out of it better than you did going in because you've learned to tighten down your ship."

It is clear to everyone in the trade publication industry that there are bright possibilities in the future for the companies with the foresight to grab them. At one level this means doing what the trade press has always done: Identifying industry needs.

"What we've got to look for are new products and emerging markets," explains Chilton's Mr. Barbour. "The secret of this industry is finding a niche. You've got to find a niche and serve the need."

One important psychological leap vital to being able to find those niches is the mental difference between magazine publishing and information delivering. The leaders in today's business press don't just put out magazines—they deliver information.

"Basically, we're going to have to give the guy what he wants in the form he wants it," says Mr. Barbour.

"We have to be able to put it in a magazine, at a terminal at his desk, on a video cassette or over the Telex. You can't fight it," he says.

Mr. King succinctly sums up the situation facing today's trade press: "If we business publishers stay on top of developments and seize the opportunities, we will stay in the forefront. If we don't, other people will take that business." ■

"We've got to look for emerging markets. The secret of this industry is finding a niche. You've got to find a niche and serve the need."

First time

Jerry Della Femina (r.), whose agency just joined the Four A's, enjoys the country & western opening night festivities at the Greenbrier with (l. to r.) Gloria and Herb Maneloveg (Della Femina, Travisano & Partners) and Kay and Nat Lehrman (*Playboy*). At right, Four A's president Len Matthews stands between incoming chairman John Bowen (l.) and outgoing Don Johnston, with the majestic resort in the background.

Four A's gets the message: Hard times

By CHRISTY MARSHALL

WHITE SULPHUR SPRINGS, W. VA.—The recession, rising costs and reduced industry productivity are causing the lowest profit margins in years for the nation's advertising agencies, industry execs said at the annual meeting of the American Assn. of Advertising Agencies here.

Though there were some notable exceptions, many agency execs gathered at the Greenbrier resort concurred with association president Leonard Matthews' terse summation: "These are tough times." The "tough times," moreover, have spread to such cities as Houston and Atlanta, where many industries—and the agencies that serve them—had been booming.

"Nothing is booming" at present, said Mike Turner, exec vp-director, Ogilvy & Mather Southern Operations. He said high-technology companies in Atlanta have started cutting back on advertising.

In Houston, where "until the first quarter, you wouldn't have known there was a recession," businesses tied to the oil industry, which has been hurt by lower prices, are putting lids on ad budgets, Mr. Turner told the

Triangle, Getty deny report of talks

Is 'Tv Guide' on the block?

By STUART EMMRICH

A report that *TV Guide* is up for sale was strongly denied by Triangle Publications president Walter H. Annenberg.

The publishing magnate and former U.S. ambassador said reports from a source that he has begun talks with potential buyers and is seeking between $750 million and $1 billion for the magazine are "totally untrue and perfectly ridiculous. There are no discussions going on right now with anyone, no one has approached me and I am not interested in selling it," he said. "I am not open to any offers—certainly not at this time."

The name of Getty Oil, which owns 85% of the cable network ESPN, has been mentioned in investment banking circles as a possible bidder for *TV Guide*, but high-level Getty execs denied that any talks are taking place or are contemplated.

Mr. Annenberg did say that four years ago Getty made an informal approach about the possibility of buying the magazine, but nothing ever went beyond those initial feelers. "I wasn't interested in selling then and I am not interested in selling now," he added.

He said that he has been approached more often about the possibility of selling Triangle's *Seventeen*, but said that publication also was not for sale.

Despite Mr. Annenberg's denial, others at *TV Guide* have suggested that the recent trimming and streamlining of staffs at the magazine may have been designed to make the publication a more attractive investment (AA, March

Coke is it in first Ad Age poll

By JOSEPH M. WINSKI

By a substantial margin, Coca-Cola advertising registers the highest awareness among consumers of any advertising, outpolling second-ranked Pepsi-Cola by a two-to-one margin.

In terms of public awareness, McDonald's Corp. advertising dominates its industry far more than any other advertisers do theirs. Over-all, McDonald's advertising ranks third in public awareness, behind Coke and Pepsi.

Fully 44% of all consumers questioned respond that they "don't know" when asked to identify which brand advertising first comes to mind of all that they have seen, read or heard in the previous 30 days.

Of all the advertisements or commercials identified as first coming to mind, 69% are tv commercials.

Those are some of the findings of the first monthly adTrack survey, a joint effort of ADVERTISING AGE and SRI Research Center Inc., Lincoln, Neb., to measure consumer awareness of advertising. As far as AA and SRI can determine, adTrack represents the most ambitious statistically valid research into ad awareness yet undertaken. It is our belief that this regular service will provide valuable, if sometimes surprising, insights into a fundamental function of advertising: Creating awareness of the product or service being advertised.

adTrack

Awareness is determined by tallying the unaided responses of consumers to these questions: (1) "Of all the advertising you have seen, read or heard in the last 30 days, which comes first to mind?" and, (2) "Of all the advertising for [each of 20 product categories] you have seen, heard or read in the last 30 days, which comes first to mind?" Consumers also are asked where they saw, read or heard any advertising they identify.

The survey, conducted by telephone from April 1 through April 21 by trained SRI interviewers, covered a sample of 1,262 Americans.

The sample is designed to represent accurately the population being studied; that is, the sample data can be used to make valid generalizations about a much larger group, in this case all U.S. consumers 18 years of age or over.

AdTrack will survey consumers monthly, and thus will be able to measure the "movement" of advertising awareness over time, or detect which advertising is increasing,

Warner sets home shop test

By SUSAN SPILLMAN

NEW YORK—Warner Amex Satellite Entertainment Co. will begin testing a home shopping cable tv network in several markets during the third quarter of this year, with hopes of expanding nationally in 1983.

Warner Amex officials would not reveal the program format of the test service, which has been in development for over a year. It is expected, however, that the shopping channel will follow the 24-hour scheduling philosophy Warner has emphasized as major strengths of its MTV: Music Television and Movie Channel services.

Several cable networks plan to carry individual shop-at-home programs and one, Satellite Programming Network, already does. But if Warner proceeds with an '83 launch, it would become the first satellite-delivered channel devoted exclusively to home shopping.

■ The company showed its interest in a shop-at-home service as early as December, 1979, when American Express tested shopping from its Christmas gift catalog on sister-company Warner Amex Cable's Qube system in Columbus, O. Warner Amex Cable also held talks with Sears about a similar venture (AA, Feb. 18, '80).

While the Qube system enabled viewers to press buttons on interactive key pads to purchase items, this technology is extremely limited today. A national shopping service offered in 1983 would likely have to utilize 800 phone numbers.#

Falkland fire hits marketers

By SEAN MILMO

LONDON—Major American and British advertisers, who at all costs want to avoid taking any position on the Falkland Islands (or Malvinas) crisis, fell into it last week and are now trying to dig out.

It started when such companies as Ford Motor Co., Eastman Kodak, Chesebrough-Pond's, Johnson & Johnson, American Home Products, a Coca-Cola bottler, Colgate-Palmolive, Anglo-Dutch Unilever Ltd., Volkswagen and N.V. Philips appeared to be sponsoring a U.S.-style, 24-hour tv telethon in Argentina to raise money for the war effort.

Commercials for the company's products were shown, or their names flashed on the screen, at a cost of $15 a second.

■ The hue and cry in London grew after word got around that British companies also were associated with the telethon. One British store owner, whose seaman son survived the Argentinian missile attack on the HMS Sheffield off the Falklands, has banned all products made by companies taking part in the telethon. Other retailers are up in arms and are demanding an explanation, partly because they are barraged with questions from angry customers.

Embarrassed executives have appeared on British tv and radio offering explanations. "I went on radio after three large retailers asked to know why it happened," said John Barker, company secretary of Colgate-Palmolive Ltd.

Some of the companies, like Colgate, are considering donations to victims of the HMS Sheffield attack, and one has made a sizable contribution to a special fund set

AMA victory may doom FTC bill

By RICHARD L. GORDON and NANCY MILLMAN

Ad industry associations easily won Senate commerce committee approval last week for their proposal to stop Federal Trade Commission regulation of "unfair" advertising. But the FTC's top lobbyist later warned the American Assn. of Advertising Agencies convention that the Senate's bill has become so controversial it may be doomed.

The fly in the ointment, according to FTC chief lobbyist Bryce L. Harlow, is the section added to the Senate bill, under pressure from the American Medical Assn., that puts doctors and other state-regulated professionals beyond the commission's reach. The professionals' bid has been denounced by FTC chairman James C. Miller III, and Mr. Harlow said House leaders are unlikely to approve any bill carving out such a huge "special interest" exemption.

The result, Mr. Harlow told the Four A's meeting in White Sulphur Springs, W. Va., could be a legislative stalemate that would keep FTC unchanged for the present. "When the doctors won, you lost," he argued.

The FTC lobbyist's grim estimate of the legislative outlook was confirmed by Rep. James Florio (D., N.J.), manager of FTC legislation in the House. He said last week the Senate FTC approach is "a radical departure from traditional thinking about FTC."

The congressman's objections go beyond the doctors to all the special exemptions the Senate has loaded on the bill. Among them, he included the ad industry's plea for removal of "unfairness" from the advertising law. He told ADVERTISING AGE this is "out of the question"

(Continued on Page 84)

Braniff: Can new line rise?

By TOM BAYER

DALLAS—A fresh airline will emerge from the Braniff debacle if Howard Putnam and his remaining cadre of executives have their way.

But getting their way may be as bumpy a ride as Braniff has seen, since, under Chapter 11 proceedings of the Federal Bankruptcy Act, Braniff is now supervised by a federal bankruptcy judge assigned the mammoth task of working out arrangements with its creditors.

And assuming that satisfactory deals are eventually struck with creditors, the new airline that emerges would face a marketing challenge unlike any other airline in history; no other airline has been born out of such proceedings. The marketing strategy would have to counteract public opinion of the old Braniff, and any remaining stigmata of proceedings associated with bankruptcy.

Mr. Putnam, though, says his commitment to turn Braniff around is just as strong today as it was when he joined the carrier from Southwest Airlines.

"The formula is right," he said.

(Continued on Page 86)

Coke it in first AA poll

(Continued from Page 1)

declining or remaining steady in consumer awareness.

"We believe this 'tracking' of awareness will be one of the most valuable features of adTrack," said Gary Gabelhouse, SRI Research Center project director. "AdTrack will be a moving picture that allows dynamic measurement of advertising's basic element—awareness."

AdTrack does not attempt to measure advertising effectiveness, or how the advertising in question affected sales. Nor does it attempt to determine whether consumers remembered an ad or commercial because they liked it or disliked it; it merely reflects what consumers said they remembered at the time they were questioned.

■ In April, consumers clearly remembered Coca-Cola advertising more than any other. Of the 1,262 people questioned, 76—or 6% of the total—said Coke's ads first came to mind. Pepsi advertising, which ranked second in over-all awareness, was mentioned by 37 people, or 3% of the total.

When asked to limit their responses to soft drinks, however, consumers were much more evenly divided: 31% said Coke advertising first came to mind, while 27% said Pepsi advertising did. 7UP finished a distant third, receiving 8% of all industry mentions. Dr Pepper advertising was named by 4%.

McDonald's advertising, third in over-all awareness by virtue of its being mentioned by 2% of the respondents, swamped its competition in the industry rankings. It was named as the fast-food advertising that first came to mind by 47% of the respondents, more than six times the number who named runner-ups Burger King (7%) and Wendy's (6%). McDonald's 47% of mentions was easily the most in any industry; Coke's 31% and Pepsi's 27% were the next closest.

McDonald's better than 6-to-1 margin over the No. 2 advertiser in its industry was approached only in one other industry, laundry products, where Tide received 23% of all mentions to only 5% for Cheer. Both products are from Procter & Gamble.

Rounding out the top 10 in over-all awareness were Miller beer, Ford, Chrysler, Peter Pan peanut butter (clearly the biggest surprise), 7UP and Budweiser and Chevrolet, which tied for ninth place.

As might be expected, tv was the medium carrying most of the high-awareness advertising, but the extent of its domination is perhaps unexpected. Nearly seven of every 10 advertisements mentioned in the survey were seen on tv. That compares with only 11% in newspapers, 8% in magazines and 4% on radio.

Other findings of note in April's adTrack:

• Ford's 19% of industry mentions comfortably topped Chevrolet's 11%. Toyota ranked third in cars and trucks, with 8% of all mentions. Although Chrysler ranked sixth in public awareness of all advertising, auto maker ranked only fourth in awareness in industry advertising.

• In medicine and drugs, Tylenol received 20% of all mentions, a commanding margin over the 8% each received by Bayer and Anacin pain relievers.

• In the closest industry fight for consumer awareness, Head & Shoulders shampoo (75 mentions for 6% of total) and Prell (73 mentions, 6%) finished in a virtual dead heat in personal soaps and shampoos. But 72% of those naming Head & Shoulders were men, while only 40% of those naming Prell were.

• Coors finished a surprisingly strong third in beer advertising, with 8% of all mentions, behind Miller's 17% and Budweiser's 13%. Schlitz was fourth, with slightly more than 7.5% of all mentions. The beer tallies included both regular and light brands when mentioned with the brewer's name. A number of respondents mentioned a "light" beer without designating a brand; these weren't recorded as part of the vote for Miller, Budweiser or other brands.

About 29% of those who recalled Coors' ads were over 65, compared with only 13% for Miller and 11% for Budweiser. About 41% of those naming Coors' ads were male, while 55% of those mentioning Bud and 51% of those mentioning Miller were male.

• Marlboro cigarets, with 10% of industry mentions, had a 2-to-1 margin over both Salem and Winston in tobacco products. Surprisingly, perhaps, of those who recalled Marlboro, 56% were women; only 42% of those naming Winston were women.

Although cigaret commercials have not appeared on tv for years, 19 people said they saw Marlboro on tv; eight people said they saw Winston commercials and six said they saw Salem commercials.

• Only one product finished in the top three in two industries. That was Charmin, which ranked No. 1 in personal toiletries/hygiene (6% of all mentions) and No. 2 in paper products (10% of all mentions).

• The top two advertisers recalled in the home electronics category represent the industry's new wave: Atari (15% of mentions) and Radio Shack (4%). General Electric and RCA, more traditional members of the group, tied for third with 3% recalls each.

Atari's awareness recall was more than seven times that of Mattel Intellivision, whose advertising was mentioned by only 2% of the respondents.

• Advertising for the account-jumping airline industry produced one of the closest awareness races, with United's 14% of industry mentions edging out Eastern's 13%. TWA received 9% of mentions, while American finished a close fourth with 8%.

Airline advertising showed the most pronounced regional differences in awareness, with United being recalled most heavily in the North Central U.S., Eastern in the South Central and TWA in the Northeast.

The 44% of respondents who said they were unable to recall any advertising for a specific brand including 9% who recalled specific advertising but not the product that was being advertised.

The confusion appeared most evident in cameras and photographic equipment; 15 people said they were most aware of the "James Garner" commercials, but did not name the product Mr. Garner touts, Polaroid. Kodak edged out Polaroid in industry advertising specifically recalled by brand, with 18% of all mentions to Polaroid's 16%.#

Question: Where did you read, see or hear (ad named as first coming to mind)?

Source: SRI Research Center Inc., Lincoln, Neb.

Study's methodology explained

LINCOLN, NEB.—SRI Research Center interviewers called a random sample of 1,262 respondents 18 or older from April 1 through April 21, making 60 contacts nightly.

Respondents were selected using randomly generated telephone numbers in the 48 contiguous states of the U.S. Respondents were proportionally stratified by sex, age, race and state in each of four regions.

Nightly quotas for males, females and region were established to reduce bias that could have resulted from the time and day of the call, and to facilitate meeting all stratification quotas upon completion of the study.

Calls were made between 5 p.m. and 10 p.m. in the respondents' time zone. A mimimum of three attempts were made to reach a qualifying respondent at each telephone number, including a final attempt made during daytime hours.

All callers were professional interviewers trained and exclusively employed by SRI Research Center. Interviewers were specifically trained for adTrack by SRI and ADVERTISING AGE. All interviewers were supervised and monitored during the study, and 10% of all respondent contacts were validated by callbacks by SRI supervisors.

The following table shows the range of error at various response levels on a sample of 1,250 respondents. All ranges of error assume a 95% confidence level, meaning that if similar-size samples were drawn from the same population 100 times, 95 times out of the 100 the responses given would be within the error ranges designated.

Range of Error

Response level—Percentage of error
50%: Plus or minus 2.8%
40% or 60%: + or - 2.7%
30% or 70%: + or - 2.5%
20% or 80%: + or - 2.2%
10% or 90%: + or - 1.7%

SRI Research Center is a 10-year-old, employe-owned full-service research company engaged primarily in telephone research. Included in SRI's clients are numerous *Fortune* 500 corporations and broadcasting companies. It has about 220 employes, including a roster of permanent interviewers.#

Meyer on

Promotions

By Ed Meyer

It's on the package

Sales promotion was used to literally "hold the fort" during 1981. According to Dancer Fitzgerald Sample's monthly "Consumer Promotion Report," the biggest change in promotion strategy from the previous year came from a dramatic increase in the use of on-package promotion by manufacturers.

The increased use of the package as a sales promotion vehicle was just one of several key developments that we discovered when comparing our 1981 DFS monthly "Consumer Promotion Report" findings with our 1980 findings. In our review of 1981, we looked at 6,147 different promotions in 23 prime product categories, including cereal, coffee, soap and detergents, to produce our findings. It's the first time we have been able to draw a comparison because the "Promotion Report" is just in its second year. All information is obtained from media and instore promotion activity in six major markets and includes every major promotion technique.

Manufacturers are designing their promotions to reach objectives more realistically.

The "Promotion Report" should not be taken as the final word, but just an indication of what's happening in the marketplace. However, I just returned from listening to Dick Aycrigg of A.C. Nielsen Co., who presented his company's annual report on coupons and refunds, and I found a distinct correlation between his findings and those from the "Promotion Report."

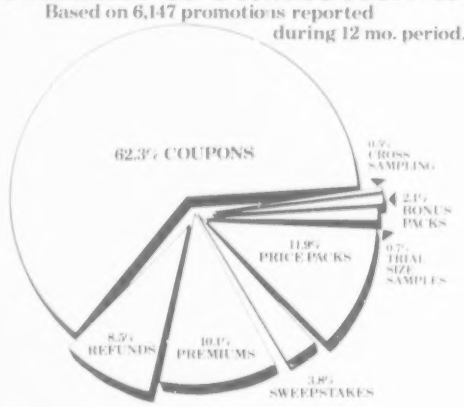
Sales promotion thrives in difficult economic times. I would think there have been significant increases in promotion budgets in order to create "quick thrusts" at consumers in hopes of capturing their interest and encouraging their steady purchases. Thus, the use of the package to create brand switching and continuity incentives to remain in one's franchise is very appropriate. I also feel that manufacturers are looking to strategically plan their promotions to achieve the most impact for their dollars. Let's see how this thinking was substantiated in 1981.

First of all, the increased use of the package for promotion was substantial over 1980. The use of package coupons increased by 10.3%; package refunds by 17.1%; bonus packs by 16.7%; instant coupons by 55.1%, and on-package sweepstakes by 89.1%. The last two areas—instant coupons and on-package sweepstakes—not only show outstanding growth, but add new dimensions to the versatility of sales promotion techniques.

The instant coupon has really emerged as a popular technique in the past two years. But questions are still raised as to its impact and what kind of effect it will have on the use of price packs (or off label) promotions? According to the latest information from Nielsen, the instant coupon averaged about 25% redemption over the past year and is being viewed as a possible alternative to price packs, which continue to receive static from retailers, who have to add new costly listings to their order sheets with this type of promotion.

SUMMARY OF PROMOTION–1981

Based on 6,147 promotions reported during 12 mo. period.



SOURCE: DFS MONTHLY CONSUMER PROMOTION REPORTS–1981

The instant coupon affixed by the manufacturer or in the store by the sales force is thought to create instant takeaway, yet it costs less than the off label when the cost of every package must be reduced in price. Until now it was believed that the instant coupon, like the off label, created an immediate sale, yet a high percentage of the instant coupons were redeemed on the next purchase, not the first, making it a very affordable promotion. We'll have to wait and see if this philosophy is realistic or whether the instant coupon just becomes too expensive if the redemptions skyrocket on the first purchase.

Our second leading on-package growth area is sweepstakes or games. This consists primarily of the insertion of rub-off game cards in a specific amount of packages offering consumers many chances to win prizes, which, in many instances, consist of cash. This technique, which has been so popular with fast-food outlets and state lotteries, has shown tremendous growth in use by packaged goods manufacturers over the past year.

Besides the increased use of the manufacturer's package as a promotion vehicle, there seems to be an over-all rise in the use of better strategic planning. In other words, manufacturers are designing their promotions to more realistically accomplish their objectives, using less "sleight of hand" and more logical thinking. We found this occurring in three other specific areas: Self-liquidating premiums, coupon refunds and the selection of the specific type of media with which to deliver coupons.

Self-liquidating premiums are the least effective of any promotion technique, except when they're used as dealer loaders. We found that almost three-quarters of all premiums being offered were self-liquidators, very similar to last year. However, we do feel that manufacturers are using self-liquidators in a very specific way—as incentives to the trade to get up displays. Which is what dealer loaders are all about. So this low-level promotion technique may be serving an excellent purpose as a phantom promotion vehicle for consumers and as a display acquiring vehicle to the trade, which represents some very smart thinking.

Another example of good planning is the continuing growth in the use of coupons as full refunds or combined with cash as partial refunds. Manufacturers are taking advantage of the coupon boom by offering higher refund values through multiple coupons while at the same time generating more product sales when the coupons are redeemed. No longer is the cash refund going straight in the pocketbook. Its coupon replacement is creating additional purchases and helping to maintain brand loyalty.

Finally, we continue to see a more effective use of coupons through the selection of very efficient delivery vehicles. Specifically, we see a greater use of cooperative couponing efforts whereby a manufacturer pays only a portion of the distribution costs and achieves in many instances as effective redemption as though it were to run its coupon alone. We found the use of the very popular free-standing insert increasing by 11.4% over 1980. This vehicle, which creates a very substantial redemption at a low delivery cost, continues to be the most efficient couponing device available outside the use of one's package, which only rewards current users.

So, in 1981, sales promotion once again proved to be a very practical marketing tool—a tool that can certainly help keep one's franchise afloat during difficult economic times. AA

Ed Meyer is director of promotion services at Dancer Fitzgerald Sample, New York.

Consumer's Viewpoint

By Barbara Mahany

Refund offer does it

Well, the planets all lined up behind the sun on March 9, and the world did not come to an end, but the Great Atlantic & Pacific Tea Co. did, here in Chicago, and that is sad. Why does one store or product make it and others fail? Oh, to get the pulse of a market and not lose it. That's what your business is all about, isn't it?

You all finally got me. I bought a different brand of instant lemonade just because of the refund offer. That is the first time I bought a product for the refund; now to take the time to get the refund. It was a warm afternoon and I went to the store to get a new container of the brand we all enjoyed so much last year, and there I was, faced with all those different brands.

The amount of competition in this one area amazed me, so I started looking at them all and comparing price and quantity and confusing myself, when I saw this one brand with a flag proclaiming a $1.25 refund. "Why not?" I asked myself. Another loyal customer fell for money.

I have been checking food ads more carefully lately and there are so many offers and the dollar value keeps going. I wonder where it will all end. It is interesting to note that General Motors feels that refunds on cars have served their time, and it is now time to find new ways of attracting buyers, without lowering the price of cars. Interesting and wonderful for all of us out here consuming like mad. I am waiting, patiently, for trading stamps to come back, perhaps included in the package. I loved stamps and really felt like I was a wise shopper when I traded in my books for merchandise.

There are promotions for absolutely every occasion. Sometimes I think you have created holidays so you will have a theme to build around. It seems to me you have missed a marvelous opportunity with April 15. I am serious, something offbeat, like "Day of Reckoning" deal—or a very big push on painkillers. We must never lose our sense of humor must we, as these are humorless times.

It is pack-up-memory time for my family. Mother is selling the family home and I went back to Cincinnati to help. Driving through Indiana I remembered how the Burma Shave signs would break up the monotony of a road trip. Wonderful nonsense rhymes; and I missed these and the barn roofs that stated so simply "Chew Mail Pouch Tobacco." Such simple messages, so straightforward and honest.

I have been concerned for years about the impact of advertising on the subconscious, and the way some companies take advantage of these needs and wants. The pictures, the copy all lead one to believe that happiness and success come with driving this car, wearing this perfume or this label, eating this product, etc. . . . The models are gorgeous, both male and female, generally young and very exciting, and all this in romantic settings. Now, most of us are not gorgeous, exciting or young. Some of us are pleasingly plump, showing signs of wear and tear and seldom, if ever, high fashion. This is much closer to the real world than the world you proclaim.

The American Tobacco Institute is running an ad now claiming that cigaret advertising does not influence kids. Their words. They have got to be kidding or are they really that naive.

Adolescence is a very difficult time at best. Wanting to look and act grown up is so terribly important in these years, and the tobacco industry bears an extra burden because its product affects not only the one using it but those of us who have to breathe the smoke-filled air. Has there ever been a cigaret ad that told about the smell of stale smoke, stained fingers, the mess of ashes? I know, I smoked. Has there ever been an ad that showed a man or woman as other than young, well-off, exciting and having a marvelous time? Some cigaret companies have changed their format and I thank them for leaving people out of the ads and appealing to reason rather than emotions, but some have not. I hope the Tobacco Institute will rethink its ad and be more responsible for the impact its industry's ads have on our youth and all future consumers.

My thanks to those in the food industry who on their own are including information regarding the salt content in their products. You make many brownie points when you do it before the consumer groups force you to. AA

Bic spots pulled off by 2 nets

By GAY JERVEY

After a pretty feisty skirmish, the latest battle in the Bic/Gillette comparative war has reached an impasse.

Both ABC and NBC reportedly have yanked—temporarily at least—a highly touted Bic tv commercial that pits Bic and Gillette shavers against each other. The commercial makes use of an electron microscope for super-tight closeups of male chins, brandishes "independent clinical" tests and is graphic about shorn whiskers—all in an attempt by Bic to show once and for all that what Gillette razors do, Bic can do, too—and for less money.

■ To date, Bic is only offering the following official statement: "We're continuing discussions with both networks, and legal counsel has advised us not to comment on this at this time."

An NBC spokesperson explained that Gillette has initiated a challenge procedure with the network, and NBC in turn is reviewing the ads internally.

Meanwhile, it will keep them

Pernell Roberts ("Trapper John, M.D.") serves up Folonari Soave for his friends who "like chablis" in a new tv commercial breaking today for the import of "21" Brands, New York. It will air in East and West Coast markets. Henderson Advertising, Greenville, S.C., handles.

REORGANIZATION TO HELP

S.C. Johnson mulls entry into otc drugs

By JENNIFER ALTER

RACINE, WIS.—S.C. Johnson & Son, which made its name and fortune on wax, is exploring a major diversification into the over-the-counter drug business.

The 96-year-old company is considering both acquisition and product development as ways to crack the $9 billion field, which Johnson expects to grow rapidly because of increased consumer interest in self-care and relaxed government regulations.

In addition, "It's kind of a natural thing for us in terms of distribution," said Richard Carpenter, exec vp, U.S. consumer products, in an interview. Emphasizing that activity to date has been "strictly exploratory investigation," Mr. Carpenter said test marketing of an otc product is more than a year away.

Johnson is known to be looking at several otc companies and has enlisted the services of former JCK Organization chairman Dan Rodgers as a consultant.

Also, last July it bolstered its internal development capabilities by hiring Donald A. Buyske as senior vp-research and development and chief scientific officer. Dr. Buyske brought along high-level pharmaceutical experience from Johnson & Johnson and Warner-Lambert.

While he declined to discuss specifics, Mr. Carpenter said skincare is a logical possibility for pursuit. "Skincare would be a good bridge," he said, referring to expertise the company has gained with its recent

Massive 'House & Garden' revamp readied

NEW YORK—*House & Garden* is about to change everything but its name as it goes against *Architectural Digest* in a head-to-head marketing battle. In one of the magazine industry's most dramatic makeovers, the Conde Nast publication will up its cover price to $4 from $1.50, drop its service features in place of "life style" stories on architecture and design, change to a 100-lb. stock cover and to 60-lb. stock inside pages and cut its 1 million rate base, perhaps almost by half. The changes are planned for January, with a prototype due in September. Sources said that between 18 and 20 staffers have been fired to make way for the new direction.

Norwich slates Head & Chest cold remedy line

NORWICH, N.Y.—Norwich-Eaton Pharmaceuticals next fall will launch Head & Chest, a line of cold remedy products, with about $9 million in support via Henderson Advertising, Greenville, S.C.

Media General mulling purchase of Tanner

RICHMOND, VA.—Media General is considering the acquisition of William B. Tanner Co., Memphis, the nation's largest barter/media placement company. Media General, a diversified communications company that owns newspapers, radio and tv stations, would only say that it was holding "discussions" with Tanner. Tanner has 450 employes and field offices located in Boston, Chicago, Cleveland, Los Angeles, New York and San Francisco.

USFL ready to sign network

By COLBY COATES

NEW YORK—Pro football is a betting man's game, so if you'd care to lay down a few markers, here are some hot tips on the new U.S. Football League.

Within the next week or so, USFL will land a network contract with either NBC or ABC. Shortly thereafter, a cable deal, most likely with ESPN, will develop.

The cable deal will be followed by Chet Simmons' exit from ESPN to become commissioner of the new league.

And there is another sure thing about the USFL: It's one of those rare times when a sports franchise is being created to meet a specific marketing objective.

In this case, advertisers have long moaned about their inability to reach the male 18-to-49 demographic during the second quarter. Sure, there are golf tournaments, NCAA basketball, some baseball and assorted anthologies; but on the network level there really is no continuing live-action, male-appeal sports franchise. Enter the 12-team USFL to fill that gap.

At this point, both NBC and ABC are negotiating with USFL. CBS apparently is on the sidelines, particularly since next year it will retain both NBA and NCAA basketball. With weekend daytime taken over by basketball, CBS would find it difficult to schedule USFL. The word among network sources is that NBC may have a slight edge over ABC in the negotiations, though both remain

Travel agents put pieces together

Braniff: Computer plot?

By KIMBERLY PALMER

DALLAS—American Airlines, when it moved here two years ago, wasted little time sharpening the sword that was aimed straight for Braniff International's heart, former Braniff executives say.

Irregularities in information about Braniff's flight schedules and availability displayed in American's SABRE reservations system began to surface within months after American moved its reservations center and corporate headquarters from New York to nearby Grand Prairie in 1980.

SABRE, considered the largest automated reservation system in the country, is used by some 6,000 travel agencies, plus a number of corporate travel departments, to book flights on various airlines.

Former Braniff officials say the problems intensified in recent months as the ailing Dallas-based carrier fought for its life with innovative marketing strategies and promotions.

■ Still reeling from Braniff's sudden shutdown (AA, May 17), travel agents now are beginning to piece together how, while they looked on, American may have used its sophisticated reservations system against Braniff. American officials deny such allegations.

"The more competitive Braniff got, the nastier American got," relates the manager of one Oklahoma travel agency. American competed with Braniff in all

Gannett sets 'innovative' ad rates for 'USA Today'

By RICHARD L. GORDON

WASHINGTON—Gannett execs put the finishing touches last week on an ad rate strategy designed to fill the ad pages of its new national daily, *USA Today*, beginning with the first issues this fall.

Key execs, who are set to go public with their rate plan this week, disclosed details to ADVERTISING AGE, including eye-catching cpms, a "Partnership Plan" offering free space to charter advertisers and pricing innovations taken from the magazine field.

Advertisers will be offered a "unique" rate card with more advantageous rates for larger units, higher than usual discounts, lower than usual color premiums and no premiums for franchise positions (premium positions sold on a renewable basis).

It's also understood that *USA Today*, which claims it will be the only newspaper using satellite links to transmit color ad pages, is separately considering publishing a new prototype, sent via satellite, to demonstrate to advertisers the quality of its color reproduction. Existing prototype editions have been printed in Washington, but 1982-83 plans call for linking Washington via satellite to printing plants in Atlanta, Minneapolis-St. Paul and Pittsburgh, with ten more markets to be added in the first quarter of next year.

The pricing tactics encourage color ads and large-space ads, an approach that fits the magazine-like concept of the publication embraced by former *McCall's* advertising director Joseph P.R. Welty, now *USA Today's* vp-advertising. "We're going to be talking about it as newspaper in format and magazine in concept," he said in an interview. Gannett is "guaranteeing no more than 30% ad content per issue to control clutter," he noted, and the emphasis on color and larger ads is part of the publication's commitment to "exception-

'Marco' journeys up Nielsen chart

By JAMES P. FORKAN

(NBC affiliate meeting coverage on Page 70.)

NEW YORK—Procter & Gamble and NBC-TV went up in the Nielsen ratings on explorer Marco Polo's latest journey last week.

The start of the 10-hour, $25 million-plus "Marco Polo" miniseries coincided with the NBC affiliates convention in Los Angeles, and Robert Mulholland, NBC president, and Raymond Timothy, network president, delivered overnight rating updates on the first two instalments in the five Nielsen-metered markets to the affiliates' cheers.

When the finale's numbers arrived on Friday, NBC said it notched a 20.8/36. That, plus the 22.1/37 for Part I, 20.3/35 for Part II and 22/36 for Part III, gave "Marco Polo" a four-night average of 21.2 in homes ratings and 36 in audience share.

Although "Marco" did win all 20 half-hours, its final average score was not quite enough to best the season's top miniseries in rating, NBC's "World War III." But it did move ahead in share, 36 to 33.

The cheering must have been just as loud in Cincinnati, since the opening episode's rating and share were topped only by another P&G vehicle, the "Miss USA" pageant on CBS, which tied for first place in the Nielsen week ended May 16.#

Conditions call for change

CBS wants makegoods cut

By COLBY COATES

NEW YORK—CBS-TV Sales will push for the elimination of some audience guarantees in the upfront tv sales season, but just how hard is now being weighed by top-level CBS Broadcast Group management.

CBS is arguing that changing network tv conditions—a reference to such things as diminishing audiences and rising production costs—necessitates a move away from the practice of giving advertisers bonus points (makegoods) when its tv programs underdeliver the promised audience numbers.

The bottom line on it is rather elementary: At a time of rising costs, combined with top-heavy pressure to boost corporate profits (and underwrite costly and often losing ventures in the new technologies), the networks can rake in countless millions of additional dollars by selling inventory rather than giving it away as makegoods.

The fact that tightly-managed CBS has "flown the balloon" does not mean it will be the only network asking buyers to give up guarantees. In fact, all the networks cut their share of specific deals each year without the promise of making up for any audience deficiencies.

But what gives added significance to the current atmosphere is the networks' message that they'll offer various upfront deals at reduced prices if the buyer agrees not to demand audience assurances. And, further, bonus points could be available for certain benchmarks—numbers of households, for example—but not others, such as demographics. Said one network exec, "Obviously buyers will demand a pretty good discount."

At this point, before serious negotiations begin for next fall's tv season premieres, some agency buyers are curious about the non-guarantee idea; others, however, seem vehemently opposed. Generally, the rule of thumb in network tv sales is: When you buy guarantees you buy the network's share estimates; when you buy without them you buy the agency estimates.

Among the risks and rewards that CBS management must be considering is how tough a time it will have in selling the weak-sister shows on next fall's schedules. Explained one exec, "If the risk is in the agency's pocket the buyer is going to pick the stable programs, the ones that have a track record, or at least own an attractive time period. So, obviously, the packages

GM holds to record ad pace

By RALPH GRAY

DETROIT—General Motors is continuing to invest in advertising at a record pace despite the long slump in car sales, stockholders were told at the company's annual meeting here Friday.

GM said it boosted U.S. ad expenditures 28.5% in 1981 to a total of $401 million, compared to $312 million in 1980. Chairman Roger Smith told stockholder advocate Lewis Gilbert, "I would probably look forward to some sort of increase" this year as well. Mr. Smith said rising ad rates and a highly competitive marketplace are responsible for the increases.

Worldwide ad spending in 1981 rose 7% to $633 million, the company said.

Mr. Smith also told shareholders that GM's 12.8% interest rate ceiling for auto loans has boosted the company's market share since it replaced rebates as the company's main promotional thrust. "We're very satisfied" with the rate program, he said.

No decision has been made on an extension past the May 31 deadline for the program. GM "may try

Kroll to Four A's: Regain creative edge

By NANCY MILLMAN

WHITE SULPHUR SPRINGS, W. VA.—"Our goal is not some self-indulgent creative revival, but the improving of advertising productivity," Alex Kroll, president of Young & Rubicam/USA, told the final session of the American Assn. of Advertising Agencies here.

For the past year holding the additional title of chairman of the Four A's committee for the improvement of advertising, Mr. Kroll in his report harkened back to an address he made last summer about the exciting work being done by agencies outside the U.S.—notably tv by the British and Japanese, and print by the French. "Now that they are stealing our thunder, they may start stealing our business too," Mr. Kroll declared.

The committee for improving advertising is made up of creative people and concentrates on the creative product, Mr. Kroll said, because it is "the backbone" of the business. The serious reasons for bemoaning the loss of the creative edge by U.S. agencies: The "desperateness" that clients are voicing regarding their profit picture; new communications altering agencies' way of doing business; clients' productivity problems, and a "consumer that is dazed" from inflation, Reaganomics and communications choices.

One of the choices consumers are beginning to have is "the power of bipping"—the fast-forward and erase buttons on videocassette recorders that enable the viewer of tv programing and commercials to "go bip—and gone," Mr. Kroll said. "The consumer will enjoy the power of bipping—it's sort of fun," he stated in pointing up the urgency for the need to create advertising the viewer will want to watch.

Mr. Kroll showed the Four A's audience a 30-minute videotape

(Continued on Page 72)

Creative staffs hard hit: Matthews

WHITE SULPHUR SPRINGS, W. VA.—Most agency payrolls are showing a "substantial" reduction on the creative side of the business, always deemed the heart of an agency's work.

Leonard Matthews, president of the American Assn. of Advertising Agencies, told the membership at their annual conference here that comparisons of agency payrolls of 1960 and 1970 with 1980 show significant increases for new business, client contact and media in 1980 *(see chart below)*. "Significantly down were creative services [art and copy] and general office overhead. If you add print, tv and radio production to creative, total creative services are down a substantial 2%, and that's quite a bit when applied to most agency payrolls," Mr. Matthews noted.

"The key question," he added, "is why? Most of us preach or at least acknowledge that creative work is the single most important thing we do. If this is true, why is creative payroll down, especially in the decade of the 1970s, when most of the decline took place?"

Attempting to find an answer to his question, Mr. Matthews said that during the two earlier recession periods (1970 and 1974-75), "many agencies cut back significantly on sales promotion, merchandising services and package design. These services were labor-intensive for creative departments. Many agencies provided these design services free as part of their full-service concept. But even those agencies which charged creative fees for these services were thought not to be able to recover all their costs."

■ Mr. Matthews also noted that "during the tougher times" in '74-'75 and '79-'80 "many smaller agencies shifted to free lance creative help and reduced in-house creative staff."

He also pointed to another theory—that the removal of cigaret advertising from broadcast swung a "very large segment" of advertising budgets from tv primarily to print, and print, it is believed, "is less expensive than creating tv commercials."#

Ad Council sets illiteracy fight

WHITE SULPHUR SPRINGS, W. VA.—An effort by the American Assn. of Advertising Agencies to combat functional illiteracy has gained Advertising Council support.

The Ad Council's program will be on behalf of a number of leading literacy organizations that formed the Literacy Alliance with the aid of the Four A's.

Don Johnston, J. Walter Thompson Co. chairman and outgoing chairman of the Four A's, said at the annual conference here that after the Four A's board agreed with him three years ago to embark on a program to combat illiteracy, the group produced a directory of organizations that deal with the problem of functional illiteracy in the U.S. At the time, "the thousands of organizations were largely ignorant of each other," he said. The Four A's also developed a newsletter through which these organizations could exchange ideas and programs.

The third step of the program, Mr. Johnston said, will be the Literacy Alliance public service campaign.#

Hot on the trail of market research trends

By Jack J. Honomichl

The U.S. marketing/advertising research industry, which had been steaming along with an annualized growth rate of about 19% from 1975 to 1978—and a "real growth rate" of about 12% after adjustment for inflation—started to run out of steam in 1979-80, and in 1981 fell off to a real growth rate of 3.4%.

Jack J. Honomichl writes a regular column on marketing research in the news pages of ADVERTISING AGE.

This trend is based on the annual revenue performance of leading U.S.-owned research companies, which has been developed exclusively for ADVERTISING AGE since 1975.

Previously there were no substantive measures of the industry's performance.

These leading companies account for the lion's share of the total industry revenues. (Profiles of the top 28 in 1981 start on Page M-7.)

Some of the major companies have revenues from nonresearch activities, but those were not included in this analysis. However, revenues these companies have from operations outside the U.S.

(Continued on Page M-6)

Research trends

(Continued from Page M-5)
were included, and they have been influenced significantly in recent years by foreign currency valuations vis-a-vis the dollar.

Impact of inflation

The need to adjust total growth down to reflect the impact of extraordinary inflation was evident back in 1975. The inflation rate used is the Consumer Price Index-U, as developed by the U.S. Department of Labor.

It is an annual average index based on all urban consumers, U.S. city average, all items (and not to be confused with the December-to-December calculation, also developed by the Department of Labor, which differs and is often higher than the annual average).

Here's how the CPI-U has run over recent years: 1981, 10.4%; 1980, 13.5%; 1979, 11.3%; 1978, 7.7%; 1977, 6.5%; 1976, 5.8%.

The Big Four

The Advertising Age group of top research companies divides naturally into two groups: The Big Four data bank companies —A.C. Nielsen Co., IMS International, Selling-Areas Marketing Inc. and Arbitron Ratings Co.—and the "all other" companies, which are basically in the ad hoc, custom research business. The Big Four, *in toto*, accounted for 68% of the total revenues shown for the top 28 companies in 1981, and so the industry growth rate is heavily weighted by how this group in particular does; in fact, they had a real growth rate, 1981 over 1980, of 3.9%, compared with 2.5% for the "all other" group.

Taking this comparison back to 1977, the real growth rate, adjusted for inflation, of the Big Four combined was 11.4%, compared with 15.1% for the "all other" group.

The "all-other" group, which is heavily weighted by survey research companies, was growing as fast in real terms as the data bank group until a reversal in 1979; from there on, the data bank group has been growing much faster—but still at a declining rate each year.

The data bank group's performance can be explained, in part, by the nature of its businesses—syndicated services—and the leverage that implies; contracts with clients, some of which have automatic inflation kicker clauses, and services that are relatively free from competition. "Sheltered" is the polite terminology.

The "all other" group, by contrast, depends heavily on ad hoc projects, fluctuations in client budgets and fierce "I-can-do-it-for-less" competition, which has inhibited their willingness to raise prices as fast as the cost of doing business (mainly field) went up. Further, some of the larger survey companies depend heavily on work sponsored by agencies of the federal government, and that has dropped off sharply under the Reagan administration's budget cutbacks.

Worldwide business

Of the total revenues shown by the Big Four data bank companies in 1981, 48.3% came from their operations outside the U.S.; for the "all-other" group, this figure was 3.0%. So the Big Four performance was influenced by the worldwide demand for marketing/advertising research, fluctuations in currency values and runaway inflation in many foreign countries.

This makes it difficult to evaluate the international growth rate. A.C. Nielsen, for instance, operates through subsidiaries in 23 foreign countries; IMS International operates in 57.

Some of these foreign operations are known to be long-time losers, and others are still in a startup, developmental mode. But if you look at the domestic revenues of the Big Four, 1981 over 1980, you see a real growth rate of 5.9% versus their overseas growth rate of 1.8%. So the huge overseas business of Nielsen and IMS is one of the weak areas in the 1981 industry growth record.

In perspective

Information like this on the marketing/advertising research industry invites comparison with a kindred group, the 28 largest U.S.-owned advertising agencies. Drawing from the U.S. Agency Income Profile compilation by Advertising Age (March 24, 1982), I make the following comparison for the gross world income in 1981 over 1980:

Total revenue growth for the 28 largest U.S.-owned advertising agencies was 9.0%, with a decline of 1.4% adjusted for inflation, compared with 13.8% total revenue growth for the 28 leading U.S.-owned research companies, with 3.4% adjusted for inflation.

So, for what consolation it offers, the marketing/advertising research industry—relatively—did better than the big agencies.

Conclusions

The 3.4% real growth experienced by the U.S. research industry is not just a function of the current recession or cutback in government spending for research.

The real growth decline started in 1979, and that was largely concentrated in the highly competitive survey research segment of the business, one so competitive that there was hesitation to raise prices parallel to the double-digit inflation that started that year.

The situation undoubtedly was exacerbated by cutbacks in federal government spending for research and the weak overseas performance of the large multinationals in recent years.

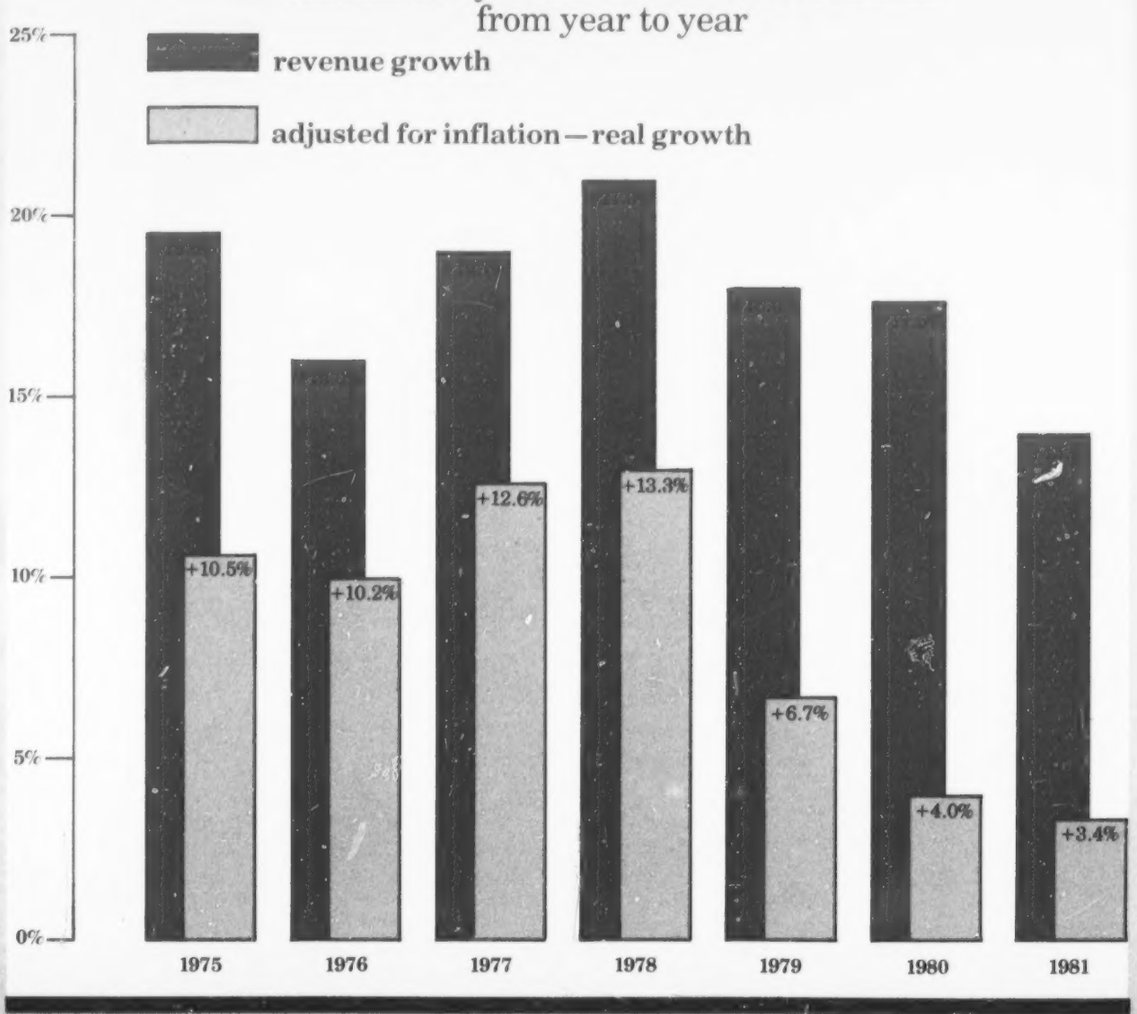
In retrospect, it could have been worse—judging from the performance of U.S. advertising agencies.

Real growth, adjusted for inflation

	Big four data bank companies combined	All others, combined
1981	+ 3.9%	+ 2.5%
1980	+ 5.5	+ .7
1979	+ 9.1	+ 8.2
1978	+12.9	+12.8
1977	+11.4	+15.1

U.S. Marketing/Advertising Research Industry

Measured by rate of increase in revenues from year to year



NOTE ON CHART: Industry growth estimated from aggregate research year-to-year revenue gains of largest companies in the industry as developed by Advertising Age. To wit: 1981, top 28; 1980, top 25; 1979, top 23; 1978, top 20; 1977, top 20; 1976, top 20; 1975, top 10. These revenues reflect all types of data collection—ad hoc and syndicated surveys; custom and syndicated store audits; warehouse withdrawal data; mail panels; UPC scanner derived data; observation measures at retail; continuous diary purchase panels, syndicated and custom; mail intercepts; etc. Revenues also include those from operations outside the U.S.

The annual inflation rate is based on the Consumer Price Index-U, as developed by the U.S. Bureau of Labor Statistics. This is the annual average index, all urban consumers, U.S. city average, all items. (In some of the individual year reports, the CPI December-to-December growth rate was used, and that is slightly different from the annual average index.)

Nation's 28 top market research companies see revenues jump 13.8% in 1981

Industry is hit with its lowest 'real growth' rate in seven years

By Jack J. Honomichl

Revenues of the U.S. marketing/advertising/public opinion research industry were up by 13.8% in 1981 over 1980, according to the seventh annual compilation prepared exclusively for Advertising Age.

Because inflation, as measured by the U.S. Department of Labor's Consumer Price Index, was 10.4% in 1981, the industry's "real growth" was 3.4%, the lowest yet since Advertising Age started this annual analysis in 1975.

Industry performance for 1981 is based on the collective record of 28 of the largest U.S.-owned, for-profit organizations whose main business activity is the development of marketing/advertising/public opinion research. Some of these companies have revenues from nonresearch activities, as is detailed in the individual company profiles that follow, but these revenues were not included in the industry growth revenues. Total revenues of these 28 organizations, including their nonresearch activities, were $1.25 billion in 1981.

The A.C. Nielsen Co., which alone had revenues of $411.3 million in calendar 1981, accounted for 42% of the 28-company total.

The top 28 for calendar 1981 had research revenues of $974.2 million, 34% ($330.4 million) of which came from operations outside the U.S. The same 28 had revenues of $856 million in 1980, making the increase 13.8%.

These companies have about 18,500 fulltime salaried employes and provide work for thousands more hourly part-timers. Eleven of the 28, which as a group account for 80% of the total revenues, are either public companies or subsidiaries of larger public corporations.

The A.C. Nielsen Co., which alone had revenues of $411.3 million in calendar 1981, accounted for 42% of the 28-company total and has considerable leverage on the total industry performance. And, for Nielsen, 1981 was a relatively bad year; its real growth rate was down to 2.8%. This was mostly because of the performance of its Marketing Research Group, which specializes in custom and syndicated store audit work.

In the fourth quarter of 1981, this Nielsen group had, for all practical purposes, no growth, compared with the same period a year ago—and after adjustment for inflation, a loss. That one unit had revenues estimated at $347 million in calendar 1981, up 11% over 1980—a real growth of 0.6%—which is particularly interesting because Nielsen's Index Service contracts have had automatic inflation kicker clauses.

The other debilitating factor was the collective performance of large survey research companies—National Analysts, Chilton, Louis Harris and Westat—which do a large share of their business with agencies of the federal government and were hard hit in 1981 by budget cutbacks in Washington.

Any analysis of the industry logically breaks out to the Big Four data bank companies—A.C. Nielsen, SAMI, IMS International and Arbitron Ratings Co. These four have most of their business under contract, and hence are relatively sheltered from the whims of short-term budget cuts. Their real growth rate, 1981 over 1980, was 3.9% versus 2.5% for the "all other" group, whose business is characterized by ad hoc, custom projects. Of the 24 organizations in this "all other" group, 13 had a revenue growth rate less than the 10.4% inflation rate in 1981.

Here are some highlights of the year's activity related to these top companies:

• **New presidents.** Six of the companies on the 1981 list appointed new presidents since last year's industry roundup: Lars H. Ericson at IMS International; Florence Skelly at Yankelovich, Skelly & White; Humphrey Taylor at Louis Harris & Associates; Carlyle C. Daniel at Selling-Areas Marketing Inc.; Marshall G. Greenberg at National Analysts, and Gian Fulgoni at Information Resources.

• **New listings.** Five companies are new to the listings this year—Winona Inc., Response Analysis, Information Resources, Custom Research and Market Opinion Research. Two were dropped from last year's list. One was Research Information Center, a wholly owned subsidiary of Greyhound Corp. that ranked 25th in 1980. RICI was acquired recently by Winona Inc. The other was National Family Opinion for lack of input.

Following are company profiles of the Top 28, including news of operational changes in 1981 and plans for change in 1982.

How they rank in size

1981 Revenues*: 28 leading U.S.-owned research companies

Rank	Organization	Research Revenues (millions)	% Change vs. 1980	Research Revenues from Outside U.S. (millions)
1.	A. C. Nielsen	$411.3	+ 13.2%	$243.9

28.	Market Opinion Research	1.6	+ 14.0	.6
	Total	$974.2		$330.4

*Total revenues which include nonresearch activities, for some companies, are significantly higher. This information is given in the individual company profiles in the main article.

1 **A. C. Nielsen Co.**, Northbrook, Ill. Public corporation traded over the counter; founded in 1923. Research revenues were $411.7 million, up 13.2% over 1980.

Gross revenues for the 12 months ending Nov. 30, 1981, totaled $595 million, of which $411.7 million, or 69.2%, was attributable to the two research divisions—Marketing Research Group and Media Research Group. (To put that into perspective, the largest U.S. advertising agency, Young & Rubicam, in 1981 had worldwide gross income of $353 million on billings of $2.4 billion.)

The Marketing Research Group, for the year ending Nov. 30, had revenues estimated at $347 million, up about 11% over 1980. (Included in the Marketing Research Group revenues are three small organizations that are not strictly market research: Dataquest Inc., Coordinated Management Systems and Product Recovery Services.

The Media Research Group, for the year ending Nov. 30, 1981, had revenues estimated at $64.3 million, up 26.6% over the same period, 1980. (Included in these revenues are those of a small company, Compucon Inc., which is not strictly in the research field.)

Because almost all Nielsen's revenues outside the U.S. are from research activities, it follows that about $167.8 million of total Nielsen research revenues are from the U.S., up about 15.5% over last year. The balance, $244 million was from operations in 23 foreign countries, up about 11.9% over last year.

By geography, Nielsen research

(Continued on Page M-10)

Research top 28

(Continued from Page M-7)
revenues are distributed approximately as follows: U.S., 41.1%; Europe, 39.2%; Canada/Mexico/South America, 12.5%, and rest of world, 7.2%.

During 1981 in the U.S., Nielsen's Marketing Research Group launched a service called Scantrack, which reports weekly brand sales and prices from a sample of more than 100 retail grocery outlets equipped with Universal Product Code scanner equipment. Overseas this group acquired Norges Markedsdata A.S., the largest research company in Norway, and started a new subsidiary, A.C. Nielsen de Colombia S.A. in Colombia.

Traditional Retail Index services are now available in both companies. The Media Research Group is expanding its electronic meter measures of continuous tv viewing into Detroit and Philadelphia, in addition to established markets such as New York City, Los Angeles, Chicago and San Francisco.

Traditional store audit and tv audience measurement services are served through 15 branch offices in the U.S., and worldwide there are approximately 11,000 employes engaged in research activities.

President is N. Eugene Harden, 47, a graduate of Lawrence University. Chairman and chief executive officer is Arthur C. Nielsen Jr., 62, son of the founder, the late Arthur C. Nielsen Sr. Henry Burk, 55, is president of the Marketing Research Group, and James D. Lyon, 46, is president of the Media Research Group.

Harden
A.C. Nielsen

Dubow
IMS International

Daniel
SAMI

2 IMS International, New York. Public corporation traded otc; founded in 1954. Research revenues were $115.2 million, up 12.9% over 1981.

Gross worldwide revenues were $200.9 million in 1981, of which $115.2 million—or 57.3%—came from market research activities through subsidiaries in 57 countries. IMS America, the U.S. subsidiary based in Ambler, Pa., had research revenues of $38 million, up 11.4% over 1980.

IMS is to the world's pharmaceutical/medical industry what the A.C. Nielsen Co. is to the package goods industry. Research activities include retail outlet measures of ethical pharmaceutical sales; panels of doctors reporting on diagnosis and treatment of patients; customized audits of purchases by, for instance, hospitals, laboratories and nursing homes, and custom studies. Emphasis in re-

(Continued on Page M-12)

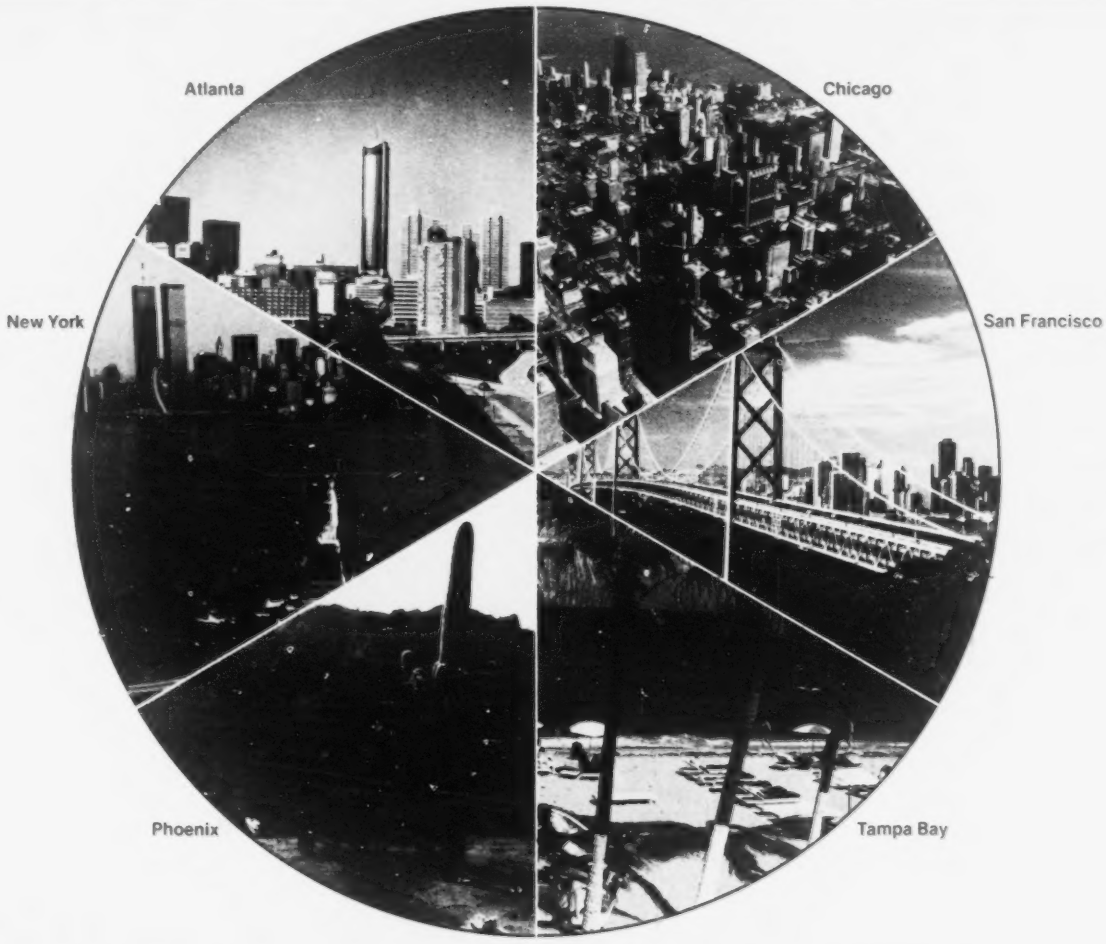
Phone laws

(Continued from Page M-8)
stricts conventional telephone use by survey research and polling organizations. By contrast, several states have laws that restrict the use of ADRMPs—including Alaska, Arkansas, California, Florida, Illinois, Hawaii, Maryland, Missouri, Nebraska, North Carolina, Oregon, Texas, Washington and Wisconsin.

The survey research industry has not been alone in opposing the undifferentiated regulation of unsolicited commercial telephone calls. The opposition camp has included some governmental organizations, telephone companies, the American Bankers Assn., National Retail Merchants Assn., American Newspaper Publishers Assn., U.S. Chamber of Commerce and the Automobile Assn. of America. These groups claim that further regulation of unsolicited commercial telephone calls is unnecessary and that such regulation has constitutional implications. They also have pointed out that bills to regulate or prohibit such calls involve fundamental, and perhaps unresolvable, problems of definition and enforcement.

A Memorandum Opinion and Order released by the Federal Communications Commission in May, 1980, supports many of these objections. The FCC found, for example, relatively few instances of telephone abuse and only a small number of actual complaints by telephone subscribers. The FCC also stated that "[an] outright ban on unsolicited telephone calls would appear to violate constitutional requirements." The FCC then went on to consider, and ultimately to reject, other "less comprehensive regulatory approaches."

Despite the FCC's opinion, and the continuing efforts of CASRO and other organizations, broad and vaguely worded unsolicited telephone bills continue to be introduced at the state level and to be promoted by their sponsors with undiminished enthusiasm. While reasoned dialog has proved an effective antidote once such bills have been introduced, constant vigilance also is required to preserve legitimate telephone use by survey researchers and others. AA



To focus on six major markets you only have to look once

At Elrick and Lavidge, Inc., we have everything you need for consistent, hassle-free focus group interviews in six major markets: well-appointed rooms with easy accessibility for participants, convenient sound and video recording systems, comfortable executive observation rooms, and complete kitchen facilities in some locations. We also have something extra: the easy hospitality of our people who will help you with the recruiting details and provide experienced moderators, if you desire.

Whatever you're looking for in focus group interviews—a more detailed picture of one market or all six—you only have to look once: for the Elrick and Lavidge office nearest you.

Research top 28

(Continued from Page M-10)
cent years has been on on-line delivery of data to clients via a system called MIDAS. There are 2,002 fulltime salaried employes in research.

During 1981, IMS purchased sole rights to a service called Pharmacon, which had started as a joint venture with the A.C. Nielsen Co. and provides an automated measure of prescription traffic in drugstores and information on how the prescription was filled.

A consumer research division of IMS owns Trendex, a company in Westport, Conn., that specializes in large scale telephone survey work. Another acquisition, RAM Data Corp., was discontinued recently and written off.

Chairman and chief executive officer of IMS is Lars H. Ericson, 47, who replaced David Dubow, who died in the fall of 1981.

The president of IMS America is Serge Okun, 36, a graduate of the *Ecole Nationale de Statisique et de L'Administration Economique* in Paris.

3 SAMI (Selling-Areas Marketing Inc.), New York. Wholly owned subsidiary of Time Inc.; founded in 1963. Research revenues were $72.6 million, up 16% over 1980.

Shaker
Arbitron

Brown
Burke Int'l

Abrams
Market Facts

The basic activity of SAMI is to amalgamate warehouse withdrawal information to produce continuous movement data for thousands of individual brand items in each of 45 market areas (three of which were added to the system in 1981—Hartford/New Haven, Conn./Springfield, Mass.; Louisville/Lexington, Ky., and Spokane/Yakima, Wash.)

These 45 market areas represent about 83% of the national foodstore ACV (all commodity volume).

In addition, SAMI operates (in a cooperative venture with Burke Marketing Services) three small test markets where foodstore product movement data are captured via UPC scanner equipped stores, and individual household purchase records are captured by electronic monitoring of purchase transactions. This system, called SAMSCAN, includes split-cable tv facilities for copy testing and logging of in-store promotions and newspaper advertising.

During 1981, SAMI offered a new capability, SAMI Segmentation Services, which permits—in selected major markets—the development of product movement data based just on stores located in neighborhoods where there is specific ethnic concentration, such as Hispanics.

Also, in 1981 SAMI discontinued a long time attempt to establish a national warehouse withdrawal service in Canada. SAMI has about 400 salaried fulltime employes.

In June, 1981, Carlyle C. Daniel, 51, a graduate of Lynchburg College, became president of SAMI, succeeding John A. Watters, 56, who became chairman.

4 Arbitron Ratings Co., New York. Wholly owned subsidiary of Control Data Corp.; founded in 1949. Research revenues were $66.4 million, up 21.5% over 1980.

The company, formerly known as Arbitron Co., changed its name on April 20, 1982.

The basic Arbitron business is local market measures of tv viewing and radio listening audiences.

About $29 million in revenues came from radio work in 1982 and about $37.4 million from tv. There are 761 fulltime salaried employes.

Most data collection is via diaries placed in the home (supplemented by telephone interviewing), and more than 2 million households are contacted each year. In New York, Chicago and Los Angeles, Arbitron provides overnight and weekly tv audience reports based on samples of households where the tv sets are equipped with meters. Plans are to add a fourth market, San Francisco, in 1982.

In 1981, Arbitron published its first "Network Cable Report," and a new edition of this syndicated service will be published next June. Also, Arbitron instigated a service called PRIZM/AID, in conjunction with Claritas Corp., to relate listening/viewing measures with geodemographic data at the Zip code level.

In 1981, Arbitron published the results of a $500,000 study designed to document the reliability of radio audience measures, as produced by Arbitron.

President of Arbitron is Theodore F. Shaker, 60, who is also a vp of the parent company. He attended Colgate, Northwestern and New York Universities.

$42.3 million, up 26.9% over 1980.

This research conglomerate, which is owned by a group of employes, consists of six units: (1) AdTel, which specializes in advertising testing and, in a joint venture with Time Inc.'s SAMI, uses three controlled market facilities with dual cable testing facilities, UPC scanner equipped store panels and consumer purchase panels for the purposes of promotion testing; (2) BASES, which specializes in market modeling; (3) Burke Marketing Research, which specializes in custom survey research and pretesting and post-testing of tv commercials; (4) Market Audits, a store audit company; (5) Professional Services, which conducts research training seminars, and (6) Burke Canada, a wholly owned subsidiary. BMSI and Infratest, a German research organization, jointly own Burke International to promote international capabilities.

There are 12 BMSI office locations in the U.S. and 325 fulltime salaried employes. About $1.3 million of the company's revenues come from outside the U.S.

Chairman of BMSI is Jack E. Brown, 37; he attended the University of Cincinnati.

6 Market Facts, Chicago. Public company traded otc; founded in 1946. Research revenues were $25.5 million, up 9.8% over 1980.

This company's total revenues in 1981 were $26.3 million, of which 97% came from marketing/advertising research activities, $500,000 of which came from outside the U.S.

These revenues include a wholly owned subsidiary, Market Facts-New York, but do not include Market Facts of Canada, in which the parent owns half interest.

If Canada were included, total MF research revenues would be about $28.5 million.

MF's activities in the U.S. include: (1) consumer mail panel (110,000 households); (2) Marketest store audit services (seven permanent markets); (3) four shopping mall facilities; (4) WATS telephone interviewing centers with over 70 stations; and (5) focus group facilities. There are 745 fulltime employes in six cities.

In April, 1982, MF relocated its main operational facilities from Chicago to Oak Park, Ill., and the headquarters office to 676 N. St. Clair St., Chicago.

President and chief executive officer is Jack Abrams, 51, who has an MBA from Northwestern University.

Chairman is David K. Hardin, 54, who has an MBA from the University of Chicago.

7 Audits & Surveys, New York. Privately held corporation; founded in 1953. Research revenues estimated at $22.5 million, up about 25% over 1980.

This estimate for the parent company includes five units: Survey division; test audit division; national total-market audit division; CTIS division, a telephone facility with 125 stations in three locations, Chicago, Washington and Toronto, and a newly established government research division in Princeton, N.J. These units have 267 fulltime salaried employes.

Not included are revenues from other organizations in which A&S or its principals have a financial position: A&S Latinoamerica; Total-Market Index in Canada; Market Probe International; Integrated Computer Systems, an electronic data processing (edp) service bureau.

In addition to custom sample surveys, field and tabulations (data processing), and both syndicated and custom store audit programs, A&S also conducts six times a year observation measures of distribution in 7,600 grocery, drug, discounter and variety store outlets through a system called SADI.

President of A&S is Richard L. Lysaker, 49, who is a graduate of the University of Minnesota. Solomon Dutka, 58, founder of A&S is chairman. He has an M.A. from Columbia University.

8 Marketing & Research Counselors, Dallas. Partly owned subsidiary of Allcom Inc. Research revenues were $18 million, up 22.4% over 1980.

This survey research company in 1981 opened a new interviewing center in St. Louis, bringing the total WATS interviewing positions to 237, 188 of which are on ACRS (Automated Custom Research System). Also in 1981, M/A/R/C introduced an improved TABS program on ACRS, which provides on-line tabulations of study data on a 15-point banner.

A Marketing Science Services group at M/A/R/C specializes in the design and execution of full

(Continued from Page M-14)
service research projects that employ sophisticated multivariate techniques.

This group has merged state-of-the-art design and high technology production to conduct segmentation and conjoint analysis using M/A/R/C's true random probability telephone sample.

There are nine full-service offices in M/A/R/C. During 1981, the one in Boston was closed. There are 153 fulltime salaried employes, 206 hourly staff professionals, and 1,200 hourly employes on the M/A/R/C payroll.

The president of M/A/R/C is Cecil B. (Bud) Phillips, 57, who is a graduate of Southern Methodist University in Texas.

9 NPD/HTI, Floral Park, N.Y. Privately held corporation; founded in 1967. Research revenues were $17.9 million, up 21.8% over 1980.

NPD/HTI, the largest purchase diary panel company in the U.S. and a member of the Europanel group of companies, had total revenues of $20 million in 1981, 89% of which came from research activities and the balance from OPOC Computing, an edp service bureau.

Research activities are organized into four divisions: (1) NPD packaged goods, which operates a national and local market purchase diary panels; (2) Home Testing Institute, which operates a standing mail panel of 60,000 families plus 6,000 individuals; (3) GRD/Crest Enterprises, which specializes in measures of out-of-home eating habits, and (4) NPD special industry services, which operates a variety of purchase panels for nonpackage goods categories. There are 190 fulltime salaried employes.

Hunt
Westat Inc.

Kilpatrick
Chilton Research

Bernard
Maritz Research

New services launched in 1981 include Video Probe Index to track new, emerging electronic media; NGA Ski Audit, a joint venture with Acker Retail Audits and GfK of Nurnberg, Germany, and Record and Tape Tracking Service, a diary panel service servicing the Recording Industry of America Assn. (RIAA).

Coming up in 1982 are a Toy Audit and the Sports Market Index to track purchasing of all sporting goods items.

Later this year NPD plans to relocate and consolidate five different offices into one new 85,000-sq.-ft. facility being constructed in Port Washington, N.Y.

Tod Johnson, 37, is chief executive officer of NPD Research (and OPOC). He holds B.S. and M.S.I.A. degrees from Carnegie-Mellon University. Chairman and founder of the NPD companies is Henry Brenner.

10 Westat Inc., Rockville, Md. An employe-owned corporation; founded in 1961. Research revenues were $15.9 million in 1981, down 18% from 1980.

This survey research company, with 183 fulltime salaried employes, gets about 90% of its revenues from studies done for agencies of the federal government, and the completion of one very large such study is mainly responsible for the 1981 drop in revenues.

Data collection is via personal, face-to-face interviewing, mail and telephone, and during 1981 Westat expanded its Telephone Research Center and instigated cati (computer assisted telepone interviewing). Westat operates out of a new, 75,000-sq.-ft. office facility in Rockville, a suburb of Washington.

President and chief executive officer of Westat is Joseph A. Hunt, 46, who has an M.S. from Massachusetts Institute of Technology. Edward C. Bryant, 67, the founder of Westat, is board chairman.

11 Chilton Research Services, Radnor, Pa. Wholly owned subsidiary of American Broadcasting Co.; founded in 1957. Research revenues were $15.2 million, down 13.1% from 1980.

A custom survey company that does studies for both industry and agencies of the federal government, Chilton maintains one of the largest cati installations in the U.S.—125 stations, excluding two banks that are used only for the continuous AT&T Telsam studies.

In 1981, Chilton closed two branch operations, one in Chicago and one in Washington. There are 170 fulltime salaried employes.

Director of Chilton Research Services is Dean J. Kilpatrick, 37, who has an MBA from the University of Delaware. He is also a vp of Chilton Co.

12 Maritz Market Research, Fenton, Mo. Wholly owned subsidiary of Maritz Inc.; founded in 1973. Research revenues estimated at $15 million, up 29% over 1980.

syndicated research through several units: (1) full-service consumer research operations in St. Louis, Minneapolis, Detroit, and Toledo, O. (the Minneapolis operation is the result of the acquisition of Quatra Marketing Research on Jan. 1, 1981, and the Detroit/Toledo operations are from the 1980 acquisition of Rogers National Research, a company that specializes in automotive and financial market research.); (2) a coast-to-coast field service division of 15 offices, which have 23 mall locations, 15 telephone and 23 focus group facilities and a St. Louis-based WATS survey center; (3) three research centers operating exclusively for WATS/crt (cathode ray tube) and interviewing facilities for corporate sponsors, and (4) an agricultural research division (added in 1981) serving agribusiness clients. There are 140 fulltime employes at MMRI.

President of MMRI is Paul E. Bernard, 52, who is a graduate of the University of Missouri.

13 ASI Market Research, Los Angeles. Privately held corporation. Research revenues were $14.9 million, up 10.3% over 1980.

Total ASI revenues in 1981 were $19.4 million, of which 77% were from research activities, and $1.5 million of that was from a wholly owned subsidiary in Hong Kong.

ASI specializes in controlled audience pretesting and on-air testing of tv commercials, custom research projects, testing of print ads, and focus groups. The company operates a 70-station WATS line telephone center in Los Angeles.

Total ASI staff is about 1,100, 350 of whom are fulltime salaried.

President of ASI is Gerald Lukeman, 50, a graduate of Dartmouth College. Pierre Marquis, 55, a graduate of Boston University School of Law, is chairman.

14 Yankelovich, Skelly & White, New York. Wholly owned subsidiary of Reliance Group; founded in 1958. Research revenues were $12.9 million in 1981, up 4% over 1980.

This survey research company does marketing and social research for industry, governmental agencies, and media—most notably *Time* and *Fortune*. Standardized services include (1) Laboratory Test Market, a market simulation facility; (2) Monitor, tracking surveys of special social segments; (3) Corporate Priorities, tracking studies on public policy issues, and (4) the New Worker, tracking values and attitudes within the work force. About 2% of revenues come from outside the U.S.

There are about 160 fulltime salaried employes at YS&W, located in three offices in the U.S.

Founder and chairman of YS&W, Daniel Yankelovich, 57, is a graduate of Harvard University. President is Florence Skelly, a graduate of Hunter College.

15 Walker Research, Indianapolis. Privately held corporation; founded in 1964. Research revenues were $11.7 million, up 29.2% over 1980.

This survey research organization is separated into various divisions as follows: (1) custom research division, which conducts customized, ad hoc projects from offices in Indianapolis and Morristown, N.J.; (2) service research division, which specializes in survey work for service-related industries, such as utilities, healthcare, home/business service, and travel/transportation services, and (3) data collection/processing division, which manages Walker's eight branch data collection offices and its interactive computer and data processing system that is in Indianapolis.

This office network offers a variety of services, including mall intercept, prerecruited focus groups, local telephone interviewing and national WATS interviewing through a 200-station setup in Phoenix and Indianapolis.

During 1981 Walker added crt interviewing capabilities to its arsenal of research techniques.

President and chief executive officer of Walker is Frank D.

Walker, 47, son of the company founder, Mrs. Tommie Walker Anderson, who started a predecessor, Walker Research Services, in 1939. Mr. Walker is a graduate of DePauw University.

16 Ehrhart-Babic Group, Englewood Cliffs, N.J. Privately held corporation; founded in 1958. Research revenues were $11.7 million, up 7.3% over 1980.

The E-B Group includes Ehrhart-Babic Associates, which specializes in custom store audits, projected sales studies, controlled store tests and minimarkets and National Retail Tracking Index, a unit that does national syndicated distribution studies of retail outlets (such as grocery stores) on a fixed schedule. In 1982, NRTI expanded its store panel to include building materials, hardware, garden supply and tire/battery and accessory dealers. NRTI also has a national wine, liquor and beer index. (Revenues from another E-B Group unit, Ehrhart-Babic Data Services, an edp service bureau, are not included in this analysis.)

Scan Plus, a service that provides in-store promotional information from UPC scanner-equipped supermarkets, will be expanded in 1982 to offer controlled store tests in selected outlets.

There are 126 fulltime salaried employes at E-B Group, and about 2% of revenues come from outside the U.S.

Founders of E-B Group are its current president, Louis J. Babic Jr., 49, a graduate of Boston University, and its chairman, Thomas A. Ehrhart, 57, who is a graduate of Pace University.

17 Data Development Corp., New York. Privately held corporation; founded in 1960. Revenues were $11.2 million, up 8.7% over 1980.

Revenues reflect all units: Data Development Corp., Central Location Testing, New York Conference Center and the Telephone Center, which plans to install crts in its WATS line system in 1982.

DDC, which has 150 fulltime employes, specializes in custom research and in 1982 launched ADOPTER, a new product sales forecasting system. Another new service, COMBO, a product test technique for priorizing modifications of a new product to maximize purchase interest, was recently announced. Also, DDC has recently introduced COPY II, a program designed to develop copy strategy in the area of image advertising.

DDC is jointly managed by Jerry Rosenkranz and president Joseph Goldstein. Both are 46 and graduates of the City College of New York.

18 Louis Harris & Associates, New York. Wholly owned subsidiary of Gannett Co., founded in 1956. Research revenues were $10.1 million, down 2.9% from 1980.

About 34% of Harris's volume comes from subsidiaries outside the U.S.—Louis Harris International in London and Louis Harris France in Paris. Domestically, there are two subsidiaries: The National Center for Telephone Research in New York and Louis Harris & Associates in Washington. In total, there are 118 fulltime salaried employes.

LHA specializes in custom survey work of commercial clients and agencies of the federal government and has several shared-cost survey programs that track public opinion.

President and chief executive officer of LHA is Humphrey Taylor, 47, who is a graduate of Cambridge University.

Chairman and chief executive officer is the company's founder, Louis Harris, 61, who is a graduate of the University of North Carolina at Chapel Hill.

19 Elrick & Lavidge, Chicago. Wholly owned subsidiary of Equifax; founded in 1951. Research revenues were approximately $9.3 million, up 7.9% over 1980.

This survey organization,

You can park a convertible or a compact at our house.

If you want more mileage from your advertising, drive over to House & Garden.

Our new editorial format and broader-based content will supply the fuel for thought.

Our 11 million readers – and riders – will be among the first to make Detroit's new convertible sales go through the roof. And there's room in their garages for an economy compact, too. Or a wagon. Or a sports car.

When it comes to style and

which has 128 fulltime salaried employes, does product concept studies, tracking and trade studies, sales forecasting and focus group interviewing.

The company also operates three mall interviewing centers, the newest of which is located in Tampa Bay, Fla.

In addition to a 50-position crt phone capability in Nashville, Tenn., which is devoted to the AT&T Telsam studies, E&L has its own 35-position cati phone center in Atlanta.

President of E&L is Robert J. Lavidge, 60, who has an MBA from the University of Chicago.

20 Opinion Research Corp., Princeton, N.J. Wholly owned subsidiary of Arthur D. Little; founded in 1938. Research revenues were $8.2 million, up 6.5% over 1980.

ORC, which has 141 fulltime employes, maintains branch offices in Chicago, New York, San Francisco and Washington. In addition to custom, ad hoc studies for industry and agencies of the federal government, ORC does numerous shared-cost surveys periodically, such as the Public Opinion Index (opinions of target groups such as business executives, Washington thought leaders, the investment community, etc.); a Corporate Reputation Survey; the Marketing Index, which tracks trends and issues; Travel Plus, a study of the travel market, and the Caravan studies.

President of ORC is Harry W. O'Neill, 51, who holds an M.S. from Pennsylvania State University. Chairman and chief executive officer is Irwin Miller, 53, who is a vp of Arthur D. Little. He holds a Ph.D. from Virginia Polytechnic Institute.

21 Decisions Center, New York. Privately held corporation; founded in 1965. Research revenues were more than $6.9 million, up 23% over 1980.

DCI, a custom survey company, has 102 fulltime employes and has three divisions: Qualitative Decisions Center, DCI International and Facts Center, a WATS telephone interviewing operation with 60 lines.

DCI is jointly managed by chairman Bernie Ruderman and president Bernie Levine. Mr. Ruderman, 50, has an M.S. from Pennsylvania State University, and Mr. Levine, 56, has an MBA from New York University.

22 National Analysts, Philadelphia. A division of Booz-Allen & Hamilton; founded 1943. Research revenues were $6.7 million, down 14.1% from 1980.

This survey research company does custom work for industry and agencies of the federal government and provides support services to the parent, Booz-Allen & Hamilton, a prominent consulting company. A dropoff in government work is one of the main reasons for its decline from 1980 levels. There are 86 fulltime employes based in two offices, Philadelphia and New York City.

Specialties include the financial services industry; telecommunications; all major elements of the information industry, including office equipment; medical equipment and pharmaceuticals; automotive industry, and the beverage industry.

Marshall G. Greenberg, 46, is the president of NA. He holds a Ph.D. in mathematical psychology from the University of Michigan.

23 Starch INRA Hooper, Mamaroneck, N.Y. Public corporation traded otc; founded in 1923. Research revenues were $6.4 million, up 11.1% over 1980.

This survey research company is composed of seven divisions: Starch Ad Readership Service; Daniel Starch (Canada) Ltd., which has an annual volume of $1.4 million; INRA (International Research Associates), a 31-country network of affiliated research organizations; Associates in Diagnostic Research; C.E. Hooper; Media Audience

(Continued from Page M-19)
Research, and the Roper Organization, which was acquired in March, 1981. The Roper acquisition added a central telephone interviewing facility in New York City to the Starch organization. There are 170 fulltime salaried employes.

President and chief executive officer of SIH is William J. (Jay) Wilson, 45, a graduate of Yale University.

24 Information Resources, Chicago. Privately held corporation; founded in 1979. Revenues were $6.4 million, up 133% over 1980.

This new company is primarily engaged in the operation of BenaviorScan, four controlled markets where purchase data are captured by UPC scanning equipment at the retail level. Consumer purchases at the household level are captured via a sample of households that have their purchases recorded at time of purchase, and split-cable tv capability that makes it possible to relate all three—store movement, demographics of purchasers, and controlled tv exposure. BehaviorScan plans to add two additional markets to the system before the end of 1982.

BehaviorScan is used primarily for advertising campaign testing, in-store promotion tests and test marketing of new products.

Chairman and chief executive officer of IRI is John Malec, 37, a graduate of the University of Wisconsin. President is Gian Fulgoni, 34, who has a master's degree from Manchester University in England.

25 Winona Inc., Minneapolis. Privately held corporation; founded in 1953. Research revenues were $5.6 million, up 8.8% over 1980.

This custom survey research company was founded as Winona Interviewing Service, primarily a field agency; it added professionals in 1968 to become a full-service supplier. There are two mall operations (Minneapolis and Phoenix), and recently a sales office was opened in San Francisco. There are 73 fulltime salaried employes.

Winona made news recently (AA, March 15, 1982) with the acquisition of Research Information Center, a subsidiary of Greyhound Corp., located in Phoenix, and No. 25 in the 1980 top 25 listings, with revenues of $5.1 million. (This acquisition is not reflected in the Winona revenues shown above.)

President of Winona is Richard McCullough, 38, a son of the founder, Marian S. McCullough. He has a B.A. from the University of Minnesota.

on th

Not included in the 1981 Top 28 group, but sure to be included in the 1982 listing, is the Marketing Services Group of Harte-Hanks Communications, a communications conglomerate based in San Antonio, Tex.

HHC started its expansion into the research field in 1975 by funding an entrepreneurial venture, RMH Research, a survey company based in Fair Lawn, N.J. Today RMH includes RMH Media Research and National WATS Services. In 1978, HHC acquired Urban Data Processing

76,001* WAYS TO SAVE ON MARKET RESEARCH

It's called Omnibus Research, and no one offers more of it, or does it better, than R. H. BRUSKIN Associates.

But, Omnibus Research is much more than just another way to save money on your market research. It also provides a fast, flexible method of obtaining reliable national consumer information, whenever that need occurs.

Our two established omnibus services, one personal, one telephone, are now being used by hundreds of Bruskin clients. Together, these services provide a total of over 76,000 interviews per year.

AIM and OmniTel—your opportunity to do omnibus research at its best!

Contact any of these people to learn more about AIM and/or OmniTel:

in Burlington, Mass., a company specializing in custom processing of U.S. Census data for purposes such as site location.

Early in 1982 (AA, April 12), HHC acquired Tele-Research, a Los Angeles-based company specializing in tv copy testing, and TRIM, a research company that pioneered use of Universal Product Code scanner data for controlled store tests. TRIM also is located in Los Angeles.

Harte-Hanks started expanding into the research field in 1975 by funding RMH Research.

Hochhauser
Harte-Hanks

All of these units are part of the HHC Marketing Services Group. The president is Richard Hochhauser, 37, the founder of RMH Research. He received his M.B.A. at Columbia University. AA

Burke experience & capability can make decisions easier.

Considering the high cost of making a marketing mistake in the 1980's, it's good to have some indication of what's around the corner.

For half a century, Burke has been a leader in solving marketing problems, and as a result of that dynamic leadership role, Burke has become the preeminent, most experienced custom survey research firm in the industry, writing more proposals on more projects every day than any other research company in the world.

Burke means innovative, dependable research services. Our highly trained and experienced professionals assure you of fast, accurate responses to your research needs. Supported by state-of-the-art technology, the various Burke Marketing Services offer a wide range of research capabilities, providing answers to nearly every marketing question:

BASES—a system for reducing the high cost and risk of new product development. ADTEL—a service that measures the effect of advertising and promotion on actual consumer sales. MARKET AUDITS—specialists in in-store research and minimarket testing. BURKE MARKETING RESEARCH—the nation's most respected custom survey research organization.

Before you make another marketing decision, let Burke help you determine what's ahead. Call us, toll free, 1-800-543-0450 (in Ohio, call 1-800-582-2047), to inquire about the Burke Marketing Services office that's nearest you.

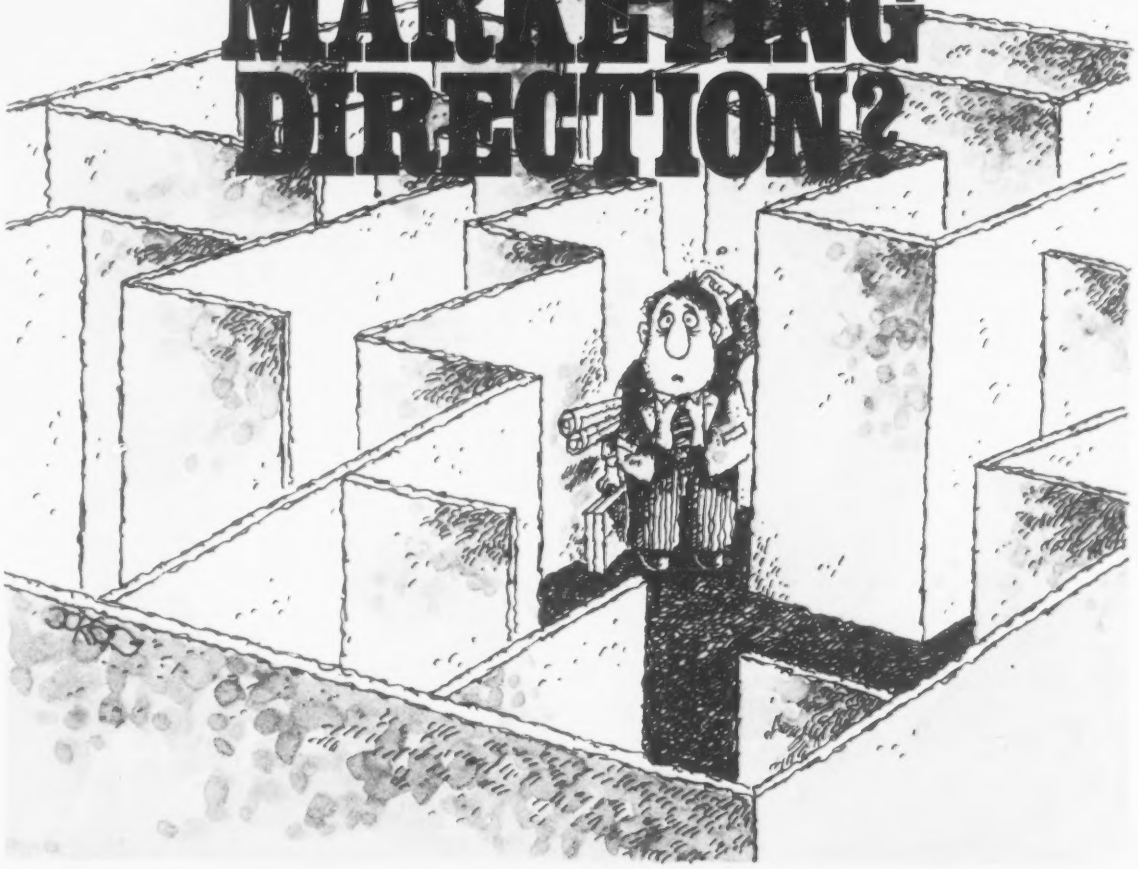
UNCERTAIN MARKETING DIRECTION?



Scanner tests show supermarkets can improve category profits: GF

CHICAGO—Early results of an experimental scanning project being conducted by General Foods Corp. and Dick's Supermarkets in Wisconsin indicate that retailers can significantly improve category profitability by using scanning data properly, a GF exec said at a workshop during the recent Food Marketing Institute here.

And, once the use of scanners becomes more sophisticated, retailers will look for more substantiated sales data from marketers and may be unwilling to accept items whose sales are "out of sync with casepacks," Kenneth Robb, sales analysis manager for GF, said after the seminar.

In their overview of ScanLab, the 18-month-old project on the use of scanning data for merchandising decisions, principals of the experiment said that, in three initial test categories—detergent, dog food and shampoos/conditioners—ScanLab data resulted in merchandising decisions that ultimately increased gross profits 8% in ScanLab stores over the control stores in a few months of tests.

■ In detergents, the scanning data, including unit movement and retail price, suggested the need for reallocation of space for subcategories—specifically, more space for heavy-duty liquid detergents—resulting in a different product mix in ScanLab stores vs. control stores.

The analysis of the dog food section "revealed potential for overall category space reduction, with the freed-up space going to a nearby category [cat food] that was undershelved."

And in the shampoos and conditioners segment, ScanLab data allowed the retailer to "respond more quickly to new product introductions" that included 17 new items in only a few months.

Confirming the findings of FMI's 1982 trend study, J. Mark Harran, director of customer strategy and development at GF, said most grocery stores with scanning capabilities now use it only in "operational areas." The FMI study said 94% of the grocery stores now using scanners use them for checker performance.

Only 40% of all grocery retailers with scanners now use their equipment to evaluate new product performance, according to the FMI study, though about two-thirds use the scanners for coupon accounting and tracking specials.

Of the supermarkets surveyed by FMI, only about 14.5% said they were completely on scanners, but, according to Timothy Hammonds, senior vp at FMI, about 20% will be by this summer.#

Cleaning products outlook

Although sales of household cleaning aids are expected to pick up after two years of flat sales, the annual growth rate of these products over the next five years will average less than 2% annually in constant 1981 dollars, according to a survey by Charles H. Kline & Co., Fairfield, N.J., whose chart is shown here. The fastest growing segments of the market will be specialty categories, the research company predicts.

Want new customers?
Dear Mrs. Carson:
I'm sending this letter to you, together with the enclosed new-customer kit, because you use Head and Shoulders shampoo. Mrs. Carson, I believe you'll want to change your brand after you've tried ours. Here are five reasons why...
...May I welcome you to our new family of users.
Cordially,
Director,
New-Customer Relations
Yes, send them a letter...include an incentive to try...and you've got what we call a "JFY New-Customer Advertising Program". In the past three years, it has proved to be the most powerful, personal, private and profitable way to build new-customer relationships. Straight out of the pockets of your competition!
BUT BE CAREFUL. You'd better know just who you're sending your letter to. A CUSTOMIZED JFY COMPUTER DATA-TAPE™ IS YOUR ONLY ANSWER. It identifies, by NAME and ADDRESS, millions of U.S. households—each freshly compiled and indexed by the PRODUCTS THEY USE, BRANDS THEY PREFER, ITEMS THEY OWN or PLAN TO BUY.
JFY is a one-of-a-kind Company helping our clients take dead aim at competitive brand users—nationally and locally. We're currently working for numerous packaged goods clients, and if there's no product conflict, JFY can help you too. Call or write today and we'll show you just how you can begin to attack your competition—head on! Now that's marketing for growth!

IAA MEET HEARS OF WOES

Latin America hardest hit by ad slowdown

By DENNIS CHASE
and LAUREL WENTZ

SAO PAULO—There will be a slowdown in the growth of advertising billings generated outside the U.S. this year, but one of the severest dips will occur in Latin America.

That is the consensus of advertising agency executives attending last week's International Advertising Assn.'s World Advertising Congress in Brazil. A general economic malaise caused by inflation and currency devaluations is being exaggerated by the worsening crisis in Argentina because of the battle with the United Kingdom over the Falkland Islands, according to sources.

In addition to Argentina's problems, a Mexican market hit by price controls and a huge devaluation and a massive drop in the Chilean market have caused ad agencies to revise their Latin American billings projections downward.

"Frankly, we're now beginning to look at our projections for Latin America," says Edward Ney, chairman of Young & Rubicam. "It's not that big a problem for us because we haven't been in some of these countries that long. But it is very important because we are now trying to establish ourselves there."

The main trouble spot is Argentina, where many agencies are expecting a 40% to 60% drop in billings this year compared with earlier estimates. Several Argentine agency execs scheduled to appear at the IAA meeting never showed up.

"They obviously had other things on their minds," said Federico Ortiz, president of Ortiz, Scopesi & Cia, the second-largest agency in Argentina, affiliated with Ogilvy & Mather. However, another agency official said, "They're all trying to save their businesses."

McCann-Erickson S.A. in Buenos Aires, with $7 million in billings last year, had estimated this year's billings around $10 million. However, according to agency head Jorge Gondolfo, those estimates have

Tummy test

Ray-Ban sunglasses "bans rays" is the message of a new commercial for the brand from Jordan, Case & McGrath, New York. Spot warns that ultraviolet rays can burn the surface of the eyes. The Bausch & Lomb brand uses a "second pair of eyes" drawn on a sunbather's stomach to show how protective the product is.

P&G tests Banner tissue, Ariel detergent gets try

By JENNIFER ALTER

Although it maintains a solid hold on the leadership position in the $1.9 billion toilet tissue category, Procter & Gamble Co. is entering the value end of the market with a moderately priced brand called Banner.

To be tested in parts of Georgia and North and South Carolina beginning in early June, Banner is priced 12% above Summit, the unadvertised brand P&G launched through mass-merchandise outlets last summer (AA, March 23, '81).

Almost concurrently, the company is introducing in this country a version of a hot overseas brand—Ariel, a concentrated, low sudsing granular laundry detergent, which will test in Colorado, Wyoming and small parts of Nebraska, South Dakota, Utah and New Mexico.

While the company claims that Banner is not a response to generic and low-price brands, now said to hold 22% of the toilet paper category, its arrival gives P&G an entry into the value segment, which clearly is increasing in importance. It also is thought by some to be a statement about the success of Summit and its positioning, the latter a clear departure from the company's traditional marketing methods.

"What they're doing now with Banner would indicate they're not entirely satisfied with Summit," commented George Adler, of Smith Barney, Harris Upham.

As opposed to Summit, which is of lower quality than P&G's Charmin and White Cloud, Banner is said to provide "superior softness." Single ply, in rolls of 400, it has sac-

Stroh's Fridholm to take over upon merger

Top 2 Schlitz execs to exit

By ROBERT REED

The two top-level Jos. Schlitz Brewing execs, Frank Sellinger and Daniel McKeithan, will leave the company upon its merger with Stroh Brewery, and recently named Stroh president Roger Fridholm will be named to head the Schlitz subsidiary.

The departures of the key Schlitz officers fuel industry speculation that Stroh will eventually move all of the former's headquarter operations to its Detroit office, leaving, at best, a skeleton operation in the beer city of Milwaukee, say industry sources.

Mr. Sellinger, vice-chairman, president and chief executive officer, and Mr. McKeithan, chairman, are expected officially to announce their resignations before the Schlitz stockholders' June 10 meeting, when the merger will be approved. Mr. Fridholm is expected to be named as president at the same time, industry sources told ADVERTISING AGE.

Officials of Stroh have been in Milwaukee talking with Schlitz employes and already have made known their intent to keep the bulk of its marketing staff and strategies intact.

It has yet to be determined if Anthony Amendola, Schlitz exec vp-marketing, will remain with the new No. 3 brewer. That decision will be based on the range of responsibilities the Stroh hierarchy gives Mr. Amendola, say sources. Stroh, which is in need of marketing expertise, is said to be anxious at keeping the veteran beer exec.

In addition, Stroh officers have recently made overtures to the brand managers of Schlitz, Schlitz Light and Old Milwaukee/Old Milwaukee Light, sources say. It has yet to be determined what members of the Erlanger brand staff will be asked to stay. Stroh had

last minute news

Lever's $30 million spot buying to BBDO, O&M

NEW YORK—Lever Bros. is moving its tv spot buying activity out of J. Walter Thompson Co., as expected (AA, May 10). The business, billing about $30 million, is to be split effective Oct. 1 between Lever agencies BBDO and Ogilvy & Mather. In dollar terms, the loss amounts to $500,000 in income, JWT said. It's the first client defection since the agency discovered tv syndication "accounting irregularities" last winter.

McMillan quits McGraw-Hill in power struggle

NEW YORK—Daniel A. McMillan III, exec vp, McGraw-Hill Publications, has resigned. Insiders say the resignation is related to a fierce internal battle over a successor to retiring *Business Week* publisher Bernie Alexander, and that Mr. McMillan's candidates were turned down. He and M-H deny the departure was related to the impending selection.

Lorillard to debut Satin, mulls Newport 10 pack

NEW YORK—Lorillard will introduce Satin low-tar regular and menthol cigarets, featuring a "satin tip," in Denver and Milwaukee June 3 via MCA. It also is said to be planning a test of a 10-cigaret Newport pack.

Sherman leaving JWT for WRG/East presidency

NEW YORK—Ronald Sherman, exec vp of JWT Co. and entertainment division president, has been named president of Wells, Rich, Greene/East,

Scripto to ignite new lighter fight with Ultra Lite

By JOHN J. O'CONNOR

A hungry Scripto Inc. this September will carry the fight to Bic and Gillette with a new parity-price disposable lighter and a $2 million-plus campaign—the first major advertising push in the category in several years.

The Atlanta-based marketer's new Ultra Lite is a sleek, fashionable lighter in four styles, whose objective is to cut deeply into the shares of market leader Bic and No. 2-selling Cricket from Gillette. Scripto's existing entries, Mighty Match and Star Lights brands, occupy third place with a combined 18% share, compared with Bic's 50% share and Cricket's 25% share. Gillette, however, claims Cricket's share is more like 35%.

The category this year is expected to generate retail sales of $230 million, a volume roughly 12% higher than 1981. According to industry estimates, unit sales are expected to hit 400 million this year, up 10% from 1981.

Scripto president-chief executive officer K. Douglas Martin, formerly of Gillette's Paper Mate division, appears to be emulating the tack that Bic took when it mangled Cricket with a lower-pricing strategy coupled with a $20 million ad outlay between 1974-77. With Bic and Gillette continuing to keep lighter pricing at inexpensive levels (30¢ to 47¢ per unit to the trade), Cricket's ad budget has dropped to zero, while Bic's "Flick your Bic" spending plummeted to $206,000 in 1981, according to Leading National Advertisers.

The company's "production and competitive marketing flexibility," as Mr. Martin puts it, stems from the planned opening this summer of a

ELECTRONIC MEDIA EDITION

Advertising Age

'EME' starts weekly schedule

CHICAGO—The new *Electronic Media Edition* of ADVERTISING AGE begins its regular weekly publication schedule with an issue dated Thursday, June 10, featuring a special report on teletext-videotex.

The premiere issue of this separate publication was published May 3, timed for introduction at the National Cable Television Assn. annual convention in Las Vegas.

The new publication will carry comprehensive news and analysis from the full range of the electronic media industry, including commercial tv, cable, radio, syndication, home video and other areas. Its editorial content will concentrate solely on electronic media. It will utilize the resources of the national and international newsgathering staffs of AD AGE and Crain Communications Inc., publisher of AA and 18 other business newspapers, magazines and newsletters.

The initial weekly issue will carry the first installment of a two-part series presenting an in-depth look at the exploding world of teletext and videotex. This report will include background on the two fields, agency and advertiser reaction to them and profiles summarizing the most significant corporate activities in these areas.

Subscriptions to the *Electronic Media Edition* are available at $10 a year. The publication is not sold as part of a regular ADVERTISING AGE subscription.#

High-tech home center set

By JANET NEIMAN

CHICAGO—Dart & Kraft's expertise in consumer products will be tested in the high-technology electronics industry beginning next week, when the company's new Anova Electronics division officially introduces its new Anova Master System at the Consumer Electronics Show here.

A "home environment system" made up of three units—a telephone center, control center and protection center—that can be integrated or used individually, Anova Master System is designed to serve as everything from a telephone to an electrical switch to a fire alarm.

Anova will debut in a wide-open consumer market for high-technology home control products. Though notable competitors exist for each individual unit (Panasonic in the telephone and message center concept, BSR for control centers and Universal Securities Instruments in home protection devices), the company says Anova is unique in its integration of all three functions.

Anova's telephone center combines the features of an answering machine with seven programable

(Continued on Page 34)

Airline competitiveness eyed by Justice

By KIMBERLY PALMER and TOM BAYER

DALLAS—The cacophony of controversy over the airline industry's automated reservations systems apparently was a familiar tune to the U.S. Justice Department.

Justice officials last week revealed a month-old civil investigation into competitive practices among the nation's airlines, and few industry observers appeared surprised. The far-reaching investigation was seen by many as a logical step following recent claims and counterclaims—specifically between bankrupt Braniff International and American Airlines—regarding possible abuses of airline computerized reservations systems (AA, May 24).

"We may have come full circle here," said William Jackman, spokesman for the Air Transport Assn., the umbrella group for the air carriers.

He was referring to the fact that, as the need for an efficient way to handle increasing passenger volume had emerged in the early 1970s, the airline industry proposed an independently operated reservations system to serve all carriers, but the plan was grounded by the Justice Department. It had balked because of antitrust implications; disagreement that arose among suppliers and carriers also contributed.

Now, almost four years after deregulation removed the tie-down, airline automated reservations systems once again are being scrutinized by the Justice Department.

The much-publicized complaints Braniff has lodged against American's SABRE reservations system, and American's staunch denials of wrongdoing, go well beyond claims and counterclaims traded between two competing carriers, one of which is now protected by the courts under Chapter 11 of the federal bankruptcy laws.

While the Civil Aeronautics Board is investigating the "dirty tricks" complaints Braniff filed against American and while the Justice Department's criminal investigation into the matter still is being conducted through a federal grand jury in Fort Worth, the newly revealed civil probe is a review of the whole industry's behavior.

How the airlines chose to compete, and how they communicate with each other from the clerical to corporate levels, appears to be the gamut of the Justice Department inquiry, which industry observers say should also define the fuzzy.

PBS finds itself in a rapidly changing game . . .

. . . including funding cuts, cable competition and commercials

By B.G. Yovovich

Advertising executive Peter Mayer's son, a law student, was shocked by what had just appeared on his television screen.

"Dad, you won't believe this," shouted the incredulous young man to his father, who was busy in another room. "I just saw an ad on WYES," the noncommercial public television station in New Orleans.

The older Mr. Mayer smiled, "I know, we placed it."

"But . . . but that's against the law," said the perplexed law student.

Au contraire.

Not only was the ad legal, but it was just the beginning of a nine-city, 18-month public television experiment mandated by Congress. And the young Mr. Mayer and other patrons of noncommercial television had best brace themselves: The opening of public television to commercials is likely to be just the first of a slew of changes as the institution enters the most critical period in its history.

There is plenty of evidence of crisis and turmoil. The Reagan Administration's proposal to cut direct federal funding of the Public Broadcasting Service by one-third, for example, helped spur the advertising experiment and is prompting public television officials to explore alternate sources of funding (see accompanying article) and to reexamine their budgetary priorities.

Public television also has begun to lose some of its most prominent personalities to its commercial competition. Longtime public television mainstay Bill Moyers moved to CBS last year. Gene Siskel and Roger Ebert, cohosts of PBS's top-rated half-hour show, "Sneak Previews," jumped to WGN Continental Productions, Chicago, last month, and "Wall Street Week" host Louis Rukeyser reports receiving numerous commercial tv offers.

And perhaps most ominous for public television is the looming competition from cable tv, particularly from various culture and entertainment channels that have been launched in the last couple of years. Though cable's lack of penetration into many of the nation's largest markets has minimized the impact of such services so far, even the most cursory examination of their offerings shows they ultimately pose a threat to public broadcasters.

This September, for example, CBS Cable will begin airing "A Walk Through the 20th Century," 20 one-hour programs, with Bill Moyers, that will explore the events of this century—precisely the kind of program that would have been a highlight of any PBS season.

So would some of the programing on Hearst/ABC's ARTS cable channel. Programs there include talk shows hosted by Calvin Trilling and Studs Terkel; original productions of plays by David Mamet, Frank South and David Rabe, and performances by Isaac Stern, Placido Domingo, Rudolf Nureyev and the Alvin Ailey American Dance Theatre.

And RCTV's Entertainment Channel now owns first rights to all BBC programing produced since January, 1981—again, the kinds of productions that have been PBS staples.

As ancient Chinese sages noted long ago, however, crises may be fraught with danger, but they contain the seeds of opportunity as well. At the same time that cable programing has fostered new threats to public television, cable and other video technologies are opening up new opportunities as well. One strong possibility: A pay, premium PBS Cable channel that would go head to head with some of the recent commercial entrants. Another project in the works: A PBS video club that would market videocassettes and videodiscs under the PBS label to its members.

There is at least one further twist to today's complicated public television scenario. At the same time that budgets are being threatened and danger looms all around, the nation's public broadcasters have been attracting record-breaking audiences and posting the highest ratings in their history.

During the week of Jan. 11 to 17 this last winter, the following news cheered the folks at PBS:

- A "National Geographic Special" on sharks was seen in 17.4% of all U.S. households, the highest cumulative rating of all time for a PBS program.
- The week's episode of the "Life on Earth" series posted a 10.7 cume, making it the highest rated weekly series ever to appear on PBS.
- The 7.5 rating recorded by "Sneak Preview" was the highest cume rating for a half-hour PBS series or special.
- The Flame Trees of Thika episode reached 7.5% of the nation's households, the highest rating on record for a "Masterpiece Theatre" presentation.
- "Wall Street Week," "American Playhouse," "Matinee at the Bijou" and the "Mark Russell Special" all set records for their respective programs.

All together, public television's prime time cumulative audience increased 17% over January, 1981, reaching a cumulative rating of 38% (or 31 million U.S. households) for the week. The total (full day) cumulative audience for the week hit 56.8%, or 46.3 million homes. Both represent the highest such figures in PBS history.

Several factors have come together in recent years to help make such ratings possible, not the least of which was a five-year appropriation passed by Congress in 1975 that increased federal funding for public television from $62 million in 1975 to $160 million in 1980. It wasn't only the size of the appropriation, but the duration as well, that was important. "It meant we could develop programing that required a two to three-year lead time, where previously we could plan only one year ahead," recalls Michael E. Hobbs, PBS senior vp.

The 1975 legislation that brought the funds also provided PBS with three satellite channels to interconnect local public tv stations and make program distribution easier and less expensive. By 1979, public television was armed with the new satellite interconnect system and with highly promotable programs like Carl Sagan's "Cosmos." The local stations decided it was time to band together and do a better job of coordinating their operations.

The first step was the establishment of a common PBS schedule for two hours on each evening Sunday through Wednesday —unprecedented cooperation for the fiercely independent stations.

"This brought a consistency to our scheduling," says Dan Agan, director of marketing with PBS. "No matter where they might be, our audience would know that 'Nova,' for example, would be on Sunday night.

"It also permitted PBS to take a more aggressive position with regard to advertising itself."

With the core programs aired at the same times and dates throughout the system, nationally coordinated advertising campaigns and more aggressive use of on-air promotion became possible. As a result, PBS and its member stations have spent more than $8 million since the major advertising and promotion push began in 1979, including more than $2.5 million for ads in *TV Guide*.

The new common core schedule also persuaded a number of program underwriters to offer additional promotional support, such as ads in *TV Guide*, newspaper television sections and national publications like *The New Yorker*.

Gulf Oil Co., for one, not only underwrites "National Geographic Specials" to the tune of $1.7 million a year, but it also spends $2.5 million each season on ads and promotion. Aided by such support, the specials are consistently the highest-rated shows on PBS, and have pulled nine of the 25 highest ratings in PBS history.

In fact, the combination of efforts among PBS, the underwriters and the local stations has had a striking effect on public tv viewership. Weekly full-day cumulative ratings are up nearly 48% since 1975, with more than half of U.S. tv households now tuning in to public television each week. Over the same seven-year period, weekly prime-time cumes are up a whopping 85%—a particularly impressive performance in light of the erosion that network ratings have suffered in recent years.

Though such audience growth in recent years has

Anthony Andrews (left) and Jeremy Irons starred in the British-made "Brideshead Revisited," one of PBS's most talked-about series this year.

Other fund sources

Commercials, pay cable, and videodisc sales are not the only new sources of funding being considered for public television. Other possibilities include:

- An excise tax levied on every television set sold in the U.S.
- Taxes to be imposed on commercial broadcasters specifically for the support of public television and radio.
- A national telethon patterned after the "Night of 100 Stars" that would be the culmination of local auction efforts.
- New tax laws that would provide tax credits for contributions to public television stations.
- A tax checkoff on federal and state tax returns similar to the Presidential campaign checkoff.
- Rental of unused Public Broadcasting Service satellite capacity and unused tv studios for tv program and commercial production and for video teleconferencing.

—*B.G.Y.*

B.G. Yovovich, a business writer in Chicago, contributes frequently to Magazine on a variety of marketing and media topics.

broadened public television's penetration into less affluent households, its viewership remains decidely upscale. Figures compiled last year show that each week public tv reaches 63% of U.S. households with annual incomes of more than $30,000 and 61% of households headed by individuals who are professionals, managers or who own their own businesses.

The demographics describing public television's more than 1 million subscribers are even more striking: Median household income is $43,000; 89% attended or graduated from college, and 59.6% are employed in professional/managerial occupations.

Such upscale demographics, of course, make public television audiences exceptionally attractive to advertisers and offer hope that commercials on public television will be able to command premium prices. Hence, the nine-station experiment to offer commercial time. As of mid-May, only WYES had run commercials, with most of the others scheduled to put them on the air shortly thereafter.

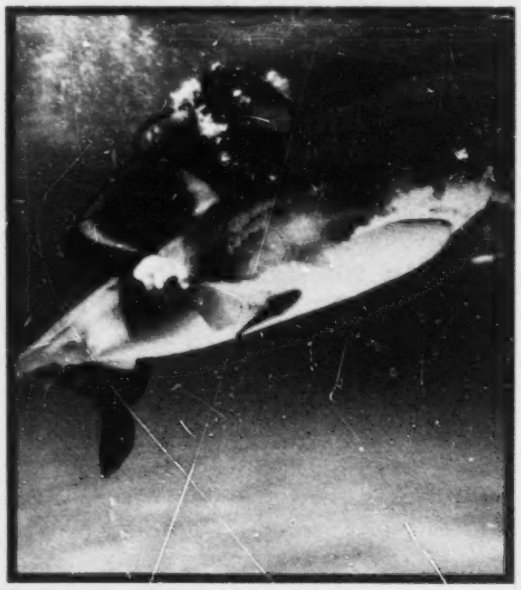
For the most part, each station sets its own policies—rates on WYES, for instance, are running at about $150 per spot—but they also follow system-wide guidelines (see accompanying article). The hope, of course, is to generate the revenue to replace funds that won't be coming in because of cutbacks and other assorted problems.

Yet, despite the prospect that commercials may generate the much-needed income, a large segment of the public television community has remained extremely cool to the idea, with Louisville's WKPC station already having pulled out of the advertising experiment after the station's board chairman resigned in protest.

"If public television goes commercial," says PBS president Lawrence Grossman, himself a staunch opponent of commercials on public television, "then it won't be public television."

Part of the reason for the deep-rooted resistance to commercials is the way many public television stations are set up. A sizable number of them are operated by universities or by nonprofit groups whose charters prohibit advertising, and there is widespread concern that commercials would destroy the special relationship that noncommercial stations have developed with their audiences—and especially with their dues-paying subscribers.

"There also are logistical problems that limit how much advertising we can sell," points out Mr. Agan, the PBS marketing director. "Our half-hour programs run 28 minutes and 50 seconds, our hour programs run



The "National Geographic Special" on sharks, which ran in January, drew a record PBS audience (see chart above).

58 minutes and 50 seconds, and that doesn't leave a lot of time for commercials, even if we eliminate all of our on-air promotions.

"The only study so far suggests that even if all the available spots on all the available stations were sold at premium prices, it would only generate $90 million—and this does not take into account selling costs." Those include the costs connected with the establishment of ad sales staffs and the purchase of necessary additional broadcast equipment.

Adds Mr. Grossman, "I haven't seen any studies that project that we won't actually lose money if we take advertising."

All time top rated PBS evening programs

Ranked by total or cumulative audience*

Rank	Title	Date	Hours	Total or Cume Aud.
1.	National Geographic Special: The Sharks	1/82	1	17.4%
2.	National Geographic Special: The Incredible Machine	10/75	1	16.0%

*Total and cumulative audience are defined as the percentage of U.S. TV homes viewing at least six minutes of the program

Note: PBS only receives ratings for ten weeks out of the year. The above rankings are for those programs for which we have ratings as of February 1982.

Sources: Nielsen Television Index, Public Broadcasting Service

Where PBS officials appear to be more hopeful is in their thoughts about the possibilities of a PBS-operated pay cable service.

"Our research and the research of others suggests that the audience for a [pay] PBS Cable is larger than you or I would believe," says Michael Soper, PBS's director of marketing projects and project director with PBS Cable. "The market is there." According to PBS market research studies, as many as 20 million American families are regular viewers of cultural programing on public television, and as many as 5 million of those households would be "likely subscribers" to PBS Cable at $12 per month.

Such an endeavor is particularly attractive to public broadcasters. Instead of forcing PBS to develop an entire new set of skills connected with ad sales, the pay cable operation would be able to take advantage of two already existing public television strong points: (1) the fund-raising and membership recruitment expertise public broadcasters have developed and (2) the well established and close ties that PBS has with the nation's major cultural institutions and, through the local stations, with arts and performing groups around the country.

The local nature of cable systems would also enable local public broadcast operations to play a role in the pay channel, perhaps providing some local programing to supplement the national feed. Moreover, such a service could be integrated relatively easily into traditional PBS broadcast operations, with the pay channel serving as a program feeder.

According to Mr. Soper, the major barrier to implementation of such a pay cable service is that "there are too few addressable homes"—that is, not enough potential customers of the PBS Cable service whose homes are wired via cable systems with a pay capacity. "It could be another couple of years before the timing is right."

Despite the advantages outlined by proponents of PBS Cable, even the service's most ardent supporters concede that it is likely to face stiff opposition from other cultural services. In fact, some of the more pessimistic observers not only question heady predictions for the vitality of the PBS Cable concept, but express doubt that any of the high quality cultural channels—pay or advertiser-supported—can be commercially viable.

"All you have to do is look at the history of other media," says Mr. Grossman. "Look at radio. When you got 50 or 100 stations, the audiences became so diluted that no one could afford to produce quality programing. In my judgement, that's what has happened to [quality] magazines as well, and when television channels proliferate, program originality and quality are more likely to diminish than to improve."

The only solution, maintains Mr. Grossman, is continuation of subsidies for public television. "No orchestra, dance company, public library, museum or educational system could survive in the marketplace without public subsidy," says the PBS president. "It is totally unrealistic to expect that new technologies of distribution will eliminate the need for public funds." AA

Brace yourself, the ads are coming

It's a case of "so far, so good" at New Orleans' WYES, the first public tv station to air paid advertising.

Despite the fact that the station has been running commercials since the last week in March, the dreaded "negative viewer response" feared by many public broadcasters has been virtually nonexistent so far. The station has received only three letters of complaint. "We've had almost no reaction at all," adds Bob Wisehart, tv critic with the *New Orleans Times-Picayune*. "We've gotten no letters and heard almost no comments."

On the financial side, the news has been more tangible.

"We did about $10,000 in billings for the month of April," says Al Smith, president of Audubon Communications Corp., a media consulting company administering the ad sales program for WYES. "We made a profit the first month, we hope to gross $1.2 million by the end of the experiment and earn a profit of $800,000 for the station." On the average, each 30-second spot is costing advertisers about $150.

Should Mr. Smith's expectations be realized, the profits from the advertising would represent roughly 20% of this year's WYES budget.

The first commercial, a spot for New Orleans Business Machine Co., was placed on WYES because, "Public television delivers a sophisticated audience and I felt tht my client should be there," says Silvio Fernandez of Creative Marketing, the advertising agency that handles the account. "We've canceled all of our other tv buys for this account so that at the end of our 90-day schedule we'll be able to tell how effective the buy was."

In addition to the business machine commercial, WYES has run spots for a bank, insurance company, stock brokerage, jeweler, radio station, theater, real estate broker, car dealer and fast-food operation. All of these advertisers had previously run spots on commercial channels.

Not all of the public tv stations involved in the ad experiment will follow WYES's example and allow product advertising, but commercials on all of the stations will have to comply with minimum standards:

- Commercials will air in clusters lasting no more than two minutes and will not interrupt programs.
- Advertising must be sensitive to the tastes and interests of the audience.
- Advertising will respect the intelligence of the viewer.
- Standards of quality that apply to regular programing will also apply to advertising.
- Stations will reserve the sole right to accept or reject advertisements on the basis of quality or content.
- Stations will adhere to both the spirit and letter of the National Assn. of Broadcasters tv code.
- Stations will exercise particular caution in placement of advertising adjacent to programing for younger viewers.

Other stations participating in the experiment are WHYY, Philadelphia; WIPB, Muncie, Ind.; WNET, New York; WPBT, Miami; WQED, Pittsburgh; WQLN, Erie, Pa.; WSKG, Binghamton, N.Y., and WTTW, Chicago. At presstime, only WYES had put commercials on the air, although WPBT and WQLN were planning for a start by the end of May. Four stations—WHYY, WPIB, WQED and WTTW—have targeted June dates, while WNET is looking to September. WSKG has not established a firm date.

Alcohol ads top $1 billion

By JOHN J. O'CONNOR

NEW YORK—Advertising of beer, distilled spirits and wine cracked the $1 billion mark for the first time in 1981, a 12% increase over the previous year's outlay.

The data, compiled by *Impact* with the cooperation of several expenditure tracking services, put beer in the lead with spending of $464.8 million, up 11% over 1980. Distilled spirits followed with an outlay of $377.1 million (+11%). Although last in spending, wine had the greatest percentage increase, 28%, as vintners poured $173 million into media.

The alcoholic beverage industry newsletter chalked up the robust increase in wine advertising to "sizable" prime time tv expenditures by major wine companies.

"The 8% gain in distilled spirits advertising," *Impact* noted, "is a sign that distilled spirits marketers are not going to take their stagnant sales performance lying down." At the same time, *Impact* questioned how distillers can maintain such spending levels when increases "erode existing profit margins."

Distilled spirits shipments were estimated at 455 million gals. last year, or the same as 1980. Wine shipments rose 6% to 505 million gals. Beer was up only 2% to 5.6 billion gals. shipped last year.

In terms of advertising per gallon shipped, distilled spirits was the undisputed category leader with 83¢ spent per gallon, up from 76¢ a year earlier. Wine advertising last year rose to 34¢ per gallon, up from 28¢ in 1980. Due to its enormous volume, beer spending per gallon was 8¢, the same as in 1980.

■ In terms of advertising by media, tv accounted for 44%, or $451 million, of total media dollars. Next came magazines with $252 million (25% share), followed by radio, $123 million (12%); newspapers, $102 million (10%); outdoor, $72 million (7%), and Sunday supplements, $15 million (1%).#

Alcoholic beverage industry's '81 ad spending

MICHAEL DONAHUE

BALTIMORE—Michael J. (Slim) Donahue, 90, an agency executive whose 70-year career included cofounding the old Donahue & Coe agency in New York, died here May 13 after a brief illness.

Mr. Donahue, who resided in Stoneleigh, Md., was born in Massena Springs, N.Y. He founded M.J. Donahue Co., New York, in the 1920s and later merged with Sayers Coe to form Donahue & Coe. The agency went on to pioneer in motion picture advertising and was credited with bringing "coming attractions" into theaters as a selling tool. In 1932, Donahue & Coe was sold to Edward J. Churchill, then an executive at the agency. Mr. Churchill retired in 1964, after the agency acquired Ellington & Co., and the remaining partners, Don West, Walter Weir and William Bartel (president of Ellington) changed the agency's name to West, Weir & Bartel. (WW&B effectively lasted until April, 1968, when it was acquired by MacManus, John & Adams).

Mr. Donahue, after selling his agency, moved to the Baltimore area and joined the Anchor Post Products company as advertising manager. He also continued to operate M.J. Donahue Advertising. He retired from Anchor Post in 1956 but continued to be active in his agency until a year ago. #

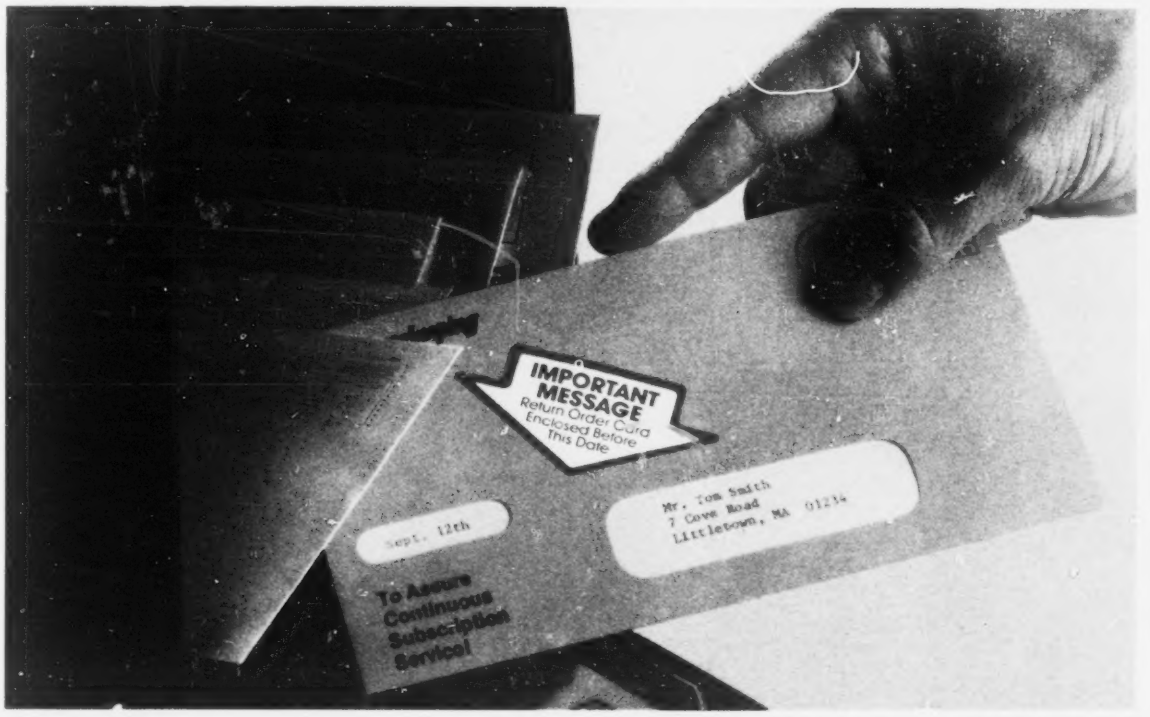
LABELLED ENVELOPES GET OPENED FIRST!



Achieve the response you're looking for with Labelled Envelopes from Westvaco.

A colorful, attention-getting label can help your envelopes make your mailings more exciting and successful . . . give them the opportunity to say, "Open Me First."

With the volume of mail competing for attention in your prospect's mailbox, your envelope needs that "something extra" to make it stand out from all the rest. Colorful labels will do the job for you. They'll make your envelopes more dramatic on the outside, generate interest and involvement, and encourage your prospects to read and respond to the message inside.

Labels offer a variety of attractive graphic effects. They can add up to six additional colors to your envelope, including vivid fluorescent oranges and pinks. Labels are available in unusual materials such as sparkling gold and silver foils and unlimited shapes like starburst, circles, arrows and more. They can be varnished, too, for an extra touch of brilliance. Labels stand out—actually "stand up" to attract attention.

Dramatize and increase the response to your next mailing with Labelled Envelopes from Westvaco. Select the label that's right for you from our large variety of label patterns or custom design a label to fit your particular mailing needs.

To learn more about Labelled Envelopes from Westvaco and how successful mailers are using them, simply complete and mail the coupon below. We'll respond promptly to your request.

Public shops up, down in quarter

By CHRISTY MARSHALL

NEW YORK—Publicly held agencies turned in record gains and losses during the 1982 first quarter as they adopted new accounting procedures, fell victim to devaluation or, in the case of JWT Group, increased operating costs as a result of relocating.

Interpublic Group of Cos. came in as the biggest gainer in net income, up an incredible 206%, as a result of changing its accounting procedures to conform to the Financial Standards Accounting Board's F.A.S. 52, a procedure that cuts down the losses suffered as a result of currency translation.

■ The biggest loser in net income, down 113%, was JWT Group, still reeling from a $30 million writeoff in 1981 as a result of accounting irregularities found in its syndication unit.

Interpublic's net income was up to $2.6 million from the $865,000 posted for the same quarter in 1981. JWT's net income nose-dived from $326,000 in 1981 to a minus $43,000 in 1982. The drop is attributable to devaluation of the Mexican peso and office moving expenses.

Earnings gains also were reported by Doyle Dane Bernbach, up 44% to $690,000, and BBDO, up 12% to $3.2 million from $2.9 million in 1981. The remaining public agencies recorded losses. Grey was down 12% to $437,000 from $501,000, and Ogilvy & Mather slipped to $2 million from $2.5 million. Decreased profits at O&M were attributed to the devalued Mexican peso.

All the publicly held agencies posted revenue gains in the first quarter. The greatest increase was reported by Grey, up 25% to $29.1 million from $23.3 million.

BBDO's revenues were up 12% to $47.2 million. Its domestic revenues, now inclusive of Tracy-Locke/BBDO in Dallas, were up 19%, but international revenues were down 4%. O&M's revenues were up 11.5% to $73.9 million, and JWT was up 11% to $92.4 million.#

Agency financial reports

First quarter

Net income	1982	1981	%
BBDO	$3,196,000	$2,860,000	12
Doyle Dane Bernbach	690,000	480,000	44
Foote, Cone & Belding	1,382,000	1,360,000	1.6
Grey	437,000	501,000	−12
Interpublic	2,645,000	865,000	206
Ogilvy & Mather	2,036,000	2,493,000	−18.3
JWT Group	($43,000)	326,000	−113

Revenues	1982	1981	%
BBDO	$47,200,000	$42,200,000	12
Doyle Dane Bernbach	38,898,000	34,267,000	14
Foote, Cone & Belding	40,838,000	38,406,000	6.3
Grey	29,083,000	23,315,000	25
Interpublic	101,850,000	98,108,000	3.8

Why DDB eyed merger

(Continued from Page 4)

agreed that the demands of multinational clients and increased competition for market share are compelling reasons in the quest for growth.

■ "There's no question but that the largest agencies, as a group, are continuing to increase their market share at the expense of the medium-size agencies," Mr. Austrian said. "This is happening because most of the large budget increases are coming from multinational clients who are assigning their accounts, with increasing frequency, to the large multinational agencies.

"For the first time ever, U.S. advertising did not represent more than 50% of the total worldwide spending," Mr. Austrian continued. "This is a key, key trend which will continue. In fact by the year 2000 the U.S. portion could well be below 40%. The major growth will be international. Our clients will continue to seek growth outside our borders. We have to be prepared to meet their needs."

In another business matter, the stockholders once again defeated the proposal from the Society of Catholic Medical Missionaries, Philadelphia, to reexamine and reevaluate the ethics involved in DDB's handling of the South African Krugerrand account (AA, May 3). The nuns in the society are opposed to South Africa's apartheid policies and, in that connection, oppose the sale and promotion of the Krugerrand.#

Grossman joins Yaffe

SOUTHFIELD, MICH.—James Grossman has closed the doors of Grossman & Associates and has become senior vp at Yaffe Berline. Mr. Grossman brought along some of his clients, including Bonnie Bread, Comcast Cablevision, Family Computer Center, Greater Media Inc., Lexitel Corp., Mercury Paint Co. and Metro Trading Assn. Billings for these accounts are estimated at nearly $2 million.

Agency elected to group

SAN FRANCISCO—Maxwell Arnold Jackson & Smyth has been elected to membership in the Affiliated Advertising Agencies International.

Fresh idea

R.T. French Co. is introducing Sweater Fresh spray garment cleaner on the West Coast. It bought the product a month ago from Cono-Tec, a product development company that had been test marketing the item. It is getting multimedia support via J. Walter Thompson USA.

McCormick juggled ad $ in takeover fight

By RICHARD L. GORDON

BALTIMORE—McCormick & Co. has revealed how executives in its grocery products division, aiding the fight against a takeover bid by Swiss conglomerate Sandoz Ltd., persuaded its ad agency to delay billings to help inflate earnings during certain periods from 1977 through early 1981.

The report on the bending of certain accounting rules, written by outside investigators hired by McCormick and recently released by the company, said that McCormick's "cooperative" advertising agency helped grocery products division managers artificially cut expenses and meet "ambitious" profit targets by delaying agency billings. In other instances, investigators said division employes altered advertising agency invoice dates, or simply withheld invoices.

The report said there is no evidence that any corporate funds were diverted to any McCormick employe as a result of the irregularities. Nor were any questions raised in the report about the role played by McCormick's agency, W.B. Doner & Co., Baltimore, though not named by the investigators, is McCormick's agency of record.

"It really is our problem, not a Doner problem," McCormick vp, secretary and general counsel James H. Harrison Jr. said in an interview. "We've taken action to solve it." He said results of the investigation are unlikely to affect Doner's status as McCormick's agency.

"They would seem to have been primarily trying to accommodate their client," he said of Doner's willingness to defer billings. "We've not really talked to them about it, although the investigators have."

Doner exec vp William Hooper said the agency had "reviewed all our materials, and our billings, with McCormick's special counsel," but he declined to dis-

ESPN signs up for Nielsens

By COLBY COATES

In a move that should silence its critics, Entertainment & Sports Programming Network has opted to join the ratings wars.

But the cable sports network's plans to go on Nielsen meters in the last quarter of this year is only one part of the ratings and research package the company is serving up to advertisers.

Designed to position ESPN more like a magazine sell than broadcast, ESPN's deal with Nielsen Home Video Index will produce quarterly reports with household ratings and share; audience comp on viewers per household, plus market section data, which includes income, education, family size, county size and pay cable homes. Besides average quarter-hour numbers, ESPN also will break out numbers by sports in specific dayparts, and dayparts with specific sports. The information will be compiled utilizing both Nielsen meters and in-home diaries, and will be published for the first time early in 1983. *(USA Cable is leaning toward Nielsens; see story on Page 81.)*

The advertiser and agency buying community, some of which has been critical of ESPN for not going on meters when the cable network met Nielsen requirements, will learn all about the research plans starting June 22.

On that date, ESPN execs will begin—in New York City—a five-city briefing tour for the buying fraternity. Other stops on the tour include Chicago, Detroit, Los Angeles and San Francisco.

ESPN exec vp-chief operating officer Bill Grimes readily admitted that Bristol, Conn.-based ESPN has taken its lumps for resisting demands that it "get into a cpm

New 'BW' chief in hot spot

By STUART EMMRICH

NEW YORK—The simple announcement from McGraw-Hill last week that James Pierce was being named publisher of *Business Week* barely hinted at the behind-the-scenes power struggles that have been going on at that company during the past year.

For the past 12 months, key execs at McGraw-Hill have been locked in corporate combat over the choice of a successor to R.B. (Bernie) Alexander and the future direction of *Business Week*. That combat claimed as casualties several top execs and staffers and raised serious questions, both within and outside of McGraw-Hill, about the management of the company.

Insiders say Mr. Pierce, publisher of McGraw-Hill's *Aviation Week & Space Technology* since 1979 (and before that on the *Business Week* sales staff for three years), faces the dual challenge of improving staff morale at *BW* and protecting the magazine from a top management described as being chiefly interested in taking its profits to prop up the company's bottom line.

That last battle, over the use of *BW*'s considerable

Toyota key in DFS-Japan link

By JACK PLIMPTON and DENNIS CHASE

TOKYO—Dancer Fitzgerald Sample is about to forge a new Japanese link with Nippon Design Center, a small Japanese agency owned, in part, by Toyota Motor Sales. That move will give DFS a stronger link with the Japanese automobile company, which is said to be looking to coordinate its worldwide advertising more closely.

DFS senior vp Nelson Riddle Jr. (son of the famous bandleader) has been in Japan on "special assignment" for 17 months working on various research and other projects with NDC related to the Toyota account worldwide. He acknowledged that the new linkup could happen within the next 12 months.

■ According to one source, so far the two agencies have been working on trying to get a common theme to Toyota's advertising—similar to what Coca-Cola is trying to do worldwide. DFS has helped Toyota's success in the U.S. with its "Oh what a feeling" campaign; however insiders say

Century 21 to review on $20 million account

IRVINE, CAL.—Century 21, largest U.S. real estate network, will conduct a review shortly in which five to six finalists, including incumbent WRG/Townsend, Newport Beach, Cal., will participate. Decision to review the estimated $20 million account follows appointment of Bruce Oseland, former operations assistant to the president, to the new post of vp-marketing. WRG/Townsend recently revamped its staff on the account.

Reynolds to test new low-tar Bright cigarets

WINSTON-SALEM, N.C.—R.J. Reynolds is about to test new Bright king-size and 100mm low-tar cigarets in Detroit, Oklahoma City and Denver. Newspapers, magazines and outdoor support via Leber Katz, New York.

P&G debuts repositioned, therapeutic Wondra

CINCINNATI—Procter & Gamble is introducing nationally a reformulated Wondra skin lotion, abandoning the upside-down bottle used when the product first was introduced. Testing since last fall in Charleston, S.C. (AA, Oct. 19), the new version takes a more therapeutic positioning, claiming to "relieve dry skin better" with seven new ingredients. B&B, New York, handles.

Broyles considered for top 'Newsweek' post

NEW YORK—William Broyles, editor of *Texas Monthly* and *California*, is under consideration for a top new editorial post at *Newsweek*, reportedly to be groomed to succeed 60-year-old executive editor Lester Bernstein, who would then be reassigned. Mark Edmiston, Newsweek Inc. president, denied industry rumors that Mr. Bernstein was being fired. Last Friday, Katharine Graham, chairman of the parent Washington Post Co., met for dinner in Austin with *Texas Monthly* publisher Michael Levy to discuss Mr. Broyles' future. Meanwhile, the controversial June 7 cover *(see story on Page 3)* generated even more controversy when it was learned that the late Sarai Ribicoff, niece of former U.S. Sen. Abraham Ribicoff, was one of the models used for the William Bailey painting. While denying the

Newspapers continue repositioning bids

'Des Moines Tribune' to cease p.m. run

By ROBERT REED

Concern for its long-term potential and growth caused the Des Moines Register & Tribune Co. to play its trump card and discontinue the afternoon *Tribune* newspaper.

The *Tribune* will cease publication in September when it will be absorbed partly by a revamped morning *Register* featuring the *Tribune's* columnists, local news coverage and features, company officials say.

The decision to terminate the afternoon publication was based not only on the immediate financial troubles of the *Tribune*, but also on the publishing concern's long-term objectives.

Newspaper operations accounted for the bulk of the Register & Tribune's 1981 revenues with a tally of $70.5 million compared with $68 million for the previous year. Broadcasting earned $18.8 million in 1981 compared with $18 million in 1980.

But the company had posted a $618,000 first-quarter loss and the *Tribune's* ad revenues had declined sharply during that span, the company said.

"We don't think Des Moines is big enough to support two mediocre newspapers, but it is capable of supporting one excellent newspaper," said David Kruidenier, publisher of the company.

For a year, the Register & Tribune has been exploring options concerning the fate of the two newspapers (AA, May 10). The company had commissioned a three-member strategy task force that submitted three other alternatives designed to improve the company's future financial health, said Michael Gartner, president and editor of the papers. Those options included: Combining news staffs but keeping two separate papers, reducing the size of each paper's staff, or standing pat with two newspapers and their autonomous units.

"All were considered financially attractive but not journalistically attractive," Mr. Gartner said. "Sure, the initial reaction is one of 'hate to see it happen' but it will insure independence for the future, strength

'Denver Post' gambles on morning-only

By KIMBERLY PALMER

In what one *Denver Post* executive describes as "the ultimate gamble," the traditional evening newspaper will complete its conversion to morning-only editions today (AA, May 31).

Since its Sept. 14, 1981, debut as an all-day newspaper, the *Post* gradually has been moving toward becoming a morning paper, in direct competition with its crosstown rival, the tabloid-size *Rocky Mountain News*.

The *Post* becomes the first major metropolitan daily newspaper to switch from evening to morning editions to take on another morning competitor, said Tim Kelly, *Post* managing editor. "It's the ultimate gamble. It's never been done before in this size of market. There is no track record or past history.

"We feel very good about the move," he added. "We are entering the morning market and will let the chips fall where they may."

According to Audit Bureau of Circulations figures for the period Oct. 1 through March 30, the *News* reported a daily circulation of 312,873, compared with the *Post's* 258,376. But the *Post* leads the *News* in Sunday circulation with 356,372, compared with 335,665.

■ Ralph Looney, editor of the *News*, which is owned by Scripps-Howard, says the move by the Times Mirror-owned *Post* poses no real threat to his paper's current lead in daily circulation. "The *Post* has been in the process of doing this [becoming a morning paper] since last September, and we have no evidence that there has been any significant change in our circulation figures. We are very confident that we will continue to grow. We have made some great improvements in our product in the past months. . .and we will continue to do so."

Soon after *Post* publisher Lee Guittar made the decision last summer to make the *Post* a morning paper, October was set as the

ELECTRONIC MEDIA EDITION

Advertising Age

'EME' goes weekly Thursday

CHICAGO—ADVERTISING AGE's new *Electronic Media Edition* begins its regular weekly publication schedule this week. The issue, dated Thursday, June 10, features a special report on teletext-videotex.

The premiere issue of this separate publication was published May 3.

The new publication will carry comprehensive news and analysis from the full range of the electronic media industry, including commercial tv, cable, radio, syndication, home video and other areas. Its editorial content will concentrate solely on electronic media. It will utilize the resources of the national and international newsgathering staffs of AD AGE and Crain Communications Inc., publisher of AA and 18 other business newspapers, magazines and newsletters.

The initial weekly issue will carry the first instalment of a two-part series presenting an in-depth look at the exploding world of teletext and videotex. This report will include background on the two fields, agency and advertiser reaction to them and profiles summarizing the most significant corporate activities in these areas.

Subscriptions to the *Electronic Media Edition* are available at $10 a year by phoning (312) 649-5403 or writing to 740 Rush St., Chicago, Ill. 60611. The publication is not sold as part of a regular ADVERTISING AGE subscription.

'RS' fires Bonanni, lawsuit threatened

By STUART EMMRICH

NEW YORK—Peter Bonanni was fired last week as publisher of *Rolling Stone*, the second time in the last four months that the 49-year-old Mr. Bonanni has left a publisher's post under stormy circumstances.

Kent Brownridge, general manager of *Rolling Stone*, said Mr. Bonanni had been terminated because of "differences" over the direction of the magazine. There has been no official word from the magazine about the changes, but Mr. Brownridge said that owner Jann Wenner will reassume the publisher's spot he held before hiring Mr. Bonanni three months ago, and that ad director William David will take over responsibility for the ad sales staff.

Mr. Bonanni confirmed he has left *Rolling Stone*, but said he could not discuss events leading to his departure until he made a formal announcement later this week. Mr. Brownridge also declined to discuss specifics, saying that Mr. Bonanni had threatened legal action against the magazine.

■ Also out is Craig VanderPloeg, who was brought in as marketing services director by Mr. Bonanni last month. Mr. Bonanni and Mr. VanderPloeg had worked together at *Woman's Day* before Mr. Bon-

N W Ayer wins 1, loses 1

By ROBERT RAISSMAN and JAY McCORMICK

You win some, you lose some.

Last week, N W Ayer won out over another General Motors agency—D'Arcy-MacManus & Masius—for a new $15 million corporate campaign, but client AT&T Long Lines decided to take its $15 million business long-distance account out of the agency.

Ayer's winning campaign for GM will carry the theme, "We're the best GM ever," and will appear in print, tv and radio as fast as possible. Print ads got into newspapers last Friday, and the broadcast spots will air as soon as production is completed. Ayer already handles GM corporate public affairs advertising and D'Arcy handles corporate product advertising. Since the new campaign fell into a gray area, GM asked the two agencies to compete for it.

"In some respects the D'Arcy campaign tested better, in others the Ayer campaign tested better," said John McNulty, vp-pr at GM. "The things that we thought were most important at this time were the ones where Ayer showed up

(Continued on Page 80)

Cigar volume dips in 1981

By JOHN C. MAXWELL JR.

The cigar industry's unit volume declined modestly in 1981. While the figures include the rolling out of Backwoods by Consolidated Cigar, we note that the total decline was minor.

With the aging of the U.S. population, more interest might be shown in cigars. Thus, we expect 1982's consumption to be flat or down only slightly. It would appear we have hit bottom or are close to it.

The major trend within the industry is, of course, the move to higher-price products. The premium product costing 50¢ or more now accounts for about 5% of units and 25% of dollars for the industry.

Backwoods appears to be an interesting success story in an otherwise lackluster industry. General Cigar recently introduced Jim Burley to compete with this product, and we expect other entries as time progresses. The only other item we see in test is a John Swisher product called Swisher Sweet Coronella.

Very few products showed growth in 1981. Those that did were American Cigar's Antonio y Cleopatra and M&N Cigar's Cuesta-Rey and Rigoletto. Bayuk sold its Garcia y Vega to General Cigar in March, 1982; this product was relatively stable in 1981. Bayuk is negotiating to sell Phillies as well. At this writing, negotiations are in progress for the MacAndrews & Forbes Group to buy Consolidated Cigar from Gulf & Western.

Mr. Maxwell is with Lehman Bros. Kuhn Loeb, New York.

Y&R out in huge Europe shift

Peugeot puts all at Univas

By CAROLYN PFAFF

PARIS—In what shapes up as the biggest account change ever to hit Europe, the management at the troubled French car maker, Peugeot-Talbot, whose European ad expenditure tops $130 million, has abruptly decided to "coordinate and harmonize" advertising across the Continent.

As a result, the auto maker is severing its seven-year affiliation with Young & Rubicam (worth $30 million) and throwing a big question mark over a further $20 million currently shared in Britain between D'Arcy-MacManus & Masius ($13.5 million) and Ted Bates ($6.5 million).

The only winner in this huge transfer is Eurocom/Univas, the giant French agency group, 46% owned by the gove ment and now No. 18 in world ings with $103 million in gros come. With a few possible exceptions, Univas will take over all Peugeot and Talbot business across the board sometime between September and January onward in most European countries.

Commenting on the Peugeot decision, Jean-Claude Boulet, Y&R deputy head of Europe and head of the Y&R group in Paris, said, "The top management at Peugeot did not realize when they decided to move the account that they are breaking a very important partnership. This decision means that Y&R loses the Talbot account in France, Spain, Italy, Germany, Switzerland, Holland and Norway. On top of this, it means that the advertising agencies handling Peugeot in all of these countries will be losing the account, so they are not only firing Y&R, they are also firing the Peugeot agencies everywhere except in Italy and Belgium,

Lorillard pits DFS against incumbent FCB

Two in Kent shootout

By JOHN J. O'CONNOR

NEW YORK—Loews Corp.'s Lorillard division has asked Dancer Fitzgerald Sample and incumbent Foote, Cone & Belding to prepare fresh creative approaches on its sagging Kent and Kent III cigaret brands, whose combined billings are in the $25 million range.

Should FCB lose the shootout, there is a very strong likelihood DFS will add both brands to the Lorillard business it already handles, namely Triumph and a test brand called Rebel.

The decision to seek a possible creative solution to the declining sales profile of the Kent brands apparently signals the death knell for the Kent III "taste city" campaign, which features panoramic views of major cities such as Chicago ("Kent III takes the Windy City by storm"), and the Kent "food" campaign. The latter attempts to marry Kent to the taste of foods and beverages through arresting graphics, e.g., a sardine can containing three mini-Kent cartons or an ice cream pack bearing the Kent design.

The demise of that effort undoubtedly will be toasted by nonsmokers, many of whom expressed revulsion with the graphic association of a cigaret with table fare.

For the last 18 months Lorillard has been slumping, with the exception of its fast-growing Newport brand, after three or four solid growth years that made it the nation's fastest-growing cigaret company. Those happy days spawned trade ads headlined, "When you're hot, you're hot."

Lorillard's cooling-off period began with huge ad spending increases by its larger competitors, namely Philip Morris U.S.A., R.J. Reynolds Tobacco and Brown & Williamson. B&W, for example, is estimated to have spent $150 million to launch Barclay in 1981, a smoke that has been successful at the expense of ultralow-tar brands like Kent III.#

Both strongly deny report

BBDO-JWT merger?

NEW YORK—ADVERTISING AGE learned last week that an eye-popping merger proposition—BBDO International acquiring JWT Group—was being floated within BBDO. However, the heads of both agencies adamantly deny any such discussions are going on.

"I have never initiated or responded to a proposal of any kind of merger or acquisition with JWT," said Bruce Crawford, president of BBDO International. "I cannot say for sure it has never been discussed among people, a what-would-you-do-if kind of thing. But no, there is no contemplation at this moment and there haven't been any negotiations." He added with a laugh. "But if enough people call me, maybe I'll start thinking about it."

A JWT spokesman was "absolutely, positively sure" no such discussions were being held or being planned.

A JWT/BBDO duo (with combined gross income of $536.9 million) would bump Interpublic Group of Cos. out of first place among U.S. agency conglomerates worldwide. And this match would be relatively conflict-free. In fact, the two share such major clients as Lever Bros., PepsiCo, Quaker Oats, Scott Paper and Schlitz.#

P&G tests microwave mix

By JANET NEIMAN

Anticipating the potential afforded by future growth of microwave ovens, Procter & Gamble is testing Duncan Hines Microwave Cake Mix, believed to be the first nonfrozen grocery product made specifically for microwave cooking.

P&G is testing one flavor, a yellow cake mix, in the Seattle area. According to a company spokesman, every ingredient of the mix "has been tailored for the microwave oven," making it inappropriate for baking in a conventional oven. The product retails for about $1.09, the same price as most other cake mixes.

Cincinnati-based P&G already maintains the top spot in the $756 million dessert mix category, of which double and single-layer mixes and specialty cake mixes make up about 67%. Duncan Hines mixes hold about 35% of the market, followed closely by General Mills' Betty Crocker. Pillsbury holds third place with about 21%.

Both General Mills and Pillsbury say their regular cake mixes can be used for microwave baking, and both include on their packages the addresses to which consumers may write to receive microwave cooking instructions. Some General Mills potato mixes also have microwave instructions on the box.

Industry sources say consumers complain that cakes baked in microwave ovens frequently come out unevenly baked and lopsided. Nevertheless, both General Mills and Pillsbury say they will not market microwave-only mixes. With only about 20% of all households owning microwave ovens, "we don't want to limit our product to such a small market," a General Mills representative said.

But one Seattle buyer pointed to the vigorous movement (80 cases a week in her stores) of Pillsbury's Hungry Jack microwave popcorn, which is a frozen, prepared product. "I'd want to bake a cake in 10 minutes a lot more than I'd want fast popcorn," she said.

Pillsbury may not be as disinterested in microwave foods as it contends at this time. In addition to frozen

Kill food rule: FTC aide

By RICHARD L. GORDON

WASHINGTON—The Federal Trade Commission's Reagan-era consumer protection chief has given the commission his guidelines for avoiding the kind of rule-making fiascos that hurt the commission in the past. And the first FTC project to fail his tests is the long-pending food advertising rule.

The running theme in the 42-page memo drafted by FTC consumer protection chief Timothy Muris is a demand for "hard evidence" before the commission acts. Without it, he said, the commission should yield to a "general presumption" against government interference with "established practices.

"Of course, markets rarely work perfectly," he said. "Perfection, however, is not the relevant standard for judging markets, any more than it should be the standard for judging the commission's actions. When there is substantial evidence that market forces cannot eliminate actions that significantly injure consumers and substantial evidence that the commission's remedy will improve consumers' well-being, the commission should act."

Mr. Muris, as expected (AA, May 17), is urging the commission to abandon a food ad rule that the pre-Reagan commission tentatively had approved in 1980. He said the long record compiled in the food project, which dates back to 1974, doesn't have the evidence he believes the commission needs to withstand later scrutiny in the courts and Congress.

The rule would limit "natural" claims to products that contain no artificial ingredients and that are "minimally processed," but Mr.

Chipwich legal woes mount

By GAY JERVEY

NEW YORK—Success may be proving a cruel mistress for Chipwich Inc., the company that reinvented the ice-cream sandwich with the addition of cookies and chocolate chips but is now plagued by controversy and legal wrangling.

With Chipwich's summer ad program apparently shelved, Rand Public Relations, Chipwich's former marketing arm, has become the latest company to join the roster of those embroiled in legal hassles with Chipwich. Last month Rand resigned the account due to unpaid bills (AA, May 17). and president Stan Bradskeir indicated at the time that if worse came to worst, it would seek legal redress to collect payment due.

Worst came, and today the company indicates that—however hesitantly—it has initiated legal action. In doing so, Rand joins Premium Products Inc., Chipwich's former marketing arm, which is suing Chipwich for breach of contract.

Chipwich abruptly severed relations with Premium last March, claiming that its principals Bruce Nevins and James Stevens had fallen short on their promises. Among other things, Chipwich claimed that Premium lacked the guaranteed marketing expertise in the ice cream area and that its small staff was too thin to conduct a new product launch.

Chipwich is "starting to spend too much god-

Fox seeks advertisers as co-producers

By JAMES P. FORKAN

Twentieth Century-Fox Television has begun a search for advertisers and agencies that are interested in co-producing tv movies and other programing for broadcast on one of the tv networks.

Richard Rosetti, Fox's vp of tv movies, miniseries, specials, daytime and late night, flew in from his Beverly Hills base last week to visit five unidentified New York ad agency execs with "institutional clients" to discuss how mutually beneficial such a linkup could be.

From a cost standpoint, the benefits are obvious. A prime time network tv movie now costs $1.9 million to $2.3 million to produce, depending on how difficult it is to produce and on what stars are booked, Mr. Rosetti said. Only two years ago, he recalled, the ballpark range was $1.6 million to $1.8 million, so the rate of increase is about $100,000 a year per movie.

Unlike some less-experienced production companies now working with advertisers on tv vehicles, Mr. Rosetti said, Fox has 25 producers under contract, extensive facilities and decades of experience.

There were indications that some Procter & Gamble agencies were among Mr. Rosetti's prospects. General Foods, which sponsors Benton & Bowles-developed tv movies under its "Golden Showcase" umbrella, is a client Fox would very much like to work with, he acknowledged. However, B&B was not on his visit list, since Fox views it as a production rival.

Harris Kattleman, Fox TV chairman, gave the go-ahead nearly two years ago to Mr. Rosetti, whose advertiser/agency chase was sidetracked until a couple of network tv miniseries commitments were completed. The seed for this advertiser push actually was planted about that same time, Mr. Rosetti recalled, after a periodic meeting with Bill Croasdale, vp-associate director of network programing, BBDO, New York, that ended, as usual, with the

Coors comes in from cold

By ROBERT REED

Coming in from the great outdoors with a renewed marketing approach is Adolph Coors Co., forsaking the "High Country" look for a more product-oriented campaign hitting the air this week.

The ad shift for the flagship Coors brand is the Golden, Colo.-based brewery's most visible effort since making a slew of marketing department changes last year.

Replacing the "High Country" scenes of rolling mountains and running water are vignettes centering around traditional beer drinking gatherings. Spots showcase bar scenes and parties against the theme, "Made for the way you really like to drink beer," industry sources report. The commercials also emphasize the beer's pure water and natural ingredients. Ted Bates & Co., New York, handles.

■ The message is primarily targeted at the drinker who has "three or four beers at a time," said one source. In addition, the campaign is attempting to lure a wider consumer base, including women and minorities, which also are rep-

Aggressive new cold cereals seen in '82

By JOHN C. MAXWELL JR.

Cold cereal volume in 1981 was up less than 1% in pounds, to 2.02 billion pounds. The year's dollar volume grew around 15% and probably approached $3 billion, against $2.6 billion in 1980. We believe that the current 1%-to-2% tonnage growth trend is a good expectation for this year, and we look for price increases approaching the 6%-to-8% level.

The only companies that gained market share in 1981 were General Mills, Nabisco and Ralston Purina (including its private labels). On a poundage basis, General Mills showed the strongest growth—up 5%. Considering Ralston's over-all base, it was up 12% from a small base. Units in the "all others" group, preponderantly private labels of Ralston, rose more than 15% from a small base.

In the new product area, Kellogg's Nutri-Grain has achieved a share of slightly under 1%—not strong for a four-item line. It has cut two of the four and recently added Wheat & Raisins.

General Mills' major priority has been to get Cheerios back on track, an effort that resulted in unit gains exceeding 10% in recent quarters. Donutz, a new children's cereal, looks promising. General Foods' Fruit & Fiber was successfully introduced toward yearend (November-December), and currently holds over a 1% share at an annual rate. Ralston's new blueberry version of Waffelos appears to be doing well. Dinky Donuts, introduced in November, 1981, currently has about a 0.5% share.

We expect aggressive new product introductions in the cold cereal industry to continue in 1982.

A few months ago Kellogg cut the price of its Corn Flakes by 8%, and this was followed by General Foods doing the same for Post Toasties. Ralston also followed with a 5.5% price reduction on its generic corn flakes.

To date, these cuts seem to have had little or no impact on respective market shares. General Mills recently announced a price increase averaging about 4.5% for its heavily oat-based product line.#

Mr. Maxwell is with Lehman Brothers Kuhn Loeb Research, New York.

Packager out to cover U.S.

(Continued from Page 4)

ize a profit—that package has to survive in the market and sell for another 10 years. In the meantime, to stay ahead of the competition, we've got to be plowing research and development money into new concepts all the time."

Mr. Rausing says that no corporate leader in his right mind would proceed on such a basis. "But when you've got only one product, you haven't any choice but to be the best. So we make certain that we are and we stay that way."

■ The no-longer-so-secret secret of Tetra Pak's success is a simple but ingenious packaging production method. A continuous roll of plastic-coated paper runs through a machine which curls it into a tube shape, while a liquid beverage is poured into this tube from above. The tube is then heat-sealed and cut off below the level of the liquid, forming a completely full container holding no air and strong enough to withstand stacking.

The smallest filling machine Tetra Pak makes can produce up to 1 billion containers a year. The company's profits come not from the machines, which are usually leased to the customer, typically a dairy, but from the sales of packaging material itself.

Tetra Pak now operates some 21 factories worldwide. The filling machines, designed and built by Tetra Pak's team of 400 engineers, are manufactured at three of the plants, while the others turn out the paper and plastic packaging material in giant rolls.

In addition to making the machines and providing the paper material, Tetra Pak also offers its customers a full-service and maintenance deal. As a market analyst puts it: "Tetra Pak's turnkey-like marketing plan builds a kind of wall around its customer by supplying the raw materials, the filling machines and the service expertise. There's little room for competitors to maneuver once the client is hooked."

Today, Sweden, where the first Tetra Pak milk carton was launched, accounts for only about 8% of the company's total sales. The biggest single market in terms of number of packages is Italy, with Japan—where Tetra Pak operates a wholly owned subsidiary—a close second.

With annual group sales exceeding $1 billion, Hans Rausing says Tetra Pak now has the capacity to tackle the U.S. market from a position of strength. Two previous attempts in the 1950s failed because of organizational problems, but Mr. Rausing has every reason to be optimistic about the chances this time.

Brik Pak Inc., Tetra Pak's U.S. subsidiary based in Dallas, is so far the only company to win FDA approval for its aseptic packaging carton, which is shaped like a brick. (It's both easily stackable and disposable and it costs far less than competing products on the market.)

Ocean Spray reportedly has achieved such success with the new package that it recently started a 10% price reduction to customers to reflect the savings it realized by switching over to the paper container.

Rita Simpson, pr manager for Brik Pak, says the company appears to have an almost unlimited potential. "Our customers are very enthusiastic about the product, not only because of its tremendous utility and low cost, but also because of the wider market it affords their products, thanks to its long-life characteristics." Ms. Simpson notes that some customers like Ocean Spray have built whole campaigns around the package.

In Europe, where Tetra Pak already reigns supreme in its field, the company is breaking into new markets. Says Hans Rausing: "Rather than diversifying into new product areas, we expand and grow by designing new and better packages and by finding new liquid foods to package." Today, Tetra Paks hold everything from Japanese sake and asparagus juice to French table wines and cooking oils. It's no surprise that for the past few years Tetra Pak's sales have been growing by more than 20% annually.

More than a household word in some areas, Tetra Pak has achieved in some countries a market acceptance that totally baffles the competition. In Kenya, one of the company's pyramid-shaped cartons is printed on the national currency, and in Tanzania Tetra Pak containers are pictured on stamps.

Mr. Rausing insists that the company could never have developed as it has if it had not remained firmly in the hands of the immediate family, and he unashamedly attributes its success to what he likes to call the "feudal" management philosophy.

"Our local management is very independent, but the main policy guidelines emanate from the top. Then it's up to different local company heads to implement those decisions in the way they see fit, taking into consideration local marketing conditions," he says.

For obvious reasons, Mr. Rausing won't reveal what new package ideas he's got up his sleeve. But his company is engaged in a massive expansion scheme, partly to take advantage of the huge potential in the Third World for high-protein liquids and long-life products and to handle the potential the huge U.S. market promises. It may not be long before there is indeed a Tetra Pak in every home.#

A Rausing success

Tetra Pak's founder, Ruben Rausing, the son of a grocer, showed early signs of genius. Back in the 1920s, he was one of the first graduates of the Stockholm School of Economics. After graduating, he traveled to New York to study advanced economics.

Upon returning to Sweden, Mr. Rausing worked briefly for one Swedish company and then joined in the ownership of another before settling into high-volume liquid food packaging, a field he has worked in ever since. In his quest to come up with a less-expensive packaging system with improved stability and longer product life, he realized that he had to devise a packaging system which produced completely filled containers.

As the story goes, when tireless experimentation had failed to reap results, he was given an idea by his wife at the dinner table. Knowing full well what he was trying to achieve—a continuous production process—she recounted to him her simple method of making homemade sausage, where the meat inside a continuous tube of skin is tied off, creating filled links.

Reminiscing about this conversation today, Mr. Rausing admits that he shrugged off his wife's suggestion with a chuckle. Soon after, in the laboratory, he discovered with surprise that the sausage method worked like a charm.#

WYMAN TRIES TO REGAIN RDR

Bitter legal fight for buying unit

By JOHN J. O'CONNOR

NEW YORK—Samuel Wyman's bid to regain control of RDR Associates and its media-buying subsidiary, Timebuying Services Inc., has spawned a rash of lawsuits alleging conspiracy, computer tampering, slander and unfair competition.

The tangled and bitter legal fight in state supreme court here pits Mr. Wyman and three other former RDR execs against the seven-member board of RDR that steadfastly has resisted Mr. Wyman's bid to regain the reins of the company he held as chairman until a term in federal prison intervened.

The company is in the business of buying and selling broadcast media advertising time for its clients.

The RDR directors opposing Mr. Wyman include Stephens Dietz and Rodney Erickson, two marketing consultants who were installed as co-chairmen and co-chief executive officers of Timebuying Services in 1979, after Mr. Wyman was sentenced to a one-year prison term in connection with fraud charges arising out of the 1976 bankruptcy of REA Express.

(Mr. Wyman pleaded guilty to three counts in a 12-count indictment that accused him of conspiracy, mail fraud and and misapplication of REA Express' funds. The indictment centered around fraudulent media invoices submitted by RDR to REA Express. In addition, Mr. Wyman and two REA execs were accused of sharing the 15% commission from advertising space placed on the sides of REA trucks. They were secret partners in T.A. Marketing, a company that brokered the truck space sales.)

Released after serving four months of the one-year sentence, Mr. Wyman met with a wall of resistance from RDR execs whom, he charges, voted to terminate his employment and oust him from the board. RDR says he resigned before he entered prison.

Mr. Wyman alleges in court papers that during his absence an additional 90,000 shares in RDR were issued "for the purpose of diluting plaintiff's ownership interest in RDR." Prior to April, 1979, Mr. Wyman said he owned 386,000 of the 840,466 shares of RDR, in addition to proxies for additional shares.

Among other things, he is seeking to have the court void the 90,000-share issuance and assess damages "believed to be not less than $1 million." RDR's directors have denied his allegations.

The legal broadsides fired by RDR at Mr. Wyman and former RDR execs accuse them of conspiring to "destroy" RDR, a charge that has been vehemently denied. In an affidavit in one of the cases, Bernard Weiss, an officer and director and second-largest stock-

Major study details ads' effect on sales

By STUART EMMRICH

NEW YORK—The case for advertising frequency—and its effect on people's buying habits—receives a major boost in an exhaustive and groundbreaking study just completed by Jos. E. Seagram & Sons and Time Inc.

Although companies work on the accepted premise that advertising can make a difference in sales—or else why bother with ads—the results of this three-year study confirm what many people up to now have taken on faith.

Preliminary findings of the study have been released to selected individuals in the advertising community over the last couple of weeks, but the full study will be made available for general release to advertisers, agencies and the media soon after Labor Day. A booklet is now being prepared by Time Inc. that will summarize the results.

Among the study's more surprising findings:

- It is easier to change people's behavior than their attitudes.
- Recall is a poor indicator of advertising effectiveness.
- Even a single ad can have a major impact on a product's awareness levels.
- It is much harder to increase a well-known product's favorable rating among consumers through an extended advertising campaign than it is to dramatically increase a favorable rating for a little-known product.
- The impact of advertising con-

Woolworth reevaluates advertising

By JAY McCORMICK

DETROIT—F.W. Woolworth Co. will change its "entire approach to advertising" and will split the Woolco discount stores and Woolworth variety store operations.

Growth of Woolco stores will be frozen, and the company will concentrate expansion efforts on its specialty stores, Woolworth executives told the annual meeting here.

"We are in the process of changing our entire approach to advertising. Our ads are more than unattractive; some are repelling," said Edward F. Gibbons, chairman-chief executive officer.

The changes in advertising will follow restructuring of the U.S.

last minute news

Ralston buys three-network upfront package

NEW YORK—Ralston Purina and Paul Schulman Co., net tv buying unit of Gardner, kicked off the fall prime time buying season with a three-network package. New series bought: ABC's "Brass Monkey," CBS' "Newhart" and NBC's "Family Ties" and "Cheers." Returnees included are ABC's "Dynasty," "Love Boat," "Hart to Hart" and "Fall Guy"; CBS' "60 Minutes," "Dallas," "Magnum, P.I." and "Archie Bunker's Place," and NBC's "Real People," "Little House" and "Quincy."

FTC told to brace for big cut in 1983 budget

WASHINGTON—FTC was told that Senate/House budget conferees are urging a major slash in its 1983 appropriation, to $47 million compared with its $61 million request. If the budget's approved by Congress, appropriations' panels would face breaking their assigned spending ceiling.

Purina readying Praise dog food

ST. LOUIS—Ralston Purina is readying a new dog food called Praise. A company source said the brand is one of a number under development and no decision has been made on its future. Tennant, Chicago, handles.

Nabisco picks two; Parkson shop to go

By NANCY GIGES

Nabisco executed two more elements in its long-range restructuring program by naming agencies to handle business formerly at MCA Advertising (AA, May 24) and by acknowledging it has hired the investment banking firm of Morgan Stanley & Co. to handle the sale of its J.B. Williams Co. toiletries subsidiary.

The agency reassignment is a further consolidation of shops that still number 14. Nabisco assigned Fleischmann and Blue Bonnet margarines to Benton & Bowles, already agency for Planters nuts and snacks. McCann-Erickson, agency for hot and ready-to-eat Nabisco cereals and Dromedary baking mixes, was named for Curtiss' Baby Ruth and Butterfinger

COORS BEATS THE HEAT THAT KILLS BEER TASTE.

Other beers are subjected to taste-killing heat of 140.

Only Coors is kept cold from the brewery to your store to assure fresh beer taste.

Extreme heat destroys beer taste. In fact, because of the way other beers are processed and shipped they are exposed to 140 degrees of this taste-killing heat even before they reach your store.

Not Coors. Only Coors is always packaged and shipped cold from the brewery to your store. In fact, Coors is kept cold longer than any other beer—and that means fresher tasting beer for you.

Sure, it would be easier to allow Coors to be exposed to extreme heat. And maybe some beer drinkers wouldn't taste the difference. But we think real beer drinkers would. Because keeping it cold is the only way to assure fresh beer taste. That's why your last Coors tastes as fresh as your first. Tastes first beer fresh. Coors after Coors. Coors is the beer made for the way you really like to drink beer.

Coors
MADE FOR THE WAY YOU REALLY LIKE TO DRINK BEER.

Coors is cool

Adolph Coors Co. is showcasing Coors beer by touting that it's packaged and shipped cold from the brewery to the store. In this ad, Coors is shown next to another beer that looks suspiciously like Anheuser-Busch's Budweiser. It is part of a new campaign via Ted Bates & Co. (AA, June 14).

Account team exits raise eyebrows

Execs say JWT, Kodak not shaky

By GAY JERVEY

NEW YORK—A highly uncharacteristic series of personnel changes on the Eastman Kodak account at J. Walter Thompson USA has raised questions about the future course this 51-year-old marriage will follow. According to JWT and Kodak, the future is positive.

Speculation followed the word that at least four key JWT execs have left the Kodak account in recent weeks. They are William C. Thompson, a JWT exec vp; senior vp John Wells; senior vp William Campbell, and Thomas Hanft, vp.

On July 15, Mr. Thompson will join McCann-Erickson as exec vp-director of account development, a new position, and as a director. A 17-year JWT veteran, Mr. Thompson has for the last five years been focusing his attention almost exclusively on Kodak's worldwide business, most recently as exec vp and member of both the U.S. and worldwide boards.

That McCann and Kodak are no strangers only makes the development more interesting. During the past few years, Kodak has been giving more of its international business to McCann. In 1978, Kodak Ltd., the U.K. subsidiary, moved its account from JWT London to McCann London. And in September, 1981, Kodak's Brazilian arm made the same agency change for its Ektra camera line.

Furthermore, when Kodak decided to move its instant camera business out of JWT several years

they're at a Pampers price.

Expanding Pampers Procter & Gamble has moved Pampers with "stay-dry gathers" into Denver, Los Angeles, San Francisco, St. Louis and Hawaii. The new version of Pampers, with elasticized legs, had been in the Fort Wayne and Cincinnati areas for several months (AA, March 15). Agency is Benton & Bowles, New York.

Next week: Top media

Next week ADVERTISING AGE presents its second report on America's 100 Leading Media Companies. The report includes profiles of each of the 100 companies, summarizing their recent activities, and includes complete listings of their holdings. Interspersed with the profiles are features on companies and individuals of special interest, along with tables listing top newspapers in circulation and ad linage gains, "hottest" magazines, largest cable systems and others.

The first AA report on top media companies ran last December. Beginning with next week's issue, the report will appear annually at midyear.

Anti fever hits Argentina

BUENOS AIRES—Anti-American sentiment was growing here after the Argentine surrender of the Falkland Islands (Malvinas) to the British last week, and it already is having an impact on marketing and advertising.

The war's end not only toppled the current government, but is causing advertisers to take a look at their campaigns, and possibly at their affiliation with various American ad agencies, according to sources.

Earlier this month, Economy Minister Roberto Alemann warned the presidents of North American companies that about 10 lists of U.S. companies and their products here are being circulated among unions, political parties and student organizations for use in action campaigns, "including a possible boycott," according to one exec who attended the unpublicized meeting.

Mr. Alemann reportedly told the company presidents that the government "is not involved in any way with such a campaign," and that the police are investigating the matter.

However, sources in the Peronist party, Argentina's largest opposition party, and trade union sources said such lists do not exist.

"I have heard that rumor and it is false," a high-ranking Peronist said. He said he believed that uncontrolled government security forces, linked to the Public Information Secretariat, are spreading rumors that lists exist and that they plan to place phone calls to U.S. companies demanding money to get the company off the list.

"I think Roberto Alemann is being used by them to give the concept credibility," the source said. "I don't think he's involved."

Nonetheless, during the last month of the Falkland (Malvinas) crisis, anti-American posters were hung in the city, listing the names of several U.S. companies and some of their products, sources say. They usually were taken down by police.

The possibility of increasing hostility toward things American has local media magnate Pedro Simoncini worried that he won't be able

'Cleveland Press' dies at age 103

CLEVELAND—As recently as six weeks ago management of the *Cleveland Press* denied their problems were serious enough to cause the demise of the 103-year-old newspaper—going so far as to accuse their competition of starting shutdown rumors. But the death blow came suddenly last Thursday with the simple announcement to employes: "Today will be the last issue of the *Cleveland Press.*"

This is the sixth major afternoon newspaper to fold in the last year.

In recent months the *Press,* owned by industrialist Joseph E. Cole since he purchased it from E.W. Scripps Co. in November, 1980, has made many changes calculated to save money and prolong its life.

A 25¢ Sunday edition was launched with much fanfare last August. But late last month, as Sunday circulation figures dipped to 275,000 compared to about 316,000 during the week, *Press* executives turned the Sunday edition into a weekend paper, charging the same ad rates as it had been charging for the Saturday paper.

And in March, the *Press* became an all-day newspaper, putting it in direct competition with the morning *Plain Dealer,* the dominant fac-

(Continued on Page 80)

summer, apparently before introduction of the rest of the '83 models.

Ford Thunderbird and Mercury XR-7 will also get a new look for 1983. The slightly down-sized new models, with all new sheet metal and quite a different appearance from current models, will be introduced in early winter.

The new Thunderbird will have styling similar to Ford Motor Co.'s Continental Concept 90 show car.

Taking no chances, Ford is planning to be ready for any market rebound with something new in almost every category except subcompact, where its Escort and Lynx have been doing relatively well.

Next spring an all-new line of compact cars, the Ford Tempo and Mercury Topaz, will debut. Based on a stretched version of the Escort, they will replace the Ford Fairmont and Mercury Zephyr.

With such a broad revamping of its product line, Ford will probably benefit from any general upswing, as it will have something new for almost everyone.

Chrysler Corp. will introduce its biggest front-drive models this fall, the E bodies. They will be about three inches longer than the K-cars and will be known as the Chrysler New Yorker, the Gran LeBaron, the Dodge 600 and 600 ES.

The current New Yorker is Chrysler's biggest old-fashioned rear-drive car and is also its hottest-selling model. It will be kept in 1983 but renamed the Fifth Avenue.

While there won't be the big multi-line alphabetical introductions from General Motors of recent years—X-cars, J-cars, A-bodies, and the like—or anything big from Chrysler Corp., there is enough new in Detroit's '83 lineup to elicit buyer interest, perhaps even some passion.

It could be that when the economy heats up, so will the love affair with the automobile. The course of true love always runs smoother with a little money in the pocket.

U.S. compact pickup trucks on a roll

After six months, GM leads the pack to grab half the market

By Don Edgar

Six months may seem like a short time for some folks. But if you are linked with the automotive industry in any way, the days, weeks and months can drag on.

Yet, for one particular segment of the industry, six months turned out to be enough time to accomplish something its counterparts have been trying to do for some years—make headway in the battle against the imports. In those six months the American automotive manufacturers overtook and passed Japanese imports in the small, compact pickup truck sales derby.

While the Japanese have had a stranglehold on the market since the mid-1960s, domestic companies appear to have seized the initiative.

Starting last October with the introduction of the Chevrolet S-10 and GMC S-15 pickups, U.S. auto makers gathered 51% of the market in March, based primarily on the strength of the two General Motors products. The Ford Ranger and Dodge Rampage joined the race after the first of the year.

Several auto executives in Detroit have forecasted annual sales of compact trucks to reach a million units by 1985—perhaps even before. While the Japanese, principally Toyota and Datsun, have had a stranglehold on the compact truck market since the mid-1960s, domestic companies appear to have seized the initiative and the battle for sales leadership has begun.

Figures supplied by the Motor Vehicle Manufacturers Assn. show that GM's dynamic new duo outsold both Datsun and Toyota during February and March and were responsible for domestic models' wresting away the sales leadership in March when U.S.-built compact pickups captured 50.89% of the market. Contributing to the over-all success for the domestics were the AMC/Jeep Scrambler, Ford Ranger, Dodge Rampage and Volkswagen pickup, while Ford Courier, Chevy Luv, Dodge Ram 50 and Plymouth Arrow, sold by American dealerships, were tallied in the imports' column. (See chart.)

"Chevrolet is very pleased with the acceptance of the S-10 pickup," noted M.H. Erdman, Chevrolet national truck sales manager. "Since January we have outsold our main foreign competitor by a wide margin."

Chevrolet took the real message to the consumer, noted Mr. Erdman. "Our advertising was built around the premise of product quality, payload, towing capability and mileage—items the customer previously associated with our competitors," he said.

The success of the S-10 has had some impact on the sales of regular-size Chevrolet pickup trucks and the imported Luv. Full-size pickup sales are off about 8% when compared with a year ago, while Luv sales, for the first three months of 1982, have fallen from 23,905 to 8,826 units. These changes were anticipated, stressed Mr. Erdman.

When 1983 introduction time rolls around, Chevrolet plans to be ready with three new offerings in the S-10 category. "Spectacular," is the way Mr. Erdman phrased it. Chevy is slated to have a four-wheel-drive pickup along with an extended cab model and a down-sized Blazer. An S-10 diesel engine version is also on the horizon, but it will be smaller than the currently popular 6.2-liter V-8 selling so well among full-size Blazers, Suburbans and pickups.

"Our advertising was built around product quality, payload, towing capability and mileage—items previously associated with our competitors."

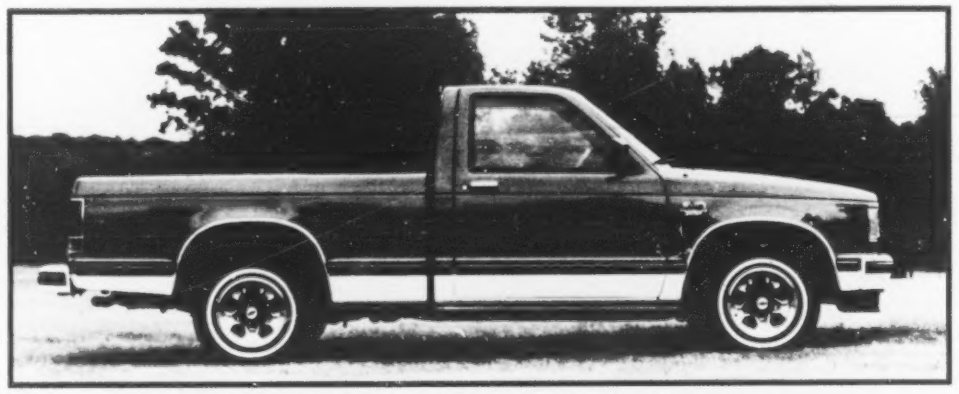
Mr. Erdman could not predict a time frame for smaller vans and van wagons.

Advertising strategy will remain about the same for Chevy's S-10. "We go right to the heart of the issue because we have the vehicle that can handle customer requirements," Mr. Erdman added. "We name names in our commercials, and we haven't done that in a long, long time. Once we get a customer to test drive an S-10, we feel certain we'll get the sale."

Ford views the competition in a different light, according to William Barnes, Ford's light truck sales manager. The company, he said, compares its sales launch to that of Chevrolet's S-10 instead of matching sales figures with Toyota and Datsun.

"Looking at the first three 10-day periods for the Ranger and the S-10, Ford had an advantage of 1,500 more sales," he said. "During the first 10-day period in April, Ford bested Chevy by a couple hundred pieces. The Ranger is going very well and as

(Continued on Page M-16)



The S-10 turned out to be a good catch for Chevrolet.

Don Edgar is a free lance writer in the Detroit area. He reported on trucks in last year's Automotive Marketing Special Report.

Compact trucks

(Continued from Page M-9)
the pipeline fills up, we'll have more ability to supply Rangers to the market."

According to Mr. Barnes, Ford sees the compact segment rising to about 30% of the total market. "Our share of the compact truck market is going up and the Japanese share is coming down. Ford is tracking ahead of its program and we are more than pleased."

Ranger sales have affected the market for the regular F-series pickup trucks, but how much "is difficult to measure," Mr. Barnes said. "We had anticipated very heavy substitution—in the neighborhood of 30% to 50%. However, the market has been so weak it is difficult to get a real handle on it. Everything is further clouded by the fact that General Motors has a diesel [in a Luv] and Ford doesn't yet.

"The imported Courier is also affected. When was the last time anyone saw a Courier advertisement or commercial? All our efforts have been directed purely

(Continued on Page M-18)

The new Dodge Rampage is targeted to the youth market.

Thoughts

(Continued from Page M-12)
eral Motors, a chief critic of the Chrysler bailout at the time it was proposed, has sought to use nearly every segment of the Chrysler bailout blueprint in some form. So have the Ford Motor Co., the American Motors Corp. and International Harvester, to name a few.

American manufacturers have initiated accelerated programs aimed at learning how to compete in today's market. While falling short of reinventing the automobile, they are reinventing the industry that makes it.

Taking its cues from the Japanese, the American industry has begun to go beyond just retooling its automobiles to run farther on less gas. Manufacturing and assembly operations are undergoing major surgery, not simply being automated, with some input from the long ignored factory worker. Supply pipelines are being rethought with competitive bidding being tried for such products as steel, with tough decisions being made about whether the company makes a product inhouse or buys it from outside.

Missing from all this activity is a sense of sincerity on the part of Detroit, a feeling by the public that the industry is serious about wanting to win back the respect of its home-turf American buyers by being truly innovative over the long haul. The reasons for this persistent uneasiness are numerous.

With respect to product, the all-new models more often turn out to be warmed-over models, much like their predecessors, and still trailing the pace-setting Japanese with respect to innovation. The customers, hard pressed as they are to buy anything, aren't impressed by what's in the showrooms, nor by the repair shop work and costs required on the new models.

Labor finds it difficult to believe that management wants to develop a new partnership when "give backs" are matched by Chrysler's recruiting management talent with country club dues paid by the company. Or, more recently, General Motors' promising select salaried workers that they will not be adversely affected by further wage cuts only days after promising labor at the bargaining table that all would sacrifice equally.

Car buyers may be disenchanted, too, with much of the regulation from Washington. But many find it tough to feel that Detroit deserves to get back in good standing when it continues a blanket assault upon laws that seek to control pollution emissions from automobiles, improve the fuel economy of automobiles and improve their safety. They are as suspect of Detroit's long-term commitment to quality also, especially when programs such as the revived Chrysler five-year, 50,000-mile warranty are limited-time-only offers rather than standard operating procedure.

The auto executives say it costs too much to do something like that. In the marketplace the message again and again is that it may cost as much not to. The same can be said of rebates and limited-time-only price cuts.

A strong economy will bring the industry temporary renewal and perhaps save it the need to confront its public with more than glossy ads and radiant commercials that haven't done the trick. Credibility in the workplace and the marketplace could give that renewal longevity. The most innovative step American manufacturers could take would be to stop the gimmickry. AA

BECAUSE OF
MEN LIKE LEONARDO DA VINCI.

"A MAN WITH WINGS LARGE ENOUGH AND DULY ATTACHED MIGHT LEARN TO OVERCOME THE RESISTANCE OF THE AIR, AND CONQUERING IT SUCCEED IN SUBJUGATING IT AND RAISE HIMSELF UPON IT."
–LEONARDO DA VINCI, 1452-1519

OMNI Magazine recognizes that science is not just the province of scientists, but of all thinking men and women. That's why a man like Leonardo Da Vinci, who was an artist and metaphysician as well as the only professional scientist of his time, could envision man traveling through the air four centuries before the Wright Brothers, Apollo, or even hang gliding. Leonardo was a man of vision and imagination, the most basic elements of science. In his day, they called his flying machine wild speculation, fiction. Today, we would call it prophetic.

Which is why OMNI feels that science fiction is as much a part of science as are laboratories and textbooks . . . and why every month, more than 5.4 million OMNI readers (MRI 1982) have come to see the full scope of today's science–and tomorrow's. Join us on the New Frontier. OMNI Magazine. It will change the face of science journalism forever.

OMNI

ADVERTISE IN OUR SPECIAL OCTOBER ANNIVERSARY ISSUE. CLOSING DATE AUGUST 1, 1982.

Compact trucks

(Continued from Page M-16)

at the Ranger. And we introduced Ranger with two years of Ford Care [a policy that includes no charge for standard maintenance such as oil, lubrication and filters]. We have since added a $300 rebate [$500 in California]."

As for the future at Ford, look for refinements in the pickup to boost both the payload and trailer towing capacities. A new down-sized Bronco II is scheduled to appear in 1983. Later this year, Rangers equipped with a diesel engine and with a four-wheel drive will be available. The diesel is a 2.2-liter, four-cylinder that Toyo Kogyo Co.'s Mazda introduced in a pickup last February. The four-wheel-drive Ranger will have a V-6 engine.

While its success has not been as great as the General Motors and Ford compact trucks, Pat Keegan, director of sales operations for trucks at Chrysler, said that the company is more than excited with how the Dodge Rampage has taken a fair segment of the market.

"We want to eat into the Chevy S-10 and Ford Ranger part of the business," he said. "And with a payload capacity of 1,140 lbs., the Dodge Rampage is going to compete."

Marketing strategy for the Rampage will remain much the same. The small car/truck is appealing to the youth market, and Rampage's marketers are considering some modification to take advantage of the public's perception of the model as a "racy little truck."

AMC's Jeep Scrambler averages 23 mpg in city driving.

Meanwhile, Chrysler's minivan, called the T-115, is getting closer to introduction, although Mr. Keegan wouldn't speculate on a date other than to say "before 1985."

"The T-115 will be a seven passenger, garagable unit and will be a high volume vehicle," he said. "We look for it to become a substitute for the conventional station wagon. Chrysler is continuing to explore other small truck ventures."

At American Motors, attention is focused on the Jeep Scrambler. "The Jeep Scrambler has been out for about a year now and the launch of the product was better than we anticipated," said Dean Greb, director of marketing with Jeep. "We ended up selling about 8,000 Scramblers. This year we expect to sell about 10,000 units."

With a five-speed manual transmission and the four-cylinder engine, the Scrambler has the best mileage rating for any four-wheel-drive compact pickup truck. The numbers are 23 miles per gallon in city traffic and 28 mpg on the highway.

"Part of Jeep's selling strategy was to lower the base price to $6,765, a reduction of $823. This gives Scrambler about a $1,000 advantage over the four-wheel-drive pickups from Datsun, Toyota and Chevy Luv," Mr. Greb said.

Based on Jeep's consumer research, a tweaking of the initial marketing plan is likely. More buyers perceive the Scrambler to be a compact pickup than the company originally thought. Scrambler will continue to be billed as the "pickup that picks up where others leave off."

"A year from now we'll have a compact of trio units on our present J-series," Mr. Greb said. "Basically a new model from the ground up, Jeep will have a Cherokee, Wagoneer and a pickup truck—size and performance to compete with Chevrolet's S-Series and Ford's Rangers."

In Japan, the importers will be busy upgrading their offerings to regain a better foothold in the lucrative American compact truck market.

But it should be interesting to see if Chevrolet and Ford can stave off the imports and battle each other, as in the past, for the No. 1 position in the small truck race. Only time will tell. AA

IF YOU DON'T DO IT NOW, YOUR COMPETITION WILL.

They'll be Joining the Nation's Leading Shopping Mall Promoter to demonstrate their automotive products to 1.5 million people, on Two 10-week tours of America's largest Shopping Centers...

The Shopping Center Network (**SCN**) will be touring America with TWO exclusive multi-company shows of automotive products. Our Eastern Tour begins September of 1983, and our Western tour starts in April of 1984.

More than 1.5 million people will visit each exhibit, see product demonstrations, and be convincingly impressed by your competitor's product, unless you act now.

Who Is The Shopping Center Network?

For nearly a decade **SCN** has been producing corporate exhibitions for sponsors like: *CHEVROLET, R.J. REYNOLDS, CLAIROL, GILLETTE, CANON, CBS, BURGER KING, EASTMAN KODAK, EASTERN AIRLINES, RCA and THE U.S. DEPARTMENT OF ENERGY...* and bringing them to the people thru our network of over 1600 of the largest and most influential enclosed regional malls in the nation.

And now for the first time, we're putting together a program just for the automotive industry called:

The Car Care Clinic.

Here's How The Car Care Clinic Works.

SCN will arrange for each major mall on the tour to house **The Car Care Clinic** exhibition each weekend, with over 20 leading manufacturers of auto related products.

Full audio, visual and live hourly spokesperson demonstrators will maintain our show's excitement and continuity. **SCN** also handles all logistical support... including scheduling, trucking, fuel, maintenance, set-up and take-down, insurance, product sampling, literature distribution... the works.

Each exhibitor can supply his own exhibit or if you prefer, **SCN** will design, build, train personnel and man your display at a pre-arranged fee.

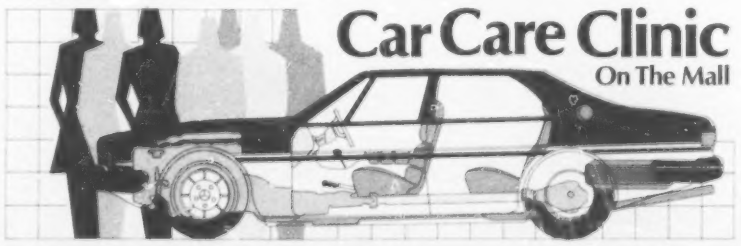
The Competitive Edge

To make it even more enticing, **SCN** will guarantee exclusivity of product line on a first come-first served basis.

How Do I Sign Up?

For more information about this new marketing concept for the 1980's and for our detailed **Car Care Clinic** brochure, call Mr. Joel Benson, President of Shopping Center Network at (305) 595-0201 in Miami or write to us at 10651 Kendall Dr., Miami, FL 33176 Suite #110.

Eastern Tour Sept., 1983
Western Tour April, 1984



advertiser was going to get overly concerned about the medium's failings.

But advertisers and tv networks can no longer afford this luxury.

Not only has the rapid growth in the number of tv households come to an end, but network programs are facing increasing competition from pay cable and subscription television—and that's why network executives should start paying much closer attention to research efforts such as those at Television Audience Assessment (TAA).

"Our goals are to develop and test a system of audience measurement based on viewers' attitudes and responses to programs, and to demonstrate to industry decision makers the utility of these measures as an additional form of program ratings for cable and broadcast television," says TAA president Elizabeth J. Roberts, whose nonprofit organization is funded by grants from various groups, including the Ford and Markle Foundations.

Current and recently completed TAA projects include efforts to study:

- The "halo" effect that placement of ads on highly appreciated programs may have on the corporate image of the advertisers.
- How viewing decisions and program involvement levels of pay cable subscribers differ from those of the general public.
- How channel-switching patterns in 12-channel households, for example, compare with those in 30-channel homes.

The TAA effort is not the first attempt to perform qualitative assessments of tv programs and audiences. In recent years, Bristol-Myers reportedly has done a private study of the relationship between program type and ad effectiveness, and J. Walter Thompson USA reportedly has conducted proprietary research on the relationship between the incidence of sex and violence on a tv show and the program's effectiveness as an ad vehicle. And in such countries as Canada, France, Great Britain and the Netherlands, where television has been under greater government control than in the U.S., a variety of qualitative measures have been incorporated in the various rating systems.

My bet is that researchers will find that quality programs will be the ones to rate high in audience interest. If this can be combined with current research that (1) develops a new attitudinal rating system that can distinguish shows generating a high audience interest and (2) demonstrates that high interest programs are superior ad vehicles, then television executives finally will find themselves motivated to eliminate the pablum that accounts for so much of today's network programing.

So far—and probably for the near future—the efforts to develop attitudinal ratings will raise more questions than they answer. Is viewer involvement with a particular program constant or does it vary from episode to episode? Do some kinds of commercials do better on a low-involvement program than on a high-involvement show?

And the big question: How will the advertising community—which likes "hard numbers" like the set-counts provided by Nielsen and Arbitron—respond to the "soft numbers" coming from surveys of consumer attitudes?

No one says that dealing with the problem of improving our television rating systems—and television programing—will be easy.

The "measurement challenge" that faced physicists in the 1920s resulted in one of the most turbulent periods in the history of the science, but by the time scientists finally got things straightened out, the turmoil had paved the way for a period of remarkable creativity and progress.

Let's hope the same will hold true for the television industry. AA

Promotion Trends

By Louis J. Haugh

Judging the most valuable

In a period of generally flat restaurant sales, it is probably appropriate that entrants in this year's ninth annual Pepsi-Cola Most Valuable Promotion competition have concentrated on price and coupon discounts as a key marketing strategy.

The winners were honored recently at the National Restaurant Show in Chicago. This year, for the first time in the nine years the contest has been sponsored by Pepsi, the panel of six judges commented that creativity among the entries seemed to have dropped off but that the contest reflects restaurant promotion activity quite accurately.

The contest is judged on three criteria: Originality of idea, creativity of execution and accomplishment of measurable objectives. The judges were three food service business papers' editors and three others, including this writer, familiar with food service and promotion.

It is interesting that the contest's winners have not had the spectacular sales and traffic increases of previous years. Among this year's winners, average sales were up 17% and traffic was up 13% as compared with sales increases of 49% on increased traffic of 81% in 1981. As a rule, promotions were aimed not so much at getting new customers as getting customers to increase their purchases. Price discounts were used by 45% of all entries, compared with only 16% the year earlier. Coupon discounts were used by 27% of all entrants this year.

At the same time, sweepstakes promotions were off, dropping from 30% of all promotions last year to 18% this year. New product activity also was off significantly, from 21% of the promotions involving new products or services last year down to only 7% this year.

Among the entrants, the percentage using radio advertising was off from 54% last year to 43%, and television was down from 28% to 15%, continuing a three-year decline from a high of 58% in 1980. Some of this decline in tv advertising may be explained by looking at the MVP entries, which are divided into three categories, restaurants with fewer than 30 units, those with 31 to 100 units and those with 100-plus units.

The MVP contest has generated more entries from smaller restaurants, which are less likely to use tv advertising. This year, 76% of all entrants in the 100-plus category reported using tv advertising, compared with 75% last year.

Use of instore materials to support a promotion has remained virtually constant over the three years, 62% this year, 54% last year and 60% the year earlier. Newspaper support has also remained constant, 45% this year, 48% last year and 47% the year earlier.

Use of premiums appears to have slipped over the three year period, from 40% in 1980, to 33% in 1981 and 26% this year. Use of direct mail increased from 13% last year to 23% this year, and use of publicity is also up, rising from 20% last year to 24% this year.

The number of restaurants that promoted with charity tie-ins also increased, from 13% in 1981 to 34% this year. In fact the MVP grand prize winner, Boddie-Noell Enterprises, Rocky Mount, N.C., a Hardee's franchisee in Virginia, mounted a statewide four-phase promotion to raise funds for mentally retarded children in the Special Olympics.

Boddie-Noell sold "donation dollars" during a four-month drive and donated 5 cents for each order of fries to raise $33,630. In addition, the company's employes helped out both the winter and summer games.

The Special Olympics tie-in was promoted via radio, tv and point-of-purchase materials such as "spare change" cannisters in stores.

The MVP entry blank pointed out that boosting sales was not a primary objective of the promotion, but stores in the Virginia cities of Richmond, Roanoke and Norfolk all reported sales increases.

Other tie-ins with charities among the MVP entrants included the United Way, James Whitcomb Riley Memorial Assn. for handicapped children, National Kidney Foundation, Children of the Scottish Rite Hospital, Mutiple Sclerosis Society and UNICEF. It almost appeared that some of the charity links were an attempt to offset some of the brassiness of "ask for the order" promotions which discounted food or soft drinks.

A winner in the MVP contest in the under-30-stores category was Campbell Hospitality, a unit of Campbell Soup Co., Camden, N.J., for a grand opening promotion for its H.T. McDougal's stores. Schedule Enterprises, Grand Rapids, Mich., operator of Mr. Steak restaurants, offered a collection of 12 "critters"—little clip-on animal premiums—free with soft drink purchases. This won the company an under-30 award.

The third winner in the under-30-stores category was Wendicorp., Miami, a Wendy's franchise; the award came for a civic booster promotion in Miami. For every hamburger sold, the company donated 5 cents to a local civic group to spread a positive image for Miami.

Wendicorp. managed to distribute 250,000 bumper stickers and raise $5,000. The promotion, it was noted by the judges, was particularly interesting because it was fielded in the back yard of Burger King Corp., which has its corporate offices in Miami. In fact, Burger King was rumored to have decided to leave Miami and then embarked on an effort to stem that report.

In the 31-to-100 category, Little King, Omaha, Neb., fielded a "deal of a meal" after announcing it at an employe rally. During this sales meeting, which followed a western theme, employes were given 3,000 coupons each to distribute to friends and new customers at schools, businesses, plants and public buildings. A total of 7.6% of the 975,000 coupons distributed were redeemed, increasing sales by 17%. The employes signed their names on the coupons and were eligible to bid for prizes with the redeemed coupons.

More and more restaurants appeared to be using employes as the focal point of their promotions. These events range from sweepstakes prizes to Walt Disney World to buttons and hats for instore use. Barney Enterprises, Crown Point, Ind., designed a promotion similar to Little King's with coupons distributed by employes, explaining "the basic restaurant business comes from people who are related to or are friends of existing employes."

Another MVP winner, the Taco Time 10-State Advertising Assn., Ogden, Utah, distributed coupons in 49 newspapers in eight states, supported by tv and radio commercials. The purpose of the promotion, which had a theme of "bite off all you can chew," was to build traffic in a down period.

In the 100-plus category, Burger Chef Systems, Indianapolis, went after children with a "funmeal feast" promotion packaged in a plastic sailboat that served as a container premium. The meal of a hamburger, fries, soft drink and dessert was supported with tv and a newspaper ad.

The Krystal Co., Chatanooga, Tenn., used an unusual "rub and win" game to win its award. The "get rich quick" sweepstakes entry was printed on the cardboard packaging for the chain's hamburgers, thereby eliminating the game pieces that are typical in most promotions of this type.

In addition to food and cash prizes, consumers could save five Krystal "K" letters to enter a $100 cash sweepstakes. Radio and tv commercials and four price-off coupons in a newspaper ad gave promotion support.

Other MVP winners in the institutional and hotel categories were Martin Marietta Aerospace, Orlando, Fla.; Motorola Inc., Schaumburg, Ill.; Strathallan Hotel, Rochester, N.Y., and the Hilton Harbor Castle, Toronto.

McDonald's Corp., Oak Brook, Ill., by far the largest in the fast-food category, submitted no entries. However, it is estimated that more than half of its 1982 ad budget will be invested in promotions.

In fact, some analysts believe that McDonald's has invested so much on game promotions that without them, sales increases would be hard, if not impossible, to come by. It has been rumored that McDonald's and other hamburger chains are trying to wean themselves from excessive reliance on games and discounts. AA

Wine sales grow 5.8% in '81, but imports do better

By JOHN C. MAXWELL JR. and DONNA M. MATTEI

Wine industry sales in 1981 grew 5.8% from 1980. As had been the case in the past few years, imported wines outpaced the domestics' growth; imports grew 11.9% and domestic wines increased 4.3%. Total shipments for 1981 pushed annual per capita consumption to 2.4 gallons.

During 1981, white wines continued to cannibalize the market share of reds and rosés. White wines' share rose to about 60% from 55% in 1980. Reds, on the other hand, fell from 25% in 1980 to 22% in 1981, and rosés slipped to 18% from 20%.

The reasons for the increase in white wines' popularity remain unchanged: White wine is a versatile and refreshing drink, and the U.S. is a young wine consuming nation and white wines are an easier beginning to wine enjoyment.

■ With imported wines increasing 11.9% in 1981, they now represent more than one-fifth of U.S. wine sales. Italian wines once again increased their share of U.S. imports, to 58.1%, and their sales grew 12.8%. French wines rebounded in 1981 from the prior year's depressed level. They were highly priced in earlier years, which caused an erosion of share and a decrease in volume. In the past year or so, promotions of these wines have increased and this, coupled with the strong dollar vis-a-vis the French franc, served to boost U.S. demand for French wine—by 33.6%.

The modest 0.4% growth in Spanish wines indicates the declining popularity of Yago Sangria, which represents most Spanish wine in the U.S.

On the domestic front, E.&J. Gallo retained its No. 1 position, followed by United Vintners, Almaden, Wine Spectrum and Franzia Brothers, in that order. Although Gallo was up 7.4% from 1980, United Vintners and Almaden were down, 3.9% and 5%, respectively. The largest percentage gains in 1981 were Franzia Brothers' rise of 26.2% and F. Korbel's 26%.

The only change in position within the top 10 sellers were between Canandaigua and Monarch, who changed positions, with Canandaigua going from No. 9 to No. 7 and Monarch doing the reverse.

Both domestic and imported wine sales reflected a continuing popularity of still and effervescent wines. The decline in natural wines (including sangrias) and vermouth continued last year.

■ In 1981, the export of U.S. wine saw tremendous growth—more than 40%. Total exports represented slightly more than 1% of domestic output in 1980 and jumped to 2.2% last year. This tells us that the quality of U.S. wines is recognized abroad, and we see no reason for this trend to stop.

The most important new trend in the wine industry is the introduction of light wines. Light wines are made from grapes that are harvested before they would be if full-flavored wines were sought. Although this decreases the sugar content, it also decreases the flavor. Because of this, we believe that until technology is developed to improve the flavor, the consumer segment for these wines will be beginning drinkers.

In addition, although we recognize that there is a niche in the industry for light wines, we believe the potential is not as great as the light beer and diet soda markets. Our basic reasons are that wines are already perceived as low in calories, and wines are viewed as a classical beverage; light wines may not measure up to that image.

We expect light wines to capture 5% to 10% of the industry over the next few years.

The first quarter of 1982 saw some softening in the U.S. wine industry. We see this as a result of the current recession, which, depending on the timing of a recovery, may produce a flat to slightly up year for the industry.

For the longer term, we continue to expect industry growth in the area of 4% to 6% per year, with premium wines outpacing that rate of growth.#

Mr. Maxwell and Ms. Mattei are with Lehman Brothers Kuhn Loeb, New York.

Radio spots popping up in Belgium

By JASPER BECKER

BRUSSELS—Media history is being made in Belgium. For the first time ever, commercials are being broadcast on private radio stations in a country that still is refusing to allow commercials to appear on the state-controlled radio and tv networks.

The audacious move by six of the largest *radios libres* (free radio stations), whose growth has mushroomed in Belgium over the past four years, takes advantage of a legal vacuum in a law passed in August, 1981, which for the first time recognized the stations' existence.

The once-outlawed free radios are sticking their necks out, but so far the government has not made any reprisals. An emergency ministerial meeting, called to consider the government's response, has neither approved nor rejected out of hand the demands to allow advertising officially on all electronic media.

■ A constitutional committee has been set up to consider the legal courses open.

The legal loophole arose in the first place because the Flemish and the Walloon regional authorities disagreed in their interpretation of the law that first legalized the free radios. The Francophones claimed the law prohibited advertising, while the Flemish thought it did neither one nor the other. The Council of State then declared that the final conclusion was unclear, due to constitutional irregularities when the law first was drawn up last year.

The lawyers may continue to disagree among themselves, but in effect it is a *fait accompli* now. The government, by its inactivity, has virtually condoned the move by the free radios to assert their financial independence.

Only the head of RTBF (the national tv network) truly is outraged and is threatening to take the free radios to court. He is backed by the Socialist parties in Belgium, but tacitly opposed by the right wing Christian Democrats.

The free radios still have a battle on their hands; they are still limited to a range of 100 watts, but for the first time Belgian advertising agencies have the potential available to reach a wide audience with a flexible medium. "This brings Belgium into the 20th Century," said one ecstatic media director in a Brussels agency.

Six of the largest free radios have grouped together under the direction of the Information et Publicité Belge, owned by Radio Television Luxembourg, to form Radio Key which is coordinating the sales of spots across the nation. They have a potential audience of some 4 million listeners and a recorded audience of 560,000.

The national newspapers have taken a dim view of the event, but on a local level the radio stations and newspapers are cooperating to share advertising sales and news-gathering. RTL is thought to have been unusually crafty in setting up Radio Key as it thereby keeps its monopoly on Belgium's commercial airwaves. Agencies complain, though, that the spot costs are too high at BF125 ($2.80) per thousand. The cost per thousand on RTL is just less than $4.48, but this is way above the four-to-one cost ratio of tv to radio found in the U.K. or the U.S.

None of the starved Belgian advertisers using the free radio stations really are complaining, though, and heading the field on the first day's broadcast were Procter & Gamble, L'Oreal, Lois jeans, Henkel and others. Spots still are being kept to four minutes per hour and avoid advertising to children as well as tobacco and political advertising, but this may change as confidence grows. And who knows where this action in Belgium may lead. Can the free radios of France, Holland and Germany be far behind?#

Scents off

"The delightful new body spray with the reassurance of a gentle deodorant" is how Lever Bros. is describing its new Impulse all-over-body spray in ads supporting national launch (AA, March 29), via J. Walter Thompson USA. It comes in four scents: Delightfully Daring, Instantly Innocent, Mysterious Musk and Suddenly Sassy.

Penney picks Gill, Howell

NEW YORK—J.C. Penney Co. has elected William Howell and Robert Gill as vice-chairmen. Mr. Howell is an exec vp and director; Mr. Gill is a senior vp-director, corporate personnel and planning. The appointments coincide with the retirements of vice-chairman Walter J. Neppl on July 1, and Kenneth Axelson, exec vp-director, finance and public affairs, on Aug. 1.

Shop promotes Hirsch

NEW YORK—Shaw Elliott has changed its name to Hirsch Elliott, reflecting the promotion of Bernard Hirsch, exec vp-creative director, to principal. The agency was formed in 1966 by Herbert Shaw and Don B. Elliott, former employes of Muller Jordan Herrick (now Muller Jordan Weiss). Mr. Shaw left the agency in 1978 to pursue other interests.

Action Graphics bought

DALLAS—Casey Cohlmia Advertising & Public Relations has purchased Action Graphics, Waco, Tex., from Patti and Jack Durrett. Karen Wilerson, account exec at Action Graphics, becomes office manager.

Coen trims '82 $ forecast

By CHRISTY MARSHALL

NEW YORK—With ad spending in local media softer than expected, Robert Coen, media spending forecaster and senior vp, McCann-Erickson USA, is toning down his predictions for 1982.

Late last year, Mr. Coen estimated that 1982 ad spending in the major media would increase 11.7% to $68.5 billion. But last week, at his midyear presentation here, Mr. Coen scaled down his estimate to $68 billion because of sluggishness in local newspapers and retail advertising. The adjusted total represents a 10.4% increase over 1981.

Said Mr. Coen, "Our December, 1981, projections for 1982 advertising expenditures were based upon the then-current consensus of a 9.2% GNP growth. Current expectations have been lowered to less than 6%. In comparison, advertising expenditures will not only continue to grow faster than the economy as a whole, but it is evident that the differential is widening as advertising is increasingly used to solve problems created by the economy. The ratio of advertising-to-sales is expected to rise."

By category, Mr. Coen expects ad spending to be up 8% to $3.8 billion in magazines, up 13% to $3.1 billion for national newspaper linage, up 12% to $6.2 billion for network tv, up 13% to $4.2 billion for spot tv, up 12% to $245 million for network radio, up 9% to $975 million for spot radio and up 11% to $19.7 billion for all other national media (including direct mail).

The greatest downward revision in Mr. Coen's midyear outlook came in total local advertising. Last fall, Mr. Coen forecast total local advertising in 1982 would show an 11.9% increase over 1981 to $30.7 billion. He has revised that to read: Up 9.6% to $29.6 billion. He attributed the adjustment to the "economic downturn" that has lasted longer than expected and to "lousy" retail sales.

■ Mr. Coen's earlier predictions were also based on a far more optimistic economic picture than has come to pass. "The recession is deeper and longer than expected," Mr. Coen said.

In the first four months of '82, network tv ad revenues were up 13%. By individual network, CBS is up 21% over 1981, ABC is up 13% and NBC showed a scant 5% increase over the same period in 1981.

The strongest performance has come in spot tv, up 21.5% for the first quarter over a year ago. Without an inventory shortage at the networks, it would have been up 18%, Mr. Coen said. He attributed the increase to a spillover from network, an increase in rebate advertising and the feeling among advertisers that they can cover their major markets just as effectively with spot tv. The fact that 1982 is an election year also bodes well for tv, Mr. Coen noted.

■ One of the poorest performers continues to be magazines, now "paying the bill for the sluggish economy," Mr. Coen said. "But the reports suggest we may be at the bottom; it may be getting better." For the first four months of 1982, there was no increase in pages and only an 8% increase in revenue for magazines.

National newspaper ad revenues are up an estimated 17% in the first four months of '82, with substantial increases in automotive. But ad spending in local papers continues to be soft, especially in classified advertising, Mr. Coen noted. For the first third, local newspaper advertising was up 11% over the same period a year ago.#

McCall raps attacks on FTC

(Continued from Page 3)

ness,' Dave simply disagrees with the overwhelming majority of our membership. Our requests to the membership to support the associations' position on this issue to their congressmen and senators has drawn the biggest response we have seen since 'kidvid,'" Mr. Adams said.

Mr. McCall's jab at the associations was the only sour note for AAF leaders using the convention to rally member adclubs to support its FTC proposals in Congress. While there is sharp debate in Washington over the industry's major goal—elimination of FTC authority to regulate unfair advertising—little of the acrimony seeped into the AAF convention program until the McCall speech.

AAF delegates heard their leaders warmly praise FTC chairman James C. Miller III. Chairman Miller's emissary to the convention, FTC lobbyist Bryce L. Harlow Jr., responded in kind. Nearly ignored in their remarks was the fact that chairman Miller and his fellow FTC members have denounced the industry's bid to end regulation of unfair advertising as an unjustified "special exemption."

Later in the convention, Sen. Robert Kasten (R., Wis.), the manager of FTC legislation in the Senate, received a hero's welcome as the prime sponsor of FTC legislation that does away with unfair advertising as a violation of the FTC act. Sen. Kasten said eliminating regulation of unfair ad practices is justified because advertising is protected by the First Amendment.

He told AAF "the pressure has got to come from you to pass a bill," and he said many members of Congress believe the FTC should not have the power to regulate truthful ads that it finds are somehow unfair, and that his bill is "the right way to do it, the logical way to do it." AAF members enthusiastically applauded the senator's attack on big government.

The next day, however, Mr. McCall said antigovernment feelings have gone too far. "Men and women who are fair-minded and deeply philosophical on almost every other issue give knee-jerk reactions to their government," he said, adding, "Government excesses are every bit as responsible as business prejudices for the current climate of antagonism in the U.S., but let's be careful that we not go too far in dismembering government and its functions that were designed to serve the American people, us included."

His own agency and clients, he noted, "have been stung more than once by the FTC. I have considered them to be arbitrary and unfair on occasion. I, in a flight of rhetoric, even likened their young lawyers to the Baader-Meinhof gang. So I am no woolly head who has no sympathy with the annoyance that people feel for the FTC."

Consumers and honest businesses need an FTC to control the "few but dangerous" unscrupulous business people, he said. And he called FTC's ad substantiation requirement and its policing of ads for both deception and unfairness "pillars of public protection."

But he complained that these requirements have come under attack since FTC chairman Miller arrived at the commission, and that some ad leaders were too quick to swing behind the chairman "when even his fellow Republican commission members were not in agreement." He cited a Four A's press release in which the association said it fully supports "the general approach" of the Reagan administration and chairman Miller toward the FTC and welcomes a review of its ad substantiation program."

"It is heady stuff," he said, "to have an administration committed to the dismantling of many government functions. But, our business must hew to the principle of judging each issue by its impact on the welfare of the public as well as its impact on business."#

Big Stroh revamp due

By ROBERT REED

Stroh Brewery Co. is expected to announce this week major changes in the marketing department of its recent acquisition, Jos. Schlitz Brewing Co.

In addition to revealing which members of the Schlitz marketing team will remain, and in what capacity they will serve, Stroh brass may shed some light on the future of Schlitz exec vp-marketing Anthony Amendola. His decision, sources say, depends on the responsibilities he is given.

So far Stroh is showing a propensity for installing its own execs in key Schlitz posts, prompting speculation that John Bissell, Stroh vp-marketing, will also be heading all Schlitz marketing efforts.

High-level changes at Schlitz were announced last week. As expected, Peter Stroh, chairman-chief executive officer of Stroh, assumes the same posts at Schlitz. Former chairman Daniel McKeithan resigned and Roger Fridholm, Stroh president, also became president of Schlitz (AA, May 31). Last week's announcement said that Frank Sellinger will remain with Schlitz as vice-chairman. Brewery sources now say the 67-year-old Mr. Sellinger will be with the company for the duration of the summer, but will retire by September.

In his post as vice-chairman, he will no longer have operational responsibilities and will be acting more in a consulting capacity for Stroh while it completes its managerial takeover of Schlitz.

Another reason insiders cited for his staying for the transition is that he is the Schlitz brand's ad spokesman. Although Mr. Sellinger's presence in the current Schlitz campaign has been lessened, he is still the image bolstering the theme: "Behind every Schlitz is a man who knows his beer."

J. Walter Thompson USA, Chicago, is working on a new Schlitz campaign expected to debut in the fall. The new work does not feature Mr. Sellinger, according to sources. Regarding advertising, Mr. Bissell said the company is "reviewing the bidding in terms of work done [by the agencies]." Mr. Sellinger was unavailable for comment on his position.

In other news, Teamsters union locals at three of the Schlitz breweries have gone out on strike. Unions in Tampa, Winston-Salem and Longview, Tex., walked out last week following three months of unproductive negotiations and the union's rejection of a company contract proposal.#

BPAA told not to cut ads during recession

By STUART EMMRICH

PHILADELPHIA—When a recession hits and money is tight, companies seeking to trim expenses often decide that an advertising budget might be expendable.

But a market researcher speaking at this year's annual conference of the Business/Professional Advertising Assn. warned that cutting back on advertising during a recession can have damaging repercussions when the economy rebounds. And Valerie Kijewski, an associate at the Strategic Planning Institute, added that increasing advertising in a recession actually can help a company boost its competitive position.

She said research by the SPI showed that companies increasing their advertising during a recession raised their market shares by at least a point and a half, an increase of 25% over what the market share for average companies was during the period.

The ability for companies to move ahead of competitors during a recession is enhanced by a tendency for most companies to become less aggressive in a recession, to blame losses on economic conditions rather than moves by competitors and not to track market share changes as closely as they do revenue figures, Ms. Kijewski said.

Increasing advertising during this period, she argued, can boost even further these potential gains, because so few companies do it.

"Only about 25% of businesses try to dramatically increase advertising during a recession. But they learn that it can pay off rather well," Ms. Kijewski said.

In response to questions about whether increasing an advertising budget during a recession means that a company might further hurt its ability to make a profit, Ms. Kijewski said there was little difference in return on investment between companies that do and those that don't advertise during a recession. But she added that those who do advertise in a recession can grab an increase in market share that likely will be retained.

"Increasing advertising during a recession doesn't hurt short-term bottom line, but does enhance long-term profitability," she said.#

Anti fever hits Argentina

(Continued from Page 2)

to show tv programs he bought in the U.S.

Mr. Simoncini owns a network of private tv stations in the country's interior and said he doesn't know what U.S. shows he should buy this year, if any, because he's afraid the government might prohibit him from showing them.

However, so far his fear seems unfounded. Just before the government's surrender, it ordered state-controlled Channel 13 in Buenos Aires to halt the English science-fiction movie, "The Limbo Connection" halfway through, and replaced it with "The Waltons."

Channel 13 said it was flooded with angry phone calls from viewers protesting the screening of an English film while Argentines were awaiting news of a British assault on their troops defending the islands.

For marketers, the surrender might have changed all the rules. One leading marketing head of a large automobile manufacturer said some companies are thinking of switching their agency affiliation from U.S. to local agencies. At least one U.S. agency official is worried about a possible campaign to bad-mouth U.S. agencies, which could affect the government's attitude toward such agencies. "If the government shows partiality, it could have a huge effect because the government controls the tv stations," he said.

Sources say Chesterfield pulled its long-running "The Most Famous American" ads out of circulation once the war began and that any new product introductions, particularly cigarets, henceforth cannot have English-sounding names. Even items such as jogging shoes, now commonly called "joggers," will be questioned, one source said.

Commercials showing young people dancing and singing in jeans and other ads probably will not be acceptable now, as "these young people are several years more mature following the war," the source said.

■ Ironically, the government's own pro-war commercials might have contributed to an expected-change in leadership. The slick ad campaign was so effective in convincing the population that victory was near, sources say, it generated massive disappointment when the surrender was announced.

The overriding question might well be whether the economy will return to strict controls or continue on its prewar path toward a free market.

Bigger budgets or earlier buying pattern?

Network tv upfront buys may hit record

By COLBY COATES

NEW YORK—The 1982-83 network tv upfront marketplace appears headed toward a $1.7 billion-to-$1.8 billion payday, making it the biggest upfront market yet.

Estimates of last year's action range from $1.5 to $1.6 billion. What suggests that this marketplace will be a record-breaker is that the projections are coming from both sides of the negotiating table.

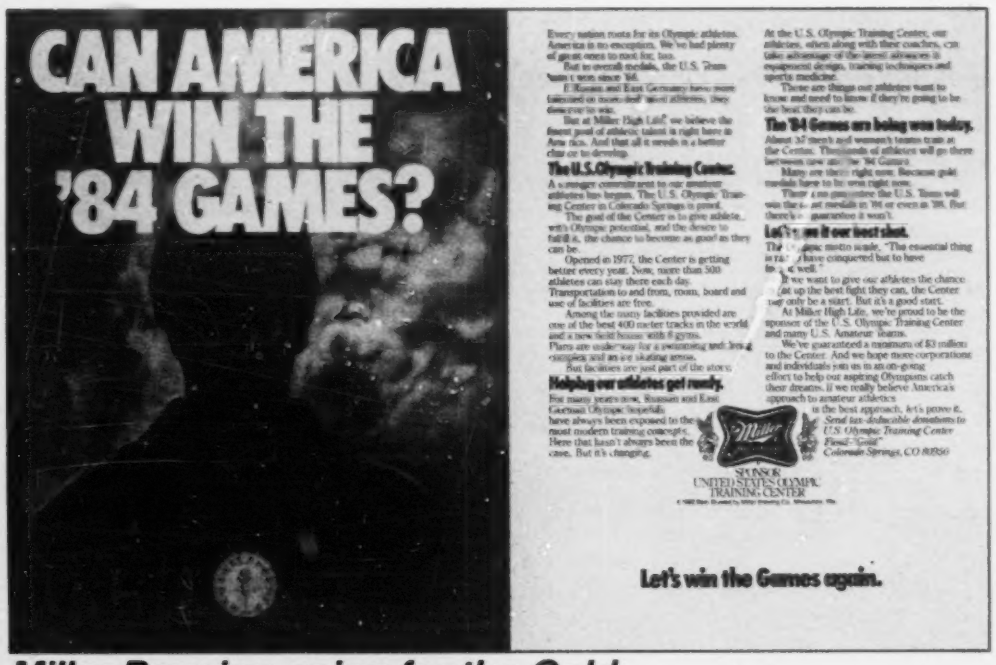
The budgets that have landed on agency and network desks thus far are uniformly higher than a year earlier. However, the important question is: Are advertisers prepared to spend that many more ad dollars than a year ago, or are they just committed to spending a greater percentage of their over-all budgets upfront to avoid the costly scatter market later on? Right now there is no clear-cut answer to the question, although the gut feeling, on the part of both agency and network execs, is that higher budgets loom.

For example, several major entertainment companies are reported to have boosted spending plans both for theatricals and various home entertainment games; automotive marketers also are reportedly checking in with bigger budgets. Even some conservatively managed package goods companies have come in with significantly higher dollars.

■ Reportedly, both ABC and CBS are opening their negotiating sessions seeking price boosts of up to 30%. Sources indicate that both will settle for 15% hikes over a year ago. NBC-TV's vp for national sales, Aaron Cohen, indicated that "flexibility" is the NBC buzzword. "We're prepared to go in and make any kind of deal the advertiser wants. If the client wants a homes assurance, we'll give it to him; if he wants demographics, we'll give him that, too."

Mr. Cohen also said that for the first time in several seasons, NBC "is getting a better shot at filling inventory across the week. It used to be, the way our Friday night was, I could only sell a six-day schedule." But with the attention its new Friday night entry, "Remington Steele," has received, along with the fact that "Matthew Star" apparently plays better as a Friday night 8 p.m. (ET) show rather than a 7 p.m. Sunday entry, things are looking up at 30 Rock.

Though several fairly significant upfront buys are in the final stages of negotiation right now, it appears as if the floodgates won't break until after July 4.



CAN AMERICA WIN THE '84 GAMES?
Every nation roots for its Olympic athletes. America is no exception. We've had plenty of great ones to root for, too.
But in overall medals, the U.S. Team hasn't won since '68.
If Russia and East Germany have been bolstered on more-deaf-mute athletes, they deserve to win.
But at Miller High Life® we believe the finest pool of athletic talent in right here in America. And that all it needs is a better chance to develop.
The U.S. Olympic Training Center.
A stronger commitment to our greatest athletes has begun. The U.S. Olympic Training Center in Colorado Springs is proof.
The goal of the Center is to give athletes with Olympic potential, and the desire to fulfill it, the chance to become as good as they can be.
Opened in 1977, the Center is getting better every year. Now, more than 500 athletes can stay there each day.
Transportation to and from, room, board and use of facilities are free.
Among the many facilities provided are one of the best 400 meter tracks in the world and a new field house with 8 gyms.
Plans are underway for a swimming and diving complex and an ice skating arena.
But facilities are just part of the story.
Helping our athletes get ready.
For many years now, Russian and East German Olympic hopefuls have always been exposed to the most modern training concepts.
Here that hasn't always been the case. But it's changing.
At the U.S. Olympic Training Center, our athletes, when along with their coaches, can take advantage of the sports' advances in equipment design, training techniques and sports medicine.
There are things our athletes want to know and need to know if they're going to be the best they can be.
The '84 Games are being won today.
Almost 30 men's and women's teams train at the Center. Thousands of athletes will go there between now and the '84 Games.
Many are there right now. Because gold medals have to be won right now.
There's no guarantee the U.S. Team will win the most medals in '84 or even in '88. But there's no guarantee it won't.
Let's give it our best shot.
The Olympic motto reads, "The essential thing is not to have conquered but to have fought well."
If we want to give our athletes the chance to put up the best fight they can, the Center may only be a start. But it's a good start.
At Miller High Life, we're proud to be the sponsor of the U.S. Olympic Training Center and many U.S. Amateur teams.
We've guaranteed a minimum of $3 million to the Center. And we hope more corporations and individuals join us in an on-going effort to help our aspiring Olympians catch their dreams. If we really believe America's approach to amateur athletics is the best approach, let's prove it.
Send tax-deductible donations to U.S. Olympic Training Center Fund-"Gold" Colorado Springs, CO 80950
SPONSOR UNITED STATES OLYMPIC TRAINING CENTER
Let's win the Games again.

Miller Brewing going for the Gold

Miller Brewing pushes for America's return to Olympics dominance in a new campaign designed to solicit funds for the Olympic Training Center. The print and tv drive will come out of Miller High Life's ad budget.

Miller opens up its Olympics run

By ROBERT REED

MILWAUKEE—As amateur athletes from all over the world prepare for the 1984 Olympics, Miller Brewing Co. also is warming up via a July campaign that will showcase its corporate sponsorship of the games.

The nation's No. 2 brewer will uncap a $15 million advertising campaign aimed at promoting support for the Olympic Training Center, Boulder Springs, Colo. Funds for the new ad drive are coming from the estimated $60 million budget earmarked for flagship Miller High Life beer.

Miller has guaranteed it will contribute a minimum of $3 million toward the running of the center.

The push centers on a competitive theme, "Let's win the games again," and three of its four 30-second commercials key on the rigors of preparing for Olympics competition, says Lauren Williams, exec vp of Miller.

The theme line underscores the fact that America has not won in over-all Olympic gold medals since 1938, and also advocates "a feeling of nationalism" to achieve that goal, Mr. Williams added.

But such altruism is not without its own competitive edge. Anheuser-Busch, the nation's No. 1 brewer and Miller's nemesis, is also deeply involved with the Olympics.

A-B recently entered into a $10 million agreement with the Los Angeles Olympic Committee and is beginning to employ that organization's symbol on its beer packaging. In addition, A-B has contracted with ABC-TV to sponsor the summer Olympic Games, and Miller High Life is the lone beer sponsoring the winter games in Sarajevo, Yugoslavia.

The first of the four Miller spots, entitled "Gold Medal," highlights the facilities of the Olympic Train-

Ad impact study stirs questions

By STUART EMMRICH

NEW YORK—More than two months before its official release, an exhaustive study on advertising frequency and its impact on consumer buying habits is generating widespread interest and controversy in the advertising community.

The findings of the three-year study, a Time Inc. and Jos. E. Seagram & Sons joint venture, challenge some long-held notions about advertising effectiveness. In addition, the findings attempt to set some general standards for print advertising campaigns (AA, June 21).

Perhaps the two issues to cause the most stir—Time Inc. execs said they had been inundated with calls about the study last week and ad agencies reported a keen sense of interest among clients—were those that touched on how many times an ad needs to be seen before it has impact and the validity of recall as a measurement tool.

■ Bill Behrmann, vp-media director, Ogilvy & Mather, Chicago, said the study would "cause people to rethink the entire issue of advertising frequency and its impact on

(Continued on Page 86)

'Vanity Fair' promotes by leaps and hounds

Vanity Fair breaks its ad campaign nine months before the first issue hits the stands in March. The first ads highlight four subjects that the Conde Nast magazine will cover: Literature, the arts (dancer Twyla Tharp is shown above), politics (above right) and popular culture. Leber Katz Partners is the agency.

JWT revamp merges N.Y., USA control

By FRED DANZIG

NEW YORK—A sweeping reorganization of J. Walter Thompson Co. has elevated chairman-chief executive officer Don Johnston's right-hand man, senior vp Roy A. Glah, into a key new post as senior vp-operations for JWT/New York, consolidated management of the New York agency operation with JWT/USA and installed a senior management committee to direct the newly combined operation.

Peter Mills, who served as exec vp-JWT/USA and general manager of the New York office since September, 1979, returns to his native Australia in a few weeks to take over as chairman-ceo of JWT Australia, based in Sydney. He succeeds Patrick Moran, president, JWT Australia, who will leave JWT after the transition period in the near future. Along with the change in Australia, Ross Howarth, exec vp-media director in the Sydney office, has been raised to general manager, assuming some of Mr. Moran's responsibilities.

Mr. Glah, who has spent 25 of his 47 years at JWT, has served since March, 1977, as special assistant to Mr. Johnston. He now will be running day-to-day operations in New York, reporting directly to Walter J. O'Brien, who earlier this year was brought here from Chicago to serve as president-chief operating officer of JWT/USA. Mr. O'Brien became

world news roundup

PARIS—Young & Rubicam, the biggest U.S. agency in France, is still losing business to French shops. Following the loss of the $30 million Peugeot-Talbot account to Eurocom/Univas (AA, June 14), Y&R lost the $4 million account of real estate developer Maison Phenix to Publicis.

BUENOS AIRES—Argentina has suspended KLM, Lufthansa and Air France flights linking Buenos Aires to the Dutch, German and French capitals in retaliation for arms sales prohibitions.

BERLIN—The West German government has approved plans for the national introduction of a videotex system that will link 150 villages and cities by the end of 1984.

TOKYO—Ogilvy & Mather's new affiliation in Japan with Tokyu Agency International (AA, May 10) has garnered its first account with the win of Pond's cold cream and manicure products, worth an estimated $1.4 million, formerly with Ketchum Advertising. In addition, O&M's Hong Kong subsidiary Meridian has won the $1.5 million Parker Pen account for the Asia region, replacing J. Walter Thompson Co.

STOCKHOLM—Thanks to a new law, direct-mail companies here will have ready access to the state's computer registry, where data on a person's income, assets, children and political persuasion are stored.

BRUSSELS—NCK's small Brussels shop has bagged the $3 million Datsun account (formerly with D'Arcy-MacManus & Masius).

HELSINKI—Burger King will enter the Finnish market this fall, with the aim of being market leader by 1984. The competition, Clock, a Swedish hamburger chain, and Carrols, which started under a U.S. license but is now wholly Finnish, plans to counter with expansion.

MEXICO CITY—Seventy-one new earth stations were inaugurated last week as part of a government plan to reach all parts of the country via tv. Also, Mexico will launch its own satellite in 1985.

Royal tot triggers U.K. tie-ins

By SEAN MILMO

LONDON—Advertisers and souvenir makers were quick off the mark once the royal birth was announced last Monday.

British Airways offered free drinks to passengers on its flights, linking up with a congratulatory commercial on the ITV network. This was screened half an hour after the announcement the Prince and Princess of Wales had a son.

The 40-second commercial, featuring a baby and children looking at a BA plane, ran to the tune of "Rock-A-Bye Baby" and ended with a shot of a BA aircraft over London's St. Paul's Cathedral with "Congratulations" traced in the sky. Most viewers would have forgotten that exactly the same shot was used for a similar commercial at the time of the royal couple's wedding last July.

Heinz also screened a congratulatory commercial and several companies ran congratulatory messages in the papers the next morning.

Staffordshire Potteries was the first of the souvenir manufacturers to get a commemorative product in the shops. Its factory at Stoke-on-Trent worked through the night to have mugs showing a silhouette of the Princess and baby and the birth date on sale in local stores by 9 a.m. the next morning.

The company and its competitors in The Potteries—the center of the U.K. china industry—could not wait for the baby's name to be announced. Factories in the area

Stormy industry lobbyist session reported

Dissent on FTC ad rule stance?

By RICHARD L. GORDON

WASHINGTON—Now that New York ad agency chief David McCall has broken the ice, are ad industry associations finding there is less consensus for change in the Federal Trade Commission's authority than they previously assumed?

The Washington grapevine reverberated with reports of a stormy meeting of industry lobbyists, where ad industry policy toward the commission was again the issue. The session was unrelated to the McCall remarks.

Execs at the American Advertising Federation and American Assn. of Advertising Agencies, meanwhile, reported no member queries last week as a result of the attack by McCaffrey & McCall's president on the industry's FTC policy, delivered during a speech at the AAF convention (AA, June 21).

Participants at the industry lobbyists' meeting, organized by General Mills and held at the Washington headquarters of the Grocery Manufacturers of America, shunned comment when contacted last week. But it quickly went into circulation that representatives of two major advertisers had opened fire on ad association proposals urging Congress to narrow FTC's

(Continued on Page 90)

Awareness falls; Coke still No. 1

By JOSEPH M. WINSKI

In a month characterized by substantial declines in the awareness scores of major advertisers, Coca-Cola advertising retained its No. 1 spot in consumer awareness in May, according to adWatch, a monthly survey by ADVERTISING AGE and SRI Research Center Inc.

Coke advertising was identified as that first coming to mind by 4.1% of the 1,250 consumers who were asked, "Of all the advertising you've read, seen or heard in the last month, which first comes to mind?" Coke's May awareness score was down from 6% in April. Runner-up Pepsi-Cola's awareness, meanwhile, rose to 3.4% from 2.9%, substantially reducing the better than 2-to-1 margin Coke held over Pepsi in April.

Moreover, in industry-specific questioning, Pepsi unseated Coke as No. 1 in consumer awareness, being identified by 28.6% of consumers as the soft-drink advertising that first came to mind, vs. the 25.3% of respondents who identified Coke advertising. In April, Coke topped Pepsi in the category by a score of 30.1% to 27.3%.

There were three newcomers to the top 10 in over-all awareness in May: Toyota rose to No. 6 with 1% of all responses, Dr Pepper to a tie for No. 7 with 0.96% of all responses and General Motors to a tie for No. 9 with 0.56% of all responses.

adWatch

Advertising for Chevrolet rose to No. 7 from No. 9 in over-all awareness, making General Motors the only company with two spots on the top 10 list. Falling from the top 10 were Peter Pan peanut butter, 7UP and Budweiser.

Advertising remaining in the top 10 but changing positions was that for Miller beer, which rose to No. 3 from No. 4, changing places with McDonald's, and for Chrysler, which fell to No. 9 from No. 6. Ford was No. 5 both months.

Coke's awareness falloff of 5.7 percentage points in advertising recalled by product category was the second-largest such drop measured in May. Purina had the largest decline, falling 7.8 points in pet food ad awareness and to No. 2 in the category, behind Alpo. Also recording sharp dips in awareness by product category were Tide detergent, down 5.1 points; Miller beer, despite its improvement in the over-all ranking, down 4.9 points; United Airlines, down 4.8 points; Polaroid, down 4.5 points; Bayer aspirin, down 4 points; Kellogg, down 3.6 points, and Scott Paper, down 3.4 points.

The top gainer in awareness of industry advertising was American Airlines, which posted a 3.1 percentage point rise in airline advertising and rose to No. 2 in awareness in its category from No. 4 in April.

The aggregate awareness score of the top

(Continued on Page 80)

'Most active' ads in May

Largest changes in awareness, by percentage points within industries

	Change in % of all responses for industry
1. Purina	−7.8
2. Coca-Cola	−5.7
3. Tide	−5.1
4. Miller	−4.9
5. United Airlines	−4.8
6. Polaroid	−4.5
7. Bayer	−4.0
8. Kellogg's	−3.6
9. Scott's	−3.4
10. American Airlines	+3.1

Awareness falls; Coke still No. 1

(Continued from Page 3)

three advertisers fell in May in 17 of the 20 product categories covered by adWatch. Only the leaders in home electronics, gum & candy and coffee & tea increased their combined scores.

This widespread decline might be traced to a variety of causes, including "decreased media buys by some of the big advertisers and increased buys and/or ad efficiency by the many smaller advertisers out there," said Gary Gabelhouse, SRI Research project director for adWatch.

Advertising Age and SRI Research Center, based in Lincoln, Neb., introduced adWatch last month (the name has been changed from adTrack because of a conflict with an existing service of Corporate Intelligence Inc., St. Paul, Minn., called ADTRACK) as a planned continuing measurement of consumer awareness of advertising.

As noted last month (AA, May 17), AA and SRI Research Center believe adWatch to be the most ambitious statistically valid research into ad awareness yet undertaken. The sample is constructed to represent accurately the population being studied, enabling valid generalizations to be made about a much larger group, in this case all U.S. consumers 18 years of age or older.

In the survey, conducted by trained SRI interviewers, consumers are asked to identify the advertising that first comes to mind out of all advertising to which they are exposed, and then for advertising for each of 20 product categories. AdWatch also asks consumers where they saw, heard or read the advertising they name.

AdWatch counts all replies naming a specific brand, including spinoff products bearing the principal brand name. Thus, Pepsi Light is counted as a vote for Pepsi-Cola and Miller's Lite beer and Bud Light are included in the totals for Miller and Budweiser. A product such as Tab, which does not include the Coca-Cola name as part of its name, is tallied as a separate brand. Some respondents named "light" beer but did not mention a specific brand. Such responses are assigned to a generic "light" category; adWatch does not assume that the consumer means a certain brand but merely records the response as given. Consumers are given no assistance of any kind in answering the questions.

As was the case in April, tv dominates as the source of advertising, being named by 66% of the respondents as the medium of the ad they identified as that first coming to mind out of all advertising. In April, 69% said tv was the source. Tv's share of the product-category advertising that first came to mind ranged to as high as 89%, for airline companies. (A detailed discussion of the source of the ads identified in adWatch will be available in this week's *Electronic Media Edition* of AA.)

More than half (52%) of the people questioned said they couldn't think of any ads when they were asked to identify one from all ads seen, read or heard in the previous month. In April, 44% couldn't come up with an ad.

Other May findings:

- In personal soap and shampoos, Procter & Gamble's Head & Shoulders, with 3.4% of all responses, dropped out of the top three from No. 1 in April, when its advertising had an awareness score of 5.1%. Head & Shoulders was the only No. 1 in April to fall from the top three in May. Prell, also a P&G brand, moved up to No. 1 from No. 2, despite a lower score in May than in April.
- Miller fell from No. 1 in the beer category, receiving 12.2% of responses, down from 17.1% in April. Budweiser took over the top spot, with a 14.2% score, up from 12.8% in April.
- Other advertising fell from No. 1 positions: Avon, to No. 2 in cosmetics, replaced by Chanel, which didn't rank in the top three in May; United Airlines, to No. 3, replaced by Eastern; Scott to No. 3 in paper products, replaced by Charmin, and Gallo, to No. 2 in wine & liquor, replaced by Riunite.
- Despite its dip in the over-all ranking, McDonald's widened its already staggering dominance of fast-food advertising, garnering 48.7% of all responses in the category, up from 46.9% in April. No. 2 Burger King's score fell to 5.8% from 7.3%.
- Polaroid fell further behind Kodak and into a tie with Canon in cameras & photographic equipment, with 11.5% of the responses in May, down from 16% in April. Kodak's score also fell, to 15.7% from 17.8%. There were no responses in May for "the James Garner ads" without identifying the product, Polaroid; in April, 18 people, or 1.4% of the total questioned, responded that way.
- Charmin, which in April was No. 1 in toiletries/hygiene and No. 2 in paper products, in May was No. 1 in both categories. It received 5.4% of the responses in toiletries/hygiene and 8.4% in paper products.

There were other newcomers to the top three in their categories, in addition to the previously mentioned American Airlines and Chanel: Dial, to No. 3 in personal soap & shampoo; Grape-Nuts, to No. 2 in breakfast foods, and Tampax, to No. 3 in toiletries/hygiene. Solo, a new P&G detergent, moved to No. 3 in laundry products.

Dropping from the top three in their product categories, in addition to Head & Shoulders: Estee Lauder, Wheaties, Crest, RCA and TWA. The top three remained the same in cars and trucks (Ford, Chevrolet, Toyota); fast-food restaurants (McDonald's, Burger King, Wendy's) and coffee & tea (Maxwell House, Folger's, Sanka). Except for RCA's dropping out of a tie for third place, the home electronics category also remained the same, with Atari a strong No. 1 followed by Radio Shack and General Electric.

In medicine & drugs, Anacin moved up to No. 2 from No. 3, switching places with Bayer. Stouffer's moved to No. 2 from No. 3 in packaged, canned & frozen foods, changing places with Green Giant. Winston overtook Salem to take the No. 2 spot in tobacco products, with Salem dropping to No. 3, and in gum & candy, Doublemint moved up to No. 2 and Trident fell to No. 3.#

Gooden boosted in Swift shakeup

Chicago—Bruce Gooden has been named director-corporate marketing services at Swift & Co. in a management shakeup that resulted in the departure of Elliot Shear, who formerly held that title. Mr. Gooden's previous position as director of marketing for the poultry and processed meats division has been eliminated. Jack Stoops, formerly president of Vigo Inc., Tulsa, assumes responsibilities as director of marketing for processed meats.

Dennis Fitzgerald, formerly associate director for business development, Libby, McNeill & Libby, was named marketing manager for breakfast strips, succeeding Randy Irion, who became marketing manager for Brown 'N Serve sausage. Mr. Irion succeeds Richard Gray, who left the company several months ago. No director of marketing for poultry has been named; Tom Giglio continues as marketing manager for poultry, and Glen Wilke, formerly media assistant in the media services department, was named assistant product manager for poultry.

Also in the shakeup, Bill Nicol, previously director of purchasing at Swift, was named group product manager for Soup Starter and Stew Starter lines, succeeding Bill Bowen, who left the company. Tim Harris, formerly assistant product manager on Soup Starter, was named product manager. Chris Broxon, formerly at Turtle Wax, was named product manager on Stew Starter.

Other people on the move:

Harv Schneider to manager-marketing services, Master Lock Co., Milwaukee, from director-marketing communications, Addressograph Farrington Inc., Mt. Prospect, Ill. He succeeds **Edson Allen**, who left the company.

Gerhard Ade to manager-company identity, a new position at TRW Inc., Cleveland, from corporate manager-design and advertising services, McGraw-Edison Co., Rolling Meadows, Ill.

George R. Snider Jr. to director-marketing services, a new position at the chemical group of B.F. Goodrich, Cleveland, from director-pr, B.F. Goodrich, Akron.

Jack F. Reichert to chief executive officer, Brunswick Corp., Skokie, Ill., in addition to continuing posts as president and chief operating officer. Mr. Reichert, formerly vp-marketing for bowling operations and Mercury Marine, succeeds **K. Brooks Abernathy**, who remains chairman.

Charles Roe to vp-international marketing, a new position at Amana Refrigeration, Amana, Ia., from vp-special accounts.

Terry L. Gould to advertising coordinator-international group, Firestone Tire & Rubber Co., Akron, from identification specialist, Dayton Trade Sales division of Firestone North American tire group, succeeding **Ronald Cusano**, who left the company. Earlier at Firestone: **Benjamin Ammons** to exec vp-marketing and sales, North American tire group, from vp-marketing and sales, Carlisle Tire & Rubber, Carlisle, Pa., succeeding **James R. Thomas**, who became vp-wholesale operations, sales and marketing operations group.

Robert L. Winter to advertising manager, and **Glen Grosser** to sales promotion manager, both at Zenith Data Systems, Glenview, Ill., from account exec, Davis Harrison Advertising, Chicago, and advertising and sales promotion manager, Belden Corp., Geneva, Ill., respectively. Mr. Winter's position is new; Mr. Grosser succeeds **Felicia Jones**, who left.

Douglas McDonough to marketing manager, a new title, Society of Real Estate Appraisers, Chicago, from communications and promotion director for affiliates of the National Association of Realtors, Chicago.

Paul Luchsinger to vp-marketing and sales, consumer plastics, Mobil Chemical, Macedon, N.Y., from general manager-new business development. He succeeds **Dominic Piazza**, who moves to vp-manufacturing.

Susan A. McCormick to advertising and catalog manager, a new post, Misco, Homdel, N.J., a minicomputer supplies company, from account manager, Newport Inc., New York.

Thomas R. Scanlin to vp-marketing, American Steamship Co., Buffalo, N.Y., from vp-service division. He succeeds **Michael M. Scheidt**, who moves to vp-sales.

Kay Warmuth to vp-direct marketing, a new post, Diners Club/Carte Blanche, New York, from director of product and service marketing, Diners Club, Los Angeles.

Suzie Crocker to director of communications, Pizza Time Theatre, Sunnyvale, Cal., a new post, from communications manager.

Joseph E. Cole to vp-marketing, SCM Proctor-Silex, King of Prussia, Pa., from vp-international operations. Mr. Cole succeeds **Thomas O. McNeil**, who left the company and has joined Freelance Inc., Philadelphia, a stationery-giftware company, as vp-marketing.

Eric M. Boyle to vp-marketing, Lindsay International, Lindsay, Cal., from senior group product manager, Morton Frozen Foods, Del Monte Corp., San Francisco, succeeding **Ronald H. Russell**, who left. Also, **Noel Schanz** to product manager-macadamia nuts, a new post, from marketing manager-foodservice, Hunt-Wesson Foods, Fullerton, Cal.

Keith L. Frohreich to vp-marketing, Carl Karcher Enterprises, Anaheim, Cal., from vp-management supervisor on the Carl's account, Cochrane Chase, Livingston & Co., Irvine. He succeeds **Paul Mitchell**, who has become vp-corporate affairs.

Brad Brown to manager-special programs, PepsiCo, Purchase, N.Y., from vp-account supervisor, Evans/Weinberg, Los Angeles. Mr. Brown will be based in Los Angeles.

Judith Kooker to director of corporate communications, FMC Corp., Chicago, from manager of public issues, succeeding **Howard Mudgett**, who was assigned to special projects.

John C. Mitchell to new post of group product manager, Morton Frozen Foods, Del Monte, San Francisco, from brand manager, Procter & Gamble, Cincinnati.

Helen M. Gray to the newly created position of vp-corporate communications, Atari Inc., Sunnyvale, Cal., from executive director, Horatio Alger Assn. of Distinguished Americans, New York.

Thomas D. Hawley to vp-manager of advertising, Rainier National Bank, Seattle, from manager for division and subsidiary support advertising. He succeeds **A. George Chambers**, who left.

Ronald J. Harcarik to manager of advertising and sales promotion, ITT Cannon, Fountain Valley, Cal., from pr manager, Ameron Inc., Monterey Park, Cal. He succeeds **Terry McCarthy**, who left.

Kenneth K. Markman to advertising director, Universal Pictures, Universal City, Cal., from vp-advertising, 20th Century-Fox Pictures, Los Angeles. He succeeds **Camille Lane**, who became vp-creative director, Columbia Pictures, Burbank.#

Good news, bad news

Among media companies, cable and Sunbelt outpace the pack

By Joseph M. Winski

In Toledo, O., last year, 14 active *Toledo Blade* advertisers, including Wickes Furniture, one of the newspaper's larger accounts, went bankrupt.

But in Houston, the *Houston Chronicle* ran enough advertising to move past the *Chicago Tribune* into second place among all newspapers in total advertising linage. Only the perennial leader, the *Los Angeles Times*, ran more.

The major tv networks, the most prominent representatives of the "old" electronic media, took their lumps last year, posting revenue gains of well under 10% each and flat or lower earnings.

But the "new" electronic media sizzled, at least in revenues. Media revenues of American Express Co. and Warner Communications soared—57% and 44% respectively in 1981—on the wings of their joint cable venture, Warner Amex. And Denver-based Tele-Communications Inc., our reporter found, "is playing its own version of Pac-Man . . . gobbling up cable systems" at such a rate that it has become the top multiple systems operator in the country. Its media revenues were up 50% last year.

In St. Petersburg, Fla., the rapidly growing *St. Petersburg Times*, increasingly becoming regional in scope, helped boost Times Publishing Co.'s revenues by 34%, while Evening News Assn. in Detroit candidly admitted that it was using *its* Sunbelt earnings to sustain the loss-plagued *Detroit News*.

That's the pattern that clearly emerges in Advertising Age's second annual ranking of the country's 100 largest media companies: While the group as a whole posted a 13% increase in revenues in 1981, cable tv and Sunbelt-based companies considerably outpaced the rest of the industry, particularly those companies primarily in traditional media businesses in the industrial northern states.

The top 10 companies in our survey, which measures revenues from media operations only, remained the same, although there was some shuffling within the top 10.

American Broadcasting Cos. retained its title of the largest U.S. media company, and self-described "largest and most successful advertising medium in the world." But ABC's media revenues rose just 4.3% last year, the smallest gain among the top 25 companies and one of the smallest on the list. ABC's lead over No. 2 CBS, which posted an 8.7% revenue increase, narrowed to $125 million from its 1980 lead of $203 million.

RCA Corp., No. 3 on the list with its NBC network, posted a 6.5% revenue increase, but NBC's earnings fell 36% last year. (Our survey does not attempt to rank companies by earnings, but does make note of them, when they are available, in the individual company profiles.)

NBC blamed the economy as well as the legacy of Fred Silverman—a stockpile of lousy programs, the network claimed.

Rounding out the top 10 were Time Inc., No. 4; Times Mirror Co., No. 5; Gannett Co., No. 6; S. I. Newhouse & Sons (also known as Advance Publication), No. 7; Knight-Ridder Newspapers, No. 8; Hearst Corp., No. 9, and Tribune Co., No. 10.

Times Mirror Co. posted a 21% revenue gain, easily the largest among the top 10, and jumped to fifth place from seventh in last year's rankings, exchanging positions with Newhouse. Newhouse still retained its ranking as the largest privately owned media company. In the other shuffle in the top 10, Knight-Ridder moved up a notch, changing places with Hearst.

Only two companies on the list suffered a decline in media revenues, both because of retrenchments in media holdings. Playboy Enterprises, which sold *Oui*, fell 3.7% in revenues and to No. 53 from No. 40. Charter Co., which is getting out of media entirely, it appears, dropped 32% in media revenues and to No. 38 from No. 23.

As was the case last year, the top 10 companies were the only ones with media revenues topping a billion dollars. The top 10 also repeated their large share of the top 100 companies' media revenues, accounting for 45.7% of the group's combined media revenues of $33.12 billion. That's down, however, from the 46.5% of the total generated by the top 10 last year. That reflects the slower rate of gain by the top 10 companies: 11% vs. 14% for the remaining companies.

While the billion-dollar-plus companies' share of media revenues might raise questions in some quarters about an unhealthy amount of media concentration in the U.S., media company executives today indicate little fear of the type of antibigness sentiment implicit in such things as the hearings on media concentration held by the Federal Trade Commission in 1978.

Asked to characterize the current political climate for media companies and how it has changed under the Reagan administration, one company replied in its questionnaire, sent earlier this year by Advertising Age: "There appears to be a trend that would permit the consolidation of media companies to move ahead at a more rapid rate than in the past."

The same company official added, "The electronic media environment has changed more drastically . . . than the print media environment." "Good—much improved with Reagan," observed another company.

Our survey and interviews also picked up a surprising, and perhaps significant, amount of wariness about cable tv. Despite the impressive revenue gains posted by many cable operations, some media executives clearly are beginning to re-examine the almost ritual projections of cable's bright financial future. Indeed, in the opinion of Roy Park, chairman of Park Broadcasting, cable "is highly capital intensive, and it's going to wind up in the hands of a few, large companies."

Among others who have recently expressed caution about cable is Katharine Graham, chairman of Washington Post Co., Lloyd Schermer, president of Lee Enterprises, and General Tire & Rubber Co.'s RKO General (No. 50), which last year sold its cable system, Cablecom-General, to Capital Cities Communications (No. 15), citing a desire to move out of the cable-intensive hardware end of cable.

Thomas H. Wyman, CBS Inc. president, also has joined the skeptics, saying at the network's affiliates meeting last month: "It becomes increasingly clear that the potential impact of cable television has been overrated by many . . . . It is going to take longer to develop profitable cable networks than most have imagined, and fewer of them will survive" than has been anticipated.

CBS distributed at the meeting a booklet crammed with data aimed at taking "a hard, cold look at the potential of cable." Not surprisingly perhaps, the conclusion is that the networks don't have all that much to fear from cable as an advertising vehicle. While basic and pay-cable will attract 18% of the evening tv audience by 1990, and the networks' share will be down to 70%, the report concludes, total ad revenues of cable services will be only $3.5 billion to $4 billion, compared to $33 billion to $38 billion for the networks and local tv stations. "The emergence of cable is no cause for alarm, as long as advertising on cable is commensurate with the audience values cable delivers," CBS asserts.

That view is hardly likely to be shared at companies such as Tele-Communications, which leaped 18 places on our list, to No. 48 from No. 66, by virtue of the growth of its cable tv systems, its only media business. Other sizable cable-fueled increases last year were attained by Cox Communications, up 32% in revenues and three notches to No. 21; Westinghouse Electric, up 19% in revenues and three places to No. 24; Viacom International, up 35% in revenues and 10 places to No. 49, and Continental Cablevision, up 53% in revenues and from being unlisted last year to No. 89. American Express rose 10 slots in the rankings to No. 70 and Warner Communications six to No. 71.

Among the noncable companies recording substantial revenue gains last year was Dow Jones & Co., which remains hard-pressed to accommodate demand for ad space in the *Wall Street Journal*; Dow Jones' revenues rose 22% last year and its ranking two notches to No. 14. Central Newspapers, publisher of the Indianapolis dailies, rose 24% in revenues and five rungs to No. 25 in the rankings, while magazine publisher Knapp Communications Corp. was up 44% in revenues and seven places in the rankings to No. 92.

New to the rankings, in addition to Continental Cablevision, is Turner Broadcasting System, unlisted last year but No. 82 this year by virtue of a 94% increase in revenues, the highest of any company on the list. Turner Broadcasting's "superstation," WTBS-TV, Atlanta, now available on cable systems serving 19 million homes, increased its ad revenues by 59% last year, while ad revenues of the company's cable operations, Cable News Network and CNN 2, nearly quadrupled. The cable operations lost $11 million last year, however.

CSX Corp., better known as a railroad company, is also new this year (No. 96). CSX owns daily newspapers in Jacksonville, Fla., and elsewhere, as well as weeklies and a small Florida cable company. Howard Publications, Oceanside, Cal., is new to the list at No. 74 and Sammons Communications, Dallas, unlisted last year, is No. 98 this year.

Some of last year's figures have been revised to reflect the receipt of what we believe to be more accurate information subsequent to last year's publication of the rankings. Figures that have been revised are so indicated on the accompanying chart and in the profiles, which start on Page M-8.

The five companies displaced from last year's list, all of which qualify as near-misses this year, are The New Yorker Magazine, $58.2 million in revenues; LFP Inc. (Larry Flynt Publications), $55 million; Rodale Press, $55 million; Blue Chip Stamps (publisher of the *Buffalo Evening News*), $54.8 million, and Macfadden Holdings (publisher of *US* and romance magazines), $54.5 million.

Other contenders identified this year are Allbritton Communications, revenues estimated by AA at $55 million; Forbes Inc., estimated revenues of $54 million; Crain Communications, publisher of Advertising Age and other business magazines, $50.5 million; Scripps-League Newspapers, estimated revenues of $50 million; Whitney Communications, estimated revenues of $49 million; Kiplinger Washington Editors, estimated revenues of $49 million, and Calkins Newspapers, estimated revenues of $48 million.

The cutoff point for this year's listing was $59.2 million. Last year it was $49.9 million.

Joseph M. Winski is editor-at-large of Advertising Age.

The 100 leading media companies

Our annual roundup looks at how the powers fared in 1981

A.S. Abell Co.

A.S. Abell Co., Baltimore, is the country's 58th largest media company, with total 1981 revenues estimated by ADVERTISING AGE at $133 million. All revenues stemmed from two media subsidiaries: A.S. Abell Publishing, which accounted for about 80% of the total, and Abell Broadcasting.

Abell's principal property remains the Baltimore Sunpapers, the collective name for morning, evening and Sunday editions, which have a combined daily newspaper circulation of 344,832 and a Sunday circulation of 382,953 (March, 1982, Audit Bureau of Circulations figures).

At the Sunpapers, the watchwords are "evolutionary change." The arrival last summer from the *San Francisco Examiner* of publisher Reg Murphy signaled the decision to embark upon a far-reaching program of change.

When the *Washington Star* folded last year the Sunpapers picked up several of its reporters and features. Circulation also got a slight boost between the September, 1981, and March, 1982, ABC ratings as a result.

"The Sunpapers is positioning itself for growth under the leadership of talented professionals," Mr. Murphy has said. "Changes in both editorial and administrative positions were made to give ourselves opportunities to expand." Mr. Murphy recently announced to his staff that "What we're doing with the newspapers is making sure they're in a position to prosper and support new ventures under the publishing company umbrella."

Currently, Sunpapers are Abell Publishing's only properties. However, the company continues to look into a mid-Atlantic regional magazine. And recently plans were announced for a direct mail operation that would start with Sunpapers subscribers ultimately reaching out to metropolitan Baltimore.

Meanwhile, Abell Communications, A.S. Abell's younger, smaller corporate offspring, is moving ahead with its own acquisition program. It has recently added two Jacksonville, Fla. radio stations, WCRJ-AM and WCRJ-FM. By the end of 1983 it expects to have a total of seven new stations.

A good example of the adventurousness at Abell Communications is seen in its sponsorship of the U.S. Professional Cycling Championship through its hometown tv outlet, WMAR.

Affiliated Publications

Affiliated Publications, Boston, is the country's 33rd largest media company, with revenues of $236.1 million in fiscal 1981, all from media operations.

The company's revenues rose 14.3% last year from $206.5 million in 1980. The *Boston Globe* contributed $221.6 million in revenues, or 94% of the total, and broadcasting and cable tv operations the remaining 6%. In 1980, the *Boston Globe* contributed the same percentage of total revenues, or $194.4 million.

The *Boston Globe's* current daily circulation is 505,986, an increase of 3,255 over 1981, and the Sunday edition's circulation is 754,243, an increase of 5,879. These circulation figures are the "highest in the *Globe's* history," Daniel Orr, vp, said.

The increase in Sunday circulation was achieved despite a price increase in the Sunday edition last Jan. 3.

William O. Taylor, chairman of the publicly owned company, in the annual report said 1981 was a "record year for Affiliated Publications." The company "turned a healthy profit," he said. Despite a decline in fourth-quarter earnings because of a 22% drop in help-wanted advertising in the *Globe*, earnings for the year increased to $14.2 million, or $2.74 a share, up from $12.9 million, or $2.49 a share in 1980.

In 1981, the *Globe* recorded a gain of 4.7% in advertising linage from 1980. Advertising in the *Globe's* Sunday magazine increased 15%. The *Boston Globe Magazine* was No. 1 in retail advertising last year among newspaper magazines in the U.S.

Company subsidiary Affiliated Broadcasting acquired WOKV-AM and WAIV-FM in Jacksonville, Fla., in March, 1981. Last November, it sold two of its radio stations, WSAI-AM and WSAI-FM in Cincinnati, to Booth American Co., Detroit. Affiliated Broadcasting now owns five am and five fm radio stations.

Affiliated's acquisition of 45% of McCaw Communications, an owner and operator of cable tv and radio common carrier companies in Washington state and Alaska, was completed last August. The company also completed, in April of this year, the joint acquisition (with McCaw Communications) of Southern Oregon Broadcasting Co., a cable tv operator. This purchase also included Pacific Telatronics, a microwave common carrier serving northern California and southern Oregon.

Last October, Affiliated Publications entered into an agreement in principle with Knight-Ridder Newspapers for access to the Knight-Ridder/American Telephone and Telegraph Co. market test data of the Viewtron Home Information Service of southern Florida. The company also will have access to the much larger market test data from research scheduled to begin in 1983. If results of these tests are sufficiently encouraging, Affiliated Publications and Knight-Ridder will organize a joint venture which will launch a similar Viewtron system in the Greater Boston area.

In March, construction began in an off-site *Globe* production facility in Billerica, Mass. This will be a satellite plant housing two eight-unit printing presses and having the capability of adding two more presses.

Effective Jan. 1, 1981, William Davis Taylor retired as chairman of the board; he will continue as an Affiliated Publications director. William O. Taylor was appointed chairman of the board, ceo and publisher of the *Boston Globe*. Also on Jan. 1, Richard C. Ockerbloom was appointed executive vp, Millard G. Owen vp-marketing/sales and John F. Reid Jr. advertising director.

1981 out of total revenues of $2.44 billion. Its media interests encompass tv and radio stations and networks, consumer and business publications and several ties to the catv field.

The lion's share of its media revenues again came from tv and radio, which produced $2.1 billion in revenues, up from $1.97 billion in 1980. Publishing accounted for $275.3 million in revenues last year, up from $231.6 million in 1980. Some of the "publishing" revenues were generated by such sources as book sales and music publishing, not included by AA in media revenues.

Commercial time sales in the last half of 1981 lifted ABC-TV Network to record revenues, bolstered by advertiser response to audience gains in news, daytime and early-morning slots. Network execs crowed that ABC again was "the largest and most successful single advertising medium in the world," a title that for decades had belonged to CBS. To hang on to that crown, industry followers said ABC must overcome increasingly stiff competition.

Last year, ABC's over-all earnings of $146.3 million—only $9,000 more than in 1980—were hurt by "uncertainty in the advertising marketplace," chiefly in the first half, according to Leonard Goldenson and Elton Rule, ABC Inc.'s chairman and president, respectively. Other negative influences, they said, were write-downs of certain publishing operations and disruption of the fall 1981 prime time season by the actors' strike of the previous year.

This year also will present problems. The executives anticipate, for example, that higher costs for sports rights and development costs for video and theatrical movies will put "additional pressure on profit margins."

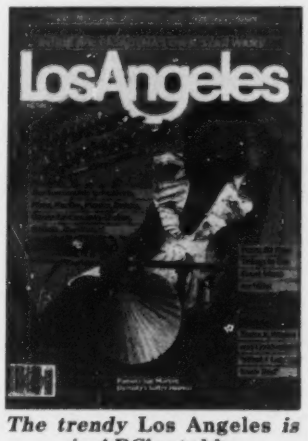
In addition, ABC Inc. plans to spend $110 million to $135 million on capital improvements in 1982.

In programing, ABC said the various commitments already in the house for movies, sports and other products totaled $1.34 billion at the end of 1981, 96% of which is payable over the next five years. These payments will range from a high of $500 million this year to a low of $49.2 million in 1986.

In the 28-week prime time season ended in April, ABC again finished as runnerup to CBS. But the gap was just .9 of a rating point, compared to a 1.6 point margin a year earlier. The company attributed the improvement to a blend of popular series, including newcomer "Fall Guy," movies like "Superman," "Grease" and "Close Encounters of the Third Kind," and specials like the Academy Awards. Hoping to narrow the gap further in the 1982-83 season, ABC has slated "The Winds of War" for the important February sweeps and "Thorn Birds" for later.

Last fall, ABC's most lucrative prime time series were "Love Boat" (asking $140,000 a 30-second spot), ABC Sunday movies ($125,000) and "Fantasy Island" ($120,000).

ABC said the network ranked



The trendy* Los Angeles *is in ABC's stable.

first in the key advertising category of viewers between 18 and 49 years of age. And in daytime, ABC dominated CBS in both the Nielsen homes and women aged 18-to-49 categories, paced by "General Hospital," "All My Children" and "One Life to Live." Although "General Hospital" has lost some of its ratings luster since its peak last fall, when the serial was the most popular daytimer ever, ABC executives plan to use it to launch a youth-oriented spinoff soaper.

ABC found itself engaged in tough ratings battles in late night ("Nightline" vs. NBC's "Tonight"), early morning ("Good Morning America" vs. NBC's "Today")—and even on Saturday mornings, where NBC children's programing threatens. ABC's weekend afternoon sports fare also has shown some slippage recently, although still ranking No. 1 in sports.

Late last month, ABC agreed to pay a reported $20 million to televise games of the new U.S. Football League, which plans to begin play next spring. The network reportedly will televise 20 games in each of the first two seasons.

NBC has seesawed many weeks in the No. 2 slot. As has happened to its rivals, ABC's growing ad volume has been offset somewhat by the costs of covering events, both expected (the royal wedding and the space shuttle) and unexpected (assassinations and attempted assassinations).

For ABC, 1984 already shapes up as a blockbuster sports year, with the network already having locked up more than $400 million in ad revenues out of a planned total of $610 million for the Winter and Summer Olympics. All told, ABC will have about 250 hours of tv coverage of the games, and another 100 hours on ABC Radio.

ABC executives described the owned tv stations division as "the most successful and profitable station group," leading in the ratings from sign-on to sign-off and in adult viewers aged 18 to 49. This operation's costs, not fully offset by ad sales, included advertising and research expenditures related to expansion of the local evening newscasts and early-morning shows.

ABC's radio division also continued to be active, lining up affiliates for the Talkradio and Superadio talk and music formats, respectively. ABC Radio Enterprises, in addition, seeks to acquire radio entities, such as Watermark Inc., Hollywood, purchased for its successful syndicated "American Top 40" series. This same operation's start-up costs have slowed ABC Radio division's earnings growth, however.

Its four veteran radio networks, with 1,800 affiliates, continued to climb in sales and earnings. The division added two demographically tailored networks, Direction (for ages 25 to 54) and Rock Radio (for 18 to 34).

The owned radio division also continued to grow, with three of its six am outlets claiming ratings leadership in their markets: KABC, Los Angeles, whose talk format inspired the Talkradio service; WMAL, Washington, and KGO, San Francisco. Former rock station WABC, New York, which for decades was the most-listened-to station in the nation, steadily lost ground in recent years to fm rock and this spring was forced to follow KABC's lead and become a talk station. ABC said WPLJ (fm), New York, finished last year as "the most-listened-to fm rock station" in the U.S.

In publishing, ABC is represented in both the consumer field via four "special interest" publications and in the trade field, through industry books from the Chilton, Hitchcock, Miller and Ames units as well as agribusiness magazines from Farm Progress Publications. Although this division posted sales gains in '81, its profits fell considerably due to write-downs at such units as R.L. White Co. plus economic pressures, including a weak farm economy.

ABC's growing involvement in new electronic media has both annoyed and worried some affiliates and shareholders, who wonder about the eventual impact these newcomers might have on ABC's No. 1 business, commercial television.

In recent weeks, ABC has signed new agreements involving at-home shopping/banking and pay-per-view (with Cox Cable Communications) and pay tv/video recording (via the Home View Network, using Sony hardware).

These join the upcoming Satellite NewsChannels joint venture with Westinghouse Broadcasting and the sports pay cable/pay-per-view projects due with ESPN and Getty Oil, as well as the currently operational ARTS and Daytime ad-supported cable services (both with Hearst/ABC Video Services) and vcr/disc sales via ABC Video Enterprises.

The ABC hierarchy acknowledges that while these ventures should make money "in time," they are not now significant revenue producers. Indeed, industry sources estimate ARTS and Daytime's combined ad sales in the low seven-digit neighborhood.

As Messrs. Goldenson and Rule explained, ABC is "more than a broadcaster" and so should be involved in the new fields, if for no other reason than to be there as home video erodes commercial tv viewing. Still, these executives expect any erosion of tv's share of audience to be offset by a growing tv audience base and John Severino, ABC-TV president, added that network tv should remain the "predominant" medium for mass marketers.

Mr. Rule said at this year's affiliates convention that ABC will continue to be "the engine that pulls the train, and we have no intention of depriving the engine of the fuel it needs."

How AA got its data

Companies were ranked by net operating revenues from media properties. Included were print media supported by advertising or circulation revenues or both.

Examples of media operations not supported by advertising but included in the calculations are newsletters and electronic information services paid for by subscribers. Book publishing was excluded.

Similarly, revenues generated from the operation of radio or tv stations, including over-the-air and cable stations, were included. Revenues generated from the "production" of tv films or other programing for use by broadcast or cable stations were excluded.

However, syndication activity was counted when companies were involved in traditional media. Occasionally, revenues from production could not be extrapolated from syndication or other broadcast activity. These exceptions were rare and are noted in the profiles.

Net operating revenues refers to revenues less commissions and discounts.

Many of the top 100 companies are privately owned and thus not required to disclose financial figures. In addition, many of the publicly owned companies do not report their figures in the detail required for our analysis. In both cases, officials of the companies were contacted for estimates. Generally, we found companies to be helpful in guiding editors to a close approximation of media-property revenues. As the individual company profiles demonstrate, we were also able to interview many company executives expressly for this special report. In those cases where companies were not helpful, editors used secondary sources believed to be reliable, as well as equations developed by leading media analysts to estimate revenues of individual newspapers or radio and or tv stations.

As far as Advertising Age can determine, no one has ever attempted a ranking of this sort. Like other such rankings, it is likely to be flawed by omission and commission. We welcome your comments and suggestions for improving the accuracy of this annual listing. AA

American Express Co.

American Express Co., New York, is the 70th largest U.S. media company, with 1981 media revenues estimated by Advertising Age of $113.6 million, including $88.6 million from its 50% partnership with Warner Communications Inc. in cable tv operations. As an entity,

that joint venture generated $177.2 million last year. American Express had estimated media revenues in 1980 of $72.4 million coming from Warner Amex and magazine publishing.

The company's total revenues last year were $7.2 billion, up from $5.5 billion in 1980.

The Warner Amex venture consists of Warner Amex Cable Communications Inc., which constructs and operates cable systems that provide entertainment programing and other services to residential and commercial subscribers, and a sister company, Warner Amex Satellite Entertainment Corp., which produces and distributes programing via satellite to cable systems throughout the country. Warner Amex increased both its cable and satellite programing operations throughout 1981 and into the first half of this year, with total revenues of the joint venture up nearly 90% from 1980.

The company's media operations also include two magazines, *Travel & Leisure* and *Food & Wine*.

In recent years, American Express has expanded its media businesses both through internal development and acquisition. This is in keeping with the company's over-all philosophy to grow in both traditional and new lines of business. The acquisition of Shearson Loeb Rhoades in June of last year (a $900 million plus transaction), as an example, provides a base for expanded financial services.

Growth at Warner Amex Cable Communications has been most striking, with the expansion of Qube, the two-way interactive system, from Columbus, O., to Cincinnati, Pittsburgh, Dallas and Houston. The Qube technology is the bellwether for Warner Amex Cable, which is betting on two-way technology as a rapid growth area. The next major revenue source for cable, Warner Amex appears convinced, is pay-per-view, which also would benefit Qube, a pioneer in its development and use of pay-per-view technology.

The Qube system already can be linked with a wide array of data banks and a variety of services. These include stock market information, airline and train schedules, personal finance management, catalog shopping at home and home security. In the last category, Warner Amex is by far the leader with some 5,000 home-security subscribers, about two-thirds of the total category in the cable industry. Warner Amex Security Systems in Columbus, O., offers fire, police and medical emergency services protection via application of Qube technology. Similar security services have been introduced in Cincinnati and Houston.

In 1981, there was an increase of more than 17% in subscribers to Warner Amex cable systems. Currently there are nearly 1 million basic cable and well in excess of 600,000 pay subscribers at Warner Amex's 146 cable systems in 27 states. This makes Warner Amex Cable the sixth largest multiple system operator in the country.

At the end of last year, homes in Warner Amex franchise areas nationwide totaled 3.4 million. The 26 new and anticipated cable tv systems won during 1981 account for a potential 675,000 of that 3.4 cable homes-passed total. Major franchise awards, to cite one situation, include the suburban Chicago area, where five communities awarded the joint venture franchises that have a potential market of more than 50,000 homes.

Warner Amex Satellite Entertainment Co, or WASEC, introduced MTV: Music Television as its third satellite-delivered service last summer. The 24-hour-a-day video version of a contemporary music radio station—aimed at the 12-to-34-year-old age group—quickly has managed to reach into some 4 million cable tv households via about 600 cable systems. It's distributed free to basic subscribers and has been picking up significant, if not abundant, advertiser support.

The Movie Channel claimed strong subscriber gains in 1981 for its feature-film pay service. Totals at the end of the year were 1.7 million subscribing households, a more than 188% increase over 1980, with 1,700 cable systems carrying the service. Five months into 1982, totals increased to 2.2 million subscribers via 2,150 cable systems.

Nickelodeon, advertiser-supported, is the self-styled "young people's channel." It is also on the upswing with the service, which reached 6.3 million cable households at the end of last year, and is currently available to more than 7.7 million basic cable subscribers. The 1,500 cable systems carrying Nickelodeon going into 1982 increased

WNEV: Never say never

By Nancy Tait

On May 22, at 6 a.m., a dream came true for David Mugar. He pushed a button and Boston's newest tv station, WNEV-TV, CBS affiliate Channel 7, went on the air.

For Mr. Mugar, a wealthy Bostonian whose Armenian immigrant father founded Star supermarkets, and his New England Television Corp., the moment marked the culmination of 13 years of legal battling to win the station from former owner RKO General.

The quest had begun in 1969, when Mr. Mugar's Community Broadcasting and Dudley Station Corp., a rival black-controlled Boston group, challenged RKO's request for a license renewal. They found fault with RKO's programing, noting, among other things, that the station, WNAC-TV, then an ABC affiliate, didn't even bother to carry the network news.

The challengers also thought the moral character of RKO's parent, General Tire & Rubber Co., under investigation by the Justice Department for illegal trade practices—including allegedly pressuring General Tire suppliers to advertise on RKO stations—should be considered in determining RKO's own fitness to be a licensee.

But in 1974, the Federal Communications Commission issued a preliminary ruling in RKO's favor: General Tire's alleged illegal activities—in a 1970 consent decree, the company had agreed, without admitting any guilt, not to follow the illegal reciprocal trade practices—did not disqualify RKO as a licensee.

"At that point, I decided we had lost the case," Mr. Mugar, 43, recalls. But he decided to persevere and "to see if there was anything we had overlooked about RKO or General Tire's character."

He says, "For me it was just common sense. If General Tire was guilty of wrongdoing, then RKO—which is owned 100% by General Tire and whose people sat on both boards—well, they had to be affected by that."

Mr. Mugar says he was acting on the presumption that "the FCC considers the character of a licensee very important." Looking back, he acknowledges that it was probably because he was a layman and knew nothing of FCC history—the commission had never refused to renew a license because of the misconduct of the station owner's parent company—that he kept up the fight.

In 1975, through a chance introduction by a mutual friend, Mr. Mugar met the man who was to help him win his case, a lawyer named Terry Lenzer, who had served as assistant chief counsel to the Senate Watergate committee. Mr. Lenzer, in turn, asked Scott Armstrong, a former Watergate committee investigator who had joined Mr. Lenzer's law firm (and since has joined the *Washington Post*) to help in the sleuthing.

Mugar: Dream come true

By the end of 1975, Messrs. Lenzer and Armstrong had compiled and delivered to the FCC a 640-page report describing what RKO itself later—but too late, it turned out—acknowledged to be a "plethora of corporate misconduct" by General Tire, including the keeping of secret slush funds for bribing foreign officials and making improper domestic political contributions.

On the basis of the report, Community Broadcasting asked the FCC to reopen hearings on the license. In arguing against the reopening, RKO asserted to the FCC that there was "no factual or legal foundation for this pyramid of charges" against General Tire.

That contention would come back to haunt RKO, because a court would later determine that at the very moment RKO was asserting the innocence of its parent company it knew that the Securities & Exchange Commission had launched an independent investigation of General Tire.

In 1976 the SEC filed a civil action against General Tire, charging it with many of the activities described in the Mugar group's report to the FCC. General Tire agreed to another consent decree, part of which required an investigation by the company's outside directors into the allegations.

Only when that report was issued in 1977 and acknowledged "a plethora of corporate misconduct," as a court that later reviewed the report said, did RKO concede to the FCC that the charges might have merit.

Mr. Mugar thought this surely would cause the FCC to reopen the hearings, but it did not. "The FCC sat on those findings," he says. Indeed, the FCC didn't move until 1978, after Mr. Mugar had struck a deal with RKO, which apparently was becoming weary of the whole thing and increasingly unsure of the outcome, to buy the Boston station for $54 million. The FCC had to okay the sale, and in the process of doing so had to consider the damaging information that had been brought before it.

It was at this point that Mr. Mugar and Bertram Lee, president of Dudley Station Corp., together formed New England Television. "We had to," Mr. Mugar says. "There was no other way to get the case resolved. The FCC would accept nothing less than an agreement among all three parties in the case. Our partnership, like many others, started out of need. And we've stayed together out of need."

In a four-to-three vote in January, 1980, the FCC finally ruled that it would not renew RKO's Boston license, as well as its licenses in Los Angeles and New York.

In effect, the FCC said, the sins of the parent were indeed visited upon the child. Among the more damaging circumstances, reportedly, was that Thomas O'Neill, chairman of General Tire, also was chairman-ceo of RKO General.

RKO appealed the FCC action to the U.S. Court of Appeals, only to find its earlier "failure to come forward with a candid statement of relevant facts," *i.e.*, the SEC investigation, had caught up with it. The court upheld the FCC action, saying that "the record . . . shows irrefutably that the licensee was playing the dodger."

The court said, however, that RKO's "lack of candor" applied only to the Boston situation and not to proceedings involving license challenges to RKO stations in Los Angeles and New York, which are continuing.

RKO asked the U.S. Supreme Court to review the FCC decision, but the court refused to do so. New England Television was the earliest and only recognized applicant for the station, and Messrs. Mugar, Lee and associates found themselves, at last, with a tv station. The company paid $22 million for the station's assets; the station is probably worth $150 million, Boston tv analysts say.

Mr. Mugar is chairman of New England Television and controls about 40% of its stock. Mr. Lee is senior vp and one of three blacks on the board of directors.

Mr. Mugar says blacks own about 13% of the company, which he says gives it the highest minority representation of any major tv station. Edward Fredkin, an MIT professor of computer science, is president-ceo. The shareholders and management are either native Bostonians or live in Boston.

"We feel the local ownership of the station will prove more responsive to the needs of the Boston community," Mr. Mugar says.

He notes that the station's general manager, Winthrop Baker, who began his job June 2, was general manager of WBZ-TV in Boston from 1968 to 1973 and "has lived in Boston for many years. He's aware of its needs. The time he worked at WBZ was a very crucial one in Boston's minority crisis."

Channel 7 is only the second major tv station in U.S. history to have the license of its owners revoked by the FCC. The first was Channel 5, also in Boston, lost by the Herald-Traveler Corp. in 1972 because of a Herald-Traveler official's improper meetings with an FCC official.

Channel 5 was then taken over by a group of local investors promising more local programing. By nearly all accounts, Channel 5—WCVB-TV—has lived up to that promise.

Ironically, the same week that WNEV-TV went on the air last month, with the promise of better programing than was offered under RKO's absentee corporate ownership, an ownership change was also completed at WCVB-TV. There, the local owners sold the station, for a record $220 million, to Metromedia Corp., a New Jersey-based broadcasting company that has at best, according to industry followers, a mixed record in local programing. AA

Nancy Tait is a business writer based in Chicago.

to 1,725 by May 1.

Next up for WASEC is probably a shopping channel, the timetable for which has undergone a number of revisions.

WASEC is not yet a profit maker for Warner Amex, but the cable tv operation claims to be making money. WASEC also was the largest single seller of national cable tv advertising last year, not only via its own services but by representing Turner Broadcasting System for all advertising sales for Cable News Network and Cable News Network 2 (also see Warner Communications profile).

Warner Amex supposedly is developing technological, creative and marketing ties with Amex's Communications division. The division expanded in an important way when it acquired Mitchell Beazley Ltd., a London-based international publishing concern. Beazley is developing video programing capabilities via a co-production and distribution agreement with the Video Programmes division of Thorn EMI, an international video and music company. The agreement provides for the two companies to produce and distribute specially created video entertainment for the international broadcast and cable tv markets. Beazley claims a number of big selling books and publications, including "The Joy of Sex" and "Random House Encyclopedia."

During 1981, the American Express Publishing Corp.'s two magazines were said to have enjoyed "marked" growth. The profit-maker, *Travel & Leisure*, chalked up record advertising revenues and linage. Ad revenues were up 20% to $18,939,222, according to Publishers Information Bureau, and linage 13%. About 85% of the magazine's subscribers are American Express credit cardholders.

Food & Wine increased its advertising rate base 50% to 300,000 during 1981. On Oct. 1 of this year that rate base is scheduled to rise again, to 400,000. *Travel & Leisure*'s rate base is 925,000.

Ad pages last year at Food & Wine totaled about 300, bringing in ad revenues of $1.6 million, according to PIB. A 30% to 40% increase in linage is anticipated this year. *Food & Wine* recently began offering regional breakouts. Eastern edition has a circulation rate base of 100,000. Western edition's base is 70,000. Life Styles Impact Plan, or LIP, allows advertisers to purchase space in both magazines, either in national editions or regionals. Together the two magazines are estimated to have delivered more than $18 million to Amex's total media revenues.

Army Times Publishing Co.

Army Times Publishing Co., Washington, is the country's 93rd largest media company, with 1981 media property revenues estimated by ADVERTISING AGE at $63.3 million, out of estimated total revenues of $94.4 million.

In 1980, the privately held company had estimated media revenues of $55 million out of estimated total revenues of $82.5 million.

About two-thirds of total revenues came from publishing and the remainder from commercial printing and telephone sales of subscriptions for other periodical publishers.

Army Times' Journal newspapers division, which publishes five daily suburban newspapers in the Washington area, began five-day-a-week publication last September, shortly after the *Washington Star* folded. The current daily circulation of 144,017, an ABC figure for the three months that ended last March, reflects a 14% increase in readership since the papers went daily.

However, Journal newspapers is the only part of Army Times Publishing that operates in the red. That's because the switch from a twice-weekly to a daily format required a huge, up-front investment that hasn't begun to spin off profits yet. That is expected to come about in a year or two.

"We decided to defer profits in order to have the long-range profitability of a five-day-a-week vs. a two-day-a-week paper," Henry L. Belber, executive vice-president, said. For now, Army Times will continue to invest in the Journal papers because the company anticipates further growth in that market, he said.

Although it has been rumored that the Journal newspapers were planning to enter the Washington metropolitan area, an Army Times spokesman insists that the company has no such plans. Army Times is best known, of course, for *Army Times* and its kin, *Navy Times*, *Air Force Times* and *Federal Times*. These papers quietly go about their business of providing newspapers to military and other government employes and have reached a combined current circulation of 330,000. The papers' principal target market,

the number of persons in active military service, has remained steady at 2 million for the past five years.

Last year was the company's best to date, but "the first quarter of '82 has come up even better than the year before," Mr. Belber said.

He suggested the company's financial health should get even better once the Journal papers reach the profitability expected of them. In addition, the company's profitable printing division is likely to become much more so when Army Times presses begin rolling out 120,000 copies a day of Gannett Co.'s new national daily, *USA Today*, for the Washington market this fall. Army Times and Gannett signed a printing contract recently after the satisfactory printing of two *USA Today* prototypes.

Army Times also is looking at opportunities that may present themselves in related areas like broadcast and cable. The company sees a role for itself in providing programing for Washington-area cable tv systems once the market is wired.

A.H. Belo Corp.

A.H. Belo Corp., Dallas, publisher of the *Dallas Morning News*, is the nation's 45th largest media company, with media property revenues of $180.1 million in 1981, of which $121 million or 66% came from newspaper publishing, and $59 million or 32% came from tv and radio broadcasting. Total revenues were $182.3 million.

Media revenues were up 20% from $150.6 million in 1980, which was 96% of total revenues of $157.6 million.

Belo became a publicly owned company last year, although about 42% of its stock remains in the hands of the Dealy family.

Total advertising revenues of the *Dallas Morning News* were $102.3 million in 1981, an increase of 18% from 1980. Revenue increases were the result of higher ad rates and additional ad linage.

Total advertising revenues for WFAA-TV, Dallas, were $41.9 million, up 17% from 1980.

The Dallas Morning News ranks third in the nation in classified ad linage and commands a 57% share of newspaper classified advertising in the Dallas market. The News also surged ahead of its archrival, the *Dallas Times Herald*, in retail ad linage, for the first time in more than 50 years.

Since 1980, Belo has invested more than $2 million in Belo Information Systems On-line Network (BISON), a videotex system, said to be the first such commercial system in the nation. But in May, 1982, Belo said it was suspending operation of BISON until market conditions improve. Only 200 subscribers had signed up for the $10-a-month service that included news stories from the *News* and wire services, financial information, airline schedules and other consumer information.

Competition between the *News* and Times Mirror Co.'s *Times Herald* reached a new pitch this year as the *Times Herald* continued bragging boldly about being dominant in the market, while the *News* overtook the *Herald* in ad linage and asserted its own dominance. Both newspapers expanded news coverage to compete, opening news bureaus around the world and across the nation.

Significant personnel changes at Belo this year include the retirement of Mike Shapiro as president and chief executive officer of Belo Broadcasting Corp. and the appointment of Ward Huey as his successor, moving from executive vp.

Also, Martin Greenberg was named vp/radio at Belo Broadcasting (formerly president, ABC-FM, New York); Dorman Cordell was named chairman and chief executive officer of News-Texan (formerly chief of Texas operations for Associated Press), and Dave Smith, former sports editor of the *Boston Globe* and of the *Washington Star*, was named executive sports editor of the *Morning News*.

Providing assistance

In addition to the Advertising Age reporters and editors in all bureaus and free lance writers who wrote media company profiles for this issue, the following people did yeoman work producing this Special Report: Craig Endicott, Ann Helming, Sarah Stiansen and Nancy Tait.

Bergen Evening Record Corp.

The Bergen Evening Record Corp., Hackensack, N.J., is the country's 84th largest media company, with media property revenues of $79.3 million in 1981, or 99% of total revenues of $80.4 million.

The family-owned company's media revenues in 1980 were $73.1 million out of total revenues of $74.2 million.

The corporation's Bergen County-based flagship, the *Record*, the largest evening newspaper in New Jersey, and its semi-weekly *Ocean County Reporter* out of Toms River, N.J., ran up combined circulation and advertising revenues of $61.3 million, the *Record* contributing $59 million of that.

Revenues credited to Gateway Communications, the company's broadcasting division based in Cherry Hill, N.J., hit the $18 million mark, a jump from $16.5 million in 1980.

The *Record* is in the midst of a $62 million upgrading project, highlighted by the purchase of two Japanese-manufactured high-speed offset presses and pilot installation of the Swiss-made Ferag inserting system.

The presses, scheduled to be on line in late June, will enable the *Record* to become a full-color newspaper and what corporate officials claim will be the most modern paper in the country.

Already the *Record* is analyzing the possibility of launching a morning paper that would vary in style from the evening publication. A final decision is expected in the fall. However, the *Record* has made it clear that if the *New York Daily News* should fold before research is completed, the Bergen County paper immediately will begin publishing a morning tabloid.

Circulation of the *Record* in 1981 was 146,694 daily and nearly 200,000 on Sunday. While yearend audits reported a slight drop in circulation, which the *Record* claims is "common to today's patterns," 1982 figures to date have pleased company officials.

"Sunday circulation has been growing . . . our daily figures have just begun to show a small plus over the same period last year," said Bob Sapanara, circulation director. He said the gains mark the beginning of a reversal of the circulation decline.

Total full-run linage in the *Record* in 1981 was close to 51 million lines, a 1.4% increase from 1980. General ad linage increased more than 8%, offsetting declines in retail linage.

The new presses will enable the *Record* to produce up to 32 pages of spot color and up to 16 pages of process color in a 96-page publication. The *Record* now has the capacity to print editorial process color on all section fronts and advertising process color on all section backs.

The already-in-use Ferag system allows automated on-line insertion of preprinted material and off-line storage. The Ferag's speed will aid the handling of a growing volume of inserts in the *Record*. In 1981, approximately 114 million pieces were inserted by the paper.

Record board chairman Malcolm A. Borg said the company is excited "about introducing a high-quality color product into a black-and-white newspaper market. We anticipate enthusiasm by readers and advertisers alike."

In existence for 87 years, the *Record* has been owned by the Borg family for more than half a century. Since January, when Gregory Borg sold his 13.5% interest in the corporation and resigned as executive vice-president, the company has been wholly owned by Malcolm Borg and family trusts. Gregory Borg remains on the board of directors.

The company's entrance into new areas of communications is illustrated in the *Record*'s agreement with CBS and AT&T to supply news and service material for the highly publicized CBS/Venture One project which will test videotex in 200 Bergen County residences. Through a computer hookup, the *Record* will supply news and other material to Venture One. The paper in 1981 also produced a series of news programs over local cable television stations and is analyzing more involvement in that field.

These communications experiments are being undertaken, according to *Record* president Michael H. Heath, not with a view to making immediate profit but to "gain some front-line experience in these avenues."

Mr. Heath also said that the modernization "gives us capabilty to do many things . . . the outlook is broader than ever before."

No major changes again were reported at Gateway, whose stations reportedly continue to make headway in syndication.

Blade Co.

The Blade Co., Toledo, O., is the nation's 65th largest media company, with 1981 revenues estimated by Advertising Age at $122.6 million, all from media operations. The privately owned newspaper, broadcast and cable company had estimated revenues of $118.7 million in 1980.

In a significant recent development, the company after several years of effort succeeded in getting Federal Communications Commission permission for Buckeye Cablevision, a wholly owned subsidiary, to unite its program offerings.

Savvy goes a long way

Some readers of Judith Daniels' *Savvy* have thanked her for not making her magazine a feminist vehicle. She says that breaks her heart.

Savvy is admittedly written for the "haves"—those well-educated women whose household incomes average $40,000 a year. That means "we may be elitist," Ms. Daniels says, "but that doesn't mean we're socially irresponsible."

Make no mistake—at age 43, Ms. Daniels thinks of herself as a feminist. *Savvy's* June issue this year carries a "Lamentation," an Editor's Note signed by executive editor Susan Edmiston, that mourns the probable death of the Equal Rights Amendment—"a historic defeat for women."

Ms. Daniels comments: "A lot of women now are going to law school and medical school and business school, but they don't see the generations of fighting that made that possible. And they're reluctant to see how laws [that gave them opportunities] can be changed back."

Even so, her magazine isn't a political vehicle, Ms. Daniels says. *Savvy* speaks to the "whole woman," sometimes in ways that some fast-track female executives might not find easy to swallow.

Along with stories on corporate power plays and investment strategies, the June issue talks about working mothers. The question: Are they cheating their children, and themselves?

In a sense, Judith Daniels is her magazine. She first thought of *Savvy* back in 1975 because "there was no single magazine talking to women I saw every day of my life"—the high achievers who loved their jobs but liked men, and family life, too. She left her job as managing

Daniels: A pragmatist

editor of *Village Voice* to work on the magazine idea fulltime for four years before its launch in January, 1980. She gives "most of her time and energy" to it as editor-in-chief of the magazine, published by Savvy Co.

But *Savvy* is a business, and Ms. Daniels is a pragmatist. There's been talk that Playboy Enterprises, recovering from recent jolts, is looking at possible magazine acquisitions. *Savvy* could be one of them.

Of that possibility, Ms. Daniels says: "Mergers happen in business, and that's never frightened me. Playboy is a first class publishing operation. [Merging with them] wouldn't bother me at all." AA

Previously, there were instances in which the cable system had to show different programs—on the same channel—to residents of Toledo and surrounding areas. For the first time, said John Karl, president of Buckeye, the cable company was able to present a unified marketing effort to Toledo residents in late 1981 and early 1982.

In January, 1982, the Blade Cable News came into being. News, provided by reporters for the *Toleao Blade*, the company's flagship media holding, is aired on one of Buckeye's channels from 6 p.m. to midnight seven days a week. It appears in the form of text flashed on the screen, in 16 colors with simple character-generated graphics.

Buckeye has added the CBS Cable Network to its list of offerings. It also has launched a drive to solicit national as well as local advertising for some of its cable channels. Solicitations for advertisers are appearing on various cable networks, and are generating interest, Mr. Karl said.

The system has experienced steady growth, growing from 68,000 households subscribing last year to slightly more than 72,000 subscribers currently. Mr. Karl said Buckeye is strengthening the already existing marketing efforts, which include ads on local television, radio, outdoor and in the *Toledo Blade*.

Two other cable systems owned by the Blade Co., one in Monroe, Mich. and the other in Sandusky, O., are holding their own. The Sandusky operation added 800 subscribers last year, growing to 14,000 subscribers. These operations were purchased by the Blade Co. in early 1981. In Monroe, the company has become one of the country's pioneers in experimenting with two-way cable tv.

A two-way stretch of wiring has recently been completed. It will give 800 homes the capability of simple response to cable programing. Consumers will be able to reply by touching panels that allow four to 15 responses. At the moment, the operation will not allow for full hookup with a home computer or terminal that would allow for complex responses.

All of the cable systems have added channels and offerings during the past year. The most recent addition will be a *Blade* sports and financial news network, slated to appear in the Toledo-area program offerings sometime in the next few months.

Things have been quieter for the *Toldeo Blade* and the company's three other newspaper holdings. Despite being the only paper in town, the evening *Blade* is, like most other newspapers, suffering from the economy and a decline in advertising linage. Ad revenues for the *Blade* in 1981 were slightly better than in 1980, but linage was down.

Ad revenues so far in 1982 are slightly below 1981 levels, said Ben Magdovits, director of advertising for the *Blade*. "The display advertising situation is a little discouraging right now," he said. "We're giving back about half the gains we made in 1981. And printing costs are continuing to rise. A change in the economy would really help."

The economy has created problems for some of the *Blade*'s advertisers, as well. Wickes Furniture Stores, a heavy advertiser, filed for reorganization under Chapter 11 of the bankruptcy laws and no longer advertises. In fact, lamented Mr. Magdovitz, 14 active *Toledo Blade* advertisers went bankrupt during the past year, victims of industrial Ohio's depressed economy.

But the paper's circulation has remained stable, he added. Despite the well publicized problems of evening papers, the company has no plans to switch the Blade to a morning paper or add a morning edition. The other Blade Co. newspapers have managed to avoid significant falloffs in business, as have its two tv stations and one radio station.

The company, owned by brothers Paul Block Jr. and William Block, remains in family hands as it has since 1926. The *Toledo Blade* this year marks its 182nd year of publication.

CBS Inc.

CBS Inc., New York, is the country's second largest media company with revenues of $2.18 billion from media operations in 1981, or 53% of total revenues of $4.13 billion.

In 1980, CBS had media revenues of $2.001 billion and total revenues of $4.06 billion.

Its original and most lucrative business, broadcasting, provided $1.92 billion of the multimedia conglomerate's revenues for the year. Nine magazines, including a newcomer, and the Sunday newspaper supplement, *Family Weekly*, contributed the remainder of media revenues.

Thanks to the CBS/Broadcast Group, CBS Inc.'s operating income managed to hold steady at $190.4 million last year, despite sharply rising tv programing costs, heavy investment in cable networking and a disappointing showing from the publishing group.

However, the cost of shutting down the mass market paperback book unit cut net income to $163.8 million from 1980's $189.7 million.

The CBS-TV Network, the corporate family's star advertising vehicle, maintained a comfortable edge in the prime time Nielsen ratings but continued to lag behind rival ABC-TV Network in billings. ABC-TV, according to Broadcast Advertisers Reports estimates, pushed past the $2 billion mark, considerably ahead of CBS-TV's $1.898 billion.

Even in the midst of celebrating the fourth consecutive prime time audience win, CBS execs could sense nagging signs of trouble ahead at CBS, because of the company's sluggish financial performance and the desire of volatile chairman and founder William S. Paley to be No. 1 in as many things as possible.

ABC's strength in the influential May local tv rating sweeps could be a harbinger of a closer nighttime race next fall. Locally, in markets where they compete head on with owned and operated stations, ABC generally outclassed CBS in the crucial November '81 sweeps, and looked particularly good with the sponsors' darlings, women 18 to 49. In New York, WCBS-TV was third to WABC-TV and WNBC-TV in sign-on to sign-off audiences, deflating the CBS station's advertising rates.

The pressures appear to be strongest at CBS News, now headed by Van Gordon Sauter, formerly of CBS Sports, who succeeded the retiring Bill Leonard. CBS News nervously watched viewers begin to sample other channels after Dan Rather was promoted somewhat earlier than originally contemplated to succeed Walter Cronkite as anchor on the "CBS Evening News."

A pinch of show business, including the loosening up of a sweater-garbed Mr. Rather, is credited with helping to hold off the advancing ABC "World News Tonight," but the competition remains tense. Mr. Sauter also must breathe life into the floundering early-morning wakeup show. Even with fresh faces and slicker promotion, this show usually runs far behind ABC's "Good Morning America" and NBC's "Today" in the Nielsens.

At the same time, CBS has been responding to news competition from Turner Broadcasting System in Atlanta. After Ted Turner began assiduously wooing over-the-air stations for his Cable News Network 2 lineup, an offer especially appealing to telecasters looking for overnight fare, CBS countered with its own bartered late-night news service. Several CBS affiliates bought the Turner service.

CBS spent $40 million on cable tv research and development last year. Its principal cable venture, CBS Cable, so far has had more success amassing press clippings than cable subscribers and affiliates. The pop cultural miniservice attracted more advertising than Hearst/ABC's ARTS, but not nearly enough to absorb the red ink. Many industry observers expect CBS Cable to be revamped once CBS/Fox Inc. gets rolling. Some think it will change quickly into a premium pay tv operation.

A restated 1982 first-quarter financial report dramatized the impact of the heavy investment in the developing technologies. The revamp, which dropped net income 14% to $12.2 million from the $14.2 million originally reported, was made because CBS decided not to defer the CBS Cable Network losses. Earlier, it had planned to include its cable operations in a joint cable venture with Twentieth Century-Fox Film Corp., starting with the second quarter, but the venture hadn't been finalized in time.

CBS/Fox will produce software for all the new video forms and will put CBS into the premium pay cable market for the first time. CBS is testing the marketing potential of teletext, using the vertical blanking interval to broadcast text and graphics material to home receivers over its Los Angeles station. Videotex, a cabled text system capable of two-way communication, will be tested in conjunction with American Telephone & Telegraph. CBS is not likely to market both on a major scale.

Some analysts believe ABC has outdistanced CBS in product development for over-the-air stations with its proposed Home View Network. ABC will test subscription tv to deliver movies and other pay attractions to videocassette recorder homes late at night, for playback at their convenience.

In 1981, CBS broke the regulatory line against Big Three tv network ownership of domestic cable companies. The Federal Communications Commission granted the network a waiver to own systems serving up to 90,000 homes for experimentation with the new techniques. The company had no difficulty buying Blackhawk Cable Communications in the Dallas/Fort Worth suburbs, but hit a snag in a bid for a newbuild franchise assignment in Alameda, Cal. The winner was United Cable, the country's 12th largest multiple systems operator.

At the publishing group, headed by Peter Derow, magazine ad pages in 1981 fell slightly from 1980, although the group's nine magazines and *Family Weekly* posted a 5% gain in ad revenues. But earnings for CBS/Publishing Group fell slightly last year.

The company's total number of magazines remained constant, but there was a change in titles. CBS sold *Pickup Van & 4WD* and acquired *Cuisine* after that magazine filed a bankruptcy petition. *Cuisine* has done exceptionally well in revenues, up 80% in the first quarter this

year, and pages, up 58% in the quarter, but the company has decided to cut the magazine's circulation base of 750,000 by 25,000 and to lower ad rates 3.3%.

Over-all pages for the group were down about 6% for the first quarter, while rev nues inched up 1%.

There were fewer traumatic personnel shifts than usual at CBS Inc. The CBS/Broadcast Group was restructured under president Gene Jankowski. Two group exec vps were added: James Rosenfield, formerly president of the CBS-TV Network, and Thomas Leahy, promoted from senior broadcast vp.

Robert Krefting shifted from head of special-interest magazines to president of consumer publishing, and Peter Diamandis of Gruner & Jahr replaced Peter Bonanni as publisher of *Woman's Day*.

Mr. Paley and Thomas Wyman, in his second year as CBS Inc. president, have assured stockholders that CBS will continue to be the preeminent provider of entertainment and information for the consumer at the end of the 1980s just as it was at the beginning. The technological explosion not withstanding, that leadership still will rest mainly on the appeal and strength of the CBS-TV conventional, over-the-air network, they predicted.

CSX Corp.

CSX Corp., Richmond, Va., is the 96th largest U.S. media company, with media property revenues of $61.6 million last year, from its Florida Publishing Co. and Clay Video subsidiaries. CSX Corp. is primarily a railroad holding company; its total revenues last year were $5.43 billion.

Media revenues were up 12% last year from $55 million in 1980. They came from cable and newspaper properties.

Florida Publishing, publisher of the morning *Florida Times-Union* and the evening *Jacksonville Journal* in Jacksonville, Fla., has always been owned by a railroad. In 1974, Seaboard Coast Lines Railroad gained 100% control of the company, and when Seaboard merged with Chessie Rail System in November, 1980, Florida Publishing became a wholly owned subsidiary of the newly formed CSX Corp.

Florida Publishing also owns *The St. Augustine Record*, a six-day publication with a circulation of 10,000, and the weekly Crescent City *Courier-Journal*, with a circulation of about 2,000 readers.

In the past year, Florida Publishing sold the *Flagler Tribune* and the *Ormond Beach Halifax*, which both served the Daytona Beach area, to the *Daytona Beach News Journal* for an undisclosed price.

According to Joseph Butler, vp-finance with Florida Publishing, the company decided to sell the Daytona Beach properties when it determined that the area's population growth wouldn't meet projections. In addition, Mr. Butler said, it was difficult for the two papers to compete with a strong, daily newspaper. Florida Publishing believes its divestitures were well timed, he said: "We were able to realize substantial gains in terms of both properties."

Florida Publishing expanded its printing operation last year to be able to offer a commercial printing service. A new offset printing press was installed at the company's St. Johns publishing division in St. Augustine, Fla., to accommodate the commercial printing venture. Florida Publishing also does commercial printing at its Jacksonville headquarters. Preprinted advertising inserts provide substantial revenue opportunities, the company said.

In the early 1970s, Florida Publishing acquired a 20% interest in Area Communications, a cable system that serves 55,000 subscribers in the Jacksonville area. Since that acquisition, it has diversified and grown modestly in cable.

Area Communications was granted a 15-year cable franchise for the city of Jacksonville in 1978. The system's initial phase of construction should be completed by year's end, by which time Area Communications expects to serve 70,000 subscribers.

Coast Line Communications, set up by CSX in November, 1980, is a separate subsidiary designed to provide marketing and advertising services both for CSX's cable systems and outside cable companies. Coast Line has an agreement with Area Communications and other systems to provide advertising inserts for local advertisers using its own inserts and those made available by cable networks such as Ted Turner's Cable News Network and the CBS cultural cable service.

Coast Line's production capability is being used by CSX's own 24-hour local news and information cable tv channel—Cablevision 12. The channel, which operates on the Area Cablevision systems, provides information to viewers in alpha-numeric form. Cable news staffers at Florida Publishing feed local and regional news, sports and other information to the channel's 50,000-person audience in Jacksonville. The system also has teletext wire service feeds.

Cablevision 12 also produces experimental video programs. This, Mr. Butler said, "is letting us get our feet wet in cable programing." Offerings include consumer-oriented programs like "Auto Shop," "Consumer Kitchen" and "Reporter's Notebook," a live, call-in show.

Clay Video, CSX's wholly owned cable subsidiary, currently reaches 10,000 homes in suburban Clay County, which surrounds Jacksonville. The cable subsidiary was acquired in August of 1980.

Clay Video has made three small cable acquisitions. One is an additional franchise for Clay County. The second is a municipal franchise for a system that is yet to be built in an adjoining county. In January, 1981, Clay acquired the Fernandian Cable Television Co., which serves a resort area in the northeastern corner of Florida. The system has around 2,800 subscribers.

CSX's media subsidiaries are continually seeking out profitable opportunities in media, and have several new media ventures pending. "We want to be a diversified communications company —not just a newspaper publisher—and one that serves a specific geographic area," Mr. Butler said. "Our commitment is to southeastern Georgia and northeastern Florida."

Some unreclusive comments

By Ann Helming

It seems that life isn't getting any easier for the multimillionaire wheeler-dealer. Take the case of Edward L. Gaylord, the 62-year-old "reclusive" head of Oklahoma Publishing Co., a little concern worth about half a billion dollars.

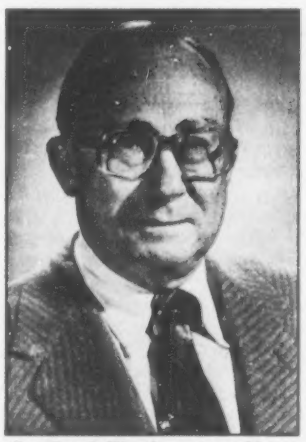
Mr. Gaylord is reputedly one of the richest and most powerful men in his oil-rich state. Much of the power, as well as the wealth, is inherited. Mr. Gaylord is the son of Edward King Gaylord, an Oklahoma pioneer who looms large in the history of the state.

The elder Mr. Gaylord also cast a long shadow on his son. Edward King Gaylord ran Oklahoma Publishing until his death at the age of 101 eight years ago. It was only then, at the age of 54, that Edward L. Gaylord was allowed to show that he might be more than just his father's son.

In attempting to do that, partly by extending the company's media holdings and adding acreage to its assets, he has generated a fair amount of controversy in the state, as well as some unfavorable comparisons with his father: He doesn't wield authority nearly as effectively as Edward King Gaylord, it's said. He doesn't command as much respect. He is aloof.

In an interview, Mr. Gaylord rejects such characterizations as unkind cuts. He says he is anything but a loner, spending about half his time on "civic" activities, such as the Oklahoma Industries Authority, Oklahoma Christian College and the Cowboy Hall of Fame, which Mr. Gaylord says is "a major tourist attraction in the state."

It's his 20-year chairmanship of the Oklahoma Industries Authority, a development trust affiliated with the state Chamber of Commerce, that he's proudest of, Mr. Gaylord says. True, the tax-exempt body did run into problems with the state's attorney general, who wanted a look at its books a while back, a request that Mr. Gaylord politely declined. Some people in the state have suggested that the authority has been run in part for the benefit of its trustees; Mr. Gaylord stoutly denies that and points to the more than 200 plants, among them a General Motors assembly plant, and the thousands of jobs he says the authority has brought to the state.



Gaylord: Work, not welfare.

Mr. Gaylord's word for himself, and his holdings, is "conservative." He says his two Oklahoma City newspapers, the *Times* and the *Daily Oklahoman*, his "most significant properties," are "conservative—not bubble-headed like the *New York Times* and the *Washington Post*."

He himself is a registered Democrat, but "not very proud of it," and has voted Republican for the last 30 years. "Ronald Reagan is a great American and we're all for Reaganomics," he says. To the obvious question, then, Mr. Gaylord explains that he keeps his Democratic registration so he can vote against especially loathed Democratic candidates in state primaries.

Mr. Gaylord serves Oklahoma Christian College as head of its board of directors because, he says, "They teach young people to work for a living, not to go on welfare." He and 25 other business leaders, mostly Oklahomans, helped raise $15 million to build an institute called Enterprise Square U.S.A. that will open on campus in November. Its aim, he says, is to "foster free enterprise," a system that he readily admits has served him well.

Meanwhile, back at the ranch, Mr. Gaylord's diversification moves for Oklahoma Publishing include some land buys up north, between Colorado Springs and Denver, that he says have good long-term development prospects.

The biggest buy, just a year ago, was $11 million invested in a ranch. Oklahoma Publishing also has added a film production company, a radio station, two tv stations and a newspaper in Colorado Springs in recent years. Plans are in the works for more tv and movie production, which Mr. Gaylord says looks "very profitable."

Some other ventures haven't panned out. After three years of fighting for control of Standard Metals Corp., a Colorado gold and silver mining operation, Mr. Gaylord and a partner backed off. He now says he would sell his 25% stake in the company "if we could find a buyer."

In the course of becoming his own man, Mr. Gaylord has upset a number of people, including the folks at an Oklahoma City tabloid who reportedly printed up some bumper stickers proclaiming that "Will Rogers Never Met Eddie Gaylord."

People who talk like that are just "enemies," Mr. Gaylord says. AA

Ann Helming is a business writer in Chicago and frequent contributor to Magazine/Special Report.

Cahners Publishing Co.

Cahners Publishing Co., Boston, is the country's 59th largest media company, with revenues of about $130 million from media operations for fiscal 1982, which ended March 31. That's an increase of 30% from fiscal 1981 media revenues of $100 miliion.

Media revenues represented 75% of the company's total revenues of about $160 million last year, up from the previous year's total revenues of $150 million.

Cahners is the U.S. operation of United Kingdom-based Reed Holdings Inc. Media revenues of Cahners came from 28 trade magazines, most of which have controlled circulation. Media revenues, therefore, are primarily from advertising.

In January the company reorganized, combining its Boston and Chicago magazine divisions into one, and dividing the magazines into four groups based on subject matter.

A new management structure was put into place as well. J. A. Sheehan was named president of the united magazine division. He had been president of the company's Chicago operation. William M. Platt, who had been president of the Boston division, was named exec vp of the unit.

The company named group vps for each of the four publishing groups. Ellsworth Brown, formerly publisher of *Purchasing*, heads the manufacturing industries group; Harold J. Sugarman, publisher of *Building Supply News*, tops the building/construction group; former *EDN* publisher H. Victor Drumm is group vp of the electronics/computer group, and *Restaurants and Institutions* publisher David Wexler heads the foodservice group.

In an interview at the time he was named president of the magazine group, Mr. Sheehan said the company plans to continue its past growth rate through "an aggressive acquisitions policy and an aggressive attitude toward launches." Since the end of 1981, however, there have been no acquisitions or launches on the part of Cahners.

Mr. Sheehan also said Cahners is interested in general circulation and newsstand publications, both consumer and business, indicating that a general circulation opportunity would be through acquisition, not a Cahners launch.

Although the company's results show gains for this fiscal year, "the place we have really been hurt is in the tight construction industry," Mr. Sheehan said.

Cahners also operates the Exposition Group as an adjunct to its magazines. This group produces publications that are distributed at industry trade shows.

Capital Cities Communications

Capital Cities Communications, New York, is the country's 15th largest media company, with 1981 revenues of $573.8 million, all from media operations. Net income was $80 million vs. the $70 million posted a year earlier, when revenues were $472.1 million.

Well over 60% of the publicly owned company's revenue was derived from its magazine and newspaper holdings, with the remainder coming from broadcast and cable properties.

By all accounts, the company's most significant accomplishment in 1981 was its becoming a major factor in the cable tv business with the acquisition of Cablecom-General for $139 million.

Combining Cablecom's systems with a few already under Capital Cities control gave the company 51 separate systems operating in 16 states. Capital Cities said it expects a positive earnings contribution from its cable systems by this year's fourth quarter.

Capital Cities, until 1968 exclusively a broadcast company, has found that cable tv is winning viewers with some of its alternative offerings, particularly with theatrical films and some sports events.

The company has noted that "there is little doubt that there will be a continuing gradual reduction in audience totals delivered by the three commercial networks, and therefore our stations as well."

The company added that, "while we are not alarmed by this trend," it makes it even more important that Capital Cities stations "excel in all programing efforts, especially local and regional news."

In 1981 the broadcasting division posted a 16% gain in revenues to $193 million. Television stations enjoyed a 20% gain in national spot sales and a 14% increase in local sales. Meanwhile, its owned radio stations posted an over-all 11% revenue gain, with Fort Worth and New York properties making above average gains.

Of the six vhf stations owned by Capital Cities, its outlets in Philadelphia (WPVI-TV), Houston (KTRK-TV) and Buffalo (WKBW-TV), are the clear-cut ratings leaders in all the important local news segments, including early and late evening news. WTNH-TV in New Haven and WTVD in Raleigh-Durham are solid challengers to the top spot. The Fresno outlet, KFSN-TV, is the evening news leader, though it lags in morning ratings.

Chairman-ceo Thomas Murphy has said that Capital Cities is interested in boosting its tv ownership to the full complement allowed, five vhf and two uhf stations. Thus, in 1981, serious discussions were held about the acquisition of several different uhf outlets in major markets. But through late May this year no firm deals had been struck.

Of the 14 am and fm radio stations owned by the company, none ranked lower than 10th in any market, and the 10th ranked station was in Los Angeles where over 40 stations attain Arbitron ratings. In several cities the Capital Cities station was top ranked.

WBIE-FM was added to the fold in 1981, bringing the company to its full complement of seven fm and seven am stations.

Also within the broadcast division is the company's programing arm, Capital Cities Television Productions. During 1981 that unit produced three one hour documentaries and in association with Paulist Productions, five dramas dealing with problems confronting young people. Among the documentaries clearing 93% of the country were "For Better? For Worse? The American Family" and "Runaway: Where are They Now."

At the end of 1981 the company's Cable Television division counted about 290,000 subscribers, of which nearly 170,000 had a premium cable service. The cable operation is split into three regional divisions: Western, Northern and Southern. Capital spending in the division in 1981 topped $27 million.

However, the company has decided that prospective rates of return on major new franchises are lower than what it considers acceptable to get involved in "overheated" bidding. Thus it currently isn't seeking any major cable franchises.

The company expressed strong optimism for cable business, noting that "historically, Cap Cities growth has come through the acquisition and subsequent improvement of existing properties."

The company's publishing division, which includes such diverse holdings as the *Fort Worth Star Telegram* and *Entree*, a monthly for the gourmet retail trade, posted record sales and earnings in 1981, despite "experiencing intense cost pressures as a result of expanded operations, increased newsprint prices, additional personnel and the effects of the high rates of inflation."

The company owns a number of pennysaver operations but late last year it terminated the operations in Tulsa and Dallas; the pennysaver operations will continue, however, in Wichita and Topeka and in Missouri.

Within the publishing division, the specialized publications group had a strong year, but Cap Cities Professional Press suffered revenue declines.

Source: Publishers Information Bureau

Central Newspapers

Central Newspapers, Indianapolis, is the country's 25th largest media company, with 1981 revenues estimated by Advertising Age at $304.5 million with all coming from newspapers, compared with the AA estimate restated from 1980 of $246.1 million.

The privately owned company publishes seven daily newspapers in Indiana and Arizona, with a combined daily circulation of 795,000.

Six are the a.m. and p.m. papers in Phoenix, Indianapolis and Muncie.

The *Vincennes Sun Commercial* is an afternoon product with a Sunday edition.

Both revenues and readership increased at Central in the past year. In fact, to accommodate the growing circulation of its Arizona newspapers, an $18 million satellite printing plant is nearing completion in Mesa, Ariz., to aid the overburdened main plant in Phoenix. The new

plant is to begin operating in August. Remodeling and upgrading of facilities continue at the Indianapolis papers as well.

Last month, Central made its first venture into cable. Through its new subsidiary, R/G Cable, the company has leased three channels in Phoenix from Storer Broadcasting Co. The one-way cable system reaches 20,000 subscribers in the Phoenix area.

The first channel, which began operating in May, brings viewers classified advertising in text form. The advertising must run in the newspaper first, and advertisers seeking cable exposure pay an additional charge.

The second channel is planned as a news program, due to start on Sept. 1. Plans for the third channel haven't been announced.

Company execs say they plan to diversify further into cable, while keeping newspapers the mainstay of the company. "We're watching the cable business very carefully," said Frank Russell, president of Central Newspapers.

Charter Co.

Charter Co., the nation's 38th largest media company, had 1981 media property revenues of $202 million, representing about 4% of the company's total revenue of $4.97 billion. This compares with $296 million in media revenues out of total revenues of $4.56 billion in 1980.

The Jacksonville, Fla.-based company, which once said it wanted to become an important factor in communications, is fading from the scene as a media company. In the last six months it has been carrying out a mass divestiture of its media properties. When pending sales are completed, the company will be left with only a trade magazine and *Ladies Home Journal*, both of which Charter acknowledges are on the block.

In a statement on the company's strategy in February, Raymond K. Mason, Charter's chairman, said, "We have been discontinuing unprofitable operations and redeploying assets" since the 1979 acquisition of Carey Energy, which doubled the company's size and made it a much more significant energy company. Charter also has a sizable insurance business, which it apparently plans to expand.

Since January, Charter has followed up last year's sale of *Sport* magazine and the Dayton Press, an unprofitable printing subsidiary, by closing the troubled *Philadelphia Bulletin*, selling off *Redbook* and Charter Data subscription fulfillment service, and signing definitive agreements, subject to still-pending governmental approvals, to sell seven company-owned radio stations around the country.

The *Bulletin*, which had about $7 million in pretax losses in the last four months of 1981 alone, folded in January after the company's unsuccessful attempts to find a buyer. The closing came only about four months after the company had won $5 million in union concessions that temporarily saved the paper and had pledged to put $30 million in new capital into the *Bulletin*. But the paper kept losing money—operating losses mounted to $10.9 million in '81—and circulation—36,000 daily customers in the last year alone, according to the Audit Bureau of Circulations. Its share of newspaper advertising in Philadelphia fell to 28% of daily linage. Charter reported that its "extensive profit improvement plans" had failed to produce "the required results."

Charter also disbanded its

Where there's a W(ill), there's a W(ay)

By Susan Spillman

"When this company decided to get into cable it decided to do it in a big way."

—Daniel Ritchie, chairman, Westinghouse Broadcasting & Cable

Westinghouse is indeed into cable in a big way. One important symbolic indication of that was a recent name change: Westinghouse Electric Corp.'s Westinghouse Broadcasting subsidiary, the nation's oldest and fourth largest traditional broadcaster, is now known officially as Westinghouse Broadcasting & Cable.

Yet less than two years ago, even cable entrepreneur Ted Turner, who now finds himself in pitched battle with Westinghouse, would have been hard-pressed to recall where the company's six 12-channel cable systems were located, although a couple were in his own Georgia backyard.

But today Westinghouse:

- Has become the third largest multiple systems operator and half owner of the Showtime pay tv network, through its $646 million acquisition of Teleprompter Corp.
- Is taking on Mr. Turner's Cable News Network with its own brand of around-the-clock video news.
- Has entered into a partnership with Walt Disney for the creation of a Disney cable channel.
- Owns the small Portland, Me.-based Home Theatre Network pay service.
- Is the marketing and ad sales representative for the proposed Nashville Network and the two-year-old Black Entertainment Television service.

In short, Westinghouse rapidly has built itself into a cable empire. In just 18 months the company whose sole cable interests previously consisted of 65,000 subscribers in two states is poised to rival the prominence of industry leaders Time Inc. and Warner Amex.

To emphasize its cable prominence, Group W Cable earlier this month launched the first national advertising campaign ever undertaken by a multiple systems operator. The campaign attempts to position Group W Cable as a home entertainment marketer rather than a mere utility provider.

Broadcast operations contributed the majority of Westinghouse Broadcasting's $431.9 million in revenues in 1981. (Revenues of Teleprompter, which has become Group W Cable at Westinghouse, were included only since July, when the acquisition became final.) But this year broadcasting and cable will be equal in revenues, and by 1987 cable revenues will substantially surpass that of broadcasting, says Mr. Ritchie, the chairman and chief executive officer of Westinghouse Broadcasting.

Hayes: Not anti-Turner.

Ritchie: Big plans.

Westinghouse is sinking $300 million in capital investment into its cable properties this year. The bulk will go to revamp systems neglected under Teleprompter management. Over the next five years Westinghouse plans to spend $1.2 billion to expand the channel capacity of these systems in order to make room for the program offerings of its sister company, Group W Satellite Communications. By 1983 all of Group W's systems will have at least 20 channels, according to Group W Cable president Chris Derick.

Mr. Derick, former president of Viacom International's cable subsidiary, was wooed away from the presidency of the Comcast Corp., a Pennsylvania multiple systems operator, by Group W only six months ago. In addition to upgrading the company's 130 systems, Mr. Derick is playing catch-up for Group W, trying to win it what additional markets he can in the final stretch of the franchising race.

Teleprompter had been slow to enter the franchising gold rush of the late 1970s, and for the most part it was unsuccessful when it finally did. After a proxy fight for company control that resulted in new leadership, Teleprompter returned to profitability but not until franchising had become a highly competitive and expensive game.

Enter Westinghouse. With deep pockets and a sparkling public image, Westinghouse beefed up the mso's bidding efforts from coast to coast.

Yet some competitors, pointing to Group W's failure to win any major-city cable franchises, claim it has done so with little more success than Teleprompter. "We have not been very successful in the larger cities because we may not be very good at playing politics," concedes Mr. Ritchie, "but we have done well in the smaller and medium size cities. We've added 400,000 homes in the last year, which is the equivalent of two Denvers."

The reference to Denver is more than a casual one. Group W Cable's losing in its effort to land that coveted franchise earlier this year is a sore spot with Mr. Ritchie, whose personal acreage in the state of Colorado is second only to that of the federal government's. "In Denver our offer was the best," he claims, "but we don't have the head for those kind of politics—it runs against everything this company stands for. We don't feel comfortable competing in that fashion and past a point I would rather lose.

"I'm not referring to anything illegal. We'd never do that as I presume the others wouldn't either. It's just that in big cities you deal with full-time politicians. In the smaller franchises the council members are businessmen and community leaders."

Group W was the only mso competing for the 220,000-home Denver franchise that was not headquartered in the city. The winner was Mile-Hi Cable, a joint venture between Time Inc.'s Denver-based American Television & Communications and Daniels & Associates. As is often the case in big city franchising, Mile-Hi included local ownership of 22 prominent citizens such as former council member John Yelnick.

On another front Westinghouse has been involved in what has become an almost amusing battle, that between its programing subsidiary's just-launched Satellite News Channels and Ted Turner's Cable News Network. Westinghouse flipped the switch on its estimated $100 million investment on June 21, beaming the service to 2.6 million cable viewers across the country.

In one corner there is Ted Turner, the dashing and disheveled southern entrepreneur who poses for scotch ads and plots the demise of the networks. Banking on loyalty, Mr. Turner collects 20 cents per subscriber from system operators for his two-year-old news network. In the other corner there are the gray pinstriped peddlers from Westinghouse, teamed with ABC in this venture, handing out 50 cents per subscriber to operators willing to let them get their foot in the door with the new news service.

"I have asked our people to go out of their way not to be anti-Turner," stresses Jonathan Hayes, president of Group W Satellite Communications. "I don't see that there's anything to gain by that. In a very basic way it's not polite."

A lack of politeness has long been one of the most notable qualities of Mr. Turner, who at a press conference held early in the battle labeled Westinghouse's proposed service a "second-rate horse shit operation."

Despite Mr. Hayes' plea, the barbs, however, have not always been one-sided. There was marketing vp Ron Castell's speech to a cable group, which, complete with diagrams, purported to show how CNN dilutes its service by using the same tape on both CNN 1 and 2 and Turner's Superstation WTBS and by selling portions to broadcast stations. Even Mr. Ritchie can't resist jabbing: "If you have not watched the Turner channel you ought to watch some time. If we can't do considerably better than that, we ought to fail."

Once Satellite News Channels 1 is under way, the company will focus on its proposed second news service, featuring in-depth rather than headline coverage. Satellite News Channels 2 is aiming for a spring, 1983, launch. That same year Westinghouse plans to introduce the Disney Channel, a 16-hour-per-day pay service programed with a mix of Disney classics and original family fare produced at Disney's EPCOT (Experimental Prototype Community of Tomorrow) center, now under construction at Disney World in Florida.

In 1983, the company also plans to roll out marketing for the Nashville Network, an ad-supported service of country programs owned and to be produced by Opryland Productions.

After that Westinghouse plans to introduce additional cable services, "but right now those are still gleams in our eyes," Mr. Ritchie says.

"Cable is not just another thing for us," he adds. "This is make-it or break-it time." AA

Susan Spillman is an Advertising Age reporter in New York who covers the broadcast and cable industries.

broadcasting group, whose operations similarly had been tightened up under new management. Six radio stations were sold late last year to Surrey Broadcasting Co., Tucson, for $32 million, and in April, Charter agreed to sell its seventh station to Amaturo Communications, Fort Lauderdale.

In early May, after months of denying a sale was on tap, Charter sold both the ailing Redbook and the successful Charter Data subscription fulfillment unit to Hearst Corp. for $23 million in cash and promissory notes, plus a contingent payment based on the magazine's future performance. Though Charter took in revenues of $181.3 million from its magazine publishing and related services in 1981, *Redbook* ad revenues fell 2.7% during the year, to $50 million, from $51 million in 1980, according to Publisher's Information Bureau/Leading National Advertisers statistics, and the magazine's ad pages fell 16% from 1980.

The company declined comment on the future of *LHJ*, though it has acknowledged that it is "holding meetings with a prospective buyer." Late last month, Peter Callahan, publisher of *Us* and president of the Macfadden Group, was rumored to be the likely buyer. PIB/LNA figures show *LHJ* ad revenues dropped 6.1% during 1981 to $50 million, from $53 million the year before, as advertising pages fell 16%.

Early this year, the company announced that, beginning with the July, 1982, issue, *LHJ* would eliminate all letterpress printing with transfer of printing and binding operations to R.R. Donnelley, Mattoon, Ill., from Dayton Press.

A company spokesman said *Discount Merchandiser* "will probably be sold because we are in effect divesting ourselves of our media operations."

Charter had intended to step up its media involvement through Charter Media, a joint venture formed in 1980 with media entrepreneur Karl Eller. Charter Media bought the *Bulletin* for $31 million, KIOI-FM, San Francisco, and New York Subways Advertising. The joint venture lasted only nine months, and Charter bought out Mr. Eller's 50% share, including the *Bulletin* and KIOI.

Christian Science Publishing Society

The Christian Science Publishing Society is the country's 99th largest media company, with revenues totaling $59.5 million from media operations in 1981. The major source of revenue is the *Christian Science Monitor*, with four national editions and one international edition.

A nonprofit, private organization, the Publishing Society also produces various Christian Science religious publications.

It was a relatively uneventful year for the *Monitor*, with ad sales remaining relatively stable and with no editorial or format changes. The *Monitor's* effort to become a news provider to other publications and broadcast outlets continued during 1981, with 206 newspapers now taking the *Monitor's* syndicated news service. The Los Angeles Times Syndicate distributes *Monitor* stories to newspapers like Denver's *Rocky Mountain News*, the *St. Louis Globe-Democrat* and the *Minneapolis Tribune*. The syndicated news stories on foreign and domestic affairs reach an estimated 30 million readers.

A weekly radio news service provided by the *Monitor* reaches about 6.5 million listeners through 312 stations. The service, which has been in place for three years, grew quickly during the past year. In 1981, the *Monitor* radio news service—a tape containing 20 audio news reports distributed to subscribers—had about 100 customers and grew to 312 by mid-1982.

The *Monitor*, published out of Boston, completed its first full year of official take-out sections on foreign countries. J. Anthony Periton, manager of the Publishing Society, said advertising by corporations and foreign countries was strong and the Monitor plans to continue the profiles. All articles are written by *Monitor* reporters and nothing is solicited from the foreign countries themselves—a common practice.

Circulation remained relatively stable for the *Monitor* during 1981 and early 1982 about 165,000. There have been no major marketing or advertising efforts to increase the paper's circulation. Advertising for the *Monitor* has declined slightly, mostly owing to the economy.

Mr. Periton said the paper has finished a program designed to motivate the *Monitor's* display ad sales staff and increase commission rates. The salespeople, who solicit primarily local advertising that runs once a week or every other week in the paper, are members of the Christian Science church and not fulltime professionals.

By boosting the amount of business coverage and putting an even stronger emphasis on reporting international news, the *Monitor* has been trying to get more corporate advertising and travel-tourism advertising.

Meanwhile, the *Monitor* continues to seriously explore the possibilities of a linkup with a cable television network as a source of additional revenue. Mr. Periton said there is nothing solid yet, but the *Monitor* did run an experimental two-segment program on television. It supplied the Independent Network News organization, through WPIX in New York, with a half hour segment on business, narrated by *Monitor* business writer Harry Ellis. The other news segment was on El Salvador, which also ran 30 minutes. The two reports were made available to any INN station wishing to use them. It was the *Monitor's* first major venture into television news.

The *Monitor* is also supplying information to a cable system and is closely examining a deal with a database information system accessed by businesses on a subscription basis.

In 1981, the New England Newspaper Assn. chose the *Monitor* as recipient of its first newspaper of the year award and *Monitor* reporter David Willis earned an award from the Overseas Press Club for his reporting of affairs in the Soviet Union.

The only personnel change in the Publishing Society was the appointment of William Moody as associate editor of the Publishing Society's religious periodicals. Irwin Canham, a noted reporter and editor of the *Monitor* for many years, died early this year.

Chronicle Publishing Co.

Chronicle Publishing Co., San Francisco, ranks 35th among the nation's largest media companies, with 1981 revenues estimated by ADVERTISING AGE of $216.7 million, all from media operations.

The company is wholly owned by the family trust of the M.H. de Young estate. Michael de Young began publication of the *San Francisco Chronicle*, the city's dominant morning newspaper, in 1865. Its revenues just exceed two-thirds total revenues, according to ADVERTISING AGE figures.

The company operates four television stations, as well as a cable system that now has 150,000 subscribers. Other activities housed under the Chronicle umbrella, although not included in ADVERTISING AGE'S total estimate, are a tv production unit and a film financing distribution (to pay television) company.

In addition to the *San Francisco Chronicle*, the company is the co-owner, with the Hearst Corp., of the *San Francisco Sunday Examiner & Chronicle*, the area's top Sunday paper, and the *Bloomington* (Ill.) *Daily Pantagraph.*

The *Chronicle's* daily circulation is 530,672, according to March, 1982 ABC figures, putting it far ahead of its biggest challenger, the Gannett Co.-owned morning newspaper *Eastbay Today*, published in Oakland. *Eastbay Today's* March, '82 circulation was 94,310.

Circulation at the *Chronicle* has been growing by some 5,000 per year for the last several years.

Eastbay Today is attempting to draw readers from the *Chronicle* by positioning itself as a 10-cent paper (the *Chronicle* is 20 cents) and offering flashy coverage of sports and local news.

Under a joint operating agreement struck in 1965, and upheld in a court case last year, all non-editorial functions for the *Chronicle* and the *San Francisco Examiner* (the Hearst afternoon paper) are performed by the San Francisco Newspaper Agency.

Phil Geyer, *Chronicle* ad director, said the paper would continue to rely on seasonal circulation drives and "close monitoring of the marketplace" to maintain its circulation advantage.

Television and radio spots, as well as special promotion, which involved 150 automobile dealers in northern California, recently climaxed with the prize of a trip to Hawaii to a winner selected from people who test drove a car.

Chronicle Broadcasting encompasses the company's four television stations, which are wholly owned subsidiaries, including KRON-TV, San Francisco. Frances H. (Rani) Martin, president and chief executive officer at Chronicle Broadcasting, said that news and information are "the heart and soul of all our broadcast operations."

Last year, KRON unveiled its "Live at 4" news program, a format whose progress Mr. Martin described as "slow but steady." This year the company is focusing on updating its technical facilities and streamlining internal operations.

Jerry Florence, director of corporate research, is bringing survey and audience research functions in house, and is determined to bring more sophisticated survey and forecasting methods to bear on the problems faced by KRON. "Our industry has lacked forecasting sophistication," Mr. Florence said. "We need more analytical expertise."

KRON is the only station in America currently using the Aurora system of computer graphics for its news and weather broadcasts, noted Bruce Lindgren, director of creative services. "We're heading toward a fully computerized newsroom, which means that we'll be able to get stories on the air far faster than in the past."

On June 7, KRON began broadcasts of CNN-2, adding

No optical illusions

Irving B. Kahn, the granddaddy of cable predictions come true, is as busy as ever. As he puts it, "Getting a little bit involved is like getting a little bit pregnant."

He's conjuring up visions as usual. In fact, he has put together three new enterprises in the last five years based on his crystal-gazing.

Mr. Kahn was talking about an electronic home shopping service, electronic newspaper, and two-way banking back in the late 1960s, when they were called "esoterica." That was when he was co-founder and president of Teleprompter Corp., one of the biggest cable systems in the country, and one of the first that wasn't a "Ma and Pa" operation. (Mr. Kahn was jailed in 1971 for bribing Pennsylvania franchising officials and subsequently was ousted from Teleprompter in a proxy fight.)

Today, he's heavily involved in fiber optics—a technology that uses light to carry messages. Of his brethren still laying cable lines, he says: They're "running like sheep" to keep from getting obsolete before they start.

Mr. Kahn launched and now heads General Optronics, which is working with European companies to make laserware and other high technology items to sell to Common Market countries. He also runs Broadband Communications in New York. And he helped found Times Fiber Communications. That company, he says, has developed a way to distribute new fiber-using master antenna systems to high-rises—and is making millions.

All three companies, says Mr. Kahn, were formed with one end in view: To get the drop on fiber optics from every angle.

Meanwhile, according to Mr.

Kahn: Still looking ahead

Kahn, cable traditionalists "are still climbing poles." He maintains that by the time most of the big metropolitan franchises are wired, the phone company will already be in every home with fiber—"a 1,000-lane-highway" message carrier—and grab all the goodies.

Mr. Kahn says his more conservative colleagues "won't go out of business tomorrow," but he invites them to return to their roots. That means making the major commitment to strong local programing, and taking a pass on national advertiser support.

Irving Berlin Kahn says he's "64 going on 29." And yes, he is named after *the* Irving Berlin, who is Mr. Kahn's uncle. AA

2½ hours of news to the schedule.

Although company officials are reluctant to specify future plans, George (Toby) Harder, vp-corporate planning, said, "If it's in communications, we're taking a look at it." Cellular radio and direct broadcast satellite were among the possible new endeavors mentioned.

"Although we are investigating all kinds of new technologies," said Mr. Harder, "it's still the case that people don't watch technology, they watch programs. And we remained convinced that traditional television can still do some things—such as local news—best."

Western Communications, Walnut Creek, Cal., is Chronicle's cable tv arm, serving subscribers in California and New Mexico. Company president Ed Allen said Western is readapting its systems for greater channel capacity, a change that would lead to more numerous opportunities for local and national advertisers. "We're also getting ready to begin pay-per-view programing," said Mr. Allen.

Also high on the Western priority list is what Mr. Allen termed a system of energy load management, whereby individual consumer use of electric power can be more carefully monitored and controlled via modifications of the basic cable hookup. The goal is to reduce the stress on Pacific Gas & Electric facilities during peak hours, thus saving the consumer money.

"What's needed is a tariff under which users are 'penalized' for use during normal peak hours, and are 'rewarded' for use during off-hours," Mr. Allen said.

Chronicle Productions is the company's tv and video production/post-production unit and another wholly owned subsidiary. The company, headed by Marty Schultz, has been involved in commercial production, programing, industrial video projects and syndication. Macy's and Emporium-Capwell are clients for commercial production, and test spots for Ketchum Communications have also originated here. Two children's programs, "Buster and Me" and "Just Kidding," have been syndicated by the company.

Continental Cablevision

Continental Cablevision, Boston, Mass., is the country's 89th largest media company, with 1981 revenues of $73 million, all from cable television. The company's net income in 1981 was $17 million.

The 11th largest multiple systems operator in the U.S., Continental ended its first quarter in 1982 with 500,000 subscribers and an unusually high ratio of one pay subscriber for every basic subscriber. Through March, 1982, the company's cable service had passed 970,000 homes.

A privately held company, Continental has grown at a compounded rate of 30% since it acquired its first system in Tiffin, O., and Fostoria, O., in 1965. In November, 1981, Dow Jones & Co., a long-time suitor of CCI, purchased an initial almost 16% interest in the company. In January, 1982, it bought an additional 9.5% to boost Dow Jones total holdings to about 25%.

CCI's 1981 revenues rose 53% from the previous year and its net income was up 52%. That fast pace continued in the first quarter of the current fiscal year, when revenues jumped 50% to $23 million and earnings increased by 240% to $2.4 million.

Continental has 60 cable systems covering 192 communities in 10 states in the East, Midwest and in three California communities.

Founded in 1963 by two Harvard Business School classmates, Amos Hostetter, CCI president and chief executive officer, and H.I. Grousveck, CCI chairman, the company is divided into seven regions, each of which is under the management of its own vp-general manager. The regions' managers are responsible for franchising and renewals and make decisions independently from the Boston corporate headquarters about equipment purchases. The feeling among Continental's executives is that it is this decentralization of its operations that accounts for much of CCI's success.

Rick Hoffstein, the company's corporate controller, said CCI's growth has been entirely the result of new franchise purchases, "never as a result of acquisition." However, in a market where new franchises are waning, Continental may have to rethink this

IN SPORTS-CONSCIOUS SEATTLE/TACOMA, WE'RE SNAGGING VIEWERS WITH BASEBALL

Baseball is still America's pastime. And that's why 16 of the top 20 television markets in the country have a big-time baseball team to root for.

Seattle/Tacoma is one of those 16 markets. And at Gaylord Broadcasting we're taking advantage of that. You see, KSTW has become the home station for the Seattle Mariners baseball team. And when you've got a professional sports team, you're going to have sports fans.

Of course, we're not about to settle for sports fans alone. That's why we have the popular team of "Laverne and Shirley" working for us. Plus "MASH". And we're signing up more winners like "Taxi" and "Three's Company" to attract even more fans in the future.

At Gaylord, that's one of the ways we're making ourselves heard. And why now more than ever, we're the stations to watch.

approach if it is to continue its rapid growth. Areas where it plans to aggressively seek new franchises are Chicago, New York City and the Oakland County suburbs outside Detroit.

CCI in the future plans to upgrade its systems. By the end of 1985, 12-channel systems will be boosted to 20 and 30 channels at a cost of $10 million. In 1982, the company hopes to add 70,000 new subscribers to its existing systems.

Other management personnel in the company include vice-president Tom Willet and the company's new treasurer, Nancy Hawthorne. Timothy Neher, formerly vp and treasurer, is now CCI's executive vp.

Copley Newspapers

Copley Newspapers, La Jolla, Cal., the 37th largest media company in the country, increased its revenues from media properties by more than $15 million in 1981 to $205.8 million, 99.7% of total revenues of $206.5 million, the company said. In 1980, Copley had estimated media revenues of $190.4 million out of total revenues of $191.6 million.

The private, family business is primarily involved in newspapers in California and Illinois. Recently, it moved into cable tv, and views electronic publishing for future diversification.

Copley lost a bid it placed last year for a cable franchise in Torrance, Cal., to Teleprompter. Undaunted, Copley has gone next door with its bidding partner, Colony Communications (owned by Providence Journal Co.), to try for a franchise in Lomita, Cal. The outcome on that bid is pending. Teleprompter is again one of the three competing bidders, according to a Copley spokesman. He added that the Copley/Colony bidding team will likely bid on at least two other cable franchises in California soon.

Copley's interest in electronic publishing is temporarily on hold while Time Inc. and Cox Broadcasting await the arrival of decoders by their backlogged suppliers. It is with these two organizations that Copley expects to venture into videotex.

There is a high probability, according to a Copley spokesman, that the company will be experimenting with Cox in its INDAX experiment in San Diego this coming August in a two-way signal system (Viewdata). Copley is slated to provide about 20% of the news, sports and other information the system will transmit.

Time Inc. may be hooked up in San Diego by October or November with its full channel teletext, a one-way distribution system, for which Copley will supply about one-half the news information.

Newspapers remain the principal source of Copley's profit. The *San Diego* (Cal.) *Tribune*, which has undergone significant changes in leadership, addition of staff and content, and a redesigning of face and format, grew slightly last year.

However, most growth continues to come from Copley's morning paper in that city, the *San Diego Union*.

Besides its California newspaper properties, Copley also is one of the largest suburban publishers in the Chicago metropolitan area, with total circulation of 140,000, according to Stuart Neffeler, director of marketing. The Copley papers in Illinois are situated near major regional shopping centers—havens for advertising revenue.

Extensive renovation of the *Springfield* (Ill.) *State Journal-Register* facilities is still in progress, and other papers are slated for capital improvement in what Mr. Neffeler described as a "continuing process".

The *Joliet* (Ill.) *Herald News* has a new publisher, George Fisk, who took over the reins on Jan. 1 of this year. He has been with the paper in other capacities.

While newspapers are likely to remain Copley's primary emphasis, the company continues to look for opportunities in cable television, and hopes to gain a significant role in the electronic experiments soon to be under way in its home market. Pursuit of these new areas will continue, "provided that the over-all economy recovers," Mr. Neffeler said.

The James S. Copley library was completed in La Jolla, Cal., in February, 1982. The facility houses American Revolutionary War material, including the collection of the late James S. Copley, as well as other items of historical significance. The library was built under the leadership of Helen K. Copley, who is Mr. Copley's widow and the company's current publisher.

Courier-Journal & Louisville Times Co.

Courier-Journal & Louisville Times Co. is the country's 76th largest media company, with Advertising Age-estimated revenues of $93.1 million from media operations in 1981. Media figures are for newspaper and broadcast properties and do not include those of Standard Gravure, a subsidiary.

Advertising Age has revised its 1980 revenues for the Bingham family-owned company, publisher of the *Louisville Courier-Journal* and the *Louisville Times*, to $86.7 million for the newspaper and the two broadcast properties, WEAS-TV and WHAS (am) in Louisville.

An executive committee formed in 1980 and headed by company president George Gill is proceeding with plans to seek new areas of development. Senior vp John L. Richards said two of these ventures involve the marriage of the newspapers with cable technology.

The company is currently on the air in a partnership with CPI of Louisville, a Times Mirror cable system with more than 46,000 subscribers. The papers have been broadcasting both news and classified advertising since April on a preset schedule 24 hours a day. The project is still "too young to know what type of action we are getting," although the service is generating inquiries, Mr. Richards said. "We are also having some success with selling classified from the papers onto the cable channel."

Initially the company is charging a "modest" extra fee for the ad to run both in print and on tv. Approximately 3,000 daily "pages" of classified ads are being broadcast. CPI sold the papers time for a set fee, plus a percentage of the ad sales.

Mr. Richards said the company is also gearing up for the start, later this year, of a teletext system. The project, in conjunction with Antiope Videotex Systems, will transmit an edition's contents to 150 homes during a six-month period. Mr. Richards said there will be 50 decoder sets, which will be moved every few weeks. "Our research department has chosen a representative sampling which will not only determine the success of this experiment but may influence other newspapers who are looking at this type of venture," he said.

In 1981, the afternoon *Times* underwent both an internal renovation and an external facelift, adding several sections and cleaning up the front page. Mr. Richards said these changes were put in effect in order "to battle the p.m. syndrome." He said both papers are improving their penetration in Louisville.

The broadcast arm of the company also has entered the cable field. Donna Zapata, WHAS-TV station manager, said Creative Associates has been formed to produce commercials for cable television.

On the radio side, Mike Krusham is the new station manager named for WHAS (am).

Cowles Media Co.

Cowles Media Co., formerly the Minneapolis Star & Tribune Co., is the nation's 32nd largest media company with revenues of $238 million for the fiscal year ended last Feb. 28, up 11% from the previous fiscal year. All revenues were from media operations.

Net earnings plunged 89% from the previous year to $747,000 from $7 million, largely because of a number of one-time charges.

Some major developments have taken place at the privately held concern in recent months. The principal one was the closing of the afternoon *Minneapolis Star* and its merging with the morning *Minneapolis Tribune* to make an all-day paper. Along with the merger came a significant broadening of the paper's targeted geographical market. A pending significant move, a merger with the Des Moines Register & Tribune Co., did not materialize.

The main one-time charges against fiscal 1982 earnings were a $2.3 million pretax charge related to a voluntary retirement plan at the Minneapolis newspapers which resulted in the early retirement of 124 employes, and a loss of $647,000 from the sale of the company's 33% ownership in Harper & Row Publishers, which had contributed $2.1 million to the previous year's earnings. Fiscal 1981 earnings also had benefited from a $2.4 million credit stemming from the company's adoption of straight-line depreciation accounting.

Merger talks with Des Moines Register & Tribune Co. broke off in early February. The Register & Tribune owns 13% share of the Minneapolis concern and both organizations are controlled by factions of the Cowles family. The companies had been negotiating for about six months before terminating the talks. Industry sources say the merger collapsed, in part, because the companies could not reach agreement over the value of the Register & Tribune Co.'s newspaper and broadcast holdings.

The merger of the *Star* and *Tribune* was officially announced in March after nearly a year of rumor and speculation about the *Star's* imminent demise. In April, the 24-hour paper was on the stands along with a promise of being a better news and advertising vehicle not only for Minneapolis but also for St. Paul.

Charles Bailey, a 31-year newspaper veteran, is serving as interim editor of the new daily while an editor is being sought. Steve Isaacs, the controversial editor of the *Star*, left the company. Donald Dwight remains

publisher of the paper.

The new paper's expressed intention to serve St. Paul signals a marked increase in newspaper competition in the Twin Cities. The *Star and Tribune's* move across the Mississippi has prompted the management of the St. Paul Pioneer Press and *Dispatch*, owned by Knight-Ridder Newspapers, to consider merging its morning and afternoon papers into one and embarking on a strong counterattack against its Minneapolis neighbor.

While management of the *Minneapolis Star and Tribune* views the combination of the two papers positively, it has been harshly criticized by the company's own employes, local media and area retailers for the tactics used to announce the merger.

As talk of the merger accelerated, the newspaper's management repeatedly denied it would take place. It was learned later that amid these denials, management had hired a New York ad agency to film two-minute spots announcing the birth of the all-day paper. On the day the merger was made public, the commercials were aired during late-evening programs.

In addition, while retailers who had advertised in both the *Star* and *Tribune* received a 2% rate decrease on ads in the new combined paper, those who had advertised in only one of the former papers were bombarded with rate hikes of nearly 50% for space in the combined edition. Since retailers were not made aware of the impending merger, their ad budgets were fixed and some were forced to begin placing smaller ads.

Still, only one employe was laid off because of the merger, while an estimated 120 persons opted for the voluntary reduction plan (either early retirement or a negotiated settlement). Also, the consolidation is expected to improve the company's profit margins, which would be helpful if the company decides to go public, as has been speculated.

Cowles Media continues to lose money at the *Buffalo Courier-Express*, despite the paper's increase in ad share and a halt in its circulation decline in that highly competitive market.

The company also has a Buffalo cable outlet, which it describes as a "rapidly growing and profitable operation."

The company's shareholders recently approved changing the name to Cowles Media to reflect its other holdings in communications.

Cox Communications

Cox Communications, formerly Cox Broadcasting Corp., is the country's 21st largest media company with media revenues of $370.2 million last year, or 92% of the company's total revenues of $403.5 million.

Total operating profits rose 23% to $109.9 million while total revenues rose 30%. In 1980, Cox had media revenues of $281 million out of total revenues of $309.2 million.

Media revenues of the publicly held company were split about equally between broadcasting and cable tv, with broadcasting contributing $181.7 million in revenues and cable tv $188.5 million. Net income in 1981 was $55.5 million, up 19% from the previous year. The broadcasting division posted a 17% gain in revenues and a 16% increase in operating income in 1981, while cable tv revenues shot up 50% and operating income rose 40%.

During 1981 Cox Cable, a wholly owned subsidiary, set subscriber records and won franchises in Tucson, Ariz., and Vancouver, Wash. Cox is now the fourth largest basic cable tv operator and the third largest in paid program subscriptions. At the end of 1981, the company had 1,100,000 basic subscribers and 980,000 paid program subscriptions.

Because of extensive research and intensive marketing of premium services, paid program subscriptions increased 81% last year while basic subscriber numbers increased 24%.

Counted among Cox's 62 cable systems in 23 states are the nation's oldest—in Astoria, Ore.—and the largest, in San Diego, with 210,000 subscribers. Most of the company's recent growth came from new and existing franchises, not from acquisition. The company said it continues to examine acquisition opportunities, but franchising has so far been the preferred method of expansion.

Spokesman David Andersen said Cox Cable had bid on the Tampa franchise and was expected to bid for franchises in Philadelphia and Baltimore.

But as the number of major franchises in this country dwindles, Cox is beginning to eye the international market. "We're always looking for new investments," said Mr. Andersen, "and with the use of satellites and microwave, the world gets smaller and smaller."

In fact, Cox already has taken one step into the international arena, with a 50% interest in a cable company in Denmark.

Cox's INDAX, touted as the industry's only two-way interactive communications operation, has been tested in San Diego and will be introduced commercially in Omaha and New Orleans later this year.

INDAX enables users to transfer bank funds, pay bills and purchase merchandise from a video catalog. Through an arrangement with The Source, a Reader's Digest Assn. subsidiary, INDAX offers updated news, and it can include local information such as restaurant guides.

In January, 1982, Cox Communications purchased its first uhf station, KDNL in St. Louis, from Evans Broadcasting for an estimated $3.2 million. On June 1, it put pay tv on the air there. Subscription tv (stv) was new to Cox and new to St. Louis, but the company said the market was ripe for such an innovation because of its size—17th in the country—and its low cable penetration.

Early in 1981, Cox also acquired 19% interest in the Robert Wold Co. of Los Angeles, which provides satellite distribution services.

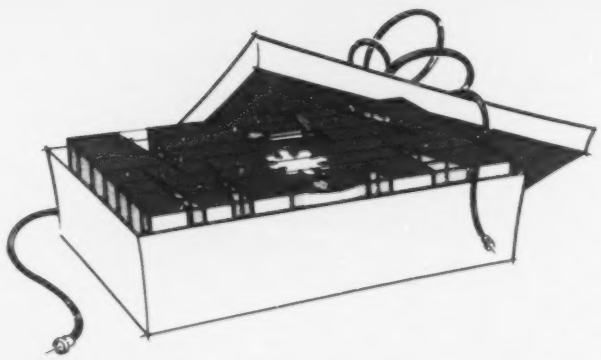
The company budgeted $200 million in capital expenditures for 1982. A portion of that was to go to developing the subscription tv service at the St. Louis station, and approximately $180 million was marked for expansion of existing cable systems, rebuilding older systems and developing franchises already granted.

Cox Communications president William A. Schwartz told stockholders in March that capital spending for cable expansion during the next few years would contribute to the company's long-term growth, but would slow short-term earnings growth.

In addition to its media properties, Cox Communications owns and operates 13 wholesale auto auctions in 10 states. These facilities have weekly auctions in which auto dealers regulate their inventories by selling and buying used cars.

The depressed new car industry led to greater interest in used cars in 1981, resulting in what the company called "a highly profitable business," with reve-

"GOOD THINGS COME IN SMALL PACKAGES..."



Modern Satellite Network offers your clients a better media mix through cable. Our unique package gives you more ways to advertise. With conventional :30 and :60 spots in a key daypart – at surprisingly reasonable rates. With unique and innovative *infomercial* programming like our nationally acclaimed "The Home Shopping Show," and "Viewpoint" – long-form advertising which can be created and produced at a fraction of the cost of traditional messages. And with program sponsorships within our magazine-format series – timely features dealing with consumerism, health, travel and finance.

Modern Satellite Network is *the* daytime source for consumer information on cable. Unique programming that viewers want, and watch and respond to. A subscriber base of more than 4 million households nationwide, reaching a targeted audience of adult women 18-54.

Whatever your need, MSN is the viable choice for cable advertising. To get the full story, contact Les Tolchin at (212) 582-5500 or 582-5962.

Cox Enterprises

Cox Enterprises, Atlanta, is the nation's 21st largest media company, with 1981 revenues estimated by ADVERTISING AGE at $419.5 million, all from newspapers. Cox Enterprises had estimated media revenues in 1980 of $367.6 million.

The family-owned chain, anchored by the *Atlanta Constitution* and *Journal*, operates dailies in 13 markets and weeklies in suburban New Orleans and Delray Beach, Fla.

According to the company, the chain's daily circulation increased to 1.15 million for the six months ended March 31, up about 0.5% from a year earlier.

However, circulation declines at both the morning *Atlanta Constitution* and evening *Atlanta Journal* may have contributed to the company's recent decision to merge the news staffs of the two papers. Officials said the move wasn't made to cut costs but to expand the papers' "news capabilities."

The company several weeks earlier had merged the news staffs of its *Dayton* (Ohio) *Journal-Herald* and *Dayton Daily News*, laying off 40 fulltime employes and 50 parttimers. Cox said it plans no layoffs at the Atlanta papers.

For the six months ended last March 31, combined circulation of the *Atlanta Constitution* and *Atlanta Journal* averaged 392,526 daily, according to latest Audit Bureau of Circulation figures, down 4.2% from the year-earlier period. Combined circulation of the Dayton papers in the same period averaged 234,963 daily, down 2.4%.

The Dayton papers, as well as the Cox papers in Springfield, O., have suffered because of unemployment in the automobile and other industries, said David Easterly, vp-operations, of the newspaper group.

"But our papers in Texas—Austin, Waco, Longview, Lufkin and Port Arthur—are doing very well," he said. "You could look at them and you'd think there's no such thing as a recession." Atlanta and Palm Beach, normally strong Sunbelt markets, are "a little soft right now," he said.

The Atlanta papers also suffered heavy circulation losses last year because of distribution upheavals involving a switch to adult employe carriers from contract carriers. "We had a real mess on our hands during the conversion," Mr. Easterly said. The new carrier system is paying off, Mr. Easterly said. Service problems have been cut in half "and we have more control over employes than contract carriers," he said.

The Atlanta papers recently introduced a "marriage mail" system in which they offer preprint customers total market coverage through a combination of direct distribution to the papers' subscribers and direct mail to nonsubscribers.

In January, Cox hired a telecommunications director to oversee its plans for developing cable news programing in those markets where it owns papers.

Cox is already airing a channel of local news and classified advertising on cable in Waco in partnership with MetroVision, the cable operator there. Cox is working on developing similar ventures in Austin and Palm Beach, and it has had conversations with cable companies serving Atlanta, officials said.

"We're interested in taking the information-gathering resources we have in each of our 13 communities and trying to find ways to use that information in other media, especially electronic media, and particularly in partnership with cable tv operators," Mr. Easterly said.

John Morton, analyst with Lynch, Jones & Ryan, said Cox Enterprises seems well positioned for the future. "Atlanta may have had its problems, but it's still one of the best big-city markets in the country," he said. "It's a very good place to be the only daily publisher."

As for Cox's other dailies, Mr. Morton said, "I judge a chain by the kind of products it puts out, and in general, Cox papers are much better than average. The *Austin American-Statesman*, for example, has improved 1,000% since they took over."

Most of the Cox newspapers have circulations between 30,000 and 150,000, "which is the most profitable range for dailies," he added. The peril of the small-to-middle-size market, however, is that it often sits on a narrow economic base.

The *Grand Junction* (Colo.) *Daily Sentinel*, for example, has grown in advertising and circulation since Cox bought it in 1979. But Exxon's decision to pull out of a major shale oil project in the area could cripple the economy if the move puts 2,000 people out of work as expected.

The company's Palm Beach papers recently reduced staff by about 40 positions. "The Palm Beach market will be okay once the economy straightens out," said Mr. Easterly, "but for now the recession has finally hit Florida."

Other Cox dailies in Florida include the *Miami News* (which has a joint operating agreement with the *Miami Herald*) and 47% interest in the *Daytona Beach Journal* and *News*

Cox purchased several papers during the late 1970s, including its Texas and Arizona properties, but no new acquisitions are planned. An official said the company believes newspapers cannot be bought for a price that offers a reasonable rate of return.

Cox Communications (formerly Cox Broadcasting Corp.) is a publicly held broadcasting and cable tv concern treated as a separate entity in ADVERTISING AGE'S media company listing. Garner Anthony, who is married to Barbara Cox, is chairman of both companies and the Cox family owns about 43% of Cox Communications stock.

'Just a country boy'

Roy Park, 71, calls himself a "country boy," and it has been said that he's never forgotten his rural upbringing in North Carolina.

In a way, that's the reason he's now the sole owner of several multi-million-dollar corporations that control dozens of newspapers and broadcast stations. Says Mr. Park: "I'm rather conservative; if you have a formula that works, use it."

Mr. Park's success has been based on acquiring smaller newspapers and broadcast outlets that serve local markets like Chattanooga, Tenn., or McAlester, Okla. Although in 1977 his company became the first to own the maximum number of am radio, fm radio and television stations the FCC allows—seven of each for a total of 21—he is making no plans to invest in cable. Cable, he thinks, is not his style: "It's highly capital intensive, and it's going to wind up in the hands of a few, large companies."

Mr. Park heads Park Newspapers, Park Broadcasting, Park Outdoor and RHP Inc., which controls other companies. All are headquartered in Ithaca, N.Y. His companies had total revenues of $80 million in 1981, a 14% increase from 1980 revenues.

But none of his newspapers has a circulation of more than 50,000. Mr. Park asks that they each devote more than 50% of their front-page space to local news, and make their editorials local: "We write on subjects people can do something about, rather than put in two columns of canned stuff from some [wire] service."

Mr. Park's most recently acquired property is the venerable *Robesonian*, a 112-year-old North Carolina daily. The former owners said they decided to do business with him partly because he understood that state so well.

Besides being born and educated there, Mr. Park found his first fulltime media job in North Carolina—as editor of the *North Carolina Cotton Grower* back in

Park: Formula that works.

1931.

At one time, Mr. Park had dabbled in a merchandising venture with Duncan Hines of cake-mix fame. In 1948, he and Mr. Hines formed Hines-Park Foods, which merged with Procter & Gamble Co. in the 1950s, yielding Mr. Park the capital to build his own business.

He decided to go back to his first love, and started buying broadcast stations and newspapers. Mr. Park acquired his first tv station in 1962, driving in his 1961 Lincoln Continental convertible from Ithaca to Greenville, N.C., to buy WNCT-TV. He still has the station, and still has the car, having become a rather accomplished collector of both classic automobiles and, it seems, lucrative radio and tv stations.

"Food was interesting," Mr. Park says of the industry he left in 1962 to start a new career at the age of 52, "but media work is exciting." AA

Des Moines Register & Tribune Co.

The Des Moines Register & Tribune Co., Des Moines, is the nation's 78th largest media company, with 1981 operating revenues of $89.5 million, compared with 1980's $86.1 million. All revenues are from media operations.

Primarily because of poor performance of its principal newspapers, hurt by the depressed Iowa economy, the company's earnings were down substantially last year, falling 84% to $1.1 million from $6.8 million in 1980. In the first quarter this year, the company lost $618,000 compared with a loss of $162,000 in the year-earlier period.

Newspapers contributed to the bulk of the Register & Tribune's revenues, with 1981 revenues of $70.5 million, up from $68 million in 1980. Broadcasting revenues were $18.8 million, compared with $18 million for 1980.

Growing doubts about the company's ability to continue to support two flagship newspapers, the *Des Moines Register* and the Des Moines Tribune, were confirmed when the company announced early this month that it will stop publishing the afternoon *Tribune* this fall. The move will result in the loss of 150 to 200 jobs out of the 1,030 who work at the two papers, the company said.

The *Tribune's* circulation is about 68,000, down from its high of 147,000 in 1947. The *Register* has a daily circulation of about 210,000. The combined paper resulting from the closing of the *Tribune* will have a circulation of 248,000, the company estimated.

The privately held company flirted this year with a corporate restructuring via a merger with its sister company, Cowles Media Co. (formerly Minneapolis Star & Tribune Co.), but talks broke off in February after six months of negotiations.

The Register & Tribune owns 13% of Cowles Media Co. Both companies are controlled by factions of the Cowles family, and members of the Cowles group sit on both company boards, helping to fuel speculation that inevitably the concerns will merge. Present indications are that both companies will remain independent for the near-term future.

An example of the Register & Tribune's continued independence was its refusal this year to be acquired by the Washington Post Co.

Register & Tribune officers rebuffed the Post after publisher Katharine Graham expressed an interest in purchasing the company.

The company added two weekly papers in Indianola, Ia., to its media operations this year and retained all of its broadcast properties.

Deseret Management Corp.

Deseret Management Corp., Salt Lake City, is the country's 90th largest media company, with net revenues from media operations under its Bonneville International flag of $71.9 million, about 85% of total revenues of $84.5 million, according to the company.

As the broadcasting arm of the Church of Jesus Christ of the Latter-Day Saints, Bonneville speaks to more than the faithful through two tv stations, four am and seven fm radio stations and an estimated 10,000-subscriber cable tv system it owns half of in Logan, Utah. Bonneville media revenues break down into 49.7% tv, 45.8% radio, 2.2% satellite broadcasting and 2.3% program syndication via Bonneville Broadcast Systems.

The church's media properties also take in the *Deseret News* with a circulation of 72,000. Although linked to Deseret Management through the church, the newspaper property does not fall under the Deseret Management umbrella.

Major excitement at Bonneville this year revolves around its plan to have its teletext system in operation over KIRO-TV on Aug. 1. KIRO is Bonneville's Seattle tv station. Its other tv outlet is KSL in Salt Lake City, where Bonneville plans to offer consumers a similar system "shortly after" KIRO goes to consumers. Teletext is a viewer-controlled data transmission system based on the British "Ceefax" system. Bonneville developed its teletext operation in cooperation with Zenith Radio Corp.

Company president Arch L. Madsen explained that teletext will contain the equivalent of a 50-page newspaper. Viewers reading from a printed index will be able to punch up any material in the electronic newspaper that they want to read. "It's a revolution in the distribution of printed information," Mr. Madsen said. "Except for illustrations, teletext can do everything a newspaper can do, including classifieds. And the costs for us are so low that we can set up the whole works for less than the cost of a single color tv camera."

Mr. Madsen said the cost to consumers will be no more than a one-time "about $150 cost" for the hardware "The whole thing will pay for itself through advertising," he said. "I see it becoming enormous." He predicted some "real action" for the system in 1982.

Bonneville already has established a working teletext relationship with Field Communications and Taft Broadcasting. Teletext will be transmitted to participating stations via satellite. With a new million dollar uplink transmitter at Salt Lake City, Bonneville has established two-way communication with Washington, D.C.

"We are planning a complete satellite communication service for the whole U.S.," Mr. Madsen said. "We have just signed a contract with the church for 500 satellite receiving stations."

ISSUES

Yellow Jackets, Honey Bees hit D.C.

Turnaround is fair play: Now mosquitoes face bites

The Register & Tribune refused this year to be acquired by the Washington Post Co.

Donrey owns 45 dailies and 41 nondaily newspapers, one television station, seven radio stations, four cable television companies and 11 outdoor advertising plants. The group operates companies in 18 states and the District of Columbia.

Recent acquisitions by the group include a cable system, Rogers Cablevision, in Rogers, Ark., and the remaining 80% of a cable company in Bartlesville, Okla., Bartlesville Video. Donrey already owned 20% of that system.

"We think cable has a very bright future," said Fred Smith, Donrey's executive vp. "Of course, we've been in cable for quite some time," he said. "We think it offers a lot and we are definitely interested in looking for more cable properties.

"We are bullish on the whole media business—newspapers as well as cable tv—and are interested in acquisitions in all areas."

Donrey's most recent acquisition is the Valley Publishing Co., publishers of three daily newspapers in Kent, Renton and Auburn on the southern edge of metropolitan Seattle. The company was purchased by Donrey in January. The transaction became final Feb. 1 but the price was never disclosed. The three dailies have a combined circulation of 40,000. A twice-weekly controlled-distribution publication extends circulation to 100,000.

Donrey is committed to continued growth and to pioneering technology, according to its founder and president, Donald W. Reynolds. The group has contributed to research on a revolutionary laser platemaker, the first of its kind to be used successfully. It is now in operation at Donrey's largest newspaper, the *Las Vegas Review Journal*, in Las Vegas, Nev.

Dow Jones & Co.

Dow Jones & Co., New York, is the country's 14th largest media company, with media operation revenues of $600 million in 1981, or 93% of total revenues of $641 million. National publications and news services accounted for more than three-quarters of total revenues. Community newspapers and book publishing (not included in Advertising Age's media revenue figures) accounted for the remainder.

Media revenues rose 22% last year and total revenues 21%. Net income from all operations was $71.4 million, up 21% from 1980.

The company is moving to improve the already-solid U.S. position of its principal publication, the *Wall Street Journal*, and also to strengthen the publication abroad.

Dow Jones will increase its presence in Europe by introducing a European edition of the *Journal*. The paper, to be printed by Limburgs Dagbblad, in Heelen, a small mining town which is located in southern Holland, is expected to make its debut in 1983.

Initially, the publication will have a staff of 20 located in Brussels. Norman Pearlstine, formerly editor of the *Asian Wall Street Journal* and now the *Journal's* national news editor, will serve as publisher and editor of the European edition. *Journal* executives believe they can increase the current U.S. edition's circulation by 50% in Europe to about 12,000 soon after publishing begins on the Continent.

With advertisers finding themselves shut out of the domestic *Journal* because of limited space, Dow Jones has continued to expand the publication. Early in 1982, the southwestern edition was expanded to 56 pages from 48, bringing it to the level of the eastern edition. A similar expansion will take place in the midwestern and western editions. The company also is studying the possibility of

expanding the eastern edition to 64 pages. Eastern printing plants are being altered to allow for expansion if the move is approved.

Dow Jones also increased the *Journal's* printing capacity by opening three new plants, in Des Moines, Ia.; Sharon, Pa. and Bowling Green, O. The *Journal* now has 14 printing plants. Three other printing plants—in LaGrange, Ga.; Charlotte, N.C. and Beaumont, Tex.—are under construction and will open this year.

Not planning to be left behind in videotex development, Dow Jones has entered into agreements with nine of the country's top 15 multiple system cable tv operators to explore joint videotex operations. The company also has plans to establish its own interactive systems in 12 communities, the largest of which is Denver, according to William Dunn, Dow Jones vp-general manager. The experiments eventually will involve 550,000 homes. Mr. Dunn said that revenues should begin topping expenses by 1984, when 200,000 homes are expected to join the various videotex systems.

Dow Jones also introduced DowAlert, a private-frequency business news service in Boston and Philadelphia. The service allows subscribers to use fm stations to receive specific business information.

The company's traditional form of dispensing business news—the *Journal*—continued its steady circulation increases. In 1981, circulation was up 3.6% to slightly more than 2 million daily. Over the past five years, the *Journal's* circulation has grown by 523,000, or 35%. Total *Journal* circulation is three times that of the *Washington Post* and twice that of the *Los Angeles Times, New York Times* and *Business Week*. A recent study showed that the paper's potential audience (executives and white-collar workers) is growing twice as fast as the population as a whole.

Wall Street Journal ad linage was up 9.7% in 1981, besting the 9.1% and 9.4% gains of the preceding two years. In 1981, more than 8,400 advertisers bought display space in the *Journal*.

Dow Jones raised the cover price of the *Journal* to 40¢ from 35¢ and of *Barron's*, its business and financial weekly, to $1.25 from $1.

Barron's suffered its first decline in ad linage in 10 years last year. The company attributed the 3.8% drop to reduced spending by brokerage houses and investment advisory services, its major advertisers. Those groups, the company contended, are suffering from the weak stock market. Circulation was up slightly to 264,416 from 264,100.

In May, the company announced it will cease publication of *Book Digest* with this month's issue, absorbing a $1.2 million charge against earnings. Dow Jones bought the magazine in 1978 and made numerous unsuccessful efforts to reverse a subsequent decline in advertising and circulation. The company had put *Book Digest* on the block in April but failed to attract any buyers.

Dun & Bradstreet

Dun & Bradstreet, New York, is the country's 16th largest media company, with 1981 media revenues of $553.4 million, or 42% of total operating revenues, which rose 13% to a record $1.33 billion.

In 1980, Dun & Bradstreet had media revenues of $492.3 million out of total revenues of $1.176 billion.

The company's net income last year rose 19% to $121.5 million, also a record.

In 1981, publishing contributed $458.5 million in media revenues, up 12% from 1980 and equal to 35% of total Dun & Bradstreet revenues. Publishing accounted for $132.1 in operating income, or 46% of the company's total operating income of $284.8 million.

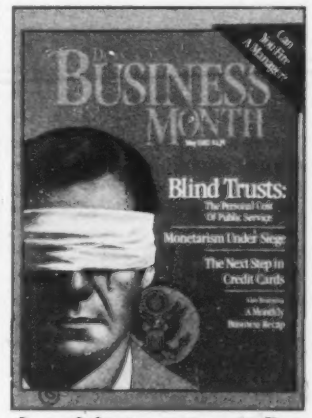
The broadcast division's operating revenues of $94.8 million accounted for 7.1% of D&B's total operating revenues. Broadcasting contributed $40.6 million in operating income, 14% of the total. The company said in its 1981 annual report that it is operating on four basic "dynamics of growth": Market segmentation, product differentiation, resource integration and computer technology application.

"They have been key to our progress in the past—and will be key to our future progress as well," a Dun & Bradstreet executive reported.

The company's progress for the past year in its publishing arm is attributed to new products and operating efficiencies.

At Reuben H. Donnelley, the company's operating revenue and income were up. In Chicago, the company hooked up with Illinois Bell and introduced the *Chicago Visitors Guide & Downtown Directory* and Bell's first *Health Care Industry Yellow Pages.*

The company also is planning to introduce its second edition of



One of the top names in Dun & Bradstreet's family.

the *New Neighbor Guide in Philadelphia* in 1982, and publish an edition for Pittsburgh as well. In its first full year of operation, Thomson Directories Ltd. was transformed from an ad sales agency to an independent publisher of local directories. Having successfully made inroads in the United Kingdom directory market, the company came out with 71 local directories in 1981 and is scheduled to bring out another 70 in early 1982.

Moody's Investors Service rang up a record year. The division set a new record in corporate bond issues rated, as well as commercial paper market ratings. Sales of the division's manuals and investment guides were ahead of 1980, while at the same time, the company launched Moody's "International Manual" and "Handbook of OTC Stocks" and is introducing a new publication, "The Stock Record" in the second quarter of 1982. "Complete Coverage," an addendum to Moody's Manuals, was brought out in 1980, while its other option, "Comprehensive Coverage," continued to show growth. Last year, the division also introduced electronic delivery of some of its information.

While the airline controllers' strike was disastrous for travelers, it turned out to be a boon for Dun & Bradstreet's Official Airlines Guides division. *Frequent Flyer* came out in September, 1980, and increased its rate base to 250,000 in March, 1981, at the same time it upped its ad rates. In April, 1982, OAG launched a Pacific area edition of its Pocket Flight Guide.

Technical Publishing enjoyed record revenues and income in 1981, while it kept working on refocusing its publications on markets with the greatest profitability. It sold *Pollution Engineering* and bought *Solid State Technology*. *Dun's Review* became *Dun's Business Month*, the same magazine but with a new format and new features.

Other Dun & Bradstreet publications coming in with record years were *Control Engineering* and *Graphic Arts Monthly*. Ad pages were also up for *Plant Engineering* and *Mining Equipment International*. *Datamation* is expanding its editorial coverage by adding a demographic edition for the original equipment manufacturer market and increasing the frequency of its international issue.

In 1981, the company also acquired Sentry Database Publishing, owner of *Software News* and *Software Search*.

Among nonmedia publishing divisions (according to AA's definition of media for this issue), the Funk & Wagnalls division fell on hard times last year with its operating income and revenues dropping below the 1980 levels. Two of its most successful products, "The Sesame Street Library" and "New Encyclopedia," neared the end of their cycles, while the "Big Bird Dictionary" and "Children's Bible Stories" began their debut.

In broadcasting, the company's Corinthian Broadcasting unit hit new highs in 1981. Stations in Houston and Hampton-Norfolk came in with the best records. Corinthian's stations also racked up better share figures and made several changes in their news programs. In Indianapolis, WISH-TV expanded its late-night news show from 45 minutes to one hour, while in Sacramento, KXTV added 30 minutes to its early evening news.

Corinthian also put in a Washington News Bureau last year to give Corinthian stations Washington news of local import. Corinthian Productions continued to develop programs for young people, with such ventures as "Historyland" and "Who, What, How Do You Know Show" series.

TVS Television Network's operating revenues and income hit new records in 1981. The network produced 68 regional and 18 national college basketball games that were aired by the NBC network.

In 1982, TVS is slated to produce 74 regional and 20 national college basketball games for NBC, as well as 23 regional Southeast Conference games that will be distributed independently to stations.

The company made several new personnel shifts in its media properties. John C. Holt was named executive vp of Technical Publishing as well as for Donnelley Marketing, Donnelley Marketing Information Service and D&B Business Education; Volney Taylor was named exec vp of Corinthian Broadcasting, including PGW (Peters Griffin Woodward, which represents tv stations in spot sales to national and local advertisers), TVS Network, and Official Airlines Guides as well as Plan Services and Sales-net. James J. Crenner was named executive vp at Reuben H. Donnelley and Moody's Investors Service, as well as for Dun & Bradstreet Commercial Collections and the Fantus Co.

Evening News Assn.

The Evening News Assn., Detroit, is the country's 31st largest media company with 1981 revenues of $250 million, all from media operations, according to the company. The company had estimated media revenues in 1980 of $235.7 million.

Profits fell 61% in 1981 to $5 million from $12.7 million in 1980.

Losses sustained by the *Detroit News*, Evening News' flagship, continue to plague the company. The newspaper war between the *News* and Knight-Ridder's *Detroit Free Press* is not likely to end soon, which means the company must keep pouring profits from Sunbelt properties into depressed Detroit.

That was the idea all along, according to Peter B. Clark, president and great-grandson of the founder of the company. "When this company started acquiring properties in other communities, the idea was to develop counter cyclicality to Detroit. We did that, and we're delighted we did, given the Detroit problems," Mr. Clark said.

Mr. Clark disagreed with analysts' predictions that Detroit will be a one-newspaper town within a decade. But should that happen, "We would be the survivor because we're the stronger by a substantial margin," he said. The margin of strength is great in ad linage but the circulation margin has narrowed and the *News* now leads by only 1,752 copies daily.

The company has been alternately embarrassed, puzzled and gratified by recent nonfinancial developments. Last Nov. 4, the paper carried a front-page story proclaiming the successful launch of the space shuttle. The shuttle did not take off for another eight days. About 30,000 copies containing the bogus story were printed. All but 300 were recovered.

In January, word spread through the city room that 75 shares in the closely held Evening News were available. All shares were quickly bought by reporters, photographers and other *News* employes at $175 a share. A contingent of the new shareholders attended the company annual meeting for the first time and saw financial figures for the Evening News, though not for the *News* itself. "I see very little meaning in it at all," said Mr. Clark of the newsroom stock rush.

There aiso has been a rush of awards for Evening News properties. The *News* won the Pulitzer gold medal for meritorious public service for a series of articles on deaths at sea of Navy personnel.

Announcement of the award was slipped into ads from new agency N W Ayer, which replaced McCann-Erickson on the $1 million account.

A company tv station, WDVM-TV, Washington, won a Peabody award and the station retained news leadership in the Washington market. Evening News management considers the Washington prominence important because of the market's relatively stable economy, and also because of the opportunity afforded to try to influence the thinking of political leaders.

"The basic flow of earning or publishing power in that community remains high and growing," said Mr. Clark. "Businessmen to some extent can predict that it will keep on growing and act accordingly."

ENA is satisfied with the performance of its television stations and hopes to buy another vhf and uhf station, though Mr. Clark would not say when. Closer at hand is the acquisition of other electronic media—possibly in cable. "We are analyzing all of that very closely and we will make investments in new communications fields," said Mr. Clark.

The company has been saying that for some years, but it is ready to move soon. "I would hope in 1982, certainly in 1983," said Mr. Clark.

Field Enterprises

Field Enterprises, Chicago, is the country's 22nd largest media company, with 1981 media property revenues estimated by Advertising Age at $368.7 million, or 87% of total revenues estimated by AA at $425 million.

Privately owned Field Enterprises includes the *Chicago Sun-Times* among its media properties and also has substantial real estate holdings.

In recent months Field has intensified its longstanding interest in new communications technologies.

However, a late 1981 plan to solidify its foothold in cable tv with the acquisition of Eugene, Ore.-based Liberty Communications failed when the companies broke off talks two weeks ago. Liberty claims about 210,000 subscribers to cable tv systems in Alabama, California, Georgia, Illinois, Michigan, Oregon, Pennsylvania, Texas and Washington.

These would have been added to Field's own cable holdings, which currently consist of six cable franchises in southern California, serving 12,000 basic and 11,000 pay subscribers.

Field said Liberty Communications was "considering alternative forms of transaction which may include participation by Field."

The companies did not elaborate. Field's originally proposed price for Liberty Communications was not disclosed.

Field Enterprises in April sold the assets of its new Field Electronic Publishing subsidiary to KEYCOM Electronic Publishing, a partnership formed by Field, Centel Corp. and Honeywell Inc.

The joint venture was created to develop, market and operate a videotex service called KEYTRAN, which enables home and business users to retrieve information and conduct business on a tv screen.

To begin operation in mid-1983, the venture is expecting to draw 25,000 videotex subscriptions and 50,000 teletext subscriptions, generating revenues of $15 million in the first year. Field has a 16% interest in KEYCOM.

KEYCOM also plans to make a national version of KEYFAX—the teletext system Field has been testing in the Chicago area—available to approximately 20 million homes through Southern

Satellite Systems. KEYFAX consists of a scrolling version of news, sports, business, weather and leisure information. Subscribers to the service will have set-top decoders and remote control keypads with which to obtain access to the information.

Also now a property of KEYTRAN is Field's Nite-Owl news and information teletext magazine, aired on Field-owned WFLD, a Chicago uhf station, from midnight to 6 a.m.

Field has its hand in another area of communications technology as a partner in Super TV with Subscription Television of America.

In mid-June, Field ceased publication of its string of suburban shoppers. The *Chicago Sun-Times*, one of the two daily newspapers left in the city, continues to show circulation gains in its hotly contested battle with the *Chicago Tribune*. According to the Audit Bureau of Circulations, in the six months ended March 31, *Sun-Times* weekday figures climbed to 663,500 from 681,400 for the same period a year earlier; *Tribune* circulation dropped 2.5% to 770,798. Sunday circulation slid for both papers, with the *Sun-Times* down approximately 15,000 from the same period a year earlier, and the *Tribune* off by 43,000.

Freedom Newspapers

Freedom Newspapers, Santa Ana, Cal., is the country's 43rd largest media company, with 1981 revenues estimated by ADVERTISING AGE at $194.1 million media operations.

Except for KTVL-TV, Medford, Ore., which was acquired in 1981, all of Freedom's revenues come from newspapers.

Its principal property is the Orange County Metro Group Newspapers, a trio of Southern California dailies: *Anaheim Bulletin, La Habra-Brea Star Progress* and the *Santa Ana Register*. Freedom also owns 29 other daily papers, mostly in the South and Midwest.

A major transition in Freedom's history began last January with the death of chairman Clarence Harrison Hoiles at 76. Mr. Hoiles had a 54-year newspaper career. He was publisher of Freedom's *Santa Ana Register* from 1970 to 1975, and co-chairman with his brother, Harry, from 1975 to 1979. Mr. Hoiles, a staunch advocate of freedom from government regulation, was named chairman of Freedom Newspapers in 1979.

Through May of this year, Freedom had acquired no new properties. However, according to president D.R. Segal, Freedom continues to look into acquisitions. "Right now," Mr. Segal said, "We are interested in a cable system and several tv stations." Mr. Segal declined to indicate in what parts of the country these prospective properties are located.

BEATING THIS GUY IN THE WET T-SHIRT CONTEST WASN'T EASY.

1980. Total revenues also rose 13%, from $1.215 billion. Gannett's earnings last year set a record for the 14th straight year, rising 14% to $172.5 million from $152 million.

Allen Neuharth, chairman and president, told shareholders last month that Gannett expects record profits again this year. In the first quarter, the company's earnings rose 5% to $31.6 million from $30.2 million. That was the smallest quarterly earnings rise in the 58 quarters since Gannett became a publicly owned company in 1967. Mr. Neuharth blamed the small gain on the weak economy.

Late last year, Gannett, which has grown primarily through the rapid acquisition of newspapers in one-newspaper communities, approved the most ambitious project in its history, and one that will put it squarely in competition with the major newspapers it has avoided over the years. The undertaking is *USA Today*, a national daily newspaper that Gannett plans to introduce this September in Washington, in four other markets by the end of the year and in 15 markets in all by the first quarter of 1983.

Although Gannett believes it can continue to grow under its longstanding strategy, some company followers believe the company may be wondering how much more growth it can derive by acquiring existing, mostly small, newspapers, especially when the number of attractive independent papers continues to decline.

Much of Gannett's recent newspaper revenue growth, moreover, has come from price increases rather than increased circulation or ad linage. Circulation revenues rose 13% last year to $260.9 million, but total circulation of Gannett's dailies fell for the third straight year, by 1.3% to 3.63 million. Ad revenues climbed 9.4% to $788.3 million, but ad linage rose a modest 0.3% and remained 1.5% below that of the record level of 1979.

Some critics also charge that Gannett muffed a chance to be a major factor in cable tv. They say the company's monopoly newspaper status in many markets should have encouraged it to move promptly and aggressively into cable tv ownership in those communities; instead, they say, Gannett stood on the sidelines while others were bidding cable tv properties up to what the company now says are prohibitive prices.

In any case, whether by choice or because it simply did not move quickly enough, Gannett today owns no cable systems and thus may be seeking with *USA Today* the growth many of its fellow newspaper companies see in the burgeoning cable business.

A less tangible but nonetheless important additional reason for *USA Today*, company followers believe, is the desire of Gannett and Mr. Neuharth to become the important media voice that the company heretofore has not been, despite its size and impressive financial performance. "The Nation's Newspaper," as Gannett describes *USA Today*, could make the company the "indisputable leader in the media business for your lifetime and mine," Mr. Neuharth told shareholders at last month's annual meeting.

With *USA Today*, Gannett will be competing for national advertisers with the *Wall Street Journal*, the *New York Times* and the weekly news magazines. Gannett last month disclosed what it called a unique advertising program aimed at attracting big advertisers. The plan "will help refocus the thinking of major national advertisers on the daily print medium," Mr. Neuharth told shareholders.

"We're going to be talking about it as newspaper in format and magazine in concept," said Joseph Welty, *USA Today* vp-advertising. The ad program offers the kind of rate discounts and striking four-color graphics more commonly associated with the magazine industry. To get advertisers to try the new paper, Gannett also is offering them the possibility of free ads for the publication's first eight months if they commit themselves to advertising for 15 months.

Gannett is willing to sacrifice its traditional large earnings gains to launch *USA Today*. Mr. Neuharth told security analysts recently that the company could suffer its first quarterly earnings decline in the first quarter next year, when *USA Today* is in its early expansion stage. The company has incurred only minor costs in the two-year development of the paper, but could spend about $20 million on the paper this year and $55 million in 1983, a security analyst said. Gannett says it will be able to finance the paper without any additional borrowings.

Gannett is aiming the paper at relatively affluent and mobile readers. It believes it can sell *USA Today* to about 4% or 5% of current newspaper readers, eventually selling 2.5 million to three million copies a day, which would make the paper the largest-circulation daily in the country by a comfortable margin.

Advertiser and ad agency reaction to prototypes of the new paper has been mixed, although Gannett says prototypes have been received favorably by the agencies it has talked to. Gannett plans a carefully controlled rollout of the paper through 1987, with numerous checkpoints along the way to measure performance against projections. Gannett hasn't disclosed any financial projections for *USA Today*. One security analyst has projected that the paper will break even in 1984 and earn as much as $20 million before taxes as early as 1985.

Meanwhile, Gannett has continued to seek out acquisitions. Last year, it spent $60 million to acquire the daily newspapers the *Norwich* (Conn.) *Bulletin*, the *Knoxville* (Tenn.) *Journal*, the *Gainesville* (Ga.) *Times* and the Spanish-language *El Diario-La Prensa; Poultry & Egg News*, publisher of two national poultry trade papers, and a weekly in Salem, N.J. The 50,000-circulation *El Diario-La Prensa* is the largest Spanish-language daily on the U.S. mainland; the company said it plans to use the paper as the base for serving Hispanic readers throughout the country.

So far this year, Gannett has acquired the *Jackson* (Miss.) *Clarion-Ledger* and *Daily News* and the *Hattiesburg* (Miss.) *American*, all dailies, as well as six Mississippi weeklies. The company didn't disclose the cost of those acquisitions. It said earlier this year it had the ability to spend as much as $100 million on acquisitions in 1982. Also, Gannett papers in Fort Myers, Fla., and Santa Fe, N.M., began providing news and other programing to cable operators. The moves don't signal any intention to move into cable ownership, however, the company said.

General Electric Co.

General Electric Co., Fairfield, Conn., is the country's 46th largest media company, with 1981 media-property revenues estimated by AA at $175 million, out of total revenues of $27.2 billion.

In 1980, the company had estimated media revenues of $150 million out of total revenues of $24.96 billion.

The company operates two consolidated media affiliates within its Consumer Products and Services group: General Electric Broadcasting Co., with three tv stations and eight radio stations, and General Electric Cablevision Corp., with 296,227 subscribers as of May 4, 1982.

According to Winthrop Baker, president and ceo of the two operations, "both areas went up very nicely in 1981." GE Cablevision concentrated on signing more subscribers during the year, rather than laying new cable. Nearly 60% of the homes passed are basic subscribers, and almost half (48%) of those are pay tv customers as well.

"We've invested a lot in upgrading [adding more channels] and further tiering [adding more pay tv options] to our system," Mr. Baker said. "By mid-1983, we plan to bring all of our systems up to the latest state-of-the-art technology. This can be almost as expensive as installing the initial system."

Mr. Baker indicated that 11 of GE Cablevision's 13 systems gained sizable numbers of new subscribers in early 1982, while one, in Anderson, Ind., where the unemployment rate is 22%, was flat for the year. Another system, in Peoria, Ill., also hit hard by the current recession, showed only modest gains.

"It may say something about our society, but people don't seem to be giving up their cable systems, even in hard times," said Mr. Baker. "They may cut back on pay services, but they're keeping the basic cable." GE Cablevision had revenues estimated by AA at $70 million last year.

Mr. Baker, who took over the broadcasting and cablevision business at GE a little more than a year ago, said that many restructuring plans on the broadcast side are in full swing. Last year "could be termed a 'turn around' year for our broadcasting properties," he said.

"We split tv and radio into two groups. Randy Bongarten, who was a manager of one of the radio stations, is now vice-president for the radio group," he said.

On the tv side, new general managers have been hired in Denver and Nashville. "We've made significant changes in our programing," said Mr. Baker. "In Denver, I believe we have the most original live programing of any station in the country."

He said that the station, KOA-TV, an NBC affiliate, has added two hours of news a day and a half-hour local call-in show. At 12:30 a.m., when network broadcasting has ended, the station airs a five and one-half hour call-in show that is simulcast by the company's KOA (am) radio station, a 50,000 watt, clear channel station. The station now broadcasts 42 to 45 hours of live local programing a week, including the most news of any station in the Mountain Time Zone, he said.

"It's an aggressive, lively station," said Mr. Baker. "We've completely rebuilt the station's news product with a multi-million-dollar investment and by hiring the best news director in Denver from another station." He said that similar changes are under way at WNGE-TV in Nashville, with more emphasis on news and local college sports coverage.

WRGB, the company's television station in Albany, N.Y., switched affiliation from NBC to CBS in late September last year. The No. 1 station in its market, WRGB had been with NBC since the 1920s when it became that network's first independent affiliate.

"We're becoming more total-service oriented with our television stations," said Mr. Baker. AA-estimated revenues from GE's broadcasting operations were $105 million in 1981.

General Tire & Rubber Co.

General Tire & Rubber Co., Akron. O., through its wholly owned subsidiary RKO General, is the country's 50th largest media company.

Media revenues from New York-based RKO totaled $160.9 million out of General Tire's total revenues of nearly $2.2 billion.

The 30-year-old RKO entered the broadcasting field with the acquisition of a single radio network. Today, amid numerous legal problems, the company operates three television stations, 12 radio stations and three radio networks.

Last September RKO started up its second radio network, which now has 140 affiliates. In January it launched a third. RKO III leans heavily on long-form programing for specific time slots, including a midnight-to-6 a.m. talk show.

Also, last July, the company sold Cablecom-General, its cable-television arm to Capital Cities Communications for $105.7 million, which resulted in a gain of $45.1 million for RKO.

RKO's future as a broadcast company, however, is in jeopardy. In January, 1980, the Federal Communications Commission voted not to renew RKO licenses for KHJ-TV, Los Angeles, WOR-TV, New York, and WNAC-TV, Boston, because of evidence that General Tire had bribed foreign officials, kept a secret slush fund for illegal political contributions and engaged in other improper activities, described in a civil suit brought against the company by the Securities and Exchange Commission in 1976 (General Tire entered a consent decree as a result of that probe) and in a report prepared by General Tire's outside directors.

The FCC also found that RKO had been less than candid in presenting, or failing to present, the FCC with information about the SEC probe and the evidence of General Tire's wrongdoing.

General Tire appealed the FCC ruling to the U.S. court of appeals for the District of Columbia circuit. The court held, in December 1981, that RKO's "egregious lack of candor" during hearings over renewal of the Boston license disqualified the company from retaining that license. But that finding did not necessarily apply to the Los Angeles and New York stations, the court said, and it sent those cases back to the FCC for additional proceedings, which are progressing while RKO continues to operate the two stations.

The Boston station, however, is gone from the RKO fold. The U.S. Supreme Court in April refused the company's request that the high court review the FCC's decision, and last month New England Television Corp., a group of Boston investors, took over the station.

For its fiscal year ended Nov. 30, 1981, WNAC-TV had revenues of $28.2 million and net income of $4.7 million.

Once the proceedings involving the Los Angeles and New York stations are concluded, the FCC might challenge RKO's qualifications to hold licenses for all its broadcast properties. That could force the company out of broadcasting entirely.

The sale of Cablecom-General to Capital Cities arises, according to the company, from RKO's decision to move out of the capital intensive hardware end of the cable tv and into the area of software to provide programs for cable tv systems and other video markets.

To accomplish its new goal, RKO Pictures entered into a joint venture with a nationwide theatrical group and has, the annual report said, "become one of the larger independent producers of shows for pay television."

The three-year joint venture program, which began in 1980, requires RKO to contribute $25 million annually, and Universal City Studios to contribute $8.3 million for the same period.

The payoff to RKO will be 75% of the joint venture's revenues—after expenses and distribution fees—as well as additional payments.

As of Nov. 30, 1981, the venture had not released any pictures for distribution. The company's investment as of Nov. 30 was $38.6 million.

Earlier this year, RKO be-

To maintain credibility in these uncertain times, a newspaper must have a solid sense of its environment. An identity that feels exactly right to its readers and advertisers.

There is a natural partnership between our newspaper and the unique and healthy evolution of our Orlando market. . .a major U.S. metropolitan area in Central Florida flourishing in the midst of national economic confusion. Orlando and its newspaper are moving together toward a vibrant future, where change means growth in the best sense of the word.

That's why the Sentinel Star changed its name to The Orlando Sentinel.

A simple change that makes sense.

The Orlando Sentinel
(305) 420-5268
Represented nationally by CWO&O and Sunday Mag/Net
Newsplan discounts optional

came a charter member of the Radio Network Assn. RKO Radio Network president Tom Burchill serves as vice-chairman.

In addition to RKO, other charter members include ABC, CBS, NBC and United Stations.

The aim of the association is to promote a better understanding of network radio on the part of advertising agencies and advertisers.

In addition to its broadcast properties, a soft drink bottling division and Frontier Airlines comes under RKO's ownership. The bottling division is one of the 10 largest Pepsi-Cola bottlers in the country. These operations, which are located in Ohio and Indiana, include eight soft drink bottling companies and a canning plant.

Frontier Airlines ranks as the 13th-largest airline in the country. Based in Denver, the airline serves 86 cities in 27 states, Mexico and Canada.

H&C Communications

H&C Communications, Houston, is the 44th largest U.S. media company, with 1981 revenues estimated by ADVERTISING AGE at $188.3 million, all from media properties. The largest of these is the *Houston Post*, which accounted for about 75% of the company's revenues. The remainder is broadcast.

In 1980, the company, then known as Houston Post Co., had estimated revenues of $165 million.

H&C Communications, which came into being this year with the acquisition of KVOA-TV in Tucson, is privately owned and will not discuss its operations. In a 1978 *Texas Monthly* article, the company's net worth was estimated at $200 million. But Oveta Culp Hobby, chairman and editor, reportedly characterized that estimate as being a little high.

The Hobby family has owned the company since 1939. From all accounts, Mrs. Hobby, now 76, remains actively involved in the newspaper's daily affairs.

Some observers have speculated that the newspaper remains at a standstill because of Mrs. Hobby's dominance, but others suggest that the company may be moving quietly to expand its broadcast operations, as evidenced by the Tucson acquisition.

The *Post* was also stirred this year to protect its morning franchise against the *Houston Chronicle*, which became an all-day newspaper in 1980, with an aggressive advertising and promotion campaign. Launched in mid-May, the campaign featured heavy use of tv and radio. Its theme was, "The *Post* puts the good in every morning."

The campaign's creative work was a collaboration of Bower O'Neill Advertising and Dallas-based Radio Ranch. One of the principals of Radio Ranch is Dick Smith, who was creative director at the Houston agency, Rives, Smith, Baldwin & Carlberg, when it created an award-winning campaign for the rival Chronicle.

In the six months ended March 31, the "all-day" *Chronicle's* circulation rose 7.1% to an average of 393,730 copies daily, while the morning *Post's* circulation rose 8.3% to 376,879 daily.

Both papers also have increased circulation on Sunday.

In addition to the Tucson tv station the company is acquiring, H&C also owns and operates KPRC-TV, an NBC affiliate in Houston, ranked third in the market in heated competition with KHOU, the CBS affiliate. In Nashville, WTVF-TV, is No. 2 in the market.

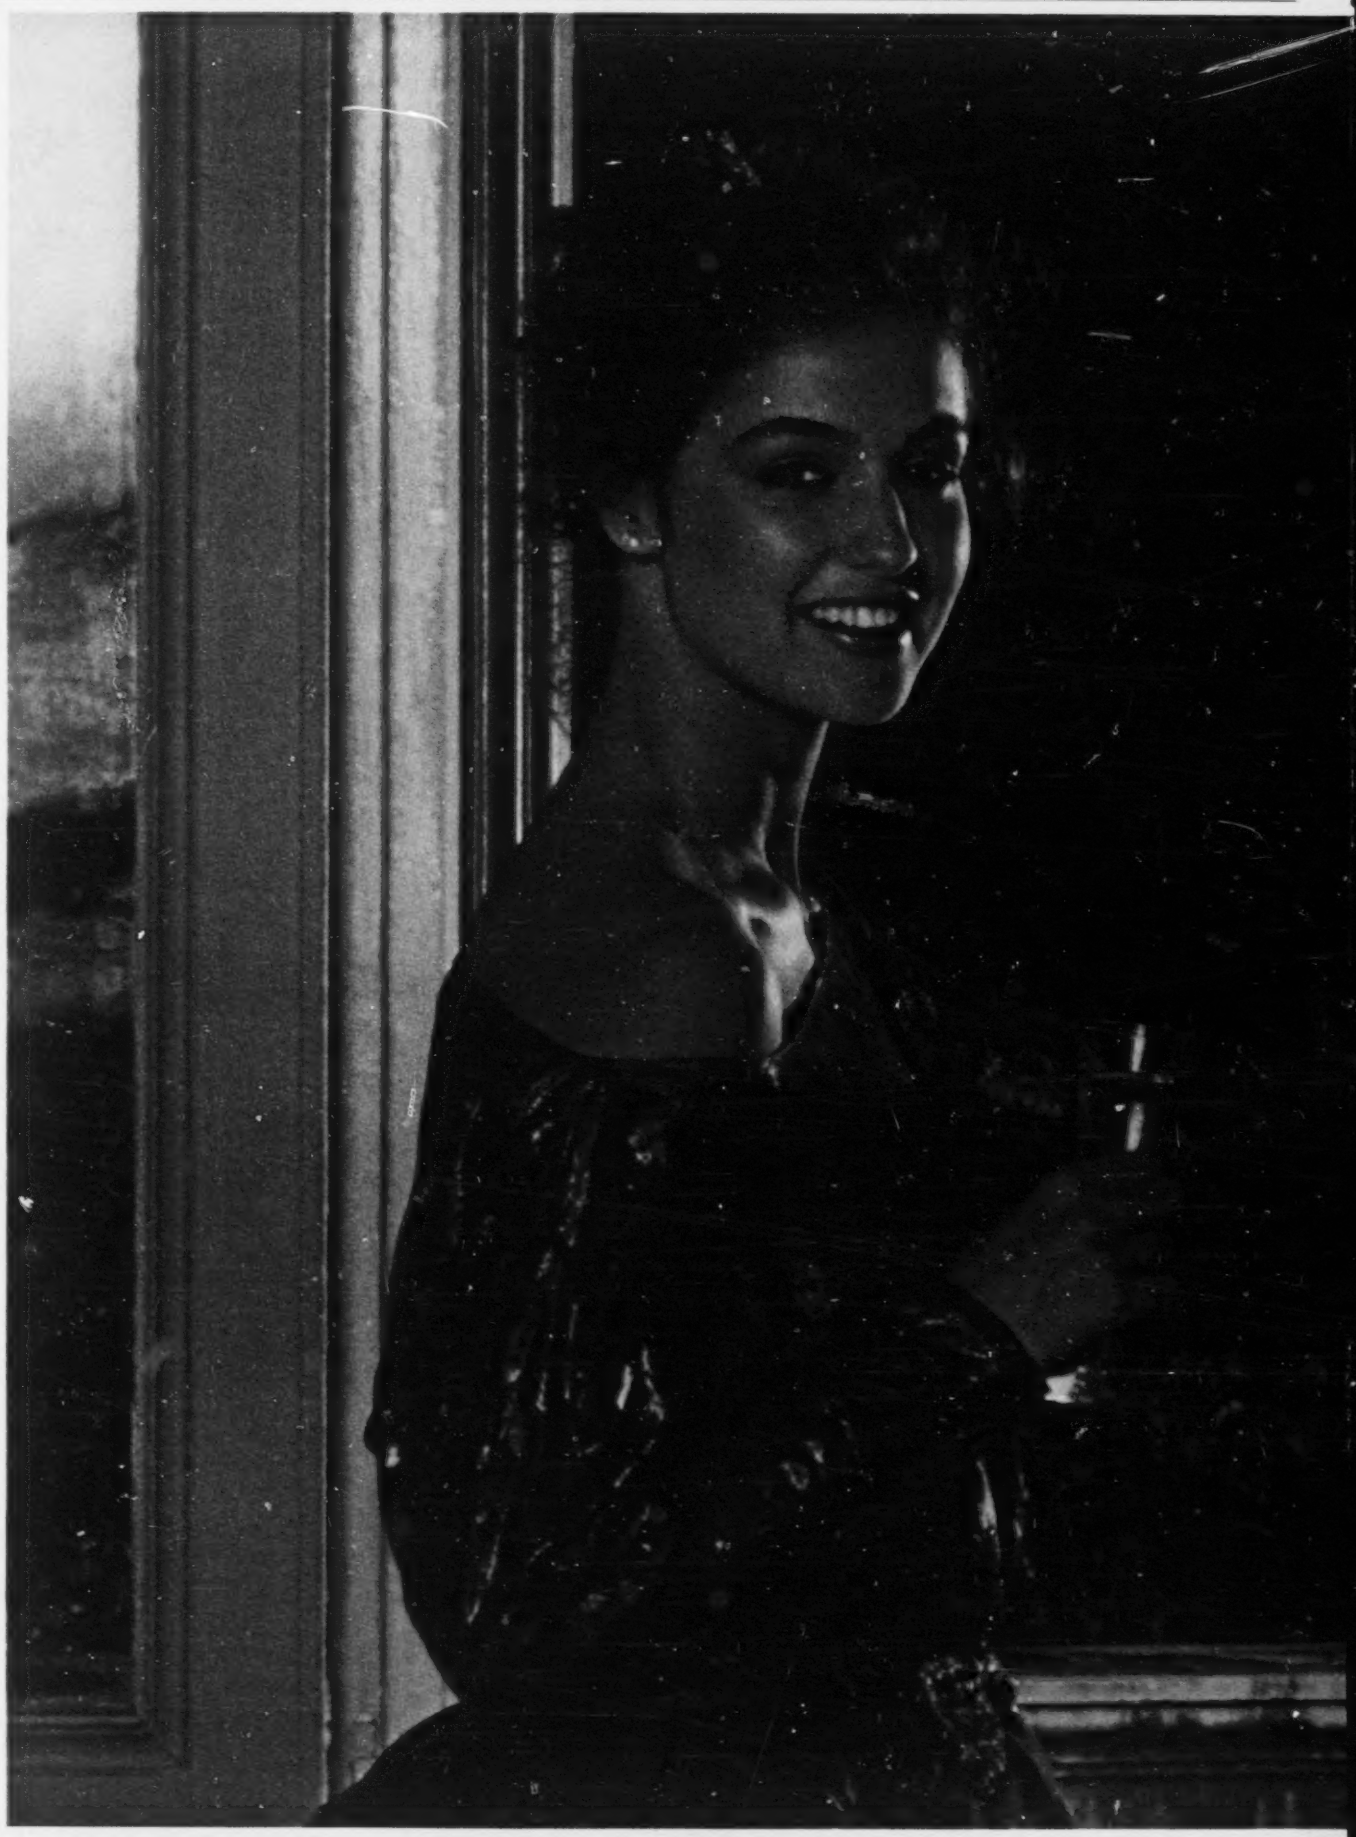
Harcourt Brace Jovanovich

Harcourt Brace Jovanovich, New York, is the country's 73rd largest media company, with media operation revenues estimated by ADVERTISING AGE of $107 million last year, or 19.4%



of revenues of $539.3 million.

The publicly owned company has three operating units: HBJ Publishers (books, academic journals and instruction courses); Sea World Enterprises (marine parks, food processing and services and land development), and its media group, HBJ Communications and Services (magazines, tv, insurance, book clubs and management consulting).

Revenues of the communications and services group were $113 million in 1981, with magazines and tv representing about 95% of the total, according to AA estimates.

Founded in 1919 as a pioneer in educational, general and professional books, HBJ has since made a practice of entrenching itself in strong educational markets, including elementary and secondary textbooks, tests and supplies; scientific books and journals; law, business and accounting publications and learning materials for college students.

The bulk of total HBJ operating profits—about 53% last year—comes from HBJ Publishers, but this division has been hurt more than the others by the recession. The division's operating profits fell 18% last year despite a 5.4% increase in sales.

In the company's 1981 annual report, William Jovanovich, chairman and chief executive officer, said the pinch was felt most acutely in research and instructional publications.

Mr. Jovanovich expressed hope, however, for a steady gain in market share over the next five years. He said he expects continued market growth for educational testing materials, as well as for fiction and general nonfiction books.

The need to brighten this division's profit picture led to HBJ's somewhat startling decision to head for the Sunbelt. Last February, the company announced that it would move corporate and certain divisional headquarters out of New York—the home office since HBJ was founded more than 60 years ago—to San Diego and Orlando.

Although the move surprised the publishing world and distressed New York's City Hall, HBJ said the decision came only after 20 months of intense study and analysis of ways to cut costs.

The move will not affect HBJ Communications and Services, which will remain in New York City in new headquarters—an HBJ-owned building at 111 Fifth Ave.

In 1981, HBJ Communications and Services sales rose 7%; earnings for this division rose 23% from last year. Robert Edgell, the division's chairman and ceo, said the versatility of HBJ Communications and Services has helped during the economic downturn. Some of the industries served by its publications—for example, oil—are booming, offsetting the effects of those—such as housing—that are not.

J. Kendrick Noble, publishing analyst with Paine, Webber, Jackson & Curtis, agrees that diversification has served HBJ well. "Its strategy of being a relatively big fish in lots of small ponds that the company knows very well has paid off," Mr. Noble said.

In April, HBJ Communications and Services made two major acquisitions that brought to 111 the number of the division's publications. The company first purchased *DVM: The Newsmagazine of Veterinary Medicine*, from Gridley Publications, reportedly satisfying a longstanding corporate interest in this branch of medicine. The company also publishes related magazines such as *Modern Medicine, Geriatrics, Physician's Management, Dental Management* and *Dental Laboratory*.

Shortly after acquiring *DVM*, HBJ bought Chicago-based Magazines for Industry, publisher of 16 magazines including *Beverage Industry, Candy & Snack Industry, Food & Drug Packaging* and *Paperboard Packaging*.

HBJ shows no signs of diversifying from its trade publishing base—either in magazines or books. Here history seems to have taught a lesson: In 1979, HBJ divested itself of two unsuccessful forays into the strictly consumer market: Jove Publications, publisher of mass-market paperbacks, and *Human Nature*, a highly publicized, glossy, popular magazine into which the company had plowed substantial sums.

Harte-Hanks Communications

Harte-Hanks Communications, San Antonio, is the 26th largest media company in the nation, with media property revenues of $300.9 million in 1981, or 86% of total revenues of $348.5 million. Media revenues rose 12% from $268.6 million in 1980, while total revenues were up 15% from $303.7 million.

The publicly owned company said it derived 61% of last year's revenues from newspapers, including shoppers, and 20% from broadcasting.

Harte-Hanks' earnings last year rose 12% to a record $25.4 million from $22.7 million.

The first quarter this year, according to president and chief executive officer Robert G. Marbut, "was probably the toughest we've experienced since Harte-Hanks went public in 1972." Nevertheless, Harte-Hankes reported revenues of $86.7 million for the first quarter, an increase of 7.5% from the first quarter the previous year; earnings rose to $4.4 million from $4.2 million. It was the company's 41st consecutive quarter of earnings growth over the same quarter of the previous year.

The company had speculated in mid-1981 that the first quarter of 1982 might be tight because of "revenue softness" in several lines of business, including radio, the general national economic climate, increased interest expenses and other factors. However, at the company's annual meeting last month, Larry D. Franklin, executive vp, predicted record earnings for 1982.

Mr. Marbut recently told security analysts that the company "has selected four mainstream businesses and four new businesses to concentrate on in the next few years: Newspapers, Pennysavers, radio and tv [two print, two electronic] are the mainstream businesses that we will continue to nurture and support. The four new businesses that we will continue to expand are: Cable tv, selected entertainment software, electronic information systems and consumer distribution marketing" (targeted marketing of advertising products to the consumer's doorstep).

Harte-Hanks owns and operates daily newspapers and nondaily publications, including weekly newspapers, advertising publications produced by newspapers and a radio trade publication. In addition, HHC publishes Pennysavers and shoppers that reach 2.5 million households each week, owns four tv stations, five am and six fm radio stations, manages or owns several cable tv systems and owns and operates seven marketing services companies, 22 direct-mail systems and 14 alternative delivery systems.

During 1981 the company made changes in several business areas. Radio revenues in two markets went down, which triggered changing the formats of the two stations (WNIS-AM, Tampa and KMJK-FM, Portland).

Wayne Kearl, chairman and ceo of broadcasting and entertainment retired on Dec. 31, remaining in an advisory role as assistant to the president. William G. Moll was named president and ceo of the group and senior vp of Harte-Hanks. Mr. Moll is former president and ceo of the tv group.

While newspaper revenues increased 13% last year, the company indicated increasing concern for the effect of high interest rates on retailers, some of whom are turning to alternate, less costly sources of advertising. Retail ads have accounted for more than 60% of the company's newspaper revenues.

The company said newspapers are being hurt by advertiser shifts from r.o.p. advertising to inserts and "marriage mail," in which retailers send advertising directly to consumers. Concern for retail ad trends was not unfounded. Insert accounts lost during the year included a K mart insert (1.4 million per week) and a Fed Mart insert in Pennysavers, both to a marriage mailer.

The company last year acquired the *Post-Dispatch*, Dardanelle, Ark., and *News-Herald*, Del Rio, Tex. The company sold Show Case Publishing, publisher of *Fashion Showcase*, a Dallas-based publication for apparel buyers, to Taylor Communications.

In cable, Harte-Hanks signed option agreements to acquire UltraCom, Montgomeryville, Pa., from AEL Industries, and to acquire Southwestern Satellite. UltraCom operates 13 cable tv systems in eight states and has three systems under development. Southwestern Satellite operates a cable tv system in the Houston area adjacent to systems owned and managed by HHC. Both options are exercisable in 1984. The company said the acquisitions "would substantially increase Harte-Hanks' presence in the cable industry."

In December, the company handed its $1 million advertising account to Cunningham & Walsh, Dallas, from KCBN, Dallas, following the move of Harve Chapman from KCBN to president of C&W/Dallas.

Since the start of 1982 Harte-Hanks has reorganized its consumer distribution marketing group, integrating distribution and shopper publishing activities into two groups: CDM East and CDM West. The change was described by a company spokesperson as "more of an evolution rather than a revolution," caused by growth. In 1981 CDM completed a $6.6 million publishing/printing/distribution plant in Brea, Calif.

In April of this year Harte-Hanks acquired Tele-Research and TRIM, both of Los Angeles, for undisclosed amounts. With combined revenues estimated last year of approximately $3.8 million, plus the $8 million HHC's other two research companies, Urban Data Processing and RHM Research, reported last year, HHC becomes one of the top 20 research companies in the nation.

Harte-Hanks' *Middlesex News*, Framingham, Mass., is participating with 10 other newspapers in a CompuServe and Associated Press project testing electronic information dial-a-computer access to subscribers who own home computers.

In addition to Mr. Marbut's posts of president and ceo, he is also chairman of the telecommunications committee of the American Newspaper Publishers Assn.

In that capacity, Mr. Marbut spent much of his time in 1981 lobbying against American Telephone & Telegraph's proposed testing of its "electronic Yellow Pages" in Austin. His efforts resulted in the Texas Public Utilities Commission ordering a new hearing on the matter.

Hearst Corp.

Hearst Corp., New York, is the ninth largest U.S. media company, with 1981 media property revenues estimated by ADVERTISING AGE at $1.2 billion. Hearst's total revenues were not available.

Hearst had estimated media revenues in 1980 of $1.1 billion.

The company in recent months has been establishing itself as "a total communications" organization, with the new technologies of cable, videodiscs, videocassette recording and videotex coming in for particular attention. Hearst's *San Francisco Examiner* is participating in a videotex test and over-all the company is looking into all phases of electronic publishing. Still, Hearst believes that the new technologies generally may be getting a disproportionate amount of publicity to the neglect of the traditional media.

The thinking is that the growing new technologies provide Hearst with promising opportunities to extend already strong franchises in magazines (both consumer and trade), newspapers, books and broadcasting into additional uses. Yet the current recession has hit home. It has adversely affected some newspaper and book operations.

Hearst is strongest in the traditional areas of magazines and newspapers. The company publishes 21 magazines, including *Harper's Bazaar, House Beautiful, Town and Country, Cosmopolitan* and *Good Housekeeping.* It distributes them in 30 countries in eight languages.

Hearst publishes 13 newspapers coast to coast, ranging from the *Examiner* to Albany, N.Y.'s *Times Union* and *Knickerbocker News.*

The big news for Hearst last year in newspapers was the purchase, for more than $15 million, of 28 Southern California weeklies and two small dailies with an estimated total circulation of about 425,000 (compared with the 285,000 daily circulation of the company's *Los Angeles Herald Examiner*). They are combined once a week with the *Herald Examiner* and sold to advertisers as a package. The company's interest in smaller newspapers is a relatively recent development, and in Southern California is designed to bolster the *Herald Examiner* as an advertising force, particularly in the suburban areas, where the paper was weakest.

Some Hearst dailies, such as the *Los Angeles Herald Examiner* and *Boston Herald-American,* have been seeking to reposition themselves in the marketplace. The Los Angeles paper has switched from a p.m. to a.m. newspaper, now going head-to-head with the dominant *Los Angeles Times.* In Boston, the *Herald-American,* trying to tough it out with the *Boston Globe,* has been publishing as a tabloid since last Sept. 13. In Seattle, Hearst's *Post-Intelligencer* is involved in an attempt to merge the paper's production, advertising and printing operations with the competition daily, *Seattle Times.* Earlier in the year, a Justice Department law judge, in ruling that the *Post-Intelligencer* should be permitted to publish jointly with the *Seattle Times,* pointed out that the Hearst paper qualifies as a "failing newspaper" under antitrust law.

Hearst Cable Communications division was established in May, 1980, to acquire cable tv systems and to develop programing and other opportunities for Hearst print-related resources.

Hearst's broadcasting interests cover five tv stations and a total of seven am and fm radio stations in major markets such as Baltimore, Pittsburgh, Milwaukee and San Juan, Puerto Rico. One of the bigger tv stations, KMBC-TV in Kansas City, is a recent acquisition, approved May 18 by the Federal Communications Commission. Hearst bought the station from Metromedia Inc. for $79 million in cash.

The move to expand in broadcasting started last year with acquisition of WDTN-TV in Dayton, O., for $49.9 million. It was the first action by Hearst in 15 years to expand its tv-related holdings. This expansion has progressed to where Hearst now has its full complement of five vhf stations, four of them ABC-TV affiliates, and WBAL-TV in Baltimore, affiliated with CBS-TV.

Hearst/ABC Video Services, the joint venture formed with American Broadcasting Co. 18 months ago, is on track producing and supplying programing for two specialized cable network services, Alpha Repertory Television Service or ARTS and "Daytime." ARTS began its second year of programing in March. It's a nightly cable tv service devoted to the performing arts and is advertiser-supported. "Daytime," a four-hour weekday video magazine specializing in programing for women that is delivered by satellite and advertiser-supported, started on March 15.

The thrust of the joint venture is to create, own and operate these services as an independent subsidiary. The pivotal appointment in the venture was the installation of James N. Perkins as president and chief operating officer. He was recruited from Washburn Associates, the Chicago-based marketing and advertising agency he founded.

The strength Hearst brings to the venture is its sophisticated knowledge of the women's market. In addition to developing still other specialized cable network services, Hearst/ABC plan to explore ancillary uses for the programing they turn out together, including videocassette and videodisc applications.

Also new at Hearst is King Features Entertainment, earmarked to move aggressively into program production, distribution and licensing for all tv and home video media worldwide. Former Time-Life Films president Bruce L. Paisner heads the new Hearst subsidiary.

Hearst publishes numerous books (not counted among media properties). These include hard-cover best sellers such as "Come Pour The Wine" and "Portraits" under the Arbor House imprint, and "The Thorn Birds" and "Ashes in the Wind" from Avon in paperback. Hearst, too, is the operator of King Features, which is home of "Popeye" and "Blondie" comics strips. The company also is involved in such other industries as forest products, real estate and ranching.

Acquisition last year of the William Morrow & Co. book publishing company was aimed at strengthening the Hearst position in the general interest publishing field, allowing the company to better compete for the works of big-name authors. Morrow was acquired from SFN Co., Glenview, Ill., for more than $22 million.

Houston Chronicle Publishing Co.

Houston Chronicle Publishing Co., Houston, is the 51st largest U.S. media company, with 1981 revenues estimated by ADVERTISING AGE at $160.6 million, all from its sole business, the *Houston Chronicle.* The *Chronicle* last year edged out the *Chicago Tribune* for the No. 2 slot in total advertising linage in the nation, ranking second only to the *Los Angeles Times.*

Last year's revenues were up 20% from estimated revenues in 1980 of $133.7 million.

The all-day newspaper is part of the Houston Endowment, a private charitable foundation created upon the death of Houston businessman Jesse H. Jones in 1956. Mr. Jones left the newspaper, several banks, corporations and various other properties in the endowment.

A federal tax statute, the Tax Reform Act of 1969, requires that by 1989 the endowment can have no more than 50% interest in the *Chronicle,* but to date there have been no reports of serious negotiations of a possible sale of the paper. Industry analysts have said the paper could be sold for $200 million to $400 million.

For the fourth consecutive year the *Chronicle* was first in the nation in classified ad linage with 62.7 million lines, up 1.4 million from 1980. In both retail and general advertising the *Chronicle* ranked sixth in the country. Total advertising was 119 million lines, up 2.9 million from 1980.

For the six months ended March 31, the *Chronicle,* which became an all-day publication in 1980, had average daily circulation of 393,730, up 7% from the year-ago period. Sunday circulation rose 6.2% to 481,319. Daily and Sunday circulation of the rival *Houston Post* also increased.

As competition between the two papers continues to intensify, the *Chronicle* is shifting to a new phase of its award-winning ad campaign. For the last two years, the campaign created by Houston agency, Rives, Smith, Baldwin & Carlberg, has featured celebrities extolling the virtues of reading newspapers. But the campaign has sparked a competitive response from the *Houston Post,* and a new *Chronicle* campaign is in the offing.

Last December the paper opened two additional auxiliary printing plants and relocated another within the city, bringing the total of such satellite centers to six. The centers facilitate distribution in the increasingly congested city and also serve as advertising offices.

Three years ago the *Chronicle* began a sports information telephone line and has since added traffic, weather and the first business information service in

the country and major newspaper.

In February the newspaper added a sixth press, a nine-unit Rockwell-Goss Metroliner offset press.

Last November the newspaper purchased what is believed to be the second most-used computer-based terminal system in the world, System Integrator's System/55, to replace the paper's existing systems. While editorial and classified will be the heaviest users of the new system, eventually all advertising, publicity, promotion, information systems, credit, accounting and composing will use it.

Howard Publications

Howard Publications, Oceanside, Cal., is the nation's 74th largest media company. Robert S. Howard, founder and owner of the privately held company, declined to release any specific earnings figures, but estimated that revenues at his company in 1981 totaled $100 million, all from media revenues. This compares with revenues estimated by Advertising Age of $87 million in 1980.

Most of the revenues—$90,000,000, or 90% of the total—came from Howard's newspaper properties. Howard says this figure is a 15% increase from 1980 newspaper revenues, and that both advertising and circulation revenues were up, with circulation up also for all newspapers combined. Howard owns 18 newspapers, all dailies, with a total circulation of 334,028; they range in size from the *Northwest Colorado Press*, in Craig, Colo., with its circulation of 4,627, to the *Hammond* (Ind.) *Times*, which puts out 69,774 papers every evening.

The balance of Howard's 1981 revenues, an estimated $10,000,000, came from WIVB-TV, Buffalo, N.Y., the company's sole broadcast property. Howard acquired that station in 1977, and its earnings rose some 20% from 1980; Mr. Howard declares himself "very much satisfied" with its performance.

Last year was a memorable one for the company. Howard streamlined his operations in 1981 by selling One Systems, Oceanside, an electronics systems company, to Compugraphic Corp. of Wilmington, Mass., because "[One Systems] was outside our main line of business," Mr. Howard says. At the same time, the company picked up the *Pekin Daily Times*, a daily newspaper with a circulation of 21,000 readers in that central Illinois community.

But perhaps most significant, 1981 saw Howard enter a joint venture with Donrey Media Group, Fort Smith, Ark., to acquire his company's first interest in cable television. The property was Overthrust Cable TV, a franchise in Evanston, Wyo., with some 2,000 subscribers.

Since then, Howard's cable ventures have gained momentum. In April, 1982, the Howard-Donrey partnership acquired its second and most recent cable franchise: Falcon Communications, based in Los Angeles. Howard says there will "probably" be yet another cable purchase in 1982; he cites cable's "bright future" to explain his company's interest.

The expected completion date for Falcon's system, now under construction, is 1984; it would then pass about 300,000 Southern California homes. Howard expects to have 100,000 basic subscribers by that time. At present, Falcon reaches 10,000 subcribers in the Southern California towns of Norwalk, Huntington Park and Alhambra.

Jefferson-Pilot Corp.

Jefferson-Pilot Corp., Greensboro, N.C., is the nation's 77th largest media company, with media property revenues in 1981 of $91.4 million, compared to 1980's $81.6 million. Earnings from media operations totaled $9.9 million in 1981, up from $7.9 million in 1980.

Media revenues of the publicly held company, whose primary business is insurance, accounted for 9.3% of total revenues of $978.7 million last year. Total revenues in 1980 were $885 million. Total profits last year were $100.4 million, up from $92.5 million.

The company's media holdings consist of two television and 11 radio stations and six daily and 10 nondaily newspapers and 18 shoppers. Broadcasting contributed about 54% of total media revenues, or $49.9 million in 1981. Publishing revenues in 1981 totaled $41.5 million. Net income from broadcasting was $6.9 million in 1981, up from 1980's $5.9 million, while net income from publishing rose to $3 million from $2 million.

It was a rebounding year for the 79-year-old corporation, which entered the media field in 1922, when it purchased CBS radio affiliate WBT in Charlotte, N.C. Net income for its media divisions not only recovered from 1980's disappointing showing but set a record, topping the record of 1979.

Stronger showings in the broadcasting properties were attributed to management restructuring and format changes brought about in 1980.

Wallace Jorgenson, president of Jefferson-Pilot Broadcasting, said format changes at its two Denver stations, KIMN (am) and KYGO (fm), from rock to country music resulted in a 48% profit increase for the two stations in 1981. The format change also helped the am station to jump to fifth place in the market from 13th.

While the company's flagship radio station, WBT (am), fell from first to second place in the fall Arbitron rankings in its market, the division president expressed confidence the station would reclaim the top spot in 1982. Only four of the company's 11 radio stations rank in the top five of their markets.

"We're looking at ways to improve the stations' profit margins, but I don't want to give away any plans we have in store just yet," Mr. Jorgenson said.

The company's biggest accomplishment in 1981 in its tv properties was fine-tuning its computerized news system, Electronic News Processing (ENP), which it hopes to lease to other stations, Mr. Jorgenson said. ENP was introduced at the National Assn. of Broadcasters conference in Dallas last April, and Mr. Jorgenson said the prospects for leasing the system to other stations was promising.

"Our Charlotte station [WBTV] was the guinea pig for this project," he said. "We wanted to get the kinks out of this system first before we went national with it." ENP will provide tv and radio news staffs with instant access via computer terminals to recorded news and can be used to help stations produce their own news programs electronically.

Installation of satellite earth stations at Jefferson-Pilot tv stations WBTV in Charlotte and WWBT in Richmond, Va., in 1980 and 1981 now enable the two stations to receive live programing from their own Washington news bureaus, as well as direct reception via satellite of syndicated programing and other transmissions, Mr. Jorgenson said.

Meanwhile, last year was one of fine-tuning for the publishing arm of Jefferson-Pilot. Acquisitions, a byword at the division in 1980, still had a strong presence in 1981 but so did termination and expansion.

Scott Trundle, executive vp of Jefferson-Pilot Publications and president and publisher of Clearwater (Fla.) Newspapers, said the division folded the *Duke* (Okla.) *Times* in 1981. "It was a small operation and simply was not making money," he said.

In August of last year, the company started a set of shoppers in Texas City, Tex., and in nearby Galveston. Across the southern part of the state, J-P Publications' second largest daily in Texas, the *Laredo Times*, went from an afternoon paper to publishing all day.

Mr. Trundle said the newspaper was at one time the only daily in the market. Several years ago a morning paper was started, which cut into the *Times* market share. Since going to an all-day publication, *Times* has grabbed 65% of the market share, Mr. Trundle said.

In Florida, another of the three J-P Publications newspaper markets, the division acquired the assets of the weekly *Palmetto Press* and two accompanying shoppers for an undisclosed sum.

The acquisition, which was completed last April, gives Jefferson-Pilot Publications a strong presence in the Tampa-St. Petersburg market, where Mr. Trundle said the division's daily *Clearwater Sun* competes head to head with the St. Petersburg papers. Also in the area are the Brandon and Plant City groups of weekly papers owned by the division.

The division continued its program to re-equip its newspapers operations with a new front-end system for news writing, editing and advertising production. Also, he said, staff reduction through attrition has helped the division improve its profit margin.

"I think we are positioned as we should be now. We continue to rely on the Beaumont, Tex., newspapers for leadership. Because of the competitive market in Clearwater, we are looking for ways to improve our advertising linage, and the acquisitions make us a strong contender in that market," Mr. Trundle said.

While the economies where some of its Texas properties are located are sluggish, Mr. Trundle said he was "optimistic at the recovery over the long-term."

OTHER OPERATIONS
Insurance.

Journal Co.

The Journal Co., Milwaukee, is the nation's 54th largest media company, with media property revenues of $152.5 million in 1981, or 53% of total revenues of $290 million. Net income was $21.2 million, rising 24% from 1980's net earnings of $17.1 million.

Although the privately held company would not reveal dollar figures by division, it said that 1981's improved performanace was due to increases in both advertising and circulation revenues, with greatest increases coming from newspaper properties.

The company acknowledged, however, that the additional revenues came from price increases. Advertising unit sales were "definitely off," a spokesman said. Journal Co. said the price hikes were forced by increased newsprint costs.

While the morning *Milwaukee Sentinel* scored a slight gain in circulation for the six months ended March 31, to a daily average of 176,680 from 173,264 in the year-earlier period, the evening *Milwaukee Journal's* circulation in the same period fell 3% to an average of 308,764 from 318,203, and Sunday *Journal* circulation fell to 518,858 from 519,365.

Despite the loss in circulation, the company hasn't announced any plans to change either the *Journal* or the *Sentinel.*

Meanwhile, said the Journal Co. spokesman, broadcast properties (two television and two radio stations), are doing "reasonably well." An especially bright performer is the Journal's big out-of-state venture, KNTV in Las Vegas. An ABC affiliate, KNTV ranked last in that three-station market when bought by the Journal in 1979. In 1981, it had attained second place, with more growth expected.

As of May 10 this year, 22 of Milwaukee's western suburbs can view the city's first electronic newspaper—thanks to the Journal. NEWSLINE is a 24-hour, all-text news service offered by Journal subsidiary Teltron Inc.'s Electronic Information Services division. NEWSLINE is carried on Channel 5 of RVS Cablevision systems; the Journal also plans to offer a 24-hour classified advertising channel via RVS come fall. Teltron Inc. was formed last year to manage the Journal Co.'s cable ventures and develop new opportunities.

In print, the company also owns four weeklies published by Trumbull Newspapers in Connecticut and in January, 1981, it acquired Add Inc., a small publishing company in Waupaca, Wis., that puts out six shoppers in Wisconsin, two in Montana, and *Choice* magazine, a controlled-circulation publication in Fort Collins, Colo., aimed at a more affluent reader.

Total circulation for all Add Inc. publications last year was 196,000.

MJE Corp., Midwestern Relay Co., Perry Printing, Waterloo, Wis.

Knapp Communications Corp.

Knapp Communications Corp., Los Angeles, is the country's 92nd largest media company with 1981 revenues from media operations of $64.5 million, all from consumer magazines, which provided 87% of Knapp's total revenues of $74.5 million.

The privately owned company expects total revenues of $103 million for the 1982 fiscal year ending next Jan. 31. In 1980, Knapp recorded media revenues of $44.9 million out of total revenues of $51.6 million. The 1980 media revenues were adjusted from estimates provided AA by Knapp prior to the company's closing of its books for the year.

Knapp has carefully positioned itself as a publisher that knows how to reach the upscale market. All of the company's properties, including *Architectural Digest, Bon Appetit, Geo* and its book publishing operations, as well as planned new ventures, are aimed at the well-heeled consumer.

That strategy is evident most recently in the launching of Knapp's version of *Geo* magazine, which it acquired for $5 million from German publisher Gruner & Jahr. The first *Geo* bearing the signature of Knapp and editor-in-chief Paige Rense appeared in April. The natural history, travel and photojournalism magazine has undergone a total redesign visually and a refocusing of editorial content to target it more accurately at affluent readers. *Geo* has a rate base of 200,000, and a subscription costs about $30.

Geo now is being promoted to advertisers in a package with *Bon Appetit* and *Architectural Digest*, two other Knapp properties with a combined circulation of about 2 million. This spring the company initiated both a direct mail circulation campaign and a trade advertising campaign for the new *Geo*.

In the works now at Knapp are two new publications aimed at the same affluent reader. *Collecting*, which was tested by direct mail earlier this year, is expected to make its debut next year.

Another project under discussion, though currently on the back burner, is a travel magazine with the tentative name entitled *Travel*. Knapp has entered the licensing business this year. In an arrangement with Oakland, Cal.-based Safeway Stores, the company has licensed the *Bon Appetit* name to a Safeway store in fashionable Tiburon, Cal. (Marin County).

In a test program, this store, which opened in February, will try to sell affluent Marin County consumers domestic and international specialty foods, wines and other products including tableware, cookware, aprons and books under the *Bon Appetit* label.

On the international front, Knapp will soon announce a French edition of *Architectural Digest* and is looking at South America and Japan for other editions to add to the Italian version that started last year.

The company also is eyeing electronic publishing, and has commissioned Communications Technology Management, McLean, Va., to explore cable tv versions of *Architectural Digest, Bon Appetit* and *Geo*.

Late last year Knapp was general partner in a partnership that acquired the 500,000-circulation *Home* magazine from International Thomson.

The publication has been integrated into the Knapp stable of magazines in that its publisher, Thomas Wolf, reports to Jack Decker, group publisher for Knapp. Editors, however, do not report to Knapp's editorial management, but at this time continue to function autonomously. The editorial focus, however, has been redirected under Knapp mandate, from a service orientation to more emphasis on redecorating and remodeling.

Executive changes this year have included the naming of T. Swift Lockard, publisher of *Geo* during the relaunch, vp-assistant to chairman Cleon (Bud) Knapp, and Harry Myers, formerly publisher of *Metropolitan Home*, publisher of *Geo*.

Combined 1981 advertising revenues of the Knapp magazines (excluding *Home*), were $26.5 million, up 39% from the previous year.

Knight-Ridder Newspapers

Knight-Ridder Newspapers, Miami, is the country's eighth largest media company, with 1981 revenues of $1.2 billion, 73% of which was derived from its newspaper properties.

Revenues from advertising and circulation in the newspaper sector were up over 11% to $1.1 billion. Total revenues were $1.24 billion.

The nonnewspaper revenue of this virtually pure media company came from its tv properties and financial newswires. KRN's Commodity News Services, in fact, turned out to be the company's fastest growing subsidiary, posting both record revenues and profits. Subscribers to CNS' various commodity and financial wire services topped 7,600 by year's end. KRN's 1981 net income exceeded $100 million, compared with net income of $93 million in 1980.

As the company sees it, 1981 was marked by a series of significant developments including: A strong move into the cable tv arena; the acquisition of a fourth vhf tv station; the decision to move its Viewtron experiment out of test into a full scale commercial operation, and gains in some of its most important newspaper markets, particularly Philadelphia and Detroit. In Miami, the *Herald* also produced another banner year.

John Shively Knight, company founder who had a long and distinguished career in journalism, died in 1981.

Knight-Ridder chairman Bernard Ridder Jr. resigned as chairman, but remained chairman of the executive committee. Alvah H. Chapman, 61, succeeded Mr. Ridder as chairman and continued as chief executive. Former senior vp James Batten, 46, became president. Mr. Batten comes from the news side of the business, but he also played a key role in development of KRN's videotex system, Viewtron.

One of the company's biggest 1981 ventures was a joint one with Tele-Communications Inc. Together the two formed TKR Cable Co. whose mandate is to buy, develop and operate cable tv systems.

Currently TKR is acquiring systems in northern New Jersey and the southern part of New York state, specifically in New York's Orange and Rockland counties. In the near term, TKR expects it will have over 100,000 subscribers by the end of 1982, with a five-year plan calling for 500,000 subscribers. Thus far, TKR systems range in channel capacity from 21 to 35, with franchises expiring from 1989 through 1994.

In other cable matters, KRN and Telecable Corp., a subsidiary of Landmark Communications, have formed a partnership with 20 Tampa residents to bid on the cable franchise in that city. A formal proposal had been submitted with the decision from town fathers expected shortly. In Long Beach, Cal., KRN has entered into a joint venture with Times Mirror Co. to construct a state-of-the-art cable system in the community.

On the broadcast side, KRN's major piece of business was the acquisition of tv station WTAR-TV, Richmond, Va. Subsequently its call letters were changed to WTKR-TV. Other KRN tv stations include WTEN-TV, Albany; WPRI-TV, Providence and WJRT-TV, Flint, Mich. Together these four stations generated $39 million in 1981 revenues, while operating profits soared almost 30%. In 1982, the company projects about a 12% gain in broadcast revenue.

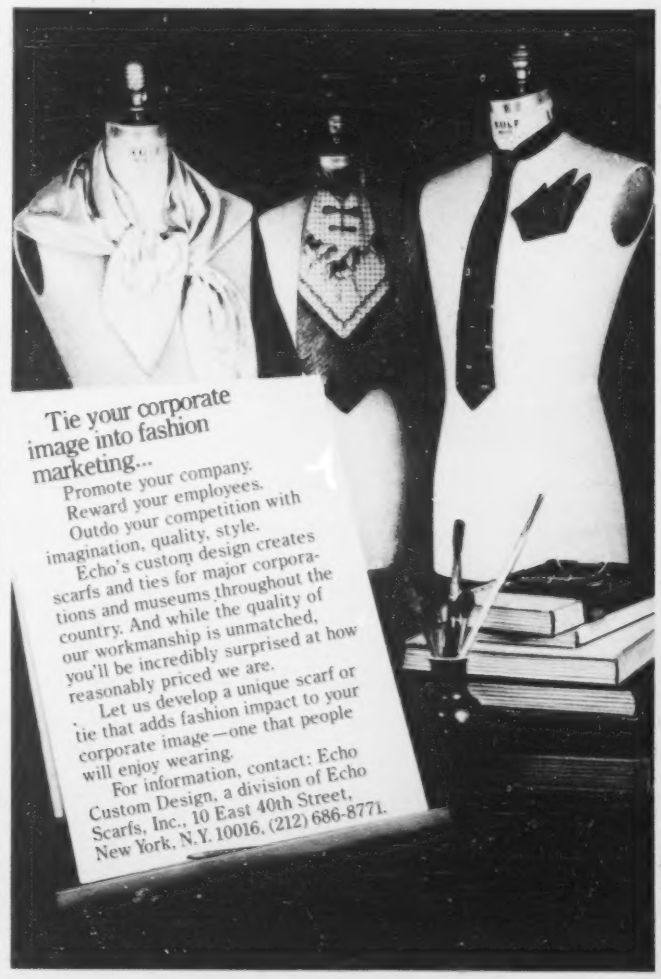
In 1981, KRN also took significant steps forward to establish its Viewtron videotex system as a national business.

From a local test begun in Coral Gables, Fla., in 1980, the system has moved ahead to the point that KRN is ready to introduce it as a full-fledged business operation in 1983. In cooperation with AT&T, KRN will bring Viewtron to 5,000 south Florida homes, and then via arrangements with Affiliated Publications, owner of the *Boston Globe*, and Capital Cities Communications, publisher of the *Kansas City Star/Times* and *Fort Worth Star-Telegram*, introduce Viewtron to those areas as well. For the 1983 market introduction, Viewtron's data base will be expanded from 18,000 pages of information to 75,000.

As KRN views it, advertisers, particularly banks and retailers, suggest they would strongly support the new videotex system, with its interactive nature lending itself to two-way banking and shopping. Moreover, KRN's research shows that those homes that participated in the test used the system from 30 to 60 times a day.

On the newspaper side, KRN made significant headway despite a faltering national economy. One reason was its successful REV UP 81 program, a concentrated program aimed at producing new advertising revenue through special selling opportunities. In 1981 it generated $16 million in additional ad revenues.

Another aid to the company, strong gains in circulation and advertising in Philadelphia,



Tie your corporate image into fashion marketing...
Promote your company.
Reward your employees.
Outdo your competition with imagination, quality, style.
Echo's custom design creates scarfs and ties for major corporations and museums throughout the country. And while the quality of our workmanship is unmatched, you'll be incredibly surprised at how reasonably priced we are.
Let us develop a unique scarf or tie that adds fashion impact to your corporate image—one that people will enjoy wearing.
For information, contact: Echo Custom Design, a division of Echo Scarfs, Inc., 10 East 40th Street, New York, N.Y. 10016. (212) 686-8771.

came at the expense, however, of the folding of another newspaper, this time the *Philadelphia Bulletin*. As owner of the *Philadelphia Inquirer* and the *Daily News*, KRN papers picked up the circulation and advertising that formerly went to its competitor. Meanwhile, in Detroit, the *Free Press* added an additional 14,000 in circulation for a total average of 619,000. Although it lost money in 1981, it is expected to lose considerably less in 1982.

The year 1981 also saw a continued expansion of KRN's supplement, "Business Monday." After a launch by the *Miami Herald* in late 1980, the Monday business news section has been introduced in a number of newspapers, the latest being the *Charlotte Observer* in early 1982.

LIN Broadcasting Corp.

LIN Broadcasting Corp., New York, is the country's 91st largest media company, with revenues of $66.2 million from media operations in 1981, or 93.2% of total revenues of $71 million.

Broadcast contributed net revenues of about $64 million, 75.1% of that from television and 24.9% from radio; the newly acquired GuestInformant brought in another $2.2 million in the short time LIN had it in 1981. LIN's other business—radio common carrier (paging systems)—contributed the remaining revenues.

About 80% of LIN's operating income before depreciation and corporate expense is from television, 13% from radio and 7% from radio common carrier and specialty publishing. Approximately 77% of LIN's earnings are derived in Texas, where it operates the NBC affiliates in Dallas/Fort Worth and Austin, am/fm stations and a radio common carrier company in Houston.

The company has ambitious plans for entering the cellular radiotelephone business, recently opened up for licensing by the Federal Communications Commission.

A new technology, cellular radiotelephone promises for the first time to provide adequate spectrum for mobile and portable telephones. According to Morris Berkowitz, LIN vp-secretary-treasurer, the company will file for such permits to cover New York, Los Angeles, Dallas/Fort Worth, Houston and Philadelphia.

In addition, LIN has filed a low-power tv application for the Dallas/Fort Worth market. The company regularly looks at available cable systems but as yet has not found a suitable entry into that business, Mr. Berkowitz said.

Expansion plans also call for the acquisition of specialty publishing properties. The company entered this business last October with the $8 million purchase of GuestInformant, a hard cover magazine that is placed in hotels in major cities. A quarter of its yearend revenues of $9.05 million was included in 1981 media revenues.

Television revenues and operating profits were up in 1981; revenues were ahead at all stations, although only the Texas stations had gains in operating profits. Of its four tv stations, three are NBC affiliates and one, WAND in the Decatur/Champaign/Springfield/Danville, Ill., area, is an ABC affiliate.

Radio revenues and operating profits were down substantially during 1981, but LIN expects format changes to country music in several markets to improve the stations' performances this year. LIN purchased Milwaukee radio stations WEMP (am) and WMXY (fm) for about $3.3 million in 1981. Its radio properties are all am/fm combos in top markets.

Broadcasting

TELEVISION: WAND, Decatur/Champaign/Springfield/Danville, Ill.; KTVV, Austin, and KXAS, Dallas/Fort Worth, Tex.; WAVY, Portsmouth/Norfolk/Newport News/Hampton, Va.

RADIO: WIL (am, fm), St. Louis; WBBF (am) and WMJQ (fm), Rochester, N.Y.; WFIL (am) and WUSL (fm), Philadelphia; KILT (am, fm), Houston; WEMP (am) and WMYX (fm), Milwaukee.

Landmark Communications

Landmark Communications, Norfolk, Va., is the country's 39th largest media company, with revenues of $200 million in 1981, all from media operations. The company had $182 million in revenues in 1980. It projects revenues of $225 million in 1982.

According to the privately held company, about 65% of its revenues are derived from newspapers, 10% from tv and radio and 25% from cable tv.

These percentage breakdowns did not change from 1981, even though cable tv revenues are increasing, because Landmark's community newspapers are also growing at a healthy clip, the company said.

Landmark executives consider cable an attractive new business opportunity for several reasons, including its supposed resistance to recession as evidenced by the growth in subscribers to its TeleCable systems.

Total subscribers now stand at 315,000 in 15 states following the acquisition this year of the Broward County, Fla., cable system, called TeleCable of Broward County.

This system for Margate, Coconut Creek, Parkland and other parts of Broward County now has 8,000 subscribers, according to company new-ventures analyst Bahnson Stanley.

He said the number of subscribers is expected to triple in coming months.

TeleCable's expansion efforts in the last six months have boosted Landmark from the 15th-largest operator to the 14th. All TeleCable systems will be equipped to carry at least 21 channels by the end of 1982 and each will offer at least three pay networks.

Last year, Landmark applied for, but did not win, a cable franchise in Scottsdale, Ariz. It expects a decision on its current bid for a franchise in Tampa, Fla., around the end of the year. The Tampa franchise would be a joint venture with Knight-Ridder Broadcasting.

Last year Landmark sold WTAR-TV, Norfolk, Va., CBS affiliate, to Knight-Ridder for $48.3 million, which will be used for additional cable system acquisitions.

Another cable development is Landmark's current construction of a system in Arlington, Tex.

On May 2, the company also got its much-heralded Weather Channel off the ground. Hugh M. Eaton Jr., Landmark's corporate vp-personnel, was named vp-general manager and treasurer of the Weather Channel.

One minute out of every five is devoted to local weather reports and forecasts with remaining minutes reserved for local commercials, commercials originating from the Weather Channel network, plus regional as well as national reports and forecasts.

The Weather Channel now has 4.2 million subscribers and a staff of 21 meteorologists, with "Good Morning America" meteorologist John Coleman providing 24-hour weather forecasts locally and nationally. In all, about 120 staffers have been added to work for the Weather Channel, which is part of Landmark's Broadcasting & Video Enterprises division.

It represents $20 million in start-up costs for the division and is expected to break even by 1985.

Landmark now is readying proposals for a number of other programing ideas, Mr. Stanley said.

In newspapers, Mr. Stanley noted that Landmark's greatest volume increases have come through community papers. The *Westminster Carroll County Times*, Maryland, was converted from a bi-weekly to a daily in the last year.

However, some of the company's metro papers have experienced difficulties in the last year, and one executive noted that the recession "has affected both newspaper and broadcasting revenues."

Lee Enterprises

Lee Enterprises, Davenport, Ia., is the country's 56th largest media company with media property revenues in 1981 of $149.8 million, or 98% of the company's total revenues of $153.1 million. Of the total media revenues, newspapers accounted for $110.7 million, or 72%, and broadcasting $39.1 million, or 26%.

Net income for the company in 1981 was $19.1 million, 26% more than in 1980. Total revenues were up 12% from 1980.

Lee Enterprises traces its history to the early 1890s, when A.W. Lee left New England to join his uncle's newspaper in Muscatine, Ia. From that single publication, Lee Enterprises media properties now include 18 papers dotting the Midwest and West, four tv stations—in Illinois, West Virginia, Oregon and Hawaii—and four am and fm radio stations in Illinois and Nebraska.

Lee also operates a two-channel cable tv service in Mason City, Ia.

In 1980, Lee Enterprises purchased the Lindsay-Schaub Newspapers for $64 million, borrowing $47 million to do it. Last year it sat back to digest that acquisition, the largest in its history, and enjoyed what was, according to Lloyd G. Schermer, Lee Enterprises president, one of the major accomplishments of the year—a balanced bank book.

Although no new properties were added in 1981, the search for new revenues continued just the same, just closer to home.

"The emphasis is on how to build revenue sources in Davenport," said Mr. Schermer. "We must change the attitude and skills within the company, develop new publications and new services."

Results of the entrepreneurial brainstorming in Davenport and other cities hosting company properties are varied, reflecting the markets served.

There is, for example, *TV Week*, one of three special interest magazines published by the *Muscatine* (Ia.) *Journal. TV Week*, which caters to cable tv subscribers, is sold by yearly subscription and can be bought on local newsstands.

Another new offering—distributed to all rural households in the seven counties of northern Iowa—is *RuraLife*, an offspring of the *Globe-Gazette* in Mason City, Ia. Last year, it doubled in size.

According to James Burgess, executive vp of the company, "Lee newspapers did a good job in a very tough year." He also mentioned that taking advantage of technological innovations was top priority.

Lee's joint ownership of NAPP Systems represents that philosophy. NAPP, owned jointly by Lee and Nippon Paint Co., Osaka, Japan, claims to be

the world's largest producer of photosensitive polymer printing plates for newspapers. In 1981, revenues for this graphic arts products operation was $2.8 million, up from $1.6 the year before.

Recent developments at NAPP include improved reproductive quality of plates, a new plate processor to make printing more cost-efficient and the completion of a $3 million plant to produce film and paper that can be processed without silver. After a $9 million expansion in late 1980, and the $3 million one in early 1981, NAPP was shaky economically early last year. But by yearend, operations had smoothed out, and by October, all debts had been paid off.

Technological improvements in the media properties include a computer system costing $6 million to $7 million so far, according to president Mr. Schermer. Started in 1973, the system is now on-line in seven cities, with two more to follow.

Mr. Schermer said the system will allow such sophisticated targeting of subscribers that subscribers weighing "over 200 lbs. in our market" could be segmented out, if that is what the advertiser needs. The next step, he said, will be the inclusion of nonsubscriber households so that advertisers may select either subscribers or nonsubscribers for inserts or direct-mail advertising, zoned according to route number, Zip code, or, eventually, census tract.

Taking some cues from prevailing squalls blowing through the industry, Lee Enterprises also has switched several of its papers to morning-only publication.

Another move, made to fight potential competition from two neighboring newspapers, has been to call on the services of a newspaper consultant to cure what supposedly ails the *Quad-City Times*, Lee's flagship paper in Davenport.

"You're good and you win all sorts of journalism awards, but what good are awards if people find you boring?" asked the consultant, Stuart H. Schwartz, assistant professor of journalism at Georgia State University who reportedly has suggested that the paper become a "sanitized version" of the *New York Post*.

The suggested changes are not viewed enthusiastically by Mr. Schermer, Lee Enterprises president. "I don't like what they are telling them to do," he said, "but they are running it, they do their own marketing. My taste might not be what this blue-collar market wants or needs."

Lee's future moves depend, in large part, on how successful the current administration is with its economic program. "We would be willing to buy [media properties] if it made sense to buy," he said, but he added that he is apprehensive about current inflated prices.

Lee has not yet acquired any cable tv properties, and Mr. Schermer admitted being cautious about cable. But "there is always that option," he said.

McCall Publishing Co.

McCall Publishing Co., New York, is the nation's 75th largest media company, with total net revenues estimated by Advertising Age of $97.2 million in 1981, all from *McCall's*, its special issues and *Working Mother*. *McCall's* brought in about 90% of total net revenues.

Revenues were restated by AA for 1981 to $93.2 million to reflect a net figure rather than gross revenues as supplied by the company for 1980. McCall Publishing reports gross revenues of $130 million for 1981.

A couple of decades ago, when Mom was more concerned with leaning over the back yard fence than with climbing the corporate ladder, American mothers were an easier target for advertisers. Daytime television, with its soap operas and game shows, was the perfect place for companies pitching their wares. Now, with the majority of young mothers in the working force, and with no end to that trend in sight, it's been harder for advertisers to get to this pivotal consumer.

Working Mother, with its format of food, fashion and "how-to" stories, was designed to meet the needs of the elusive American Mom—during her free time, which in these days, is sometimes both limited and unpredictable.

"The working mother is hard to reach and hard to find," noted Ray Eyes, president-publisher of McCall. "She's obviously gone all day."

Launched in 1979, *Working Mother* has already attracted a solid base of advertisers. About 79 of the 100 top advertisers in the country are showing up in the magazine, which has now gone monthly and is up to a circulation base of 400,000.

Working Mother is now breaking even, and will start turning a profit next year, the company said. McCall's believes that is a notable accomplishment in an economy that has not been kind to too many younger publications.

The soft economic climate has been harsher on *Working Mother's* older sister, *McCall's*, and on the entire category of women's service magazines. The housing slowdown has provoked a decline in the number of housing-related ads, for products like appliances, for instance. Mr. Eyes said, however, that the number of ad pages in *McCall's* this year will at least pull even with last year's figures. The package goods category, which continues to sell well, will help.

"Business is not bad, and not sensational," Mr. Eyes said.

Recently, *McCall's* raised the cost of its issues to $1.50. No advertising rate raises are currently in the works. *McCall's* circulation rate base remains at 6.2 million.

McCall Publishing doesn't plan any new projects for the balance of this year, Mr. Eyes said.

Magazines
McCall's, Working Mother.

McClatchy Newspapers

McClatchy Newspapers, Sacramento, Cal., is the country's 52nd largest media company, with 1981 revenues estimated by Advertising Age at $160 million, all from media operations. Last year's revenues were up 17% from estimated 1980 revenues of $136.8 million.

The family-owned and operated business is active in newspaper, radio, tv and cable.

McClatchy recently announced the sale of radio stations KOH (am) and KNEV (fm) in Reno, Nev., and KBEE-AM and FM in Modesto, Cal. Once the sale is approved by the Federal Communications Commission, McClatchy plans to concentrate on upgrading its remaining radio properties in Sacramento and Fresno, a company exec said.

Last January, McClatchy acquired WCPT-TV, an independent station in Crossville, Tenn., for $600,000. Official transfer of that station also awaits approval by the Federal Communications Commission. A cross-filing for ownership by a competing station in the market for ownership is adding to the delay. No new cable holdings were added to the McClatchy fold in the past year, but the company is entrenching itself in the cable field. Its four cable holdings continue to add subscribers, and communities are being wired for future subscription sales. Norcal Cablevision, McClatchy's only mature cable system, now serves 37,800 subscribers in three communities north of Sacramento.

Fresno Cable TV Ltd., though a young system, reaches 28,600 homes. Tel-Cab Communications Cable, which has been operating for more than a year in Reno, lists 1,300 subscribers. The fourth system, Sequoia Cablevision, was just activated in May, and is actively selling subscriptions to the residents of Visalia-Tulare.

The company has created a new subsidiary and a new position to consolidate McClatchy's growing cable efforts and show what the company has called "a commitment to cable." The new subsidiary is Pacific Cablevision, headed by Marvin Dilbeck, recently appointed cable director and president, Pacific Cablevision. Mr. Dilbeck had worked for McClatchy's Fresno Cable TV Ltd.
